

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009

Oak Ridge Environmental Management (EM) Funding

FACTS AT A GLANCE

Background: As a result of the American Recovery and Reinvestment Act (ARRA) signed into law by President Barack Obama on February 16, 2009, the U.S. Department of Energy's Oak Ridge Office has received \$755 million for environmental cleanup projects across the Oak Ridge Reservation.

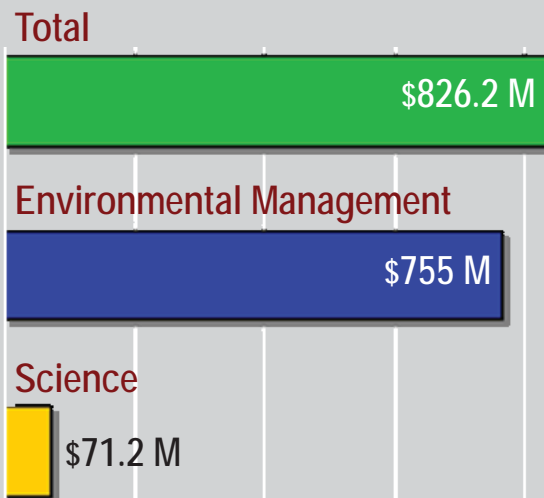

The ARRA funds will be allocated to new cleanup projects at the East Tennessee Technology Park (ETTP), the Oak Ridge National Laboratory (ORNL), the Y-12 National Security Complex, and the existing cleanup operation at the Transuranic Waste Processing Center (TWPC) in Oak Ridge. The Oak Ridge Office acquisition strategy includes the combination of using existing contracts with the Bechtel Jacobs Company, UT-Battelle, B&W Y-12, and EnergyX, which will have subcontracting opportunities: Indefinite Delivery/Indefinite Quantity task orders; and, new set aside prime awards, if needed. In accordance with the Recovery Act, contractors shall, to the maximum extent possible, give a preference to small business in the award of subcontracts.

Project duration: Completion by 2011

Jobs: Up to 1,500

Where will information be posted: www.oakridge.doe.gov/recovery

Where Your Money is Going in Oak Ridge... (in million)

ARRA Funds by Oak Ridge Site

The DOE sites in Oak Ridge that will receive this funding include:

Oak Ridge National Laboratory

This investment proposal will demolish surplus contaminated facilities and remediate contaminated soil at the ORNL. This work will:

Oak Ridge National Laboratory

- Complete demolition and disposition of Buildings 3026 C&D (~20,000 square feet) wooden superstructure and hot cells and demolition preparations of Building 3038 (~8,000 square feet) at Bethel Valley Isotope Facilities.
- Complete legacy material removal and disposition from 4 buildings (~30,000 square feet) in the ORNL Central Campus and Building 2026 Complex (~28,000 square feet).
- Complete demolition and disposition of surplus facilities at ORNL in order to release valuable real estate for redevelopment for science and technology research. Demolitions will include buildings within the 2000 Complex (~55,000 square feet), the General Maintenance Facilities Complex

Building 3026

2000 Complex

(~46,000 square feet), and the Southeast Lab Complex (~24,000 square feet).

- Complete high priority environmental cleanup projects, including Bethel Valley Burial Grounds (7 acres), Bethel Valley Groundwater Early Actions (to include Melton Valley Monitoring Wells).
- Complete demolition and disposition of surplus facilities (~35,000 square feet) in the ORNL Small Facilities project.
- Complete removal action at the Tank W1A project (also known as Corehole 8).

Corehole 8

Y-12 National Security Complex

ARRA funding will render the highest risk facility at the Y-12 National Security Complex (Alpha-5) ready for decontamination & decommissioning (D&D) by removing all legacy material; remediate the most significant source of mercury contamination to surface water at Y-12; and demolish five dilapidated, contaminated buildings. This work will:

Y-12 National Security Complex

- Prepare the highest risk facility at Y-12 (Alpha-5) for accelerated D&D by completing all legacy material disposition (estimated at 1.1 million cubic feet) from approximately 613,000 square feet of floor space.

Alpha-5

- Eliminate the most significant source of off-site mercury transport, and the greatest environmental concern at Y-12, by completing remediation of the Y-12 storm sewers in the

West End Mercury Area (WEMA).

- Complete cleanup of the Y-12 Salvage Yard (7 acres) by removing over 31,000 cubic yards of scrap material.

Y-12 Salvage Yard

- Complete removal of legacy material from the entire second floor of Y-12's Beta-4 building (84,000 square feet).
- Complete cleanup and demolition of contaminated surplus facilities totaling 150,000 square feet, including Building 9211, Building 9769, Building 9220, Building 9224, and Building 9735.

Beta-4

- Complete cleanup and demolition of the contaminated surplus Filter House for Building 9206, eliminating a criticality and Defense Nuclear Facilities Safety Board concern.
- Complete expansion of sanitary landfill for disposal of debris and other materials.

Building 9211

- Expand Environmental Management Waste Management Facility by 500,000 cubic yards to accept more demolition waste.

EMWMF

East Tennessee Technology Park

This investment proposal will prepare for demolition a large surplus nuclear facility at the East Tennessee Technology Park, a former uranium enrichment facility. This work will:

East Tennessee Technology Park

- Complete preparation for demolition of the K-27 Gaseous Diffusion Building (383,000 square feet) by the end of Fiscal Year 2011, including non-destructive assay of diffusion equipment and piping, High Risk Equipment removal, foaming of equipment and piping, and the declaration of criticality incredibility.

K-27 Building

Transuranic Waste Processing Center

This investment proposal will accelerate remote-handled (RH) and contact-handled (CH) Transuranic (TRU) waste treatment on the Oak Ridge Reservation, enabling this waste to be shipped to DOE's Waste Isolation Pilot Plant near Carlsbad, New

Transuranic Waste Processing Center

Mexico for ultimate disposition one year earlier. The facility is currently operating a single CH and RH processing shift. The proposal takes TWPC from the single CH and RH operating shift to multiple CH and RH operating shifts over an extended work week by July 2009. This work will:

Contact-Handled TRU Waste Processing

- Process 400 cubic meters of additional CH Debris by September 30, 2011, completing CH TRU Debris processing for the current inventory.

Remote-Handled TRU Waste Processing

- Process 200 cubic meters of additional RH Debris waste by May 31, 2011, completing RH Debris processing for the current inventory.

TRU Waste Shipment Preparations

Accountability

The Department of Energy will closely monitor how the ARRA funds are used, and the progress will be reported regularly so taxpayers are fully aware that the funds are being used responsibly. Taxpayers can easily watch how the Oak Ridge Office and other agencies across the government are spending the ARRA money on a newly-created Web site, located online at <http://www.Recovery.gov>. Additional information is also available at www.energy.gov/recovery or by contacting the Office of Public Affairs at 865-576-0885.
