**Franklin N. Corbin, Counselor Specialist  
Oregon Vocational Rehabilitation Division**

**Second Edition  
Summer 1999**

# Preface

This document originated from a graduate project at Southern Oregon University where the author, Franklin Corbin, attended in 1997. Franklin currently works as a VR Counselor Specialist in the Medford office.

VRD Training & Development Services has provided assistance with formatting, layout, technical assistance and distribution of this booklet. As you are aware, web sites are ever changing with new sites being added daily. Mr. Corbin has done his best to keep up with sites that are relevant to the Rehabilitation Professional. If you can contribute to any new additions for future editions, please forward your information to: [franklin.n.corbin@state.or.us](mailto:franklin.n.corbin@state.or.us)

# Introduction

Here is my second of what I hope will be many future editions of this booklet. Computers and the number of users continue to grow to staggering numbers. Just think, in 1981 there were less than 300 computers in use that had internet capability. In 1999, it is estimated that there are more than 65 million people in the United States alone with access to the internet. The future for the internet is endless.

I have completely updated and added many new internet sites and deleted those from the first edition that are no longer functioning. I have added two new additions in the Table of Contents, Financial Resources and Business & Technical Assistance/Home-Based Self-Employment. The later was added due to a recent trend we are seeing toward more consideration of self-employment and technical assistance needs.

Enclosed you will find 185 high-quality internet sites that were selected for use by professional's working with individuals with disabilities. Please be sure to explore the attached links when accessing each site as this will lead you to other valuable resources in your search. **As with edition one, site addresses that are followed by three asterisks (\*\*\*) are sites that I found to be of exceptional content.** Remember that each address must be typed exactly as it appears in this booklet. Many sites are case sensitive (if some letters are capitalized or lower case, you must do the same). Do not type spaces in any internet address.

It's a pleasure to provide this 1999 second edition. I want to thank all of you who were gracious enough to share your feedback and contributions with me in preparation of this edition. I would also like to thank Amy Klaus, who is VRD's Desktop Publisher. This project would not have been possible without her willingness to take it on in the midst of her other daily responsibilities.

I welcome your comments and suggestions. You can e-mail me at [fnc@mailexcite.com](mailto:fnc@mailexcite.com) or at my state office: [franklin.n.corbin@state.or.us](mailto:franklin.n.corbin@state.or.us)
