Finding of No Significant Impact	A
Frontispiece	i
Glossary and Acronyms	iii
Contents	ix
Chapter 1 — Purposes of and Need for Action	1
<i>Purposes of and Need for Action</i>	<i>1</i>
<i>Proposed Action and Scope of Work</i>	<i>3</i>
<i>Background</i>	<i>5</i>
Authority	<i>5</i>
Rogue River Basin Project Description	<i>5</i>
Early Powerplant/Wasteway Designs	<i>5</i>
Wasteway Construction and Modification	<i>6</i>
<i>Construction Permits</i>	<i>6</i>
<i>Rights-of-Way/Flowage Easements and Wasteway Access</i>	<i>7</i>
<i>A Decision to Make</i>	<i>9</i>
<i>Scoping Process and Issues Identified</i>	<i>9</i>
Land Ownership and Access	<i>10</i>
Geologic Features	<i>10</i>
Water	<i>10</i>
Vegetation	<i>10</i>
Fish, Wildlife, and Aquatic Resources	<i>11</i>
Social Aspects	<i>11</i>
Alternatives and Study Types	<i>11</i>
Quality of Analyses	<i>12</i>
Management and Infrastructure	<i>12</i>
Issues Outside the Purposes of and Need for Action	<i>12</i>
Chapter 2 — Alternatives	15
<i>Future Diversions Through the Wasteway</i>	<i>15</i>
<i>Alternatives Considered But Eliminated From Further Consideration</i>	<i>15</i>
<i>Alternative 1 – No Action</i>	<i>16</i>
<i>Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering</i>	<i>16</i>
Acquiring Additional Rights-of-Way/Flowage Easements	<i>16</i>
Landowner Negotiations	<i>16</i>
Data Collection	<i>17</i>
Sections 32 and 5.....	<i>17</i>
Sections 6 and 1.....	<i>17</i>
Using Data.....	<i>17</i>
Collecting Further Data	<i>18</i>
Bioengineering Techniques.....	<i>18</i>
Vegetation Selection	<i>18</i>
Stabilizing Infrastructures	<i>18</i>
Bioengineering Advantages	<i>22</i>

Standard Engineering Techniques.....	22
Access Road.....	23
Route	23
Road Specifications.....	24
Construction	25
Use of the Road	25
Vegetation Cuttings and Removal.....	26
Along the Wasteway	26
Along the Access Road	26
Proposed Work Sequence	27
Minimizing Construction Impacts.....	28
Inspection and Maintenance.....	28
<i>Alternative 3 – Bioengineering Only</i>	<i>29</i>
Rights-of-Way/Flowage Easements, Negotiations, and Data Collection	29
Bioengineering Techniques.....	29
Access Road.....	29
Vegetation Cuttings and Removal.....	29
Proposed Work Sequence	30
Minimizing Construction Impacts.....	30
Inspection and Maintenance.....	30
<i>Alternative 4 – Standard Engineering Only.....</i>	<i>30</i>
Rights-of-Way/Flowage Easements, Negotiations, and Data Collection.....	30
Standard Engineering Techniques.....	30
Access Roads	31
Vegetation Removal.....	31
Along the Wasteway	31
Along Access Roads.....	32
Proposed Work Sequence	32
Minimizing Construction Impacts.....	32
Inspection and Maintenance.....	32
Chapter 3 – Affected Environment and Environmental Consequences	35
<i>Geology.....</i>	<i>35</i>
Affected Environment.....	35
Wasteway Erosion and Landslides	36
Reclamation’s Geologic and Geotechnical Studies	36
Privately Completed Studies	36
<i>Hicks Reports.....</i>	<i>36</i>
<i>1999 Tyler Creek Monitoring</i>	<i>37</i>
Future Detailed Geologic or Geotechnical Studies	38
Environmental Consequences	38
Alternative 1 – No Action	38
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	38
Alternative 3 – Bioengineering Only	39
Alternative 4 – Standard Engineering Only	39
Cumulative Effects.....	40
Mitigation.....	40
<i>Water Quality</i>	<i>40</i>
Affected Environment.....	41
Water Temperature.....	41
Sediments	43
Nutrients	43
Drinking Water.....	44
Environmental Consequences	45
Alternative 1 – No Action	45
Alternative 2 (Preferred Alternative) – Bioengineering Combined with Standard Engineering	45

Alternative 3 – Bioengineering Only	46
Alternative 4 – Standard Engineering Only	46
Cumulative Effects	46
Mitigation	46
<i>Wetlands</i>	47
Affected Environment	47
Environmental Consequences	48
Alternative 1 – No Action	48
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	48
Alternative 3 – Bioengineering Only	48
Alternative 4 – Standard Engineering Only	49
Cumulative Effects	49
Mitigation	49
<i>Vegetation</i>	49
Affected Environment	49
Environmental Consequences	52
Alternative 1 – No Action	52
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	52
Alternative 3 – Bioengineering Only	52
Alternative 4 – Standard Engineering Only	52
Cumulative Effects	53
Mitigation	53
<i>Fish and Wildlife</i>	53
Affected Environment	54
Fish	54
Amphibians and Reptiles	55
Birds	55
Mammals	55
Environmental Consequences	56
Alternative 1 – No Action	56
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	56
Alternative 3 – Bioengineering Only	56
Alternative 4 – Standard Engineering Only	56
Cumulative Effects	57
Mitigation	57
<i>Threatened and Endangered Species</i>	57
Gentner's Mission-Bells	58
Affected Environment	58
Environmental Consequences	59
Alternative 1 – No Action	59
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	59
Alternative 3 – Bioengineering Only	59
Alternative 4 – Standard Engineering Only	59
Bald Eagle	59
Affected Environment	59
Environmental Consequences	60
Alternative 1 – No Action	60
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	61
Alternative 3 – Bioengineering Only	61
Alternative 4 – Standard Engineering Only	61
Northern Spotted Owl	61
Affected Environment	61
Environmental Consequences	62
Alternative 1 – No Action	62
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	62
Alternative 3 – Bioengineering Only	62

