OFFICIAL LIST OF PUBLIC WATERS
Published Pursuant to RSA 271:20 II (effective June 26, 1990)

Public waters in New Hampshire are prescribed by common law as great ponds, (natural waterbodies of 10 acres or more in size public rivers and streams, and tidal waters. These common law public waters are held by the State in trust for the people of New Hampshire. The State holds the land underlying great ponds and tidal waters (including tidal rivers) in trust for the people of New Hampshire. Generally, private property owners hold title to the land underlying freshwater rivers and streams, and the State has an easement over this land for public purposes.

Several New Hampshire statutes further define public waters as including artificial impoundments 10 acres or more in size, solely for the purpose of applying specific statutes. Most artificial impoundments were created by the construction of a dam, but some were created by actions such as dredging or as a result of urbanization (usually due to the effect of road crossings obstructing flow and increased runoff from the surrounding area). The land surrounding and underlying many artificial impoundments is privately owned. Statutes defining them as public waters do not have any effect on the ownership of the land underlying the water bodies.

The format of this edition of the Official List of Public Waters is intended to clarify the application of statutes and common law. The table included in Part I "Public Lakes and Ponds" shows which statutes apply to specific water bodies, based on whether they are great ponds, artificial impoundments 10 acres or more in size, or great ponds which have been enlarged by artificially impounding water above the elevation of natural mean high water.

Part 2, "Public Rivers and Streams" is a partial listing of this set of common law waters. The current list is primarily based on the listing of rivers that fall under the jurisdiction of the Comprehensive Shoreland Protection Act (RSA 483-B:4). There are many other public rivers in New Hampshire, which will be added to the Official List of Public Waters in the future.

Tidal waters, included in Part 3, include waters off the coast of New Hampshire and rivers that are effected by the ebb and flow of the tide.

These determinations are based on the best available data and may be revised upon further research or field investigation.

Great Ponds with Additional Artificial Impoundment

Ponds and lakes of 10 acres or more in size in their natural state, which have been enlarged and/or whose surface elevations are maintained by a dam. The State holds the land underlying the natural portion of the pond up to the natural mean high water mark and the land underlying the artificial portion is usually privately owned by abutting property owners or the dam owner.

Artificial Impoundments 10 acres or more in size

Ponds and lakes which are 10 acres or more in size as a result of the presence of a dam at the outlet, or as a result of dredging. Waterbodies in this category were less than 10 acres in size before the artificial impoundment was created. The land underlying the waterbody is generally owned by abutting property owners or the dam owner. The land underlying waterbodies listed as 'publicly-owned bodies of water' or 'public-owned waterbodies' pursuant to RSA 482-A:16 is owned by or subject to flowage easements held by the State of New Hampshire. The land underlying all other waterbodies in this category can be privately, municipally or federally owned land.

OFFICIAL LIST OF PUBLIC WATERS - NEW HAMPSHIRE DEPARTMENT OF ENVIRONMENTAL SERVICES

This information is subject to amendment as information is reviewed and corrected. View the Official List of Public Waters pages on the NH Department of Environmental Services' Website (www.des.nh.gov/dam/public_waters.htm) for the most recent version of this document, for the full wording of the referenced statutes and for additional information.

Artificial Impoundments 10 acres or more in size

Ponds and lakes which are 10 acres or more in size as a result of the presence of a dam at the outlet, or as a result of dredging. Waterbodies in this category were less than 10 acres in size before the artificial impoundment was created. The land underlying the waterbody is generally owned by abutting property owners or the dam owner. The land underlying waterbodies listed as 'publicly-owned bodies of water' or 'public-owned waterbodies' pursuant to RSA 482-A:16 is owned by or subject to flowage easements held by the State of New Hampshire. The land underlying all other waterbodies in this category can be privately, municipally or federally owned land.

OFFICIAL LIST OF PUBLIC WATERS
New Hampshire Department of Environmental Services, Water Division
Part 2

LIST OF FRESHWATER PUBLIC RIVERS AND STREAMS

This is a partial list of freshwater public rivers. The exclusion of a river from the Official List of Public Waters does not indicate that it is not a public waterbody. As additional rivers are determined to be public waters, either by the Department of Environmental Services or by the NH judicial system, they will be added to this list. Final determinations of "navigability" or "useful purposes" are ultimately dependent on judicial interpretation and cannot be made conclusively by administrative agencies.

River Sections Defined as Public Waters as per RSA 483-B:4, XVI(c)		
Fourth Order or Higher Rivers*		
Name of River	From:	To:
Ammonoosuc River	Juncture of Crawford Brook in Carroll	Juncture of Connecticut River
Androscoggin River	Juncture of Magalloway River at Lake Umbagog	Maine Border
Ashuelot River	Juncture of Grassy Brook in Marlow	Juncture of Connecticut River
