

A question has arisen about whether the Child Care Division will accept online First Aid/CPR training. The answer is that the Child Care Division does not accept First Aid/CPR training offered online unless it is part of a blended learning model that includes a classroom skills session and assessment with a certified instructor. This is based on OSHA guidelines that require the training to include hands on classroom practicum. Please contact your licensing specialist or the Division's central office (1-800-556-6616) if you have any questions.
