

# Balances of Budget Authority

## Budget of the U.S. Government

Fiscal Year 2010

### **GENERAL NOTES**

- All years in the tables are fiscal years.
- Because of rounding, the detailed amounts in tables and charts may not add to the totals.
- Table balances represent end-of-year balances except as specified.

\*This report is available on the Internet at www.budget.gov\*

## BALANCES OF BUDGET AUTHORITY Budget for Fiscal Year 2010

Government agencies are permitted to enter into obligations that result in immediate or future outlays only when the agencies have been granted authority to do so by law. This authority is recorded as budget authority in the year that it first becomes available. Not all budget authority enacted for a fiscal year results in obligations and outlays in the same year. This analysis presents summary information on the unexpended balances of budget authority for the end of 2008, 2009, and 2010 as shown in the 2010 Budget Appendix. The definition of unexpended balances and its two components follows:

- **Unexpended balances** of budget authority are the sum of obligated and unobligated balances.
  - **Unobligated balances** are the amounts of budget authority that have not yet been committed by contract or other legally binding action by the government.
  - **Obligated balances** are the amounts of unpaid obligations (i.e., undelivered orders and accounts payable) that are net of accounts receivable and unfilled customer orders.

Unobligated balances of budget authority may be carried forward from one year to the next only when authority to incur new obligations in a succeeding period is specifically provided in law. Amounts that are obligated are carried as obligated balances until the obligations are paid or the authority is canceled.

Unexpended balances are the result of a lag between the time budget authority becomes available (for example, when an appropriation is enacted) and the actual outlay of funds. Outlays usually occur when the Department of Treasury electronically disburses the funds in payment of an obligation. For most government accounts, the interval between the enactment of appropriations, the obligation of funds, and the related outlays is relatively short.

Unexpended balances consist of three types of accounts: annual, multi-year and no-year accounts.

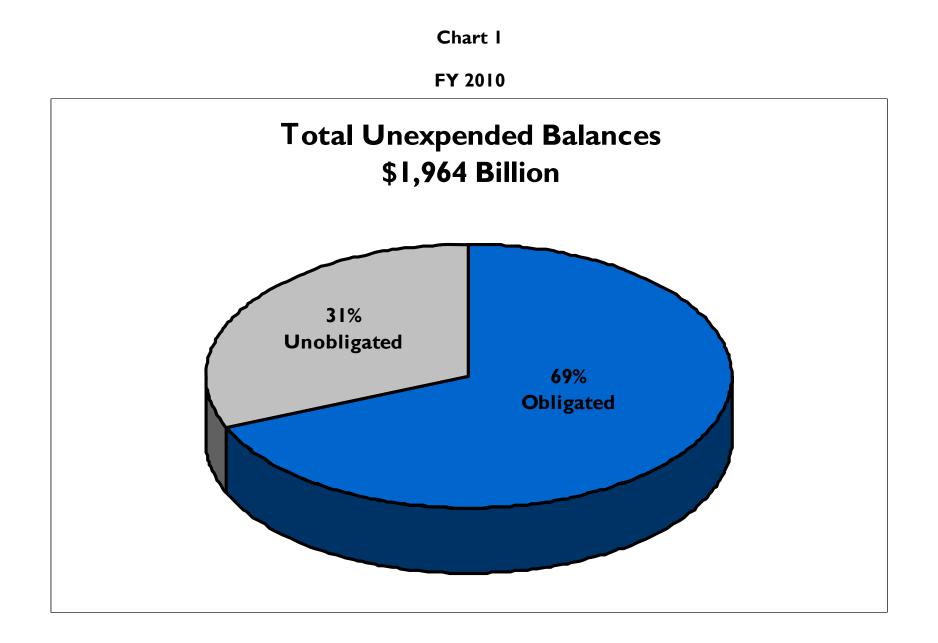

For annual accounts, appropriations are made available for obligation for only one year and any unobligated amounts expire at the end of that fiscal year. However, the obligated, but not yet paid, portions of the expired annual appropriations are normally carried forward for five years during which the balances are not available for new obligations but are available to pay old bills. After the five expired years, the balances are permanently canceled.

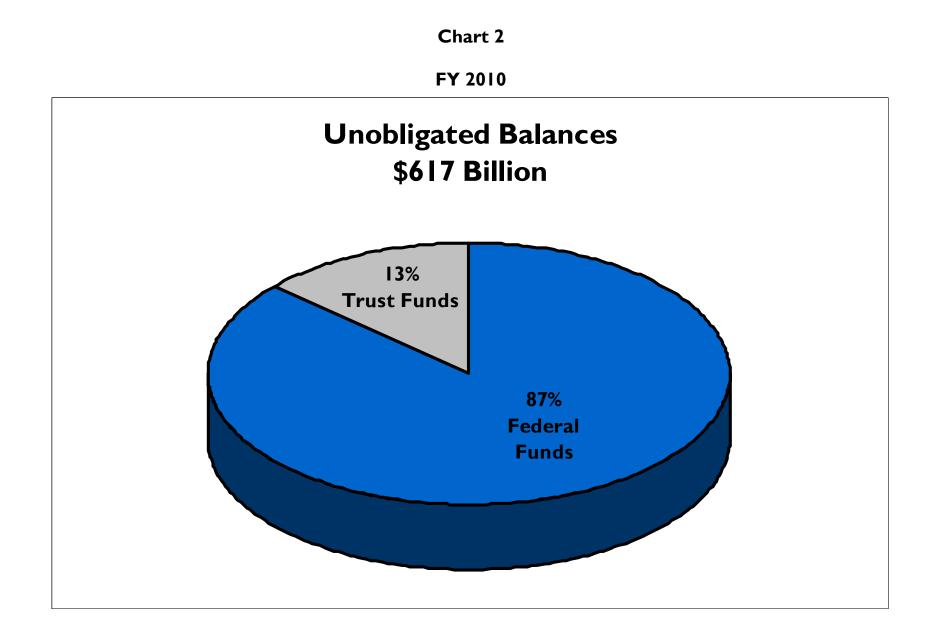

For multi-year accounts, appropriations are made available for more than one fiscal year. When the budget authority of multi-year funds expires the balances are treated the same as the balances of annual accounts. The obligated, but not yet paid, portions are carried forward for five fiscal years, after which the balances are permanently canceled.

