**INSTRUCTIONS FOR NRC FORM 396
CERTIFICATION OF MEDICAL EXAMINATION BY FACILITY LICENSEE**

Enter **NAME OF APPLICANT**, as it appears on NRC Form 398, and the applicant's **DOCKET NUMBER**.

Enter name of **FACILITY(IES)** and **FACILITY DOCKET NUMBER(S)** for which a license is sought as it (they) appear(s) on NRC Form 398.

Enter the **PRINTED NAME (of physician)** and other medical professionals (e.g., nurse practitioners and physician's assistants) who performed the physical examination. The examining physician may delegate portions of the examination to a licensed nurse practitioner or a licensed physician's assistant who is familiar with the applicable ANSI standard and the activities required of a nuclear power plant operator or senior operator. However, the physician has the ultimate responsibility for certifying that the medical examination was conducted in accordance with the ANSI standard and that the applicant meets the medical requirements. The **STATE AND LICENSE NUMBER(S)** of all the medical practitioners significantly involved with the examination (i.e., not laboratory technicians) should be entered on NRC Form 396.

Enter the **DATE** of the applicant's **MOST RECENT BIENNIAL MEDICAL EXAMINATION**. For new license applicants (i.e., ROs and instant SROs), the medical data in support of NRC Form 396 are normally good for six months from the date of the medical examination. If more than 6 months have passed since the date of the medical examination, the facility licensee shall certify in writing that the applicant has not developed any physical or mental condition that would be reportable under 10 CFR 55.25; this should be done in Item 17, "Comments," of the associated license application (NRC Form 398). If the applicant's medical condition has changed or the time since the applicant's last medical examination is expected to exceed 24 months before the licensing action is completed, the applicant must be reexamined by a physician.

Check (or specify) which **GUIDANCE** document was **USED** to determine that the applicant's physical condition and general health are such that the applicant would not be expected to cause operational errors endangering public health and safety. Use the numbered blocks to identify any and all license restrictions, changes, or waivers (exceptions) that might be necessary.

Check **1. NO RESTRICTIONS** if, in the physician's judgment, the applicant's medical condition and general health will not adversely affect the performance of assigned operator job duties or cause operational errors endangering public health and safety (i.e., the applicant satisfies, without exception, all the criteria specified in the applicable ANSI standard).

Check **2. CORRECTIVE LENSES MUST BE WORN WHEN PERFORMING LICENSED DUTIES** if the applicant must wear corrective lenses in order to achieve the near and distant visual acuity specified in the applicable ANSI standard.

Check **3. HEARING AID MUST BE WORN WHEN PERFORMING LICENSED DUTIES** if the applicant must wear a hearing aid in order to achieve the audiometric scores specified in the applicable ANSI standard.

Check **4. SOLO OPERATION IS NOT AUTHORIZED** if another individual must be present (as specified in Section C.3.c of ES-605 of NUREG-1021) when the applicant performs licensed duties.

Check **5. MUST TAKE MEDICATION AS PRESCRIBED TO MAINTAIN MEDICAL QUALIFICATIONS** if the applicant's medical qualification per the applicable ANSI standard is contingent on taking a prescription medication.

Check **6. MUST SUBMIT MEDICAL STATUS REPORT EVERY 3, 6, or 12 MONTHS** if the applicant's medical condition requires more frequent monitoring (than every 2-years) to ensure compliance with the applicable ANSI standard.

Check **7. MUST NOT PERFORM LICENSED DUTIES REQUIRING A RESPIRATOR** if the applicant suffers from a respiratory condition that would preclude the wearing of a respirator.

Check **8. OTHER RESTRICTION OR EXCEPTION** if, in the physician's judgment, any other license condition is necessary to accommodate any identified medical or psychological situation that does not meet the minimum requirements in the applicable ANSI standard. Fill out the **PROPOSED WORDING OF OTHER RESTRICTION** block, briefly explain how the recommended restriction will correct or accommodate the disqualifying condition in the **RELATIONSHIP OF RESTRICTION TO DISQUALIFYING CONDITION** block, and attach the supporting medical evidence for review by the NRC. If an applicant fails to meet a medical requirement but can demonstrate complete capacity to perform assigned duties, as proven by a practical test administered by the physician, the physician may recommend, and similarly justify, a waiver (exception) of that portion of the applicable ANSI standard. In all cases, check Item 4.f.4 on the associated license application (NRC Form 398).

Check **9. RESTRICTION CHANGE FROM PREVIOUS SUBMITTAL** if the physician recommends the modification or deletion of an existing restriction. Include an **EXPLANATION FOR RESTRICTION CHANGE** in the space provided.

Check **10. INFORMATION ONLY** if the form is being used simply to forward updated medical information (e.g., a 6-month blood pressure report required by an operator's license condition) to the NRC for evaluation. Be sure to attach supporting information, if necessary.
