OTTER Filers
Downloads for 2009

For 2009 all OTTER users should now download the required upgrade from the OTTER Homepage (see address below). The current year version must be installed before a 2009 quarterly report can be prepared.

The download takes two to three minutes for most systems and has the advantage of always being the latest version of the software. Also there is a substantial saving in the expense of producing and mailing the disks.
The download is now available Downloading and installing instructions can be printed from the site.

CDs can still be ordered by employers and accountants who are without fast internet hookups. The disks may be ordered on the www.oregon.gov/EMPLOY/TAX home page by selecting the Order Forms option.

Browse the OTTER Home Page at http://oregon.gov/EMPLOY/TAX/OTTERhome.shtml for additional information.
