## I. Introduction to PEDRO

### Overview

Thank you for selecting the Energy Information Administration (EIA) PC Electronic Data Reporting Option (PEDRO). We hope that this option will significantly reduce your reporting burden and facilitate your submission of data to EIA.

The PEDRO User's Guide has been developed as an informational tool for a manager to become acquainted with the system or as a reference tool for the PEDRO user.

The User's Guide introduces you to Version 6.2 of PEDRO, and some of its basic functions and features. It includes hardware and software requirements, a detailed set of instructions for installing and running PEDRO on your PC, procedures for setting up to transmit data to EIA, and instructions for removing PEDRO from your PC. The appendix provides survey-specific information including import file formats, cell labels, product codes, sample import files, and edit checks.

PEDRO is available at no cost to the user. Formal training is not required since installation, data importation, data processing, and transmission are done by interactive, user-friendly menu options.

### The PEDRO System

The PC Electronic Data Reporting Option, or PEDRO, system enables users to enter Energy Information Administration (EIA) survey form data on a personal computer (PC) using interactive data entry screens and validate the accuracy of the data through an electronic data editing process. A communication program included as part of the system transfers the data to EIA and verifies the accuracy of the transmission. PEDRO currently supports data collection for the following EIA surveys:

- o EIA-14 Refiners' Monthly Cost Report
- o EIA-182 Domestic Crude Oil First Purchase Report
- o EIA-782A Refiners'/Gas Plant Operators' Monthly Petroleum Product Sales Report
- o EIA-782B Resellers'/Retailers' Monthly Petroleum Product Sales Report
- o EIA-782C Monthly Report of Prime Supplier Sales of Petroleum Products Sold for Local Consumption
- o EIA-800 Weekly Refinery Report
- o EIA-801 Weekly Bulk Terminal Report
- o EIA-802 Weekly Product Pipeline Report
- o EIA-803 Weekly Crude Oil Stocks Report
- o EIA-804 Weekly Imports Report
- o EIA-805 Weekly Terminal Blenders Report
- o EIA-810 Monthly Refinery Report
- o EIA-811 Monthly Bulk Terminal Report

- o EIA-812 Monthly Product Pipeline Report
- o EIA-813 Monthly Crude Oil Report
- o EIA-814 Monthly Imports Report
- o EIA-815 Monthly Terminal Blenders Report
- o EIA-816 Monthly Natural Gas Liquids Report
- o EIA-817 Monthly Tanker and Barge Movement Report
- o EIA-819 Oxygenate Telephone Report

This Graphical User Interface (GUI) version of PEDRO has been developed by EIA's Office of Oil and Gas (OOG). This system will feed respondent-level data from the weekly Forms EIA-800 through EIA-805, and the monthly Forms EIA-14, EIA-182, EIA-782A, EIA-782B, EIA-782C, EIA-810 through EIA-817 and EIA-819. The different edit checks for each survey are included as Appendix A, titled "Edit Checks."

For specific information on PEDRO procedures, commands and system functions which are common to all EIA surveys, see section five, "Running the PEDRO System." For information on the particular survey with which you are currently working, refer to the section describing that specific survey. Survey-specific sections begin following the "Running the PEDRO System" section of this manual.

Should you have any questions or concerns, please contact the Electronic Data Support Staff on (202) 586-9659. American Petroleum Institute contact is Mike Robey at (202) 682-8365.

#### PEDRO Patches

Occasionally, updates to the PEDRO software are required that are not significant enough to justify a complete recreation and mailout of the software for every user. Instead, a "patch" is developed. A patch is a bundled file (or files) that is sent out to PEDRO users to update the system without completely replacing or reinstalling PEDRO. A list of all PEDRO patches created and distributed between February of 2004 and early March of 2005 is included as a short appendix to this User's Guide (see Appendix B, "PEDRO Patches").

## II. Hardware / Software Requirements

Check to make sure you have the necessary hardware and software before you begin installing PEDRO. The following is a list of required items.

- Windows-based personal computer (PC)
- Windows 2000 or higher (NT, 2000, or XP)
- CD-ROM drive and the CD containing the PEDRO 6.2 system software
- Approximately 30 Mb of free disk space for the PEDRO system files, plus up to 10 Mb for each survey
- Internet Service Provider (ISP) with appropriate link or modem

### III. How to Set Up the PEDRO Software

#### Installing PEDRO

**IMPORTANT NOTE:** If you have a previous version of PEDRO (6.1, for instance) on your PC, you can perform an upgrade when installing the new PEDRO, version 6.2. This will save any data you may wish to retain from the previous version.

If you have PEDRO 6.1 or earlier installed on a PC and you wish to install PEDRO 6.2 to a different PC, while still retaining the PEDRO data from the old PC, you must copy all files from the old PC's PEDRO/DATA directory to the new PC prior to installation of PEDRO 6.2. Be sure to create a directory on your C:\ drive named PEDRO/DATA in which to copy the six .DB files, so the new version will find them during installation. Be sure to select "Upgrade" during installation, in order to retain this copied data. Selecting "Upgrade" will also retain your previous PEDRO Communications settings as well.

To install the new 6.2 version of PEDRO:

- 1) Insert the EIA-provided PEDRO CD. If the "InstallShield Wizard" box appears, skip to step 4; if it does not, go to step 2.
- 2) Click the Windows Start button; then click Run. In the Windows RUN command line, type:  
  
D:\setup  
  
[Where D is the drive letter for your CD ROM; yours may differ (i.e., E or F)]
- 3) Click the OK button.
- 4) The "InstallShield Wizard" box is displayed. Click the Next button to proceed.
- 5) On the "Customer Information" screen, type your name in the "User Name" field and your company's name in the "Company Name" field, then click the Next button.
- 6) On the "Setup Type" screen, you now have the option to download the entire system or, if you prefer, you can choose to load only spreadsheet and/or PDF versions of all of the forms included within PEDRO. Instructions for each survey can also be loaded. Choose "New Installation" if you wish to enter your data electronically using PEDRO and if you DO NOT have an older version of PEDRO on your PC -- select "Upgrade Installation" if you DO have an older version of PEDRO and wish to retain any data you've entered using the older version.

Upgrade/New Installation Notes:

- If you currently have an older version of PEDRO, but DO NOT wish to retain your old data, select "New Installation."
- If you select either New or Upgrade, all of the spreadsheets, PDFs, and Instructions will be downloaded to the C:\pedro folder on your PC.
- If you do NOT wish to enter your data electronically and simply want electronic versions of each form to complete without using PEDRO, select the "Survey Form in PDF Format" and/or "Survey Form in Spreadsheet Format" from this "Setup Type" screen.
- If you currently have PEDRO 6.1 and wish to retain your data, select "Upgrade Installation."

Click the Next button after selecting the desired type of installation.

- 7) The "Choose Destination Location" box is displayed. By default, PEDRO will be installed to the C:\PEDRO directory. However, if you wish to install it elsewhere, click the Browse button and select the desired drive/folder in which you'd like to install PEDRO. Click OK. Click the Next button on the "Choose Destination Location" box.
- 8) The "Start Copying Files" screen is displayed. Click the Next button to begin the installation.
- 9) A progress bar is displayed, indicating the status of the installation. When finished, click the Finish button.
- 10) To run PEDRO, click the Windows Start button. Then click Programs, and select EIA Applications from the list of programs. On the fly-out "EIA Applications" menu, select PEDRO 6.2. PEDRO will open on your PC.

NOTE: If you selected "Upgrade Installation" during the installation process, an "Updating System" box is displayed. This will update the PEDRO files on your PC. Depending on the speed of your PC, this process could take up to five minutes. Be sure to let the process run to its completion, otherwise you could corrupt the new system and/or lose your previous data!

#### Uninstalling PEDRO

**IMPORTANT NOTE:** Performing an uninstall of PEDRO will delete all data files you may have entered! If you are uninstalling PEDRO on an old PC and planning to install the new version of PEDRO on a new PC, remember to copy the data files from the old PC to the new PC prior to performing any uninstall! See the "Important Note" in the previous section ("Installing PEDRO") for details on copying data files from one PC to another.

If, for whatever reason, you wish to remove the older version of PEDRO from your hard drive (rather than perform an upgrade) before installing PEDRO 6.2, follow these steps:

Click the Windows Start button, then click Settings. From the Settings menu, click Control Panel. In Control Panel, click Add/Remove Programs. The Add/Remove Programs Properties box is displayed. A list of all programs installed on your PC is shown in the bottom half of this box; select "PEDRO - PC Electronic Data Reporting Option" (or similar wording of any PEDRO software), then click the Add/Remove button at the bottom of the box. Follow the prompts to uninstall PEDRO, then proceed to install the new version of PEDRO.

## IV. Overview of the PEDRO Reporting Process

This section provides a brief overview of the complete PEDRO reporting process. For a more detailed description of these procedures, see section five, "Running the PEDRO System."

- 1) First, install the PEDRO 6.2 system, as described in the previous section.
- 2) To run the PEDRO system, click the Start button on your Windows desktop. Then click Programs, and select EIA Applications from the list of programs. On the fly-out "EIA Applications" menu, select PEDRO 6.2. PEDRO will open on your PC.
- 3) From the PEDRO Introduction Screen, select the survey for which you wish to enter data from the list of surveys displayed on the left side of the screen. Click the Continue button.
- 4) The selected survey is displayed. By default, the "Open Respondent" box is displayed. Select the respondent and period you wish to edit, then click the Open button. If you wish to add a new respondent or period, click the Add Respondent and/or Add Period buttons on the "Open Respondent" box. Type in new Respondent Name and ID(s) numbers, or the new period you wish to add, and click the Add button.
- 5) After selecting the desired respondent and period, the main data entry screen for the selected survey is displayed. It uses the "tabbed notebook" format -- click the tabs along the top of the screen to select which data you wish to view and/or edit. The tabs display the following options on each survey:

Identification tab: Enter the respondent's name and address information in the appropriate fields.

Select State tab: This tab is displayed only on the EIA-782A, B & C surveys, on which you enter State Level data. The Select State tab allows you to enter numerous separate data entries for different States.

Data entry tabs: There will be one or more "data entry" tabs, depending on which survey is running. For example, the EIA-14 survey only has one data entry tab ("Crude Oil Costs and Volumes"); but the EIA-810 has three such tabs ("Refinery Inputs," "Sulfur Content...", and "Refinery Operations"). Click the appropriate tab and type in your data in the data entry fields.

Errors and Warnings tab: This tab's screen displays a list of error/warning messages, and allows you to rerun the system edit checks by clicking the Refresh Edits button. Note that you must run the Validate Data option OR click the Refresh Edits to view the list of errors/warnings. PEDRO does not run the edit checks simply by clicking the "Errors and Warnings" tab.

- 6) After you have entered all of the data, to the best of your knowledge, for the respondent you selected, it is recommended that you run the PEDRO edit checks prior to submitting any data. To do so, either click the Utility / Validate Data option from the upper menu bar, or click the Validate Data button (displayed as a check mark in the button toolbar). Either option runs the system edits, and a "Data Validation Error" box is displayed, in which you can run through potential errors discovered by the system.

You can also run system edit checks by clicking the "Errors and Warnings" tab, and then click the Refresh Edits button at the bottom of the screen. If you use this option, the "Data Validation Error" box is not displayed; instead, a list of all possible errors is displayed on the "Errors and Warnings" tab screen, which you can then scroll through or print. Edit checks for each system are described in Appendix A, "Edit Checks."

- 7) After running system edits, and cleaning up any errors (or explaining them with a "Comment"), you then submit your data to EIA. This is done using the PEDRO Communications module. Click the Utility / Create a Transmission File option from the upper menu bar, or click the Create Transmission button (displayed as a lightning bolt on the button toolbar). Either option will display a box showing your Submission Parameters, which can be updated as necessary. Click the Continue button to proceed with the transaction file creation.
- 8) Click Yes to open the PEDRO Communications Module. Your name and phone number will be displayed in the "Logon" box. Make any necessary corrections.
- 9) Your newly-created transmission file should be identified in the list displayed under the "Files to Send" tab when PEDRO Communications opens. Highlight the file you wish to send to EIA (it should have ok in the "Status" field), then Click the File / Transmit option from the upper menu bar, or click the Transmit button (displayed as a lightning bolt on the button toolbar). Either option will send your selected data file off to EIA. NOTE: You must first be sure that you are connected to EIA, either by LAN, Internet, etc. See Part VII, "The PEDRO Communications Module," for details on setting up a LAN or Internet connection.
- 10) Follow these steps for each respondent in each survey for which you are responsible. For a detailed look at this process, including some features not mentioned in this overview, see the "Running the PEDRO System" (section five) of this document that follows.

## V. Running the PEDRO System

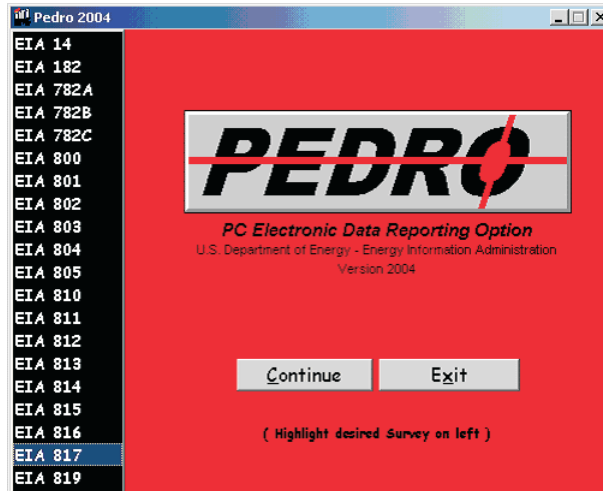

In this version of PEDRO, all Surveys run more similarly than in prior versions of PEDRO. This section provides specific information on PEDRO procedures, commands and system functions which are common to each of the surveys. For information on the particular survey with which you are currently working, refer to the section describing that specific survey. Survey-specific sections begin following this "Running the PEDRO System" section of this manual.

