Tilt-Roll-Back / Tilt-Roll-Off Truck	60,000	400	1450	7/1/2006	12/31/2006

Footnotes

- 1 This list identifies types of vehicles that are known to be unavailable in an alternative fuel platform today. This list is to be used in conjunction with Section 7A of the Rule 1196 TCR form. Horsepower and torque specifications in this table must be used to determine vehicle eligibility under Section 7A of the TCR form. Section 7A does not require documented responses to bid solicitations. If either the HP or torque specification for the vehicle under consideration equals or exceeds the corresponding value in this table according to vehicle type, a TCR may be submitted for the vehicle under Section 7A. (Exception -- see footnote 3.) Based on existing fleet, AQMD staff may require additional information to verify vehicle or engine specification requirements on a case-by-case basis.
- 2 Expiration Date is set at six months subsequent to the initial inclusion of vehicle type on the list, and may be renewed for inclusion on this list for an additional six month period based on AQMD staff analysis for model availability. TCR applicants are encouraged to call AQMD staff for renewal status of specific vehicle types.
