

MEDICAL EXAMINER REPORTING SOFTWARE

The State Medical Examiner's office has its own software written in-house for investigative reports. We have developed a Runtime version of this program that can be utilized by our County/District Medical Examiners and our Deputy Medical Examiners (Medicolegal Death Investigators). This software allows local data entry into their computer, and then send the information to our office for inclusion into the master file thus eliminating the need to dictate cases over the phone.

If you are currently involved in the Oregon State Medical Examiner program and wish to obtain a copy of this program, please e-mail a request to:

Eugene.Gray@state.or.us

You will be given a download path and a password.

Thank-you,

Eugene Gray
Forensic Administrator
Office of the State Medical Examiner