The surveys are as follows:

- o EIA-14 Refiners' Monthly Cost Report
- o EIA-182 Domestic Crude Oil First Purchase Report
- o EIA-782A Refiners'/Gas Plant Operators' Monthly Petroleum Product Sales Report
- o EIA-782B Resellers'/Retailers' Monthly Petroleum Product Sales Report
- o EIA-782C Monthly Report of Prime Supplier Sales of Petroleum Products Sold for Local Consumption
- o EIA-800 Weekly Refinery Report
- o EIA-801 Weekly Bulk Terminal Report
- o EIA-802 Weekly Product Pipeline Report
- o EIA-803 Weekly Crude Oil Stocks Report
- o EIA-804 Weekly Imports Report
- o EIA-805 Weekly Terminal Blenders Report
- o EIA-810 Monthly Refinery Report
- o EIA-811 Monthly Bulk Terminal Report
- o EIA-812 Monthly Product Pipeline Report
- o EIA-813 Monthly Crude Oil Report
- o EIA-814 Monthly Imports Report
- o EIA-815 Monthly Terminal Blenders Report
- o EIA-816 Monthly Natural Gas Liquids Report
- o EIA-817 Monthly Tanker and Barge Movement Report
- o EIA-819 Oxygenate Telephone Report

## Opening a Survey

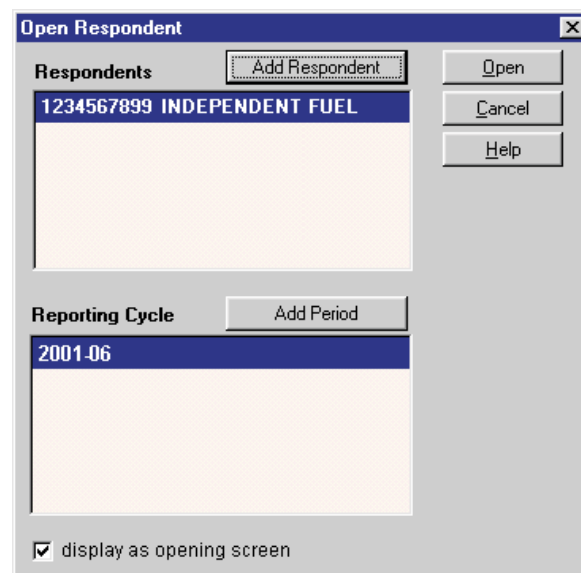

To open a desired survey in PEDRO, click the PEDRO icon on your Windows desktop. The following screen is displayed:

PEDRO Introduction Screen

Select the desired survey from the menu along the left side of the screen, then click the Continue button.

The “Open Respondent” box for the selected survey is displayed. The EIA-782B is shown below as an example:

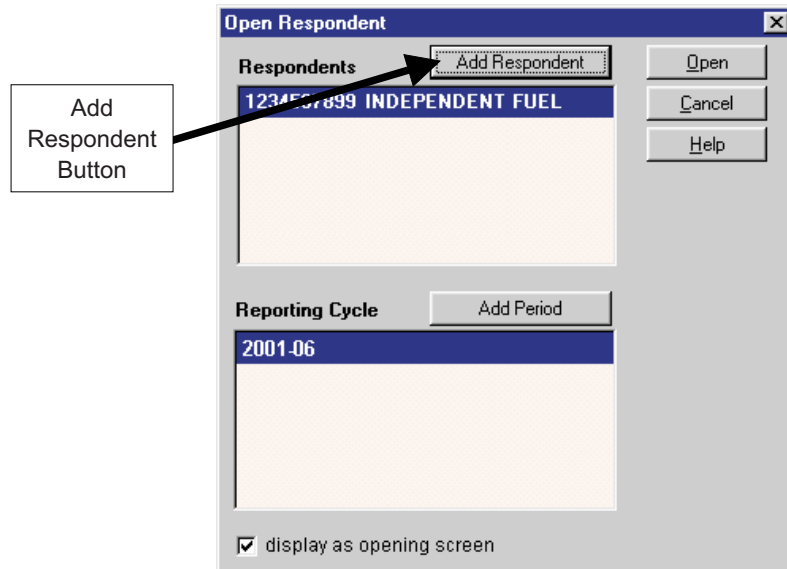

Open Respondent Box (sample from EIA-782B)

The user can select a respondent and a period for editing, or add a respondent and/or a period from this screen. If more than one respondent cycle is available, the most recent cycle will be highlighted as the default. You may skip this step if you wish to import survey data. For more information about file importation, see section six, “Import Data.”

NOTE: If you do not wish to view this screen when you initially open the selected survey, un-click the check box at the bottom of the “Open Respondent” box (“display as opening screen”).

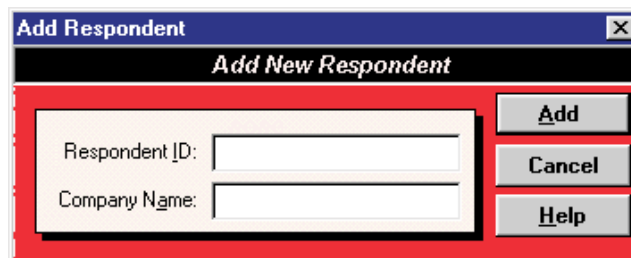

1) Add Respondent

If you wish to add a new respondent to the desired survey, click the Add Respondent button on the "Open Respondent" box, as shown below:

Add Respondent Button (sample from EIA-782B)

The following Add New Respondent screen is displayed:

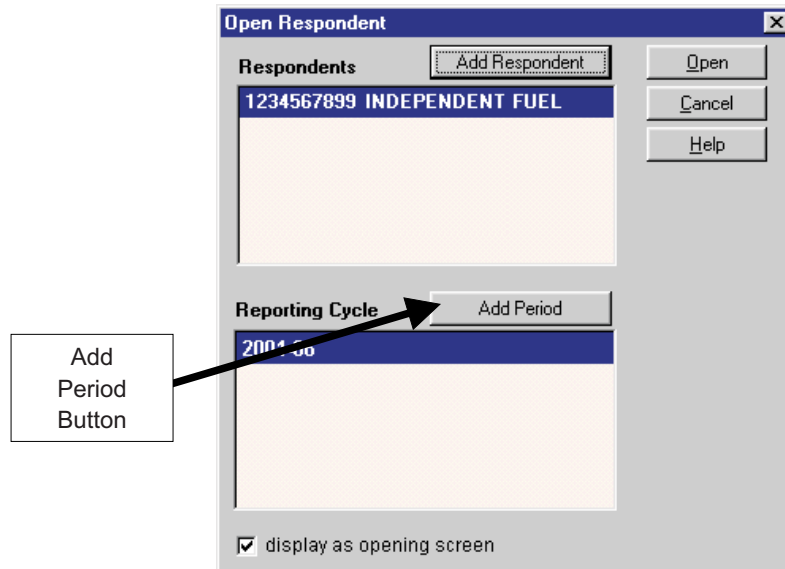

Add New Respondent box (sample from EIA-782B)

Type in the 10-digit ID number of the company you wish to add, then press the Tab key to move to the "Company Name" box and type in the new company's name. If you do not know your EIA respondent ID number, contact the Electronic Data Support Staff on (202) 586-9659. Click the Add button to add the new company to the survey database. The "Open Respondent" box is re-displayed, and the just-added company will appear in the list of respondents.

NOTE: On some surveys, one or two additional fields are displayed on the Add Respondent screen for entering "Plant Name" and "API ID Number." Enter these when applicable. If you do not know your API identification number, contact Mike Robey at (202) 682-8365.

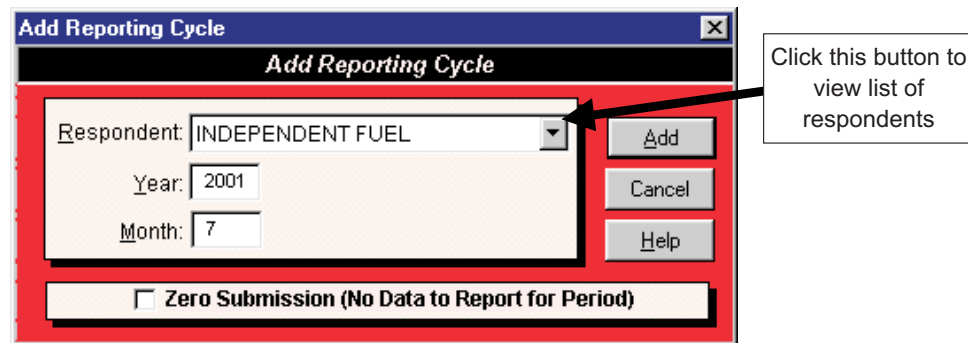

## 2) Add Period

If you wish to add a new period (a new month, for the EIA-14, EIA-182, and EIA-782 A, B, and C surveys), click the Add Period button on the "Open Respondent" box, as shown below:

Add Period Button (sample from EIA-782B)

The following Add Reporting Cycle screen is displayed:

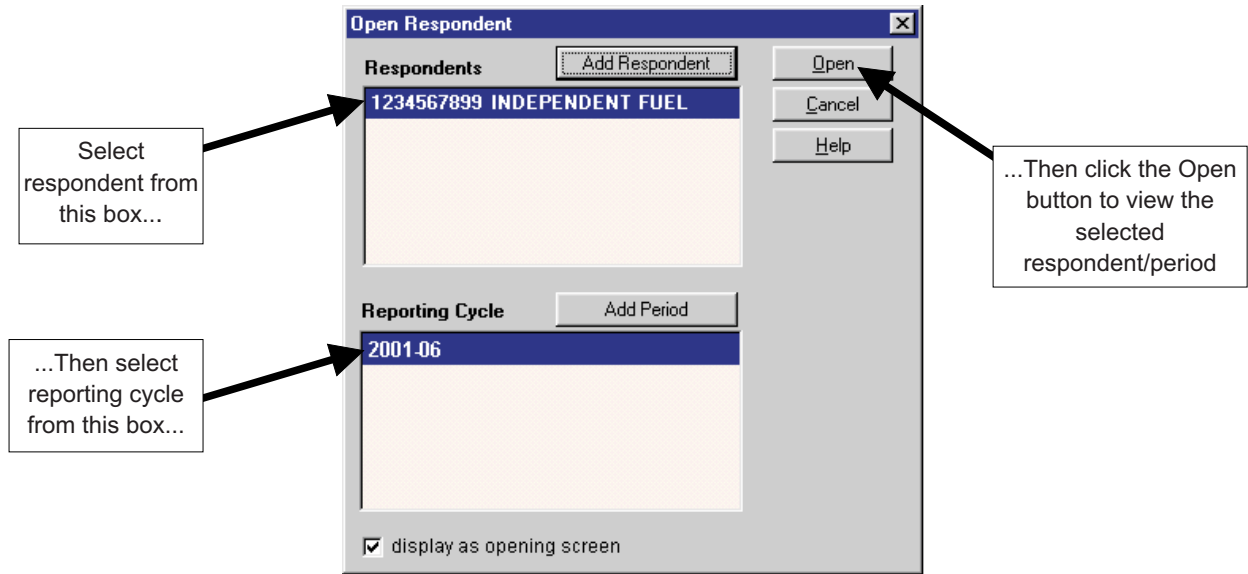

Add Reporting Cycle box (sample from EIA-782B)

Click arrow (as indicated above) to select the company's name (for which you wish to add the new period) from the drop-down list in the "Respondent" box. You may also select "All Respondents" (of the displayed survey) if you wish to add this new period for every company currently entered in PEDRO for this survey. Press the Tab key to move to the "Year" box, and type in the year, then the month, of the new reporting cycle. Click the "Zero Submission" check box at the bottom of the box only if there will be no data entered for this new period. Then click the Add button to add the new period to the survey database. The "Open Respondent" box is re-displayed, and the just-added period will appear beneath the list of respondents.

NOTE: The Weekly surveys (EIA-800 through EIA-805) include a box for "Day." Enter the end date of the Reporting Cycle to be added (this date should always be a Friday).

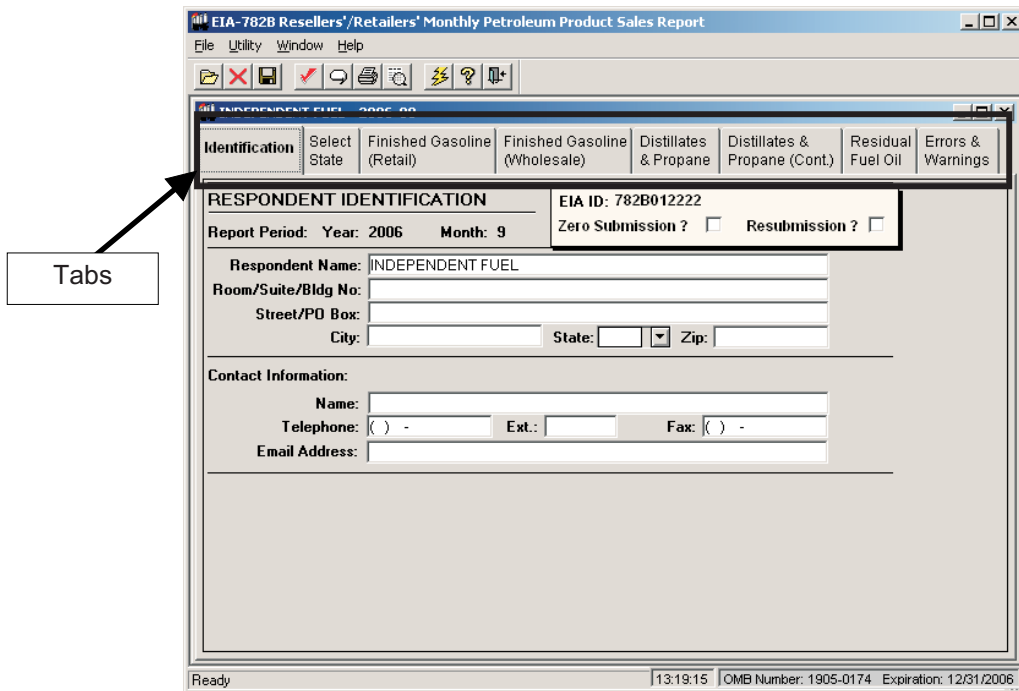

3) Select a Respondent

After you have added the desired company and/or period as necessary, select the company you wish to edit or view from the "Open Respondent" box, as shown below:

Select Respondent/Period (sample from EIA-782B)

The following PEDRO Main screen is displayed:

PEDRO Main Screen (sample from EIA-782B)

Note that the tabs on this screen (shown above) will differ significantly in appearance from survey to survey. However, general functionality is the same except where noted. The following survey-specific sections display the Main Screen and provide additional details for each PEDRO survey system.

## Survey-Specific Screens and Procedures

This section contains descriptions and procedures for entering data in each of the PEDRO survey systems, along with detailed screen captures for each individual survey. The data entry screens are set up using the “tabbed notebook” method; clicking a labeled tab along the top portion of the screen will display that data entry screen. The tabbed screens into which data are entered differ from survey to survey. However, the first and last tabs are the same for every survey:

The first tab is Identification. Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable. Note that while the Identification tab screens are nearly identical for all surveys, there are exceptions: For example, the EIA-810 ID screen contains a field for entering “Refinery/Blending Plant Name” (which is not found in other surveys).

The final tab is Errors and Warnings. This screen’s functionality is the same for each survey throughout PEDRO. This tab is used to run edit checks for the survey data you’ve entered. See the “Validate Data” section of this manual for detailed instructions for viewing errors and warnings.

The data entry tabs that appear between the Identification and Errors and Warnings tabs are described in the remainder of this section.