For no-year accounts, appropriations are made available until the objectives of the program have been achieved. In these instances, unobligated balances are carried forward and become available for new obligations. No-year authority may be canceled by the head of the agency or the President if the purposes for which the funds were provided have been carried out and there has been no disbursement from the authority for two fiscal years. To the extent that balances have been canceled, old bills can be paid from up to one percent of the balances in any unexpired account available for the same purpose as the canceled accounts.

Total unexpended balances will approach two trillion dollars by the end of 2010. Table 1, Summary of Unexpended Balances, provides a distribution between Federal and Trust funds for 2008, 2009, and 2010. Table 2, Total Unexpended Balances by Agency, provides a distribution of unexpended balances by agencies.

Charts I and 2 provide an overview of the projected unexpended balances at the end of 2010.

## **BRIDGE TABLE**

### Bridge Table for Trust Funds: From Unexpended Balances of Budget Authority to Cash Balances

Federal law designates certain accounts as trust funds. These accounts are authorized to do two things. First, trust funds are authorized to collect receipts or offsetting receipts that are earmarked for specific purposes. Second, trust funds are authorized to obligate or spend those receipts. The receipts or offsetting receipts are deposited in trust fund "receipt" accounts. The amounts authorized to be obligated or spent are credited to trust fund "expenditure" accounts.

Previous tables in this report provide information on the unexpended balances of "budget authority" that are in trust fund "expenditure" accounts as shown in the "Program and Financing" (P&F) schedule printed in the Appendix to the Budget.

#### TRUST FUND UNEXPENDED BALANCES OF BUDGET AUTHORITY

Trust fund balances of budget authority are derived from the information in the P&F schedule which is also know as MAX schedule P in the Budget database. Specifically, the unexpended balances in schedule P consist of balances from the following:

- Amounts appropriated;
- Offsetting collections credited to expenditure accounts; and
- Unfunded contract authority.

The first line in Table 8 presents the total trust fund unexpended balance of budget authority as presented in the previous trust tables in this report.

Balances of amounts *appropriated* represent cash balances. No further legal action is needed to obtain cash to liquidate obligations incurred against appropriations. Balances of offsetting collections credited to expenditure accounts also represent cash balances. Offsetting collections result from laws that authorize the crediting of certain collections of cash (generally from business-like transactions like the selling of stamps) directly to trust expenditure accounts.

<u>Unfunded Contract Authority</u>. In contrast, balances of unfunded contract authority do not represent cash balances. Unfunded contract authority results from laws that provide the authority to obligate the Federal government in *anticipation* of receiving cash at a later date to cover disbursements. The anticipated cash can take the form of an offsetting collection or an appropriation to liquidate the unfunded contract authority.

The line in Table 8 labeled "Subtotal, Unfunded Contract Authority" provides the amounts that must be subtracted from trust fund unexpended balances to get to the amount of trust fund cash balances in trust fund expenditure accounts.

<u>Trust Fund Receipt Accounts</u>. As a general rule, the amounts in trust fund receipt accounts are "cash" balances. The balances of trust fund receipts are derived from the information in the "Special and Trust Fund Receipts" (N) schedule.

#### TRUST FUND CASH BALANCES

The line in Table 8 labeled "Subtotal, Trust Fund Unavailable Receipts" provides the additional amount that must be added to the amount of trust fund cash balances in trust fund expenditure accounts to reach the total trust fund cash balances.

#### TABLE 8. TRUST FUND BRIDGE FROM BALANCES OF BUDGET AUTHORITY TO CASH BALANCES

# CREDIT REFORM – FINANCING ACCOUNTS

## TABLE 9 CREDIT REFORM - FINANCING ACCOUNTS UNOBLIGATED BALANCES

Under the Federal Credit Reform Act of 1990 (FCRA), new account structures were established for post-1991 direct loan obligations and loan guarantee commitments. All estimated subsidy costs for new direct loan obligations and loan guarantee commitments are recorded in accounts that are called "program" accounts. All cash flows for the direct loans and loan guarantees are recorded in separate non-budgetary financing accounts. The net cash flows for these transactions are recorded outside the budget totals as a means of financing the deficit. Hence, these accounts are called "financing" accounts. In other words, only the unreimbursed costs of making or guaranteeing new loans --- the subsidy costs, on a net present value basis, and administrative expenses, on a cash basis --- are counted in the budget totals. The FCRA authorizes financing authority, which permits obligations to be incurred by financing accounts and is parallel to the concept of budget authority. This table presents the unobligated balances of financing authority in the credit financing accounts. The unobligated balances in the direct loan financing accounts are needed to repay the Department of Treasury for the amounts borrowed in the past to make loans. These balances also provide working capital to pay the costs of foreclosing, managing, and selling collateral due to default. The unobligated balances in the loan guarantee financing accounts are needed to pay interest subsidies, claims to lenders when a borrower of a Federal guaranteed loan is delinquent or in default, and to provide working capital to pay the costs of foreclosing, managing to pay the costs of foreclosing, managing, and selling collateral to pay the costs of selling collateral due to default.
