Introduction

The *Insurance Division Annual Report 1998* is published in two parts:

Part I

Part I includes information about the Insurance Division's mission, organization, revenue and expenditures. It also includes summaries of the financial results of all insurance companies, for each line of insurance.

Part II

Part II includes financial results for property and casualty and life insurance companies by insurer and by line of insurance. Part II is available in printed form, by request to (503) 378-8254, or on the Internet at: http://www.cbs.state.or.us/imd/cbs-ins.html

Insurance Division Organization

Mission

The mission of the Insurance Division is to protect the insurance-buying public by administering and enforcing the Insurance Code.

We ensure the financial soundness of insurers, the availability and affordability of insurance, and the fair treatment of consumers by:

- Advocating for consumer interests on insurance issues,
- · Resolving consumer complaints,
- Investigating and penalizing violations of insurance law,
- Reviewing insurance policies and premium rates for compliance,
- Licensing insurance companies and agents,
- Monitoring insurers for solvency and marketplace conduct, and
- Educating the public on insurance issues.

Administrative Services & Operations Section

In addition to providing administrative support to the Insurance Division, the Administrative Services and Operations Section receives and reviews applications and appointments for agents, firms, and corporations licensed to sell insurance in Oregon. The section establishes licensing requirements for insurance agents, oversees the development and administration of licensing examinations, and processes continuing education course registrations.

Administrative Services and Operations develops legislation and administrative rules, and conducts contested case hearings. The section also is responsible for developing the Insurance Division's budget.

Company Regulation Section

The Company Regulation Section is responsible for the licensing and examination of all domestic and foreign insurers. Company Regulation activities include maintenance of files on approximately 1,600 licensed insurers; financial analysis of

annual and quarterly financial statements; review of applications to transact insurance business in Oregon; collection of insurance taxes from insurers, which amounted to \$58 million in general fund revenue in Calendar Year 1998; supervision of all surplus lines business in Oregon; and maintenance of security deposits by licensed insurers. The section also reviews applications for formation of risk retention and purchasing groups under provisions of the Liability Risk Retention Act of 1986.

Activities include examining the financial condition of all insurers domiciled in Oregon at least once every three years, as well as participating in examinations of other foreign and alien insurers. Additional responsibilities include administration and review of filings for new company formations and applications for mergers and/or acquisitions of domestic insurers. The examinations staff also supervises rehabilitation and liquidation activities involving domestic insurers.

Consumer Protection Section

The Consumer Protection Section assists consumers in resolving inquiries and complaints, investigates and enforces Oregon law, conducts market conduct examinations of insurers, recommends to the director imposition of civil penalties if a law has been violated, recommends suspension or revocation of agent licenses where appropriate, provides voluntary mediation services, and develops educational materials and brochures for consumers.

The Senior Health Insurance Benefits Assistance (SHIBA) program trains volunteers who provide one-on-one counseling assistance to Medicare beneficiaries.

Rates & Forms Section

The Rates & Forms Section reviews insurance policies for fairness and compliance with Oregon law. Property and casualty and health pricing systems are also reviewed to ensure that rates are not excessive or unfairly discriminatory. In some cases, advertising and marketing practices are also reviewed.

Insurance Division revenue and expenditures for fiscal year 1998

Revenue - other funds

Tables

Explanation of Terms Used in Tables

The next several pages show the accounting results of each company for each line of insurance as categorized in the financial reporting format required. These categories do not provide information about some specific insurance coverages (such as products liability) or classes of insureds (such as houses less than five years old). These figures are accounting data intended for use in evaluating the financial condition of each

company. Comparing premiums and losses in this form provides only a rough indication of how appropriately priced each line of business may be for all companies combined. The results reported for a single line, company, and year are subject to considerable variation as well as artificial mechanics of accounting procedures.

- **"Direct"** is the term used to describe insurance transactions between the insurance buyer and the insurance company before or without regard to reinsurance transactions among insurance companies.
- **"Premium written"** is usually defined as premium billed by property and casualty companies. Rules of life insurance accounting require reporting premiums actually collected. This item is a measure of marketing activity in this state for the year.
- **"Premium earned"** is constructed from premium written this year and in previous years, and in some instances, premium to be written in the future for current coverages. It is approximately the pro rata portion of the premium charged for each policy, for the portion of coverage provided, within the calendar year.
- "Unearned premium reserves" are premiums written for future coverage. This might also be understood as the amount an insurer would have to return to policyholders if it canceled all policies in force. This amount of revenue is deferred from earnings to achieve a proper matching with losses and expenses incurred.
- "Losses paid" is the sum of all payments made during the year to, or for, the benefit of insurance claimants. These payments include amounts paid in the current year for claims arising from coverage in prior years, and exclude amounts which will be paid in future years for claims arising from the current year. Hence, this item is not a measure of the actual cost of current coverages, but only of current cash flows.
- "Losses incurred" equals losses paid, plus a year-end estimate of future payments for all current and prior year claims, minus the losses incurred estimate for the preceding year. If these estimates were to be exactly correct, then losses incurred would be the actual cost of all claims on coverage provided during the current year. However, incurred losses reported also includes estimated amounts unpaid for incurred-but-not-reported (IBNR) claims.

- "Losses unpaid" is the insurer's estimate of amounts to be paid in the future for coverage provided in the current or prior years. This includes claims which might not yet have been reported and claims which have not yet been resolved.
- "Dividends paid" is the amount paid to policyholders under participating agreements. These dividends are paid to policyholders after coverage for which they have paid premiums has expired. The premiums for which dividends have been paid in the current year are almost entirely written and earned one to two calendar years before. Hence, dividends paid in 1997 are not strictly comparable to 1997 premiums. Dividends paid to company stockholders are not included.
- "Annuity considerations" are revenue received for annuity contracts during the latest year. This amount corresponds to premium written for insurance contracts. 'Consideration' is a term from contract law for payment given by one party to obligate the other to performance specified by contract.
- "Insurance in force" is the total amount of coverage provided by policies that are in force at a specified moment. These are policies that have become effective and have not expired or lapsed. This construct is primarily meaningful for life insurance or other insurance where a stated amount of coverage is purchased.
- "Benefits paid" is the amount paid in performance of obligations imposed by life or annuity contracts. This corresponds to 'losses paid' and includes amounts paid during the current year for obligations incurred in prior years, but does not include amounts insurers are obligated to pay in future years. This is a cash flow item only and not a measure of profitability or the cost of current coverages.
- **"Loss ratio"** equals losses incurred divided by premiums earned. This is the best accounting representation of the portion of each premium dollar that has been needed to honor the company's promise to pay claims. The figures shown are subject to many artificialities of insurance accounting, such as those explained above, as well as considerable variation between years and among companies.
