Please include the 11-digit Census File Number (CFN) shown in the address box of the report form with any correspondence.

Respondents are not required to respond to any information collection unless it displays a valid approval number from the Office of Management and Budget (OMB). The OMB 8-digit number appears in the upper right corner of this questionnaire.

Report all value figures in thousands of dollars, total number of hours worked by production, development and exploration workers in thousands of hours, and all electricity quantity figures in thousands of kilowatthours for the mining establishment.

WHO SHOULD REPORT?

- A separate report must be filed for each mineral establishment operated by the company during any part of 2007. This includes mines under development and processing plants or tipples under construction. **The report should be completed by the operator of the establishment, whether the operator is the owner or is operating it under lease or contract.**
- If you have not received forms to cover each of your operations, call or write the Census Bureau, describing the activity at the establishments for which you are requesting forms.
- If this questionnaire does not pertain to your type of activity, complete all appropriate items, such as employment, payroll, shipments, etc., of this report. Describe your activities in the Remarks section at the end of the form.

WHAT IS A MINERAL ESTABLISHMENT?

A mineral establishment is a single physical location where mineral operations are performed. It represents a working or group of workings at a given locality in which operations are conducted as a unit or are unified by common management or joint handling of some parts of the mining or processing process.

- Individual shafts, openings, or sites should not necessarily be considered as individual mines.
- Report strip-pit or auger mines and culm-banks separately from underground mines, whenever possible.
- Report plants engaged solely in processing coal mined at other locations separately from the mines

Examples of mineral establishments are:

- mine only (a mine may be an underground, strip-pit, auger, culm-bank, or dredge operation)
- mine and processing plant
- processing plant only
- mines or sites under exploration, development, or maintenance
- plants under construction

Separate reports are required for lease and land acquisitions of mineral rights if they are located in a county different than any establishment operated. Include a designation of the kind of mineral expected to be produced. Such acquisitions may be included in the report of the nearest operating establishment if the establishment is located in the same county as the acquisition and produces the same type of mineral.

HOW TO REPORT FOR ESTABLISHMENTS WITH NO PRODUCTION DURING 2007

Return a completed report for each of your company's mineral establishments that had no production during 2007. Enter "0" in item 22. Report information in the appropriate items, such as custodial employees, inventories, assets, or capital expenditures.

WHAT ACTIVITIES SHOULD BE REPORTED?

INCLUDE

- Operations of a mine together with its associated tipple, shops, auxiliary units, yards, breaker, washery, or other processing plant, and offices
- A processing plant not at the site of the mines served, or operated under separate management from the mines, together with its associated shops, yards, auxiliary units, and offices
- Other associated activities **when carried on at the same physical location** such as:
 - generating energy for the mine or plant (include a central power plant serving two or more mines or plants with the one for which the power plant furnishes the most electric energy)
 - maintenance of mine, plant, and equipment
 - receiving, shipping, storage, research, record keeping, health, safety, cafeteria, and other services

EXCLUDE

- Operation of company stores, boardinghouses, bunkhouses, and recreational facilities
- Separate sales branches, research laboratories, and general administrative offices. Report these on the appropriate Census of Business, Census of Manufactures, or central office or auxiliary forms
- Production of coal chemicals, coke, fuel briquettes, or packaged fuel. Report such operations on Census of Manufactures form

WHAT PERIOD SHOULD EACH REPORT COVER?

- Each report should cover the calendar year 2007.
- If book records are not on a calendar-year basis, carefully prepared estimates are acceptable.
- If your fiscal year covers at least 10 months of calendar-year 2007, and reporting on a calendar-year basis involves considerable cost, you may report on a fiscal-year basis. However, all payroll and hours-worked figures should relate to the calendar year rather than the fiscal year. (Use calendar-year payroll records from your tax records.)
- If an establishment began to operate or ceased to operate during 2007, report only the part of the year that the establishment was in operation.
- If the operator changed during the year, report only for that part of the year that your company operated the establishment. Report in item 3 the appropriate information on changes in **operator** or operational status.
- Specify in the certification, item 30, the exact period that the report covers.

If any of the items requested are maintained in your records only at a divisional or company level, allocate their costs to each establishment for which you received a questionnaire. When determining transfer values of products and materials from one establishment to another (interplant transfers), include, in addition to direct costs of production, a reasonable proportion of "all other costs (company overhead) and profits." The establishments receiving such transfers should report them as purchased coal for processing, supplies, fuels, or electric energy at the same value plus cost of freight and other direct handling charges.  If any of the items are maintained in your records only at a company level, allocate their costs to the mining establishment. You may distribute the total based on the ratio of the payroll of each mining establishment to the total company payroll unless you have developed your own method of making such allocations. Specify the method used and the approximate portion that has been allocated in the REMARKS section at the end of the form.