## EIA-14 Data Entry Screens

**EIA-14 Refiners' Monthly Cost Report**

ZENITH GAS - 2007-01

Identification | Crude Oil Costs and Volumes (Domestic) | Crude Oil Costs and Volumes (Imported) | Errors and Warnings

**RESPONDENT IDENTIFICATION**

EIA ID: 1465488885  
 Zero Submission ?  Resubmission ?

Report Period: Year: 2007 Month: 1

Respondent Name: ZENITH GAS

Room/Suite/Bldg No:

Street/PO Box:

City:  State:  Zip:

**Contact Information:**

Name:

Telephone: ( ) -  Ext.:  Fax: ( ) -

Email Address:

Ready | 13:21:12 | OMB Number: 1905-0174 | Expiration: 12/31/2006

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

**EIA-14 Refiners' Monthly Cost Report**

ZENITH GAS - 2007-01

Identification | **Crude Oil Costs and Volumes (Domestic)** | Crude Oil Costs and Volumes (Imported) | Errors and Warnings

Category Description	Line No.	Domestic Crude Oil	
		Total Cost (in thousands of dollars)	Total Volume (in thousands of barrels)
		(a)	(b)
PADD I	1		
PADD II	3		
PADD III	5		
PADD IV	7		
PADD V	9		
OTHER	12		
TOTAL U.S.	15		

Ready | 13:21:34 | OMB Number: 1905-0174 | Expiration: 12/31/2006

Crude Oil Costs and Volumes Tab Screen: This screen is for Domestic data only. Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. For example, entries in the “Total Cost” field must be less than \$10,000. Also, entries in the Total Volume Field must be less than 1,000,000.

Crude Oil Costs and Volumes (Imported) Tab Screen: This screen is for Imported data only. Otherwise its appearance, functionality and data checks are the same as the tab screen displayed and described above.

## EIA-182 Data Entry Screens

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

Line No. (a)	State/Production Area (b)	Average Cost (c)	Total Volume (d)
	<b>ALABAMA</b>		
3	Alabama Light		
4	Alabama Heavy		
5	Alabama Other		
	<b>ALASKA NORTH SLOPE</b>		
6	ANS		
	<b>ALASKA SOUTH</b>		
7	ALASKA SOUTH		
	<b>ARIZONA</b>		
8	AZ Miscellaneous		
	<b>ARKANSAS</b>		
9	AR Miscellaneous		
	<b>CALIFORNIA: MAINLAND</b>		
10	Belridge South		
73	Coalinga		
74	Cymric		

Domestic Crude Oil First Purchases Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the “Average Cost” field must be less than \$100.00.

## EIA-782A Data Entry Screens

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

Select State Tab Screen: In the 782A survey, you must first select the State for which you wish to enter data. Click on the button containing the desired State's abbreviation. If this is a new State for this company, a confirmation box is displayed; click Yes to add the new state. Once a State is added, its abbreviation on this screen appears underlined and bolded. Click on the desired State and its full name will appear in the “Current State” box, as shown above. Click the radio button in the lower portion of the screen next to the term that best describes the selected firm, as shown above.

To remove a State from this firm, click on its abbreviation (so that the State name appears in the Current State box), then click the Remove Current State button (to the right of the “Current State” box).

## PC Electronic Data Reporting Option (PEDRO) System User's Guide

RETAIL SALES (Direct Sales to End-Users)					
California					
Product (Refer to definitions)	Product Code	Sales Through Company-Operated Retail Outlets (1)		Sales To Other End-Users (2)	
		Volume (000s)	Price	Volume (000s)	Price
Reformulated Regular Motor Gasoline	153				
Reformulated Midgrade Motor Gasoline	154				
Reformulated Premium Motor Gasoline	155				
Conventional Regular Motor Gasoline	159				
Conventional Midgrade Motor Gasoline	160				
Conventional Premium Motor Gasoline	161				

Finished Gasoline (Retail) Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the "Volume" fields must be less than 1,000,000. Also, data in the "Price" fields must be less than \$10.00.

Each of the other data tabs -- Finished Gasoline (Wholesale), Distillates and Propane, Distillates and Propane (Cont), and Other Petro Products -- display similarly-formatted data with the same range restrictions. Click each of these tabs to view and/or edit the corresponding data.

### EIA-782B Data Entry Screens

The EIA-782B data entry screen is the same as the 782A screen, with the following exception:

- Instead of Other Petro Products as the final data entry tab, the 782B lists Residual Fuel Oil.

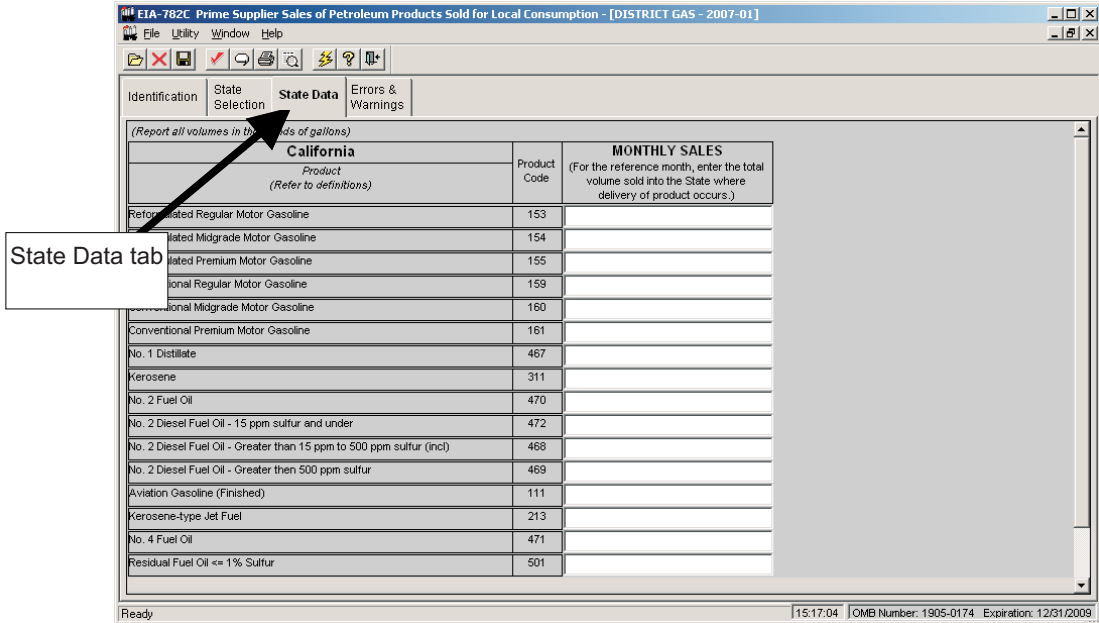

## EIA-782C Data Entry Screens

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

State Selection Tab Screen: In the 782C survey, you must first select the State for which you wish to enter data. Click on the button containing the desired State’s abbreviation. If this is a new State for this company, a confirmation box is displayed; click Yes to add the new State. Once a State is added, the abbreviation on this screen appears underlined and bolded. Click on the desired State and its full name will appear in the “Current State” box, as shown above. Click the radio button in the lower portion of the screen next to the term that best describes the selected firm, as shown in the “EIA-782A Data Entry Screens” section.

To remove a State from this firm, click on its abbreviation (so that the State name appears in the Current State box), then click the Remove Current State button (to the right of the “Current State” box).

# PC Electronic Data Reporting Option (PEDRO) System User's Guide

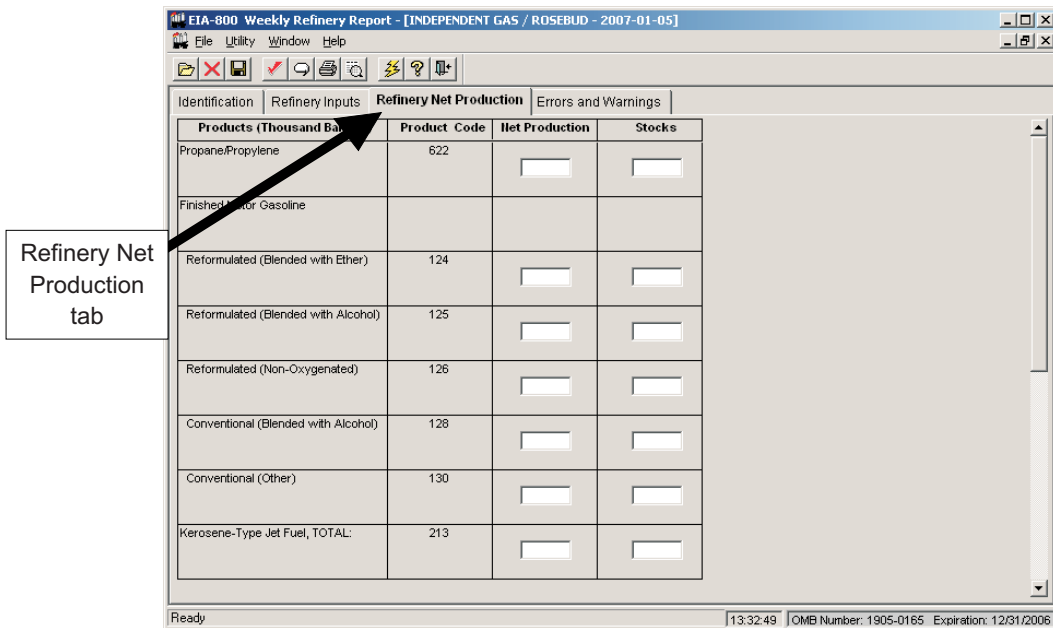

State Data Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the "Monthly Sales" field must be less than 1,000,000.

## EIA-800 Data Entry Screens

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

Input (Thousand Barrels)	Product Code	Input	Stocks
Crude Oil	050	<input type="text"/>	<input type="text"/>
Unfinished Oils	812	<input type="text"/>	<input type="text"/>
Total Inputs (excl motor gasoline blending components)	001	<input type="text"/>	<input type="text"/>
Gross Input to Atmospheric Crude Oil Distillation Units	990	<input type="text"/>	<input type="text"/>
Motor Gasoline Blending Components		<input type="text"/>	<input type="text"/>
Reformulated Blendstock for Oxygenate Blending (RBOB) for Blending with Ether	122	<input type="text"/>	<input type="text"/>
Reformulated Blendstock for Oxygenate Blending (RBOB) for Blending with Alcohol	123	<input type="text"/>	<input type="text"/>
Conventional Blendstock for Oxygenate Blending (CBOB)	139	<input type="text"/>	<input type="text"/>
Gasoline Treated as Blendstock (GTAB)		<input type="text"/>	<input type="text"/>
Reformulated	120	<input type="text"/>	<input type="text"/>

Refinery Inputs Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the “Input” or “Stocks” fields must be less than 100,000.

Refinery Net Production Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the “Net Production” or “Stocks” fields must be less than 100,000; negative numbers are permitted in the “Net Production” field (but not in the “Stocks” fields).

Kerosene-Type Jet Fuel	213						
Distillate Fuel Oil:							

Ready 13:34:03 OMB Number: 1905-0165 Expiration: 12/31/2006

Terminal Stocks Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the “PADD” field must be less than 100,000.

Volumes Tab Screen: This screen displays only one field of data, the volume of 15 ppm sulfur and under diesel fuel downgraded during the week. Enter the appropriate data, in thousands of barrels.

## EIA-802 and EIA-803 Data Entry Screens

The EIA-802 and EIA-803 screens are very similar to the EIA-801 screens, with the following exceptions:

- the EIA-802 screen displays a tab for Pipeline Stocks, instead of Terminal Stocks
- the EIA-803 screen displays a tab for Crude Oil Stocks, instead of Terminal Stocks

The data validations work the same way (entered "PADD" data must be less than 100,000) for the EIA-801, EIA-802, and EIA-803.

## EIA-804 Data Entry Screens

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

Item Description	Product Code	PADD 1			PADD 2	PADD 3	PADD 4	PADD 5	TOTAL U.S.

Ready | 13:51:56 | OMB Number: 1905-0165 Expiration: 12/31/2009

Stocks Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data. For example, entries in the “PADD” fields must be less than 100,000.

# PC Electronic Data Reporting Option (PEDRO) System User's Guide

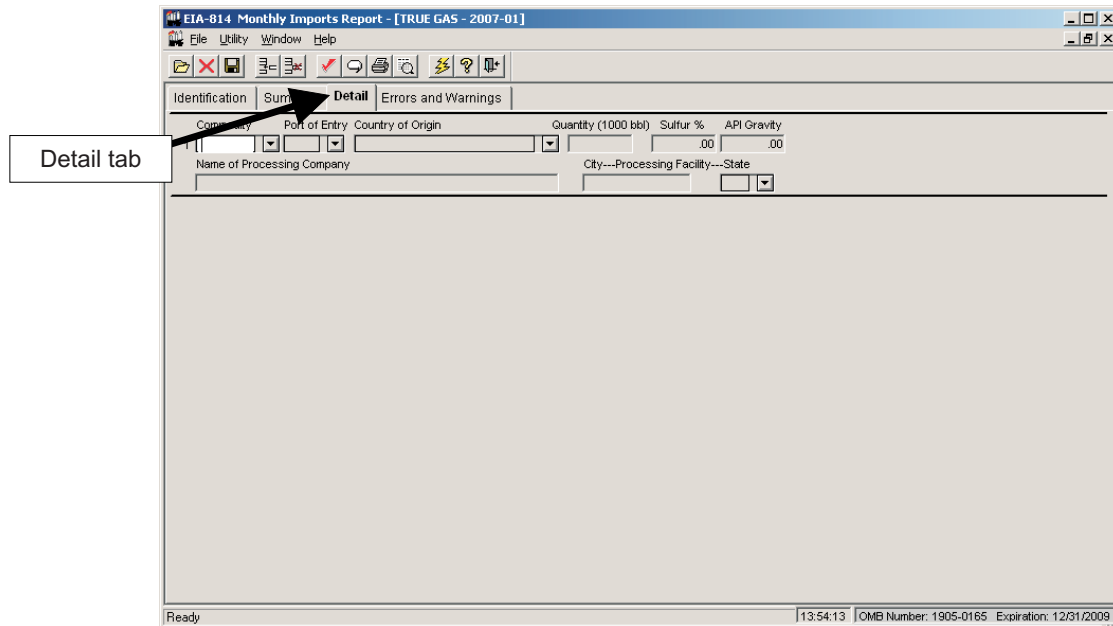

Movements Tab Screen: As on the Stocks tab screen, enter the appropriate data in the displayed fields. Entries in any fields must be less than 100,000.

