

**DEPARTMENT OF TRANSPORTATION**

**National Highway Traffic Safety Administration**

[Docket No. NHTSA-2004-18512]

**Highway Safety Programs; Model Specifications for Devices To Measure Breath Alcohol**

**AGENCY:** National Highway Traffic Safety Administration, DOT.

**ACTION:** Notice.

**SUMMARY:** This notice amends the Conforming Products List for instruments that conform to the Model Specifications for Evidential Breath Testing Devices (62 FR 62091).

**EFFECTIVE DATE:** July 14, 2004.

**FOR FURTHER INFORMATION CONTACT:** Dr. James F. Frank, Office of Research and Technology, Behavioral Research Division (NTI-131), National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590; Telephone: (202) 366-5593.

**SUPPLEMENTARY INFORMATION:** On November 5, 1973, the National Highway Traffic Safety Administration (NHTSA) published the Standards for Devices to Measure Breath Alcohol (38

FR 30459). A Qualified Products List of Evidential Breath Measurement Devices comprised of instruments that met this standard was first issued on November 21, 1974 (39 FR 41399).

On December 14, 1984 (49 FR 48854), NHTSA converted this standard to Model Specifications for Evidential Breath Testing Devices, and published a Conforming Products List (CPL) of instruments that were found to conform to the Model Specifications as Appendix D to that notice (49 FR 48864).

On September 17, 1993, NHTSA published a notice (58 FR 48705) to amend the Model Specifications. The notice changed the alcohol concentration levels at which instruments are evaluated, from 0.000, 0.050, 0.101, and 0.151 BAC, to 0.000, 0.020, 0.040, 0.080, and 0.160 BAC; added a test for the presence of acetone; and expanded the definition of alcohol to include other low molecular weight alcohols including methyl or isopropyl. On October 3, 2002, the most recent amendment to the Conforming Products List (CPL) was published (67 FR 62091), identifying those instruments found to conform with the Model Specifications.

Since the last publication of the CPL, two (2) instruments have been evaluated and found to meet the model specifications, as amended on September 17, 1993, for mobile and non-mobile use. In alphabetical order by company, they are: (1) The Alcotest 6510 manufactured by Draeger Safety, Inc., Durango, CO. This is a hand held device intended for use in stationary or roadside operation and is powered by an internal battery. It uses a fuel cell sensor. (2) The Alco-Sensor FST manufactured by Intoximeters, Inc, St. Louis, MO. This is a hand held device intended for use in stationary or roadside operation and is powered by an internal battery. It uses a fuel cell sensor. Finally, a technical correction has to be made in the name of one device on the CPL. The current CPL lists the "Intox EC/IR 2" manufactured by Intoximeters, Inc., St. Louis, MO, but the device should be listed as "Intox EC/IR II."

The CPL has been amended to add the two instruments identified above to the list, and to make the one technical correction indicated.

In accordance with the foregoing, the CPL is therefore amended, as set forth below.

\*Instruments marked with an asterisk (\*) meet the Model Specifications detailed in 49 FR 48854 (December 14, 1984) (i.e., instruments tested at 0.000, 0.050, 0.101, and 0.151 BAC). Instruments not marked with an asterisk meet the Model Specifications detailed in 58 FR 48705 (September 17, 1993), and were tested at BACs = 0.000, 0.020, 0.040, 0.080, and 0.160. All instruments that meet the Model Specifications currently in effect (dated September 17, 1993) also meet the Model Specifications for Screening Devices to Measure Alcohol in Bodily Fluids.

[Docket No. NHTSA 2004-17623; Notice 2]

**Cooper Tire & Rubber Company, Grant of Petition for Decision of Inconsequential Noncompliance**

Cooper Tire & Rubber Company (Cooper) has determined that certain tires it manufactured during 2004 do not comply with S6.5(f) of Federal Motor

Vehicle Safety Standard (FMVSS) No. 119, "New pneumatic tires for vehicles other than passenger cars." Pursuant to 49 U.S.C. 30118(d) and 30120(h), Cooper has petitioned for a determination that this noncompliance is inconsequential to motor vehicle safety and has filed an appropriate report pursuant to 49 CFR Part 573, "Defect and Noncompliance Reports." Notice of receipt of a petition was published, with a 30-day comment period, on May 7, 2004 in the **Federal**
