Detailed Project Description

This project is a result of requirements of US EPA's combined sewer overflow control policy and federal law. It supports US commitments made under the Great Lakes Water Quality Agreement with Canada. It will help clean up the Auglaize and Maumee Rivers that are used as a source for drinking water and for low cost/no-cost recreation. The requested funds will help reduce the sewer rate increases necessary for repayment of project loans. These rate increases disproportionately hurt low and moderate income ratepayers.