## EIA-814 Data Entry Screens

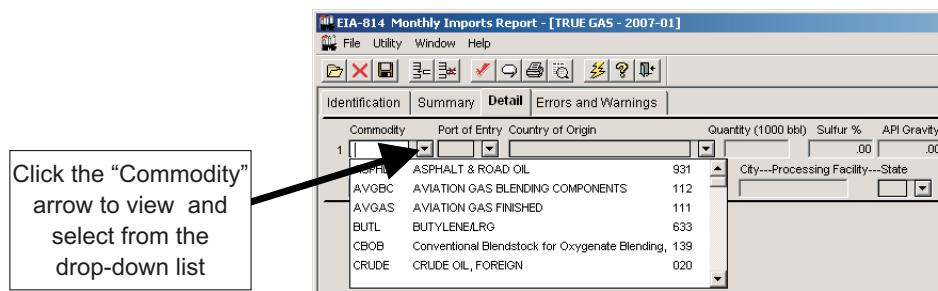

Identification Tab Screen: Enter all available identification information for your company in the appropriate boxes. Click the “Zero Submission” or “Resubmission” boxes if applicable.

Summary Tab Screen: Summary data are entered in this screen. Enter the “Total Number of Line Entries” reported in the appropriate box; this number should reflect the number of line entries you list under the Detail tab. Next, enter the “Total Quantity Reported,” which should equal the total quantity of all lines under the Detail tab. Each entry must be less than 100,000.

Detail Tab Screen: Enter the following data on this screen: Commodity (type of fuel that your company imports); Port of Entry (entry point where fuel was delivered); Country of Origin (country from which fuel was shipped); Quantity (amount of fuel received). The data entry process is described below:

First, select a “Commodity” type by clicking on the arrow to the right of the field, as shown below:

Data entry fields displayed are dependent on the type of commodity selected. For example, if you select “CRUDE OIL, FOREIGN” as your commodity, the “Sulfur %” and “API Gravity” fields become active (they are greyed-out for most commodity types). Also, the “Name of Processing Field” becomes active, as does the city and State fields. When a field becomes active on this Detail screen (changes from grey to white), it should not be left blank (an active field that is left blank will generate an error message when validation is run).

Next, select the “Port of Entry” from the drop-down list of U.S. cities (plus Puerto Rico and the Virgin Islands), listed alphabetically by State.

Then select the “Country of Origin” from the drop-down list of countries that export to the U.S. This list is also displayed alphabetically.

Enter the “Quantity” in the next field (must be less than 100,000). Then fill in any other fields for the selected commodity that are active (not greyed out).

Insert a Row / Delete a Row buttons

NOTE: There are two buttons on the EIA-814 toolbar that are unique to this survey:

Click the left button (Insert a Row) to insert a new row on the Details screen, thereby allowing you to enter a different "Commodity" and its associated data.

The right button is used to delete a row. Click anywhere within the row you wish to remove, then click the Delete a Row button to delete the selected row. A confirmation box is displayed, to make sure you wish to delete the selected row/commodity.

## EIA-815 Data Entry Screens

**RESPONDENT IDENTIFICATION** EIA ID: 8154920214

Other	119						

Oxygenate Activity (Production) Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data.

# PC Electronic Data Reporting Option (PEDRO) System User's Guide

Oxygenate Activity (Ending Stocks) Tab Screen: Enter the appropriate data in the displayed fields. If you enter data that are considered outside the reasonable range for that field, a message will appear informing you of the range limits for that data entry. You must abide by these system limitations when entering data.

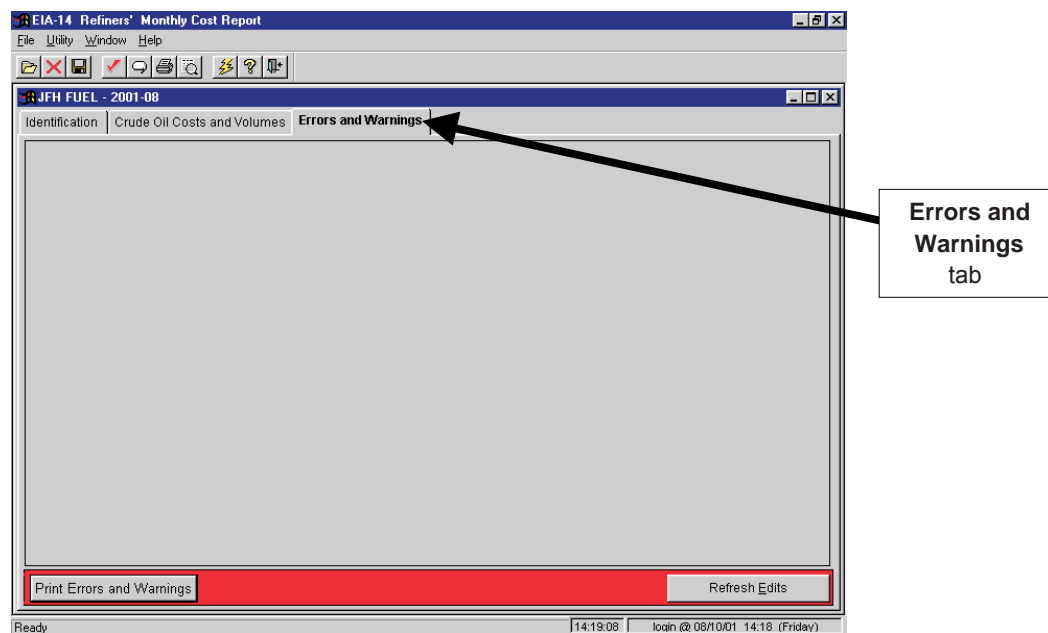

## Validate Data

This function helps insure that your data are correct. In addition, it will minimize phone calls from EIA questioning the data you have sent to them. You may run edit checks as often as you like throughout the data entry process, but it is recommended that you validate your data at least once prior to submission. For a list of edit checks run during validation for each survey, see Appendix A, "Edit Checks."

There are two methods of validating PEDRO data:

- 1) Errors and Warnings
- 2) Perform Validation Checks

Both of these options perform basically the same function. The first is run by clicking the **Errors and Warnings** tab (the right-most tab on each of the PEDRO survey screens). This tab is displayed below:

**Errors and Warnings Screen**

Click the **Refresh Edits** button in the bottom right corner of the screen to begin the data validation. A list of any discovered errors (or potential errors) is displayed. Beneath each item is an "Explanation" box -- if you would like to provide an explanation of why the "error" should be left unchanged, type it in the "Explanation" box below that specific error. You may then print the list of errors if you wish, by clicking the **Print Errors and Warnings** button in the bottom left corner of the screen.

To invoke the second method of data validation, "Perform Validation Checks," click the Check button "  " on the toolbar, or choose the Utility / Validate Data menu option from the upper left menu bar. Data that do not pass the edit validation will be identified in a "Data Validation Error" window, which is displayed at the top of the screen. The data in question will be highlighted on the screen. A sample "Data Validation Error" is shown below.

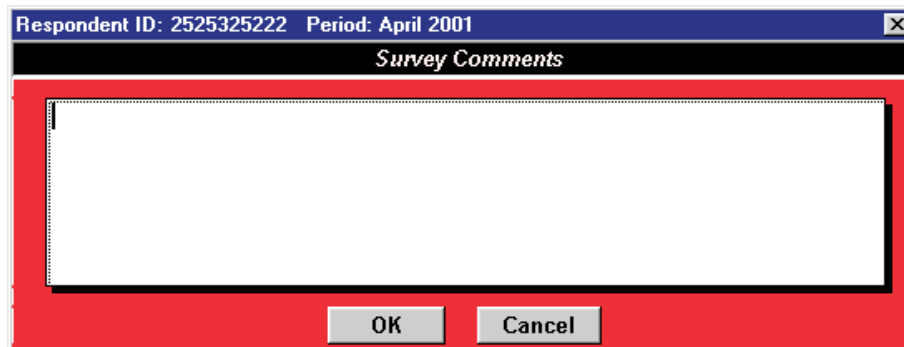

**Data Validation Error Box**

If you wish to type in an explanation for this error, do so in the "Explanation" box. To scroll through the series of discovered edit checks, click the **Previous Edit** and **Next Edit** button. To start the validation process over, click the **Restart Edits** button; this is useful if you correct an error while the "Data Validation Error" window is open. Click the **Done** button to close the "Data Validation Error" window.

## Enter Comments

If you wish to enter a comment to explain any unusual or substantially different aspects of your company's operations, click the **Comments** button on the toolbar, "  " or choose the Utility/ Comments menu option from the upper left menu bar.

The following "Comments" box is displayed:

**Survey Comments Box**

Type in the comments for the Respondent ID and Period identified at the top of the "Survey Comments" box, and click the **OK** button when finished.

## Save PEDRO Data

To save PEDRO data as it is entered, click the **Save** button on the toolbar, "  " or choose the File / Save menu option from the upper left menu bar.

**NOTE:** Whenever you exit a respondent or survey without saving, you will be prompted whether you wish to save your modifications before closing.

## Close Current Respondent

When you are finished with a particular respondent and period but wish to keep the currently-selected survey open, click the **Close Respondent** button on the toolbar, " " or choose the File / Close menu option from the upper left menu bar.

You may then click the **Open Respondent** button " " to open a different respondent/period within the survey.

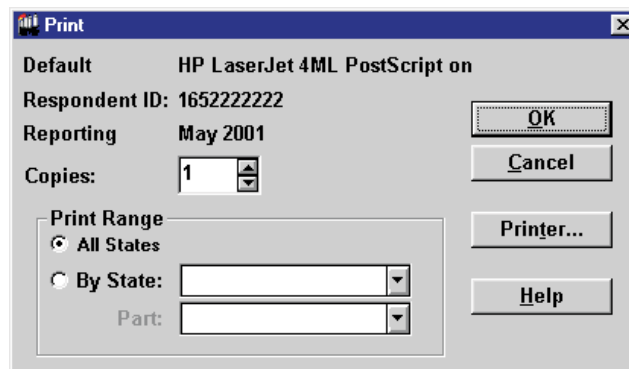

## Print Options

To print a report for a selected respondent/reporting cycle, first open a survey form (see the "Select a Respondent" in the Opening a Survey section of this manual). Then either:

- Click the Print icon on the toolbar " " ; or
- Choose the Print option from the File menu.

The currently-selected respondent/period will be printed, displaying all data you've entered.

**NOTE:** When using the EIA-782A, B and C Surveys, the following screen is displayed when the **Print** button is clicked:

**EIA-782A, B, & C Print Box**

From this screen, you may select the number of copies you wish to print (in the "Copies" box); and whether you wish to print "All States" (the default option) or one state (by clicking the "By State" button). If you select one state, you may also select whether you wish to print "All Parts" of the 782 form, or only individual parts of the form. You may also adjust your printer setup by clicking the **Printer** button. After making your desired selections, click the **OK** button to continue with the printing process.

A **Print Preview** button " " is also available if you wish to view the form as it will appear when printed.

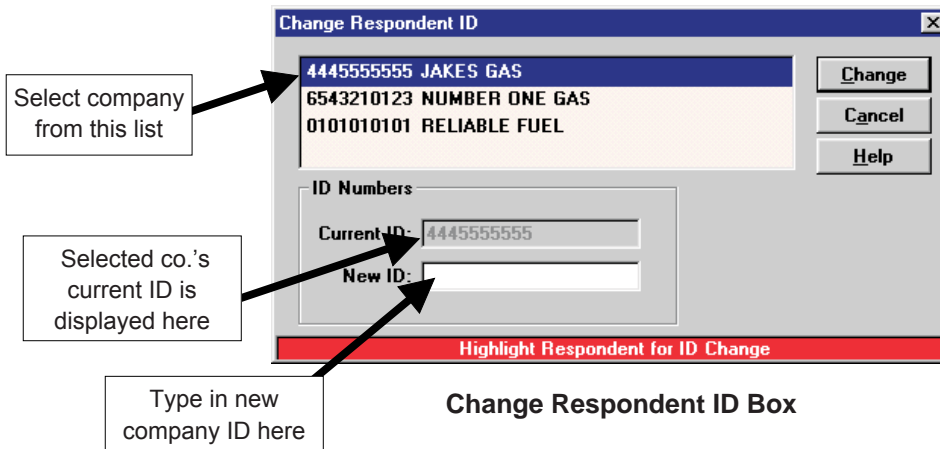

From the "Print Preview" screen, you can print the form, change your printer settings, scroll through the pages of the form being displayed, and zoom between 20% and 200% of the form's actual size.

## Change Respondent ID Number

If you wish to change a respondent's EIA ID number (or API ID number) for a company that you've already added to PEDRO, choose the Utility / Change ID menu option from the tool bar in the upper left corner of the PEDRO screen. This option is only available when no respondent/period is open in PEDRO (the menu option appears greyed out if a respondent is open). The look of the "Change ID" box is slightly different between the surveys, as displayed below:

### EIA-14, EIA-182, and EIA-782A, B, & C Surveys

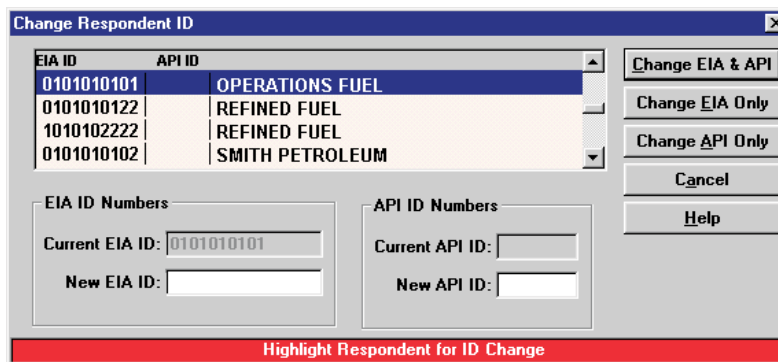

After selecting the "Change ID" option, the following "Change Respondent ID" box is displayed:

Select the company and ID that you wish to change. The "Current ID" of the selected company is displayed in the field identified above; type in the new ID in the field below it. Click the **OK** button. A confirmation box is displayed; click the **OK** button to complete the ID change.

### EIA-800 through 805, EIA-810 through 817, and EIA-819 Surveys

After selecting the "Change ID" option, the following "Change Respondent ID" box is displayed:

Select the company and ID that you wish to change. The EIA ID of the selected company is displayed in the "Current EIA ID" field identified above; the API ID is displayed in the box to the right of the EIA ID. Type in the new EIA ID in the appropriate field, and/or the new API ID. Click the appropriate button, depending on whether you wish to change both the EIA and API IDs (**Change EIA & API**), only the EIA ID (**Change EIA Only**), or only the API ID (**Change API ID Only**). A confirmation box is displayed; click the **OK** button to complete the ID change. All data formerly under the old ID will now be displayed under the new ID.

## Delete a Period or Respondent

If you wish to remove a period or respondent from a survey, choose the Utility / Delete Period/Respondent menu option from the menu bar in the upper left corner of the PEDRO screen. This option is only available when no respondent/period is open in PEDRO (the menu option appears greyed out if a respondent is open).

