

TO: All State Agencies/Institutions Directors
FROM: Robin R. Reidman, Risk Manager, State Fleet Services
DATE: September 21, 2006
SUBJECT: Motor Vehicle Collision Report

State Fleet Services experienced a total of 303 reported motor vehicle collisions from July 1, 2005 through June 30, 2006.

The most frequent type of crash continues to be backing. 31 percent of State Fleet collisions during this period were caused by improper backing. Unrecovered collision repair cost is a factor in establishing rental rates for State Fleet vehicles. Backing collisions are almost always preventable.

Safe driving is everyone's concern. No one is immune from a crash. The attached charts and graphs represent the data visually. Please share it with your entire staff.
