# DOE Corrective Action Management Program

## *Fourth Quarter Report for Fiscal Year 2007*

---

---

### Summary

This report provides the fourth quarter, fiscal year 2007 summary status of the Department of Energy Corrective Action Management Program (CAMP). The report includes the status of corrective action plans (CAPs) and their associated corrective actions as of September 30, 2007. The report depicts the Department's CAMP program status, followed by the status for the Under Secretaries and the assigned Secretarial Officer (SO).

Progress has been noted with respect to Office of Environmental Management (EM) facilities in that no corrective actions were overdue during the past four quarters, an improvement from 4QFY2006 when seven late corrective actions were reported. EM also completed 25 corrective actions during the quarter. Additionally, there were no overdue effectiveness reviews during this quarter.

The National Nuclear Security Administration (NNSA) had 35 late corrective actions and two overdue effectiveness reviews for the quarter, representing an increase in late actions from the previous quarter when 8 late corrective actions and no overdue effectiveness reviews were reported. This represents a reversal in the positive trends seen over the past three quarters. NNSA did complete 49 corrective actions and one effectiveness review during this quarter.

The Office of Science and the Office of Nuclear Energy had no late corrective actions or overdue effectiveness reviews during this quarter.

Corrective Action Management Program requirements delineated in DOE Order 414.1C, Quality Assurance, direct Department line managers to address, track, report, complete, and determine the effectiveness of corrective actions to resolve and prevent recurrence of:

- (1) Environment, safety, and health, and emergency management findings identified by the Office of Independent Oversight;
- (2) Judgments of Need identified during Type A Accident Investigations;

- (3) Safety management findings of DOE aviation facilities identified by the Office of Aviation Management, Office of Management.

- (4) Findings identified during the conduct of special assessment initiatives directed by the Secretary or Deputy Secretary to be tracked and reported in accordance with the provisions of the DOE CAMP.

A *finding* is defined as a significant deficiency identified during the conduct of an oversight assessment that may adversely affect the DOE mission; environment, safety, or health of workers or the public; or national security. For the purpose of this report, the term *findings* will also apply to accident investigation judgments of need. These findings are validated and clearly addressed in a formal assessment report provided to line management.

Department line managers must develop and implement a CAP that describes all actions required to effectively resolve each reported finding. The final CAP is approved by the SO, or delegated designee, within 60 days from issuance of the formal assessment report. Line managers must also complete all corrective actions within the planned dates as outlined in the approved CAP and report the status of these actions in the Department's Corrective Action Tracking System database. The planned CAP completion date is the date that all corrective actions listed in the CAP are to be completed.

Within 6 months after completion of all corrective actions in the CAP, the responsible Field Element Manager must complete and approve a corrective action effectiveness review to verify closure of corrective actions, and determine their effectiveness in preventing recurrence.

This report is available on the Internet by accessing the CAMP Website at <http://www.hss.energy.gov/CSA/csp/camp/index.html>.