After selecting "Delete Period/Respondent," a box is displayed, listing the current respondents and periods for the survey. Select the Period or Respondent you wish to delete, and click the appropriate button (**Delete Respondent** or **Delete Period**). A confirmation box is displayed; click the **OK** button to remove the selected Respondent or Period.

Note that, if a Respondent only has one corresponding Period, the system will not allow you to delete that unique Period -- a Respondent cannot exist without at least one Period. Also, remember that **all data** for the respondent will be deleted as well when the respondent is deleted.

## Create Transmission File

After all data have been entered and checked for a given survey, a final Transmission File must be generated for filing your data with EIA. The Transmission File is transported to EIA using the PEDRO Communications Module, described in the next section of this manual.

To create a Transmission File, click the **Create Transmission File** button on the toolbar, "⚡" or choose the Utility / Create Transmission File menu option from the upper left menu bar. The following screen is displayed:

**Create Transmission File Box**

Review the displayed information (check the survey number and Period, and check the Zero Submission and/or Resubmission boxes if applicable). If the submission parameters appear correct, click the **Continue** button. A box is displayed, asking if you wish to open PEDRO Communications now. If you wish to submit your data transmission file now, click the **Yes** button. If you wish to wait and submit it later, click the **No** button.

For instructions on running the PEDRO Communications Module, see section seven, "The PEDRO Communications Module."

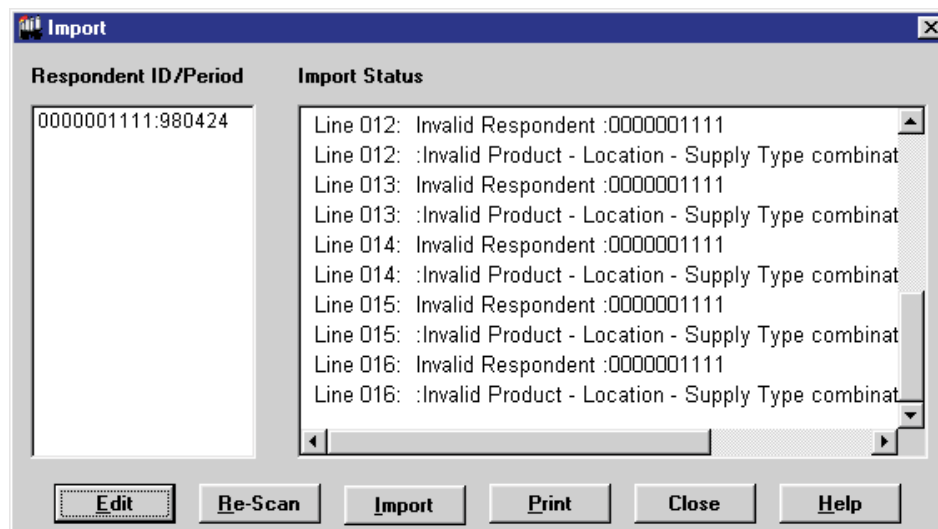

## VI. Import Data

To import data for one or more respondents and reporting periods, close all respondents and report periods, and choose the Import option from the Utility menu. The following screen is displayed:

**Select Import File Box**

Select the file to be imported and click the **Open** button. The file to be imported must be formatted according to the survey layout, specified in Appendix A. The selected file will be scanned for proper record format. If the format is correct, the following "Import" screen is displayed:

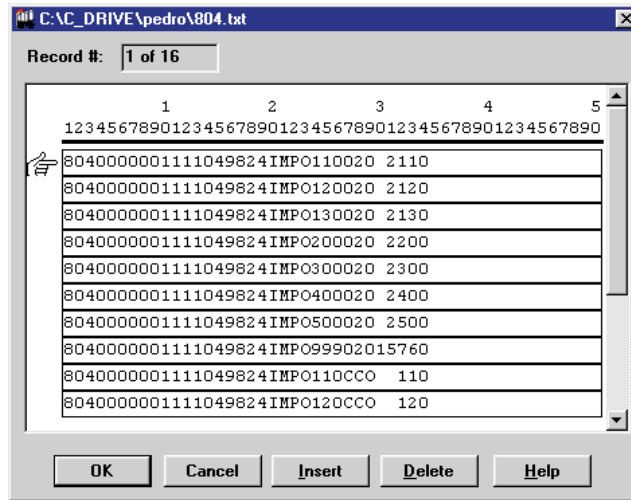

**Import Box**

As shown in the example above, information about the data being imported is displayed in the "Import Status" portion of the screen. This will include any potential errors that have been found in the imported data.

If you wish to re-check the data after editing it or recreating it elsewhere, click the **Re-scan** button. You may also print information in the "Import Status" box by clicking the **Print** button.

You may complete the import by clicking the **Import** button. If you wish to edit the data prior to importing, follow these steps:

To edit individual lines of data within the file before importing it into PEDRO, click the **Edit** button in the bottom left corner of the "Import" box. The following screen is displayed:

**Edit Imported Data Box**

You may click on any line and type in any adjustments you wish to make. If you wish to add a new line of data, click the line below where you wish the new line to appear, and click the **Insert** button. If you wish to remove an entire line of data, click on it, then click the **Delete** button.

After completing any editing, click the **OK** button to return to the "Import" box, or click **Cancel** to ignore any changes. Click the **Import** button on the "Import" box to complete the importation of data into PEDRO.

## VII. The PEDRO Communications Module

The PEDRO Communications Module is used when you wish to transmit one or more data files to EIA. PEDRO Communications requires that you have previously entered your data, successfully validated your data, and created a transmission file containing your data. If all three of these steps have been completed, then you are ready to send your transmission file to EIA.

There are two ways you can invoke the communications module. You may enter PEDRO Communications immediately after creating a transmission file, by responding **Yes** when the pop-up box asks you if you want to start PEDRO Communications. You may also enter PEDRO Communications directly from Windows by clicking on the PEDRO Communications application icon. This is accomplished outside of the PEDRO survey module. After using either method to access the PEDRO Communications Module, the following screen is displayed.

**Logon to PEDRO Communications Box**

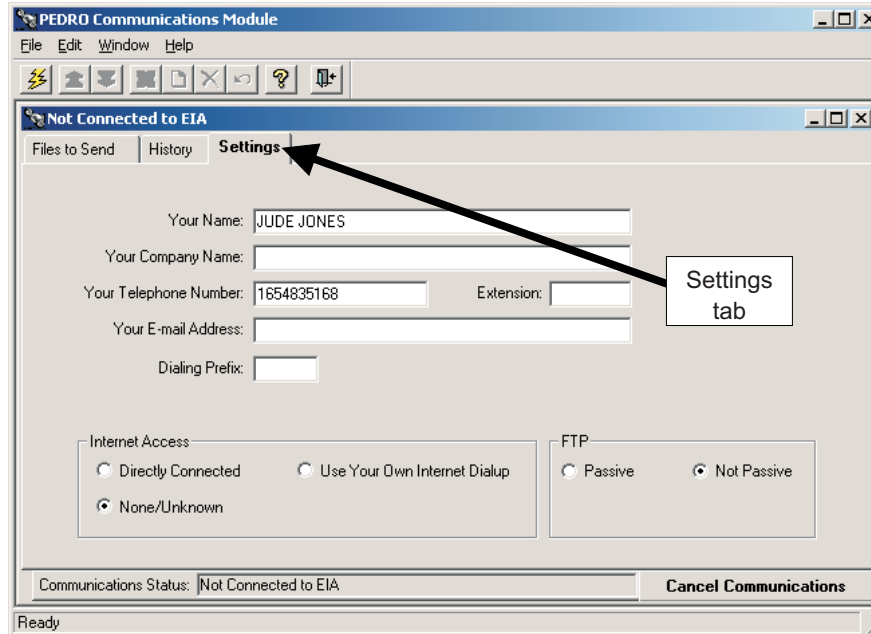

This identification information will be used by both EIA and your company to track the transmission of data files. Your name will be displayed as it was entered in PEDRO; you may update it here if necessary. Please enter your phone number, so that EIA personnel can contact you if necessary. After completing name and phone number fields, click the **Logon** button to access the PEDRO Communications Module. The main screen is displayed below.

Status	Date Created	Subm. Type	Respondent ID	Company Name	EIA Form	Report Period	Filename
ok	2001/07/05	Orig.	0000001111	/ plant 810	EIA-800	2001/06/01	B75D0L06.txt
ok	2001/07/26	Submission	0101010101	RELIABLE FUEL	EIA-182	2002/01	B7QB0L02.txt
ok	2001/07/26	Orig.	1010102222	REFINED FUEL	EIA-814	2000/06	B7QF0U10.txt
ok	2001/07/27	Orig.	1010102222	REFINED FUEL	EIA-814	2000/06	B7R90N18.txt
ok	2001/07/27	Submission	0101010101	RELIABLE FUEL	EIA-182	2002/01	B7RA060Z.txt
ok	2001/07/27	Submission	4445555555	JAKES GAS	EIA-182	2001/06	B7RA0115.txt

**PEDRO Communications Main Screen**

If you are using PEDRO Communications for the first time, you will have to configure it to transmit and receive data from EIA.

Click the "Settings" tab, as shown below.

PEDRO Communications Main Screen

Enter all of the appropriate information in the space provided.

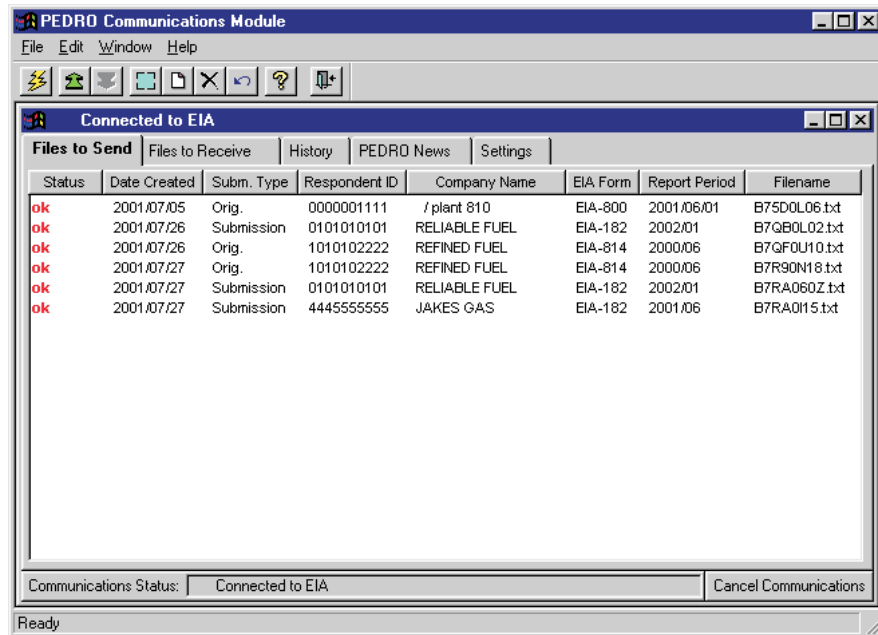

You must have Internet access in order to transmit data using PEDRO Communications. Make sure you are logged on to the Internet when you attempt to transmit files. If you select None/Unknown on the "Settings" screen (shown above), the system will attempt to determine your method of access.

Brief descriptions of each of the options in the "Internet Access" box:

- Directly Connected: Select this option if you have a direct connection to the Internet.
- Use Your Own Internet Dial-Up: Select this option if you access the Internet via an Internet Service Provider such as AOL, or if you are using a cable modem or DSL.
- None / Unknown: Select this option if you do not know what type of connection you have, or if you have no way to access the Internet. If you have problems getting this option to work, call PEDRO support for assistance.

After entering the necessary information in the “Settings” tab screen, you may connect to EIA to transmit your data. To do so, click the Connect button “” or choose the File / Connect menu option from the menu bar in the upper left corner of the PEDRO Communications screen.

Click on the “Files to Send” tab, and select the files to be transmitted to EIA. Use the normal Windows convention of clicking the left mouse button on the file you wish to transmit. If you wish to send more than one file, press the Ctrl key and then click on the files you wish to send (while holding the Ctrl key down). In this manner, you can select any number of files for transmission.

PEDRO Communications Main Screen - Select Files to Send

Note that, in the example shown above, the Status for each file is ok. This means that these files have been validated, and therefore are suitable for transmission to EIA.

If you now click on the Transmit button “” on the toolbar, or select the File / Transmit menu item, your file(s) will be sent to EIA. At that point, the Status column for the file(s) you transmitted will be updated to sent to indicate a successful transmission.

Click on the “Files to Receive” tab to view those files sent by EIA that can be received by your machine. Select a file or files and click the Receive button “” or click the File / Receive menu item to receive the selected file.

Click on the “History” tab to view files that have been successfully transmitted to EIA. If you have just transmitted, the latest sent file will not show up until you exit and reenter PEDRO Communications. If there was a problem during transmission, and some/all of the data were lost, you may have to recreate the file and retransmit it.

Click on the “PEDRO News” tab to view information about the PEDRO system.

### Other PEDRO Communication Module Functions

In addition to the functions already described, the toolbar along the top left portion of the PEDRO Communications Main Screen also provides the following functionality:

Receive “” (also available by choosing the File / Receive menu item):

Click this button to receive a file from EIA. Identify the file in the “Files to Receive” tab screen before selecting this option.

The next group of four buttons can be used to perform the following functions:

1. 2. 3. 4.

1. Select All: Click this button to highlight every entry on the currently-displayed screen. This is useful if you are transmitting a large number of respondent data files at once.

2. Select None: Click this button to de-select any and all entries you may have highlighted on the currently-displayed screen.

3. Delete: Click this button to delete the highlighted entry (or entries) on the currently-displayed screen. The “Status” will then change from “ok” to “deleted.”

4. Undelete: Click this button to undelete any highlighted entry (or entries) whose “Status” is “deleted.” The “Status” will then switch back to “ok” (assuming the highlighted entry has passed validation).

NOTE: Each of these four functions can also be performed using the Edit menu:

## VIII. PEDRO Help

PEDRO's online Help allows you to obtain access to any information necessary to use the PEDRO system.

You can obtain access to online Help at any point in the PEDRO system by selecting the "Contents" option from the "Help" menu located at the top of the main PEDRO window. Doing so will connect you to the Contents screen for general PEDRO Help. Help for the specific EIA survey form with which you are currently working is accessed by selecting the "Survey Specific Help" option from the "Help" menu. Choosing the "Search for Help On" option from the "Help" menu will display a dialog box allowing you to search for survey-specific Help topics containing specific keywords.

