notes:

1. FY 2008 is a 10 month figure. The rule takes effect December 1, 2007.
2. Only the incremental costs of FP III have been computed in this analysis. For this reason, the costs under the current rule are displayed as 0. For the same reason, current food costs for individuals who will be served under FP III under the interim rule have been removed from the figures shown for the current rule.
3. The phased-in cost for FY 2008 is 31% of the unadjusted cost. For FY 2009, the phased-in figure is 87% of the unadjusted total. Costs are assumed to phase-in linearly over 18 months. The rule is assumed 1/18th phased in after the first month, 2/18th after the second month, etc. For the 10 months of FY 2008, the average of the first 10 of the factors in this series is equivalent to 31%. For FY 2009, the average of the 7 remaining factors in this series, plus 5 months fully phased in, is equal to 87%.

**Current Rule**

### NOTES

1. The cost of the rule is estimated differently for Food Package III than it is for other packages. In every other food package, some foods are added while others are deleted or reduced in quantity. Under current rules, Food Package III recipients are prescribed special formulas or other medically necessary foods. The new rule does not reduce that benefit. But, it makes available to Package III recipients all of the other Package I-VII foods to which the participants would qualify were it not for their Package III status. Because of the difficulty of estimating the cost of medical foods, and the fact that the cost of medical food prescriptions is ultimately irrelevant to the economic impact of the rule, FNS estimates only the incremental cost of making Package I-VII foods available to Package III recipients. The current cost of Package III in this incremental cost approach is therefore shown as \$0.

Interim Rule
