RULE 2202

TECHNICAL ASSISTANCE

- PURPOSE:** To assist employers in learning about options available under Rule 2202 that may be more cost effective and practical for your facility.
- HOW:** A staff member will analyze your facility's potential cost to implement various options under Rule 2202.
- WHY:** To help employers determine which compliance options can benefit the company and save money while at the same time help clean the air in our community.
- WHERE:** A member of AQMD's Technical Assistance will gladly sit down with your employer representatives to present options in detail. The AQMD Diamond Bar headquarters has conference areas that will allow for one-on-one visits and small group meetings. Large groups can meet together if scheduled in advance. The Technical Assistance person can also visit worksites when staff resources permit.
- WHEN:** At the convenience of employers. By making an assistance appointment early, employers can determine which option(s) are best for their worksites before the Rule 2202 Registration form is due to the AQMD.
- WHO:** Listed on the other side are AQMD contacts for technical assistance and/or appointments.