The Help windows available in PEDRO allow you to navigate among the topics in the Help system in a number of ways. By clicking the Contents button, for example, you will open the Contents screen and be presented with an overview of all topics in the Help system. Any information not available in the Contents screen will be accessible from the Search facility (click the Search button), which will display a dialog box allowing you to search for Help topics containing specific keywords. Clicking the Back button will return you to the previous topic on the display. The History button will display a running history of up to 40 topics viewed since the Help system was opened; this list will appear in a secondary window, and you can click one of the topics and jump straight to it. Clicking one of the Browse buttons (marked "<<" and ">>") will allow you to wander through a series of related Help topics. You may exit the Help system at any time by clicking the Exit button.

## General Information

This appendix addresses survey-specific information for the following Petroleum Surveys operating under PEDRO, for survey submissions with a report period greater than or equal to January 1<sup>st</sup>, 2004:

- EIA-14 \_\_\_\_\_ Refiners' Monthly Cost Report
- EIA-182 Domestic Crude Oil First Purchase Report
- EIA-782A Refiners'/Gas Plant Operators' Monthly Petroleum Product Sales Report
- EIA-782B Resellers'/Retailers' Monthly Petroleum Product Sales Report
- EIA-782C Monthly Report of Prime Supplier Sales of Petroleum Products Sold for Local Consumption
- EIA-800 Weekly Refinery Report
- EIA-801 Weekly Bulk Terminal Report
- EIA-802 Weekly Product Pipeline Report
- EIA-803 Weekly Crude Oil Stock Report
- EIA-804 Weekly Imports Report
- EIA-805 Weekly Terminal Blenders Report
- EIA-810 Monthly Refinery Report
- EIA-811 Monthly Bulk Terminal Report
- EIA-812 Monthly Product Pipeline Report
- EIA-813 Monthly Crude Oil Report
- EIA-814 Monthly Imports Report
- EIA-815 Monthly Terminal Blenders Report
- EIA-816 Monthly Natural Gas Liquids Report
- EIA-817 Monthly Tanker and Barge Movement Report
- EIA-819 Oxygenate Telephone Report

Information on specific survey reporting cycles, submission due dates, resubmission policies and instructions, are contained in both the PEDRO Help, and on the EIA webpage. For questions regarding specific survey data, contact your EIA specialists listed in the survey instructions, or on the EIA webpage.

The information below provides specific edit criteria and file specific information for importing data files.

### **Edit Criteria**

PEDRO provides an on-line error-checking process that highlights discrepancies. This permits you to enter and check data before transmitting to EIA. There are two types of error checks, immediate mandatory validations, and data validation edits. The immediate mandatory validations prevent the user from entering incorrect data at the time of data entry, while the data validation edits flag questionable data (after data entry is complete, but prior to submitting data to EIA). Listed below are the immediate mandatory validations.

- Keystroke limits shall be applied as the user types in any data for all fields, to prevent an overload of database fields and / or to prevent an unreasonable scale for a given field.
- Zip codes fields shall accept up to 10 alphanumeric characters, thus accepting both zip codes and Canadian postal codes.
- Telephone numbers shall accept up to 14 alphanumeric fields including the spaces and punctuation.
- Telephone extension fields shall be five characters.
- Quantity fields shall be positive integers (less than 100,000), or zero except as explicitly noted under survey specific requirements.
- Quantity fields shall be numeric and shall not accept alphabetic characters. Dollar fields (prices, costs, sales) shall be considered quantity fields within PEDRO.

### **Import File Format and Codes**

An alternative method of entering data in the PEDRO system is to import an ASCII file. This allows data entered via other software programs to be brought into PEDRO without re-keying.

This appendix includes information useful for importing data, including:

- Import File Formats
- Cell Labels
- Product Codes
- Sample Importation Files

Additional information on file importation can be found in the "Import Data" section in this User's Guide.

## EIA-14 Refiners' Monthly Cost Report

### File Format

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA survey number, always <b>014</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (e.g., 06=June)
16-17	2-digit year code (e.g., 02=2002)
18-19	2-letter geographic code, always US
20-26	3-character cell label (always RMC) followed by 4 blanks
27-29	3-digit product code: See table below
30	1-digit PADD location: See table below
31-38	8-digit total cost in thousands of dollars
39-46	8-digit total volume in thousands of barrels

### Cell Labels

RMC            Refiner's Monthly Cost

### Product Codes

<u>Code</u>	<u>Description</u>
050	Domestic Crude Oil
020	Imported Crude Oil

### PADD Location Codes

1	PADD I
2	PADD II
3	PADD III
4	PADD IV
5	PADD V
9	Total U.S.

### Sample Importation File

The following sample file contains data for respondent **000001111** for the months of **October and November 2004 (1004 and 1104 respectively)**. As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

```
01400000011111004USRMC    050150000    400
01400000011111004USRMC    020160000    400

01400000011111004USRMC    050250000    400
01400000011111004USRMC    050380000    200
01400000011111004USRMC    020350000    200
01400000011111004USRMC    050450000    400
```

**EIA-182  
Domestic Crude Oil First Purchase Report**

**File Format**

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA survey number, always <b>182</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (e.g., 06=June)
16-17	2-digit year code (e.g., 02=2002)
18-19	2-character State/Production Area code
20-26	4-character cell label (always DCFP followed by 3 blanks)
27-29	3-digit product code, always 050
30-37	8-digit average dollars per barrel
38-45	8-digit total volume in actual barrels

**Cell Label**

DCFP            Domestic Crude Oil First Purchases

**Product Code**

050            Domestic Crude Oil

**Sample Importation File**

The following sample file contains data for respondent 0000001111 for the month of October 2002 (1002). As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-782A**  
**Refiners'/Gas Plant Operators' Monthly Petroleum Product Sales Report**

**File Format**

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA survey number, always <b>782</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (e.g., 06=June)
16-17	2-digit year code (e.g., 02=2002)
18-19	2-letter State code
20-23	4-character cell label, EIA-782A=PPSA, EIA-782B=PPSB
24-26	3-character sales code
27-29	3-digit product code
30-37	8-digit sales volume in 1000 gallons
38-41	4-digit sales price in \$0.000 per gallon

**Cell Labels**

<u>Code</u>	<u>Description</u>
DTW	Dealer Tank Wagon
RAC	Rack
BLK	Bulk
RES	Residential
COM	Commercial/Institutional
IND	Industrial
OUT	Company-Operated Outlets
OTH	Other End-Users
PTR	Petrochemical
RLT	Retail
WSL	Wholesale

**Product Codes**

<u>Code</u>	<u>Description</u>
111	Aviation Gasoline (Finished)
153	Reformulated Regular Motor Gasoline
154	Reformulated Midgrade Motor Gasoline
155	Reformulated Premium Motor Gasoline
159	Conventional Regular Motor Gasoline
160	Conventional Midgrade Motor Gasoline
161	Conventional Premium Motor Gasoline
213	Kerosene-Type Jet Fuel
311	Kerosene
467	No.1 Distillate
468	No. 2 Diesel Fuel > 15 ppm to 500 ppm (incl.) Sulfur
469	No. 2 Diesel Fuel > 500 ppm Sulfur
470	No. 2 Fuel Oil
471	No. 4 Fuel

472	No. 2 Diesel Fuel $\leq$ 15 ppm Sulfur
501	Residual Fuel Oil $\leq$ 1% Sulfur
510	Residual Fuel Oil $>$ 1% Sulfur
624	Propane, Consumer Grade

### Sample Importation File

The following sample file contains data for respondent 0000001111 for the month of October 2002 (1002). As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular system order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-782B**  
**Resellers'/Retailers' Monthly Petroleum Product Sales Report**

**File Format**

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA survey number, always <b>782</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (e.g., 06=June)
16-17	2-digit year code (e.g., 02=2002)
18-19	2-letter State code
20-23	4-character cell label, EIA-782A=PPSA, EIA-782B=PPSB
24-26	3-character sales code
27-29	3-digit product code
30-37	8-digit sales volume in 1000 gallons
38-41	4-digit sales price in \$0.000 per gallon

**Cell Labels**

<u>Code</u>	<u>Description</u>
DTW	Dealer Tank Wagon
RAC	Rack
BLK	Bulk
RES	Residential
COM	Commercial/Institutional
IND	Industrial
OUT	Company-Operated Outlets
OTH	Other End-Users
PTR	Petrochemical
RLT	Retail
WSL	Wholesale

**Product Codes**

<u>Code</u>	<u>Description</u>
153	Reformulated Regular Motor Gasoline
154	Reformulated Midgrade Motor Gasoline
155	Reformulated Premium Motor Gasoline
159	Conventional Regular Motor Gasoline
160	Conventional Midgrade Motor Gasoline
161	Conventional Premium Motor Gasoline
468	No. 2 Diesel Fuel > 15 ppm to 500 ppm (incl.) Sulfur
469	No. 2 Diesel Fuel > 500 ppm Sulfur
470	No. 2 Fuel Oil
471	No. 4 Fuel
472	No. 2 Diesel Fuel ≤ 15 ppm Sulfur
501	Residual Fuel Oil ≤ 1% Sulfur
510	Residual Fuel Oil > 1% Sulfur
624	Propane, Consumer Grade

**Sample Importation File**

The following sample file contains data for respondent 0000001111 for the month of October 2002 (1002). As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-800  
Weekly Refinery Report**

**Edit Criteria**

Listed below are the Edit Criteria for the EIA-800.

<b>survey rule_code</b>	<b>error_message</b>
800 AND	Company Name cannot be blank.
800 ADA	Address line cannot be blank.
800 ADC	City cannot be blank.
800 ADS	State cannot be blank.
800 ADS	Invalid State Code.
800 AND	Zip cannot be blank.
800 CIR	Crude Inputs Range Error. Crude Inputs (050) should be within 10% of gross inputs.
800 CIZ	Zero Error: Crude Inputs (050) is non-zero and Gross Inputs (990) is zero.
800 TIZ	Zero Error. The sum of refinery Net Production for all products is negative and Total Inputs (001) are non- zero.
800 GIR	Gross Inputs Range Error. Gross Inputs (990) should be between 50% and 110% of Total Inputs (001).
800 GIZ	Zero Error: Gross Inputs (990) is non-zero when Total Inputs (001) is zero.
800 TQE	Subtotal Error. Total Net Kerosene-Type Jet Fuel Production (213) should equal the sum of Commercial (217) and Military (218) Production.
800 TPR	Total Production of all products is inconsistent with Total Inputs.
800 TPZ	Zero Error: The sum of Refinery Net Production for all products is non-zero when Total Inputs (001) is zero.
800 CGZ	Zero Error: Crude Inputs (050) are zero when Gross Inputs (990) are non-zero.

**File Format**

The Import Data option of the Survey Utilities Menu imports data from an ASCII (text) file to the PEDRO database for the EIA-800 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>800</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (06=June, etc.)
16-17	2-digit year code (02=2002, etc.)
18-19	2-digit day code 1-31 (10=tenth, etc.)
20-26	4-character cell label followed by 3 blanks
27-29	3-digit product code
30-34	5-digit quantity in thousands of barrels

**EIA-802**  
**Weekly Product Pipeline Report**

**Edit Criteria**

Listed below are the Edit Criteria for the EIA-802.

<b>survey_rule_code</b>	<b>error_message</b>
802 AND	Company Name cannot be blank.
802 ADA	Address line cannot be blank.
802 ADC	City cannot be blank.
802 ADS	State cannot be blank.
802 ADS	Invalid State Code.
802 AND	Zip cannot be blank.
802 TCS	Line Imbalance. The U.S. Total (999) for Reformulated Motor Gasoline (150) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Oxygenated Motor Gasoline (151) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Other Finished Motor Gasoline (152) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Blending Components (134) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Naphtha-Type Jet Fuel (211) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Kerosene-Type Jet Fuel (213) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for Low Sulfur Distillate Fuel Oil (461) must equal the sum of the PADD values.
802 TCS	Line Imbalance. The U.S. Total (999) for High Sulfur Distillate Fuel Oil (462) must equal the sum of the PADD values.

**File Format**

The Import Data option of the Survey Utilities Menu imports data from an ASCII (text) file to the PEDRO database for the EIA-802 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>802</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (06=June, etc.)
16-17	2-digit year code (02=2002, etc.)
18-19	2-digit day code 1-31(10 = tenth, etc.)
20-26	7-character cell label
27-29	3-digit product code
30-35	6-digit quantity in thousands of barrels

**Cell Labels**

ESTO110	Stocks of Products in PADD 1A
ESTO120	Stocks of Products in PADD 1B
ESTO130	Stocks of Products in PADD 1C
ESTO200	Stocks of Products in PADD 2
ESTO300	Stocks of Products in PADD 3
ESTO400	Stocks of Products in PADD 4
ESTO500	Stocks of Products in PADD 5
ESTO999	Total Stocks of Product
VOLU999	Total Volume of 15 ppm sulfur and under diesel fuel downgraded during week (thousand barrels)

**Product Codes**Propane/Propylene

231	Propane/Propylene
-----	-------------------

Finished Motor Gasoline

124	Reformulated (Blended with Ether)
125	Reformulated (Blended with Alcohol)
126	Reformulated (Non-Oxygenated)
128	Conventional (Blended with Alcohol)
130	Conventional (Other)

Motor Gasoline Blending Components

122	Reformulated Blendstock for Oxygenate Blending (RBOB) for Blending with Ether
123	Reformulated Blendstock for Oxygenate Blending (RBOB) for Blending with Alcohol
139	Conventional Blendstock for Oxygenate Blending (CBOB)

Gasoline Treated as Blendstock (GTAB)

120	Reformulated
121	Conventional
138	All Other Motor Gasoline Blending Components

Jet Fuel

213	Kerosene-Type, Total
-----	----------------------

Distillate Fuel Oil

465	15 ppm sulfur and under
466	Greater than 15 ppm sulfur to 500 ppm sulfur (incl.)
467	Greater than 500 ppm

Diesel Fuel Oil

466	Total Volume of 15 ppm sulfur and under diesel fuel downgraded during week (thousand barrels)
-----	---

**Sample Importation File**

The following sample file contains data for respondent **000000802** for the week of **January 2, 2004 (010402)**. As shown, the file may contain data for multiple respondents and multiple weeks. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-803**  
**Weekly Crude Oil Stocks Report**

**Edit Criteria**

Listed below are the Edit Criteria for the EIA-803.

<b>survey_rule_cod</b>	<b>error_message</b>
803 AND	Company Name cannot be blank.
803 ADA	Address line cannot be blank.
803 ADC	City cannot be blank.
803 ADS	State cannot be blank.
803 ADS	Invalid State Code.
803 AND	Zip cannot be blank.
803 TCS	Line Imbalance. The U.S. Total (999) for Crude Oil (050) must equal the sum of the PADD values.

