Made in USA Policy Comment

Dear Sir,

My Family and friends are appalled at the proposed change in policy regarding the "Made in the USA" label. Contrary to what this administration believes, most Americans care a great deal about whether products are made in this country. It is becoming more and more difficult to find clothing, electronics, appliances and other items with the 'Made in the USA' label.

Just for the record, I am a registered Democrat. I, and most of the people I know, are very much concerned and troubled with the changes taking place in our country - from dumbing down citizenship requirements to this proposed misleading and dishonest labeling of products.

Yours truly,

  
Joan D. Torres