<i>Alternative 4 – Standard Engineering Only</i>	62
Southern Oregon/Northern California Coasts ESU Coho Salmon	63
Affected Environment	63
<i>Coho Salmon</i>	63
<i>Essential Fish Habitat</i>	63
Environmental Consequences	64
<i>Coho Salmon</i>	64
<i>Essential Fish Habitat</i>	64
Species Comparison Table	65
Cumulative Effects	65
Mitigation	65
<i>Historic Properties</i>	66
Affected Environment	66
Early Occupation of Southwest Oregon	66
Existing Wasteway and Access Right-of-Way Conditions	67
Archeological Investigations	67
Environmental Consequences	70
Alternative 1 – No Action	70
Alternative 2 (Preferred Alternative) – Bioengineering Combined With Standard Engineering	71
Alternative 3 – Bioengineering Only	71
Alternative 4 – Standard Engineering Only	71
Cumulative Effects	71
Mitigation	72
<i>Indian Sacred Sites</i>	73
Affected Environment	73
Environmental Consequences	73
<i>Indian Trust Assets</i>	73
Affected Environment	73
Environmental Consequences	73
<i>Cascade Siskiyou National Monument</i>	74
Affected Environment	74
Environmental Consequences	76
Cumulative Effects	76
Mitigation	76
<i>Environmental Justice</i>	76
Affected Environment	76
Environmental Consequences	77
Chapter 4 — Consultation and Coordination	79
<i>Public Involvement</i>	79
<i>Agency Consultation and Coordination</i>	80
Endangered Species Act of 1973	80
National Historic Preservation Act of 1966, as Amended	80
Bureau of Land Management Coordination	81
<i>Tribal Consultation and Coordination</i>	81
<i>Adjacent Landowners</i>	81
<i>Other Contacts</i>	82
Chapter 5 — Environmental Commitments	83
<i>Soil</i>	83
<i>Water</i>	84
<i>Vegetation</i>	84

<i>Fish and Wildlife</i>	85
<i>Historic Properties</i>	86
<i>Indian Sacred Sites</i>	86
<i>Cascade Siskiyou National Monument</i>	86
Chapter 6 — References	87
<i>Glossary References</i>	87
<i>Chapter 1 References</i>	87
<i>Chapter 2 References</i>	87
<i>Chapter 3 References</i>	87
<i>Chapter 4 References</i>	91
<i>Chapter 5 References</i>	91

Tables

Table 3-1. Vegetation Found in the Local Vicinity of the Work Area	51
Table 3-2. ESA Species Effects.....	65
Table 3-3. 2000 Jackson County, Oregon, Census Statistics.....	77

Figures

Frontispiece. Location Map	i
Figure 1-1. A portion of the area of considerable erosion (June 1997)	2
Figure 1-2. Proposed work area.....	4
Figure 1-3. Berm prevents wasteway flow from entering the area of considerable erosion and directs it into another natural channel.....	6
Figure 1-4. Approximate 2002 land ownership and Reclamation rights-of-way.....	8
Figure 2-1. Near vertical wasteway banks	19
Figure 2-2. Live cribwalls.....	19
Figure 2-3. Vegetated gabions	19
Figure 2-4. Sloughing banks.....	20
Figure 2-5. Tree revetments.....	20
Figure 2-6. Live fascines	20
Figure 2-7. Live stakes	21

Figure 2-8. Brush mattresses	21
Figure 2-9. Example of a small hand-placed rock energy dissipater	21
Figure 2-10. Example of backfill and riprap armament with minimal concrete and metal components	22
Figure 2-11. Middle culvert site where standard engineering techniques would be beneficial	23
Figure 2-12. Bridge site where standard engineering techniques would be beneficial	23
Figure 2-13. Approximate access road alignment	24
Figure 2-14. The 12-foot-wide primitive dirt road, ungraveled and unpaved, would consist of two tracks across existing pasture and connect to an abandoned logging road.....	25
Figure 3-1. Streams near Tyler Creek wasteway exceeding summer water temperature standards [based on 2002 Oregon State 303(d) list]	42
Figure 3-2. Wetlands adjacent to the proposed access road alignment.....	48
Figure 3-3. Tyler Creek wasteway in relation to Klamath-Siskiyou Ecoregion	54
Figure 3-4. Anadromous Fish Distribution Map.....	64
Figure 3-5. Wasteway in relation to Cascade Siskiyou National Monument	75