**File Format**

The Import Data option of the Survey Utilities Menu imports data from an ASCII (text) file to the PEDRO database for the EIA-803 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>803</b>
4-13	10-digit respondent ID number
14-15	2-digit month code, 01-12 (06=June, etc.)
16-17	2-digit year code (02=2002, etc.)
18-19	2-digit day 1-31 (10 = tenth, etc.)
20-26	7-character cell label
27-29	3-digit product code
30-35	6-digit quantity in thousands of barrels

**Cell Labels**

ESTO100	Stocks of Products in PADD 1
ESTO200	Stocks of Products in PADD 2
ESTO300	Stocks of Products in PADD 3
ESTO400	Stocks of Products in PADD 4
ESTO500	Stocks of Products in PADD 5
ESTO999	Total Stocks of Product

**Product Codes**

<u>Crude Oil</u>	
050	Crude Oil

092 Alaskan Crude Oil in Transit by Water  
093 Cushing, Oklahoma

### Sample Importation File

The following sample file contains data for respondent **000000803** for the week of **January 3, 2004 (010402)**. As shown, the file may contain data for multiple respondents and multiple weeks. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

Weekly Imports Report**

**Edit Criteria**

The following are the Edit Criteria for the EIA-804.

<b>survey_rule_code</b>	<b>error_message</b>
804 AND	Company Name cannot be blank.
804 ADA	Address line cannot be blank.
804 ADC	City cannot be blank.
804 ADS	State cannot be blank.
804 ADS	Invalid State code.
804 AND	Zip cannot be blank.
804 TCS	Line Imbalance. The U.S. Total (999) for Crude Oil (020) must equal the sum of the PADD values.
804 TCS	Canadian Crude Oil (CCO) for PADD 1x (110) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 1y (120) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 1z (130) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 2 (200) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 3 (300) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 4 (400) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Canadian Crude Oil (CCO) for PADD 5 (500) must be less than or equal to the reported value for Crude Imports (020) in the same PADD.
804 TCS	Line Imbalance. The U.S. Total (999) for Canadian Crude Oil (CCO) must equal the sum of the PADD values.
804 TCS	Line Imbalance. The U.S. Total (999) for Reformulated Motor Gasoline (150) must equal the sum of the PADD values.
804 TCS	Line Imbalance. The U.S. Total (999) for Oxygenated Motor Gasoline (151) must equal the sum of the PADD values.
804 TCS	Line Imbalance. The U.S. Total (999) for Other Finished Motor Gasoline (152) must equal the sum of the PADD values.

804	TCS	Line Imbalance. The U.S. Total (999) for Blending Components (134) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Naphtha-Type Jet Fuel (211) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Kerosene-Type Jet Fuel (213) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Low Sulfur Distillate Fuel Oil (461) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for High Sulfur Distillate Fuel Oil (462) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Residual Fuel Oil (511) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Liquefied Petroleum Gases (230) must equal the sum of the PADD values.
804	TCS	Line Imbalance. The U.S. Total (999) for Other Petroleum Imports (666) must equal the sum of the PADD values.
804	TCS	Total Imbalance. The U.S. Total (999) Imports Activity for Crude Oil (020) must equal the sum of Crude Oil Imports by Country of Origin.
804	TCS	Total Imbalance. The U.S. Total (999) for Canadian Crude Oil (CCO) Imports Activity must equal the Imports by Country of Origin for Canada (260).
804	TCS	Unfinished Oils (UFO) for PADD 1x (110) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 1y (120) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 1z (130) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 2 (200) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 3 (300) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 4 (400) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Unfinished Oils (UFO) for PADD 5 (500) must be less than or equal to the reported value for Other Petroleum Imports (666) in the same PADD.
804	TCS	Line Imbalance. The U.S. Total (999) for Unfinished Oils (UFO) must equal the sum of the PADD values.

**EIA-810  
Monthly Refinery Report**

**Edit Criteria**

The following are the Edit Criteria for the EIA-810.

<b>survey_rule_code</b>	<b>error_message</b>
810 AND	Company Name cannot be blank.
810 ADA	Address line cannot be blank.
810 ADC	City cannot be blank.
810 ADS	State cannot be blank.
810 ADS	Invalid State code.
810 AND	Zip cannot be blank.
810 INC	Inputs to Dist. units (990) reported yet no Operable Capacity (401) reported.
810 I>T	Gross inputs greater than total inputs.
810 CU1	Crude Oil Capacity Utilization Rate (codes 990 and 401) is greater than 120%.
810 TQE	Total Error. (Codes 399 plus 400 should equal 401).
810 TQE	Subtotal Error. Receipts of Crude Oil (050) should equal the total of Domestic (010) and Foreign (020) Crude Oil.
810 P>T	Receipts of Alaskan Crude Oil (011) is greater than Domestic Crude Oil (010). The value for Alaskan Crude should be included in the Domestic Crude Oil value.
810 CLI	Line Imbalance. For Crude Oil (050), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Ethane (110), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Propane (231), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Normal Butane (232), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Isobutane (233), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Pentanes Plus (220), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.
810 CLI	Line Imbalance. For Total Other Hydrocarbons (090), Ending Stocks should equal Beginning Stocks + Receipts - Inputs - Shipments - Use Loss.

810	CLI	Line Imbalance. For Total Unfinished Oils (812), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Reformulated Motor Gasoline (150), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Oxygenated Motor Gasoline (151), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Other Finished Gasoline (152), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Motor Gasoline Blending Components (134), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Finished Aviation Gasoline (111), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Aviation Gasoline Blending Components (112), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Special Naphthas (051), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Naphtha-Type Jet Fuel (211), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Total Kerosene-Type Jet Fuel (213), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Kerosene (311), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Total Distillate Fuel Oil (411), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Total Residual Fuel Oil (511), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Total Lubricants (854), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Asphalt and Road Oil (931), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Wax (070), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.

810	CLI	Line Imbalance. For Marketable Petroleum Coke (021), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Catalyst Petroleum Coke (022), Fuel Use and Losses should equal Production.
810	P>T	Part greater than total. Inputs of Ethylene (631) cannot exceed Inputs of Ethane (621).
810	P>T	Part greater than total. Production of Ethylene (631) cannot exceed Production of Ethane (621).
810	CLI	Line Imbalance. For Ethane (621), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	P>T	Part greater than total. Inputs of Propylene (632) cannot exceed Inputs of Propane (622).
810	P>T	Part greater than total. Production of Propylene (632) cannot exceed Production of Propane (622).
810	CLI	Line Imbalance. For Propane (622), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	P>T	Part greater than total. Inputs of Butylene (633) cannot exceed Inputs of Butane (623).
810	P>T	Part greater than total. Production of Butylene (633) cannot exceed Production of Butane (623).
810	CLI	Line Imbalance. For Normal Butane (623), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	P>T	Part greater than total. Inputs of Isobutylene (634) cannot exceed Inputs of Isobutane (615).
810	P>T	Part greater than total. Production of Isobutylene (634) cannot exceed Production of Isobutane (615).
810	CLI	Line Imbalance. For Isobutane (615), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Naphtha Petrochemical Feedstocks (822), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Other Oil-type Petrochemical Feedstocks (824), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Line Imbalance. For Misc. Non-Fuel Use Products (097), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.

810	CLI	Line Imbalance. For Misc. Fuel Use Products (098), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
810	CLI	Total Imbalance. Total (999) Inputs should equal Total (999) Production.
810	TQE	Subtotal Error. Inputs of Total Other Hydrocarbons (090), must equal the sum of its subordinate products (094, 141,142, 143, 144, 145,146, 444).
810	CLI	Subtotal Error. Ending Stocks of Total Other Hydrocarbons (090), must equal the sum of its subordinate products (094, 141,142, 143, 144, 145,146, 444).
810	CLI	Subtotal Error. Ending Stocks of Total Unfinished Oils (812), must equal the sum of its subordinate products (820, 830, 840, 850).
810	TQE	Subtotal Error. Total Inputs of Kerosene-Type Jet Fuel (213) must equal the sum of Inputs of Commercial (217) and Military (218) Jet Fuels.
810	TQE	Subtotal Error. Total Production of Kerosene-Type Jet Fuel (213) must equal the sum of Production of Commercial (217) and Military (218) Jet Fuels.
810	TQE	Subtotal Error. Total Inputs of Distillate Fuel Oil (411) must equal the sum of Inputs of Low- (461) and High-Sulfur (462) Fuel Oils.
810	TQE	Subtotal Error. Total Production of Distillate Fuel Oil (411) must equal the sum of Production of Low- (461) and High-Sulfur (462) Fuel Oils.
810	TQE	Subtotal Error. Total Ending Stocks of Distillate Fuel Oil (411) must equal the sum of Ending Stocks of Low- (461) and High-Sulfur (462) Fuel Oils.
810	TQE	Subtotal Error. Total Inputs of Residual Fuel Oil (511) must equal the sum of Inputs of Low- (508), Medium (509) and High-Sulfur (510) Residual Fuel Oils.
810	TQE	Subtotal Error. Total Production of Residual Fuel Oil (511) must equal the sum of Production of Low- (508), Medium (509) and High-Sulfur (510) Residual Fuel Oils.
810	TQE	Subtotal Error. Total Ending Stocks of Residual Fuel Oil (511) must equal the sum of Ending Stocks of Low- (508), Medium (509) and High-Sulfur (510) Residual Fuel Oils.
810	TQE	Subtotal Error. Total Inputs of Lubricants (854)) must equal the sum of Inputs of Naphthenic (852) and Paraffinic (853) Lubricants.
810	TQE	Subtotal Error. Total Production of Lubricants (854) must equal the sum of Production of Naphthenic (852) and Paraffinic (853) Lubricants.
810	GAL	Both Processing Gain (911 Inputs) and Processing Losses (911 Production) were reported. Report only one, as appropriate.
810	GLG	Processing Gain (911 Input) should be less than or equal to 10% of the sum of Crude Inputs (050) and net Unfinished Oils Inputs (812 inputs less 812 production).
810	GLG	Processing Loss (911 Input) should be less than or equal to 10% of the sum of Crude Inputs (050) and net Unfinished Oils Inputs (812 inputs less 812 production).

810	TQE	Total Error. Total (999) Inputs does not equal the sum of all Inputs, including Processing Gain (911).
810	TQE	Total Error. Total (999) Production does not equal the sum of all Production including Production Loss (911).
810	CLI	Line Imbalance. For Still Gas (045), Production should equal Receipts - Inputs - Shipments - Use Loss.
810	SGI	Sulfur values were reported for both 030 and 040. Report only one.
810	SGI	Sulfur not reported for Receipts (030), yet API Gravity was reported. You must report both or neither.
810	SGI	API Gravity not reported for Receipts (030), yet Sulfur was reported. You must report both or neither.
810	SGI	Sulfur not reported for Inputs (040), yet API Gravity was reported. You must report both or neither.
810	SGI	API Gravity not reported for Inputs (040), yet Sulfur was reported. You must report both or neither.
810	SGI	API Gravity values were reported for both 030 and 040. Report only one.
810	SGI	Sulfur Content for Crude Oil Receipts (030) cannot be reported if Crude Oil Receipts (050) and Crude Oil Inputs (050) is zero.
810	SGI	Sulfur Content for Crude Oil Inputs (040) cannot be reported if Crude Oil Receipts (050) and Crude Oil Inputs (050) is zero.
810	SGI	API Gravity for Crude Oil Receipts (030) cannot be reported if Crude Oil Receipts (050) and Crude Oil Inputs (050) is zero.
810	SGI	API Gravity for Crude Oil Inputs (040) cannot be reported if Crude Oil Receipts (050) and Crude Oil Inputs (050) is zero.
810	SGI	Sulfur Content or API Gravity (030) not reported for Crude Receipts (050).
810	SGI	Sulfur Content or API Gravity (040) not reported for Crude Inputs (050).
810	RCS	Invalid value for Sulfur Content at Receipts (030); must be between 0 and 6.00%.
810	RCS	Invalid value for Sulfur Content at Inputs (040); must be between 0 and 6.00%.
810	RCG	Invalid value for API Gravity at Receipts (030); must be between 10 and 55 degrees.
810	RCG	Invalid value for API Gravity at Inputs (040) be between 10 and 55 degrees.
810	SGI	Sulfur Content not reported; yet Crude Receipts and Inputs (050) reported.
810	SGI	API Gravity not reported; yet Crude Receipts and Inputs (050) reported.

**File Format**

The Import Data option of the Survey Utilities Menu imports data from an ASCII (text) file to the PEDRO database for the EIA-810 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>810</b>
4-13	10-digit respondent ID number
14-15	2-digit month code: 01-12 (06=June, etc.)
16-17	2-digit year code (02=2002, etc.)
18-19	blank
20-26	4-character cell label followed by 3 blanks
27-29	3-digit product code
30-34	5-digit quantity in thousands of barrels, unless otherwise specified
30-35	6-digit quantity for <b>Product Codes</b> 399, 400, and 401

**Cell Labels****Section 1 - Refinery Activity**

INPT	Gross or Fresh Feed input - <b>Product Codes</b> 990, 491, 492, and 493
CAP	Operating, Idle, or Total Operable Capacity - <b>Product Codes</b> 399, 400, and 401
RECS	Weighted Average Sulfur Content Receipts - <b>Product Code</b> 030. Value must contain the decimal
RECA	Weighted Average API Gravity Receipts - <b>Product Code</b> 030. Value must contain the decimal
INPS	Weighted Average Sulfur Content Inputs - <b>Product Code</b> 040. Value must contain the decimal
INPA	Weighted Average API Gravity Inputs - <b>Product Code</b> 040. Value must contain the decimal

**Sections 2, 3, & 4 - Refinery Operations**

BSTO	Stocks Beginning of Month
GREC	Receipts During Month
INPT	Inputs During Month
PROD	Production During Month
SHIP	Shipments During Month
USEL	Refinery Fuel Use and Losses During Month
ESTO	Stocks End of Month

**Product Codes****Section 1 - Refinery Activity**

990 Gross Input to Atmospheric Crude Oil Distillation Units

Fresh Feed Input to Downstream Processing Units

491 Catalytic Cracking Units  
 492 Catalytic Hydrocracking Units  
 493 Delayed and Fluid Coking Units

Operable Capacity of Atmospheric Crude Oil Distillation Units

399 Operating  
 400 Idle  
 401 Total Operable

Sulfur Content and API Gravity of Crude Oil

030 Receipts  
 040 Inputs

**Section 2 - Refinery Operations**Crude Oil (including lease condensate)

050 Crude Oil Total  
 010 Domestic Crude Oil (including Alaskan)  
 020 Foreign Crude Oil  
 011 Alaskan Crude Oil

Products of Natural Gas Processing Plants

110 Ethane  
 231 Propane  
 232 Normal Butane  
 233 Isobutane  
 220 Pentanes Plus

Other Hydrocarbons, Hydrogen and Oxygenates

090 Other Hydrocarbons, Hydrogen and Oxygenates, Total  
 094 Other Hydrocarbons and Hydrogen  
 141 Fuel Ethanol  
 142 Ethyl tertiary butyl ether (ETBE)  
 144 Methyl tertiary butyl ether (MTBE)  
 445 All Other Oxygenates

Unfinished Oils

812 Unfinished Oils, Total  
 820 Naphthas and Lighter  
 830 Kerosene and Light Gas Oils  
 840 Heavy Gas Oils  
 850 Residuum

098 Fuel Use

Inputs (Gain) or Production (Loss)

911 Inputs or Production

Total

999 Total

### Sample Importation File

The following sample file contains data for respondent **000000810** for the month of **April, 2004 (0404)**. As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-811  
Monthly Bulk Terminal Report**

**Edit Criteria**

The following are the Edit Criteria for the EIA-811.