Include employer's cost for legally required programs and programs not required by law.

Health Insurance – Insurance premiums on hospitals, medical plans, and single service plans such as dental, vision, and prescription drug plans. Include premium equivalents for selfinsured plans and fees paid to third party administrators (TPAs). Do not include employee contributions.

Pension plans

Pension plans that specify the benefit to be paid to employee upon retirement, generally either as a specified amount or a percentage of compensation. Employer contributions are based on actuarial computations that include the employee's compensation and years of service and are not allocated to specific accounts maintained for employees.

b. **Defined contribution plans** – Costs under defined contribution plans. Pension plans that define the employer contributions to a separate account provided for each employee. The employee "benefit" at retirement depends on the amount contributed and the results of the account's activity. Examples include profits sharing plans, money purchase (e.g., 401k, 403b) and stock bonus plans (e.g., ESOPs).

Other – Other fringe benefits (e.g., Social Security, workers' compensation insurance, unemployment tax, state disability insurance programs, life insurance benefits, Medicare).

Item 9 – INVENTORIES

MULTI-ESTABLISHMENT COMPANIES ONLY

If this establishment is part of a multi-establishment company, assign to each establishment those inventories that the establishment is responsible for as if it owned them. In completing the report of a mining establishment or sales branch, **INCLUDE** those inventories that are held elsewhere, such as a warehouse operated by your company or a public warehouse. The inventories of an operating establishment held elsewhere should not be reported on the report of the warehouse where they may be actually stored. Inventories should not be duplicated on establishment reports.

Report the value of all inventories that are attributable to the establishment's operations regardless of where the inventories are held or stored.

In reporting value of inventories for inventories valued on LIFO, use the value of the inventories before calculations to determine LIFO Value and LIFO Reserve. The LIFO reserve (if any) is to be reported separately on item 9B, line 4.

Part B, line 1 – Mined Or Quarried Products

INCLUDE

- stocks of raw products awaiting treatment or preparation that were **mined** at this establishment

Part B, line 2 – Supplies, Parts, Fuels, Etc.

INCLUDE

- stockpiles of minerals **received** from other establishments for further processing
- cost of items to be used for extracting or beneficiating

Part B, line 4 – Amount Of LIFO Reserve

LIFO reserve represents the excess of current period cost over the LIFO carrying value. LIFO reserve is the difference between the current cost (e.g., FIFO) of inventories (gross value) and the LIFO carrying value (net value).

Item 13 – ASSETS, CAPITAL EXPENDITURES, RETIREMENTS, DEPRECIATION

MULTI-ESTABLISHMENT COMPANIES ONLY

If this establishment maintains a tenant relationship with the parent company or one of its subsidiaries and pays "rent" for the use of either its buildings or equipment, exclude the value of this rent from item 14, Rental Payments. Instead, report the gross value of assets made available to this establishment as a result of this "rental" agreement in item 13, as if the establishment owned them.

If this establishment uses buildings or equipment rented directly from other companies, but rental payments are handled centrally at a company or division level, report the share of overhead charged to this establishment or estimate the share of rental charges appropriate to the operations of this establishment in item 14.

Establishments Involved With Leasing Arrangements for Equipment and/or Buildings

 - expenditures capitalized for these projects during 2007 in item 13B
- If the establishment was acquired during the year, report the value at the end of the year (item 13D) as your purchase cost adjusted for capital expenditures (item 13B) and deductions (item 13C) since the time of purchase. Include used assets purchased during the year at their market value at the time of transfer rather than at original book value.

- If your company sold the establishment during the year, report the gross value at the beginning of the year (item 13A) at its acquisition cost. Also report this acquisition cost plus capital expenditures that may have occurred since the beginning of the year and the time of sale in item 13C
- Report gross assets for the end of the year consistently with the gross assets at the beginning of the year and the annual asset changes during the year. Item 13A plus 13B line 4 minus 13C equals 13D.

The quantity of coal shipped, plus that used at the mine or plant, may be greater than the net coal mined if

- (1) run-of-mine (raw) coal was sold or transferred for washing at the other establishments; or
- (2) run-of-mine (raw) coal from other mines was processed at this establishment.
