United States

I oppose this regulation on telemarketing as affecting the Real Estate industry. This greatly restricts our marketing activities. Example: For sale by owners who advertise their phone numbers either by newspaper or flyers in front of their homes should be able to be called. We should also be able to call a potential home owner if we truly have a buyer for the property. Also any past clients, regardless of how long since last contact. I believe this regulation needs more work as to who, how, & why it should restrict telemarketing.