<b>survey_rule_code</b>	<b>error_message</b>
811 AND	Company Name cannot be blank.
811 ADA	Address line cannot be blank.
811 ADC	City cannot be blank.
811 ADS	State cannot be blank.
811 ADS	Invalid State code.
811 AND	Zip cannot be blank.
811 TQE	Total Quantity Error. The U.S. Total for Reformulated Motor Gasoline (150) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Oxygenated Motor Gasoline (151) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Other Finished Motor Gasoline (152) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Blending Components (134) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Finished Aviation Gasoline (111) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Special Naphthas (051) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Kerosene (311) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Naphtha-Type Jet Fuel (211) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Kerosene-Type Jet Fuel, TOTAL (213) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Low Sulfur Distillate Fuel Oil (461) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for High Sulfur Distillate Fuel Oil (462) must equal the sum of values for reported states.
811 TQE	Total Quantity Error. The U.S. Total for Lubricants (854) must equal the sum of values for reported states.

811	TQE	Total Quantity Error. The U.S. Total for Asphalt and Road Oil (931) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Miscellaneous Products (888) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Residual Fuel Oil, Under 0.31% Sulfur (508) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Residual Fuel Oil, 0.31%-1% Sulfur (509) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Residual Fuel Oil, Over 1% Sulfur (510) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Pentanes Plus (220) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Ethane/Ethylene (110) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Propane/Propylene (231) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Butane/Butylene (232) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Isobutane/Isobutylene (233) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Fuel Ethanol (141) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for ETBE (142) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for MTBE (144) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for TAME (145) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for TBA (146) must equal the sum of values for reported states.
811	TQE	Total Quantity Error. The U.S. Total for Other Oxygenates (444) must equal the sum of values for reported states.

**File Format**

**EIA-814  
Monthly Imports Report**

Edit Criteria

The following are the Edit Criteria for the EIA-814.

<b>survey_rule_code</b>	<b>error_message</b>
814 AND	Company Name cannot be blank.
814 ADA	Address line cannot be blank.
814 ADC	City cannot be blank.
814 ADS	State cannot be blank.
814 ADS	Invalid State code.
814 AND	Zip cannot be blank.
814 UPC	Port/Processor Location Mismatch. You have entered an unlikely combination of Port and Processor locations.
814 NGR	Value for API Gravity is Required. For the commodity code you selected, you must enter a non-zero value for API Gravity.
814 NSR	Value for Sulfur Content is Required. For the commodity code you selected, you must enter a non-zero value for Sulfur Content.
814 FTC	Crude Country Mismatch. Crude imports are unlikely for the country you selected.
814 CCC	Port/Country Mismatch. You can only receive imports from Canada into the Port you entered.
814 NCP	Processing City Required. For the commodity code you selected, you must enter a city in which the processing facility is located.
814 NCP	Processing state required. For the commodity code you selected, you must enter a processing state.
814 NCP	Processing facility required. For the commodity code you selected, you must enter a processing facility (a company name).
814 TLE	Total Number of Line entries reported must equal the number of lines reported in the Detail Tab.
814 TQE	Total Quantity Error. Total Quantity Reported in the Detail Tab must equal the sum of individual quantities reported.
814 NQR	Quantity Required. You must provide a quantity for all imports lines.
814 CCW	Port/Country Mismatch. You cannot receive imports from Canada into the Port you entered.

**File Format**

The Import Data Option of the Survey Utilities Menu Imports data from an ASCII (text) file to the PEDRO database for the EIA-814 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>814</b>
4-13	10-digit respondent ID number (shown IIIIIIIII)
14-15	2-digit month code: 01-12 (06=June, etc. shown as MM)
16-17	2-digit year code: 90-91 (90=1990, etc. shown as YY)
18-19	blank
20-26	7-character cell label (shown as LLLLLLL)
27-29	3-digit line number (shown as NNN)
30-31	2-character state code for cell labels PORTSTA & PROSTAT (Shown as QQ)
30-33	4-digit port of entry code for cell label PORTNUM. Optional alternative to PORTCTY and PORTSTA (shown as QQQ)
30-34	5-character value for cell label COMMODT, or 5-digit quantity in thousands of barrels. Cell labels for SULFURW and APIGRAV must contain the decimal (shown as QQQQQ)
30-59	30-character value for cell labels: PORTCTY, PRONAME, PROCITY and COUNTRY (Shown as Q's)

**Cell Labels****Product Codes**

Asphalt and Road Oil	ASPHL
Aviation Gasoline	AVGAS
Aviation Gasoline Blending Components	AVGBC
Butylene	BUTL
Crude Oil (including Lease Condensate)	CRUDE
Crude Oil Burned as Fuel	CRDFL

**Distillate Fuel Oil:****Bonded**

Distillate Fuel Oil 15 ppm Sulfur and Under	BDISU
Distillate Fuel Oil Greater than 15 ppm Sulfur to 500 ppm Sulfur (inclusive)	BDISL
Distillate Fuel Oil Greater than 500 ppm Sulfur to 2000 ppm Sulfur (inclusive)	BDISH
Distillate Fuel Oil Greater than 2000 ppm Sulfur	BDISG

**Other**

Distillate Fuel Oil 15 ppm Sulfur and Under	DISU
Distillate Fuel Oil Greater than 15 ppm Sulfur to 500 ppm Sulfur (inclusive)	DISL
Distillate Fuel Oil Greater than 500 ppm Sulfur to 2000 ppm Sulfur (inclusive)	DISH
Distillate Fuel Oil Greater than 2000 ppm Sulfur	DISG
Ethane	ETHN
Ethylene	ETHL
Isobutane	ISBTN
Isobutylene	ISBTL
Kerosene	KERO

**Kerosene-Type Jet Fuel:**

Domestic	KEROJ
Bonded	BKERJ
Lubricants	LUBES
Miscellaneous Products	MISC

**Motor Gasoline Blending Components:**

RBOB for Blending with Ether	RBOBE
RBOB for Blending with Alcohol	RBOBA
CBOB	CBOB
GTAB, Reformulated	GTABR
GTAB, Conventional	GTABC
All Other	BCOTH

**Motor Gasoline**

Reformulated, blended with ether	MGRFE
Reformulated, blended with alcohol	MGRFA
Reformulated, non-oxygenated	MGRNO
Conventional, blended with alcohol	MGCWA
Conventional, other	MGCOT

**Naphtha-Type Jet Fuel:**

Normal Butane	BUTN
Other Hydrocarbons/Hydrogen	OHCHY

**Oxygenates:**

Ethyl tertiary butyl ether	ETBE
Fuel Ethanol	FETH
Methanol	METH
Methyl tertiary butyl ether	MTBE
Pentanes Plus	PENT +

**Petrochemical Feedstocks:**

Naphtha<401°F End-Point	NFEED
Other Oils $\geq$ 401°F End-Point	OFEED
Petroleum Coke	COKE
Propane	PROP
Propylene	PROPL

**Residual Fuel Oil:**

Domestic	RESID
Bonded	BRESID
Special Naphthas	SNAPH

**Unfinished Oils:**

Naphthas and Lighter (<401°F End-Point)	UNAPH
Kerosene and Light (401°F-650°F End-Point)	ULITE
Heavy Gas Oils (651°F-1000°F End-Point)	UHEVY
Residuum (>1000°F End-Point)	URSID
Wax	WAX

**Sample Importation File**

The following sample file contains data for company 555555401 for the months of August and September 2001 (0801 and 0901, respectively). It also contains data for respondent 555555402 for September 2001. As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation. Data over 14 months old must not be imported into PEDRO as this will result in an error.

**Sample Importation File**

The following sample file contains the data for respondent **000000815** for the months of January **2004** and February **2004 (0104 and 0204, respectively)**. As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

**EIA-816  
Monthly Natural Gas Liquids Report**

**Edit Criteria**

The following are the Edit Criteria for the EIA-816.

<b>survey_rule_code</b>	<b>error_message</b>
816 AND	Company Name cannot be blank.
816 ADA	Address line cannot be blank.
816 ADC	City cannot be blank.
816 ADS	State cannot be blank.
816 ADS	Invalid State code.
816 AND	Zip cannot be blank.
816 BII	Isobutane processing gain greater than 5 percent.
816 BII	Isobutane processing loss greater than 5 percent.
816 CLI	Line Imbalance. For Ethane (110), Ending Stocks should equal Beginning Stocks + Receipts + Production - Shipments - Use Loss.
816 CLI	Line Imbalance. For Propane (231), Ending Stocks should equal Beginning Stocks + Receipts + Production - Shipments - Use Loss.
816 CLI	Line Imbalance. For Normal Butane (232), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.
816 CLI	Line Imbalance. For Isobutane (233), Ending Stocks should equal Beginning Stocks + Receipts + Production - Shipments - Use Loss.
816 CLI	Line Imbalance. For Pentanes Plus (220), Ending Stocks should equal Beginning Stocks + Receipts - Inputs + Production - Shipments - Use Loss.

**File Format**

The Import Data option of the Survey Utilities Menu imports data from an ASCII (text) file to the PEDRO database for the EIA-816 Survey.

<u>COLUMN</u>	<u>DESCRIPTION</u>
1-3	3-digit EIA form number: <b>816</b>
4-13	10-digit respondent ID number
14-15	2-digit month code : 01-12 (06 = June, etc.)
16-17	2-digit year code (02=2002, etc.)
18-19	blank
20-23	4-character cell label for product codes not equal to 105. 2-character cell label followed by 2 blanks for product code 105
24-27	4-digit location code; used for product code 105
28-30	3-digit product code
31-35	5-digit quantity in thousands of barrels

**Cell Labels****Section 1-Natural Gas Liquids Activity**

BSTO	Stocks Beginning of Month
INPT	Inputs During Month
SHIP	Shipments During Month
USEL	Plant Fuel Use and Losses During Month
GPRO	Production During Month
ESTO	Stocks End of Month
GREC	Receipts During Month

**Section 2-Natural Gas Activity**

GC	Volume of Natural Gas Received During the Month
VF	Plant Fuel Use/Vented and Flared
NR	Nonhydrocarbon Gases Removed
SK	Shrinkage (from liquids produced)
RI	Volume of Natural Gas Returned for Reinjections During the Month
SC	Volume of Residue Gas (shipped to pipeline) During the Month

**Product Codes****Section 1-Natural Gas Liquids Activity**

110	Ethane
231	Propane
232	Normal Butane
233	Isobutane
220	Pentanes Plus

**Section 2-Natural Gas Activity**

105	Volume of Natural Gas Received During the Month
105	Plant Fuel Use/Vented and Flared During the Month
105	Nonhydrocarbon Gases Removed During the Month
105	Shrinkage (from liquids produced) During the Month
105	Volume of Natural Gas Returned for Reinjections During the Month
105	Volume of Residue Gase (shipped to pipeline) During the Month

**Sample Importation File**

The following sample file contains data for respondent **000000816** for the month of **December 2004 (1204)**. As shown, the file may contain data for multiple respondents and multiple months. The records do not need to be in any particular order as the program will sort them into the required order before importing them into the PEDRO system. For example, the last line of data could be moved to the first line and this would not change the importation.

# **PC Electronic Data Reporting Option (PEDRO) System User's Guide**

## **Appendix B**

### **PEDRO Patches**

**Appendix B  
Table of Contents**

PEDRO Patches ..... B-1

### PEDRO Patches

Occasionally, updates to the PC Electronic Data Reporting Option (PEDRO) software are required that are not significant enough to justify a complete recreation and mailout of the software for every user. Instead, a "patch" is developed to update and/or correct the system. A patch is a bundled file (or files) that is sent out to PEDRO users to update the system without completely replacing or reinstalling PEDRO. A list of all PEDRO patches created and distributed in 2004 and 2005, is shown below:

Date Fixed	Surveys Affected	Explanation
02/26/2004	EIA-811, EIA-182, EIA-810, EIA-814, EIA-800, EIA-815	These fixes involved the product codes and cell labels, and correcting them to the right values. The current list of import values and edits that are contained in this User's Guide's Appendix A are the correct ones.
03/15/2004	EIA-815	When a PEDRO user tried to modify existing survey data, the form cells were locked.
03/17/2004	EIA-814	Validation total quantity edit: Total quantity edit checks were referencing the wrong cells on the EIA-814 form, causing incorrect error messages to be displayed.
03/17/2004	EIA-817	Validation messages: Edit checks were referencing the wrong cells on the EIA-817 form, causing incorrect error messages to be displayed.
04/06/2004	EIA-782A	This fix was related to the wholesale and retail cells on the form. These cells were switched: wholesale was being saved to retail, and retail was being saved to wholesale.
04/06/2004	EIA-14	EIA-14 invalid PADD code value: PADD code value being created was not correct. Fixed to create the correct PADD code value.
04/07/2004	EIA-802	There was a trigger date for the EIA-805 setup which indicated to the system when EIA-805 should be made accessible for entry/maintenance to the users. This trigger did not work successfully and the users were locked out of the form.
04/08/2004	EIA-800	The definitions of the product codes 122, 123, 139, 120, 121, and 138 changed, which would allow negative entry for these product codes. PEDRO was preventing negative entries for these product codes. Fixed PEDRO to allow for negative entries for these product codes.
04/19/2004	EIA-782C	The survey form EIA-782C sometimes caused a SQLAnywhere database error when selecting a state to enter survey data for. This was fixed.
04/30/2004	EIA-810	The EIA-810 edits were not referencing the correct grid cells when evaluating the edits. All EIA-810 edits and their cell references were reviewed and corrected.

<b>Date Fixed</b>	<b>Surveys Affected</b>	<b>Explanation</b>
<b>05/03/2004</b>	EIA-801	When the respondent created a survey transmission file for transmission to API, the file contained duplicated entries for the data.
<b>10/06/2004</b>	EIA-816	Survey values on the EIA-816 form were being truncated and the product code had changed after the PEDRO 6.1 release.
<b>03/01/2005</b>	EIA-182	For some respondents, the EIA-182 survey form contained a blank form when they tried to create and enter data for the January 2005 report period. This fix did not entail script changes. What probably happened was that the initial PEDRO 6.1 installation/upgrade, performed by the respondent, did not fully complete, causing this error. The programmer has been emailing the version of this form that he has, which has corrected the problem for the respondents.
