STAG Water and Wastewater Infrastructure Project

Project Information

Grantee State

OH

Grantee Name

City of Fostoria

Project Name

CSO No. 5 Elimination

Project Location

Purpose of Project

Detailed Project Description

This project includes a design to partially separate the existing combined sewer upstream of CSO No. 5. The project will include inflow redirection of a 250 ac. area of the City. The project will require a study and construction of raising the existing weir at CSO No. 5. The goal of raising the weir and other construction will be to ensure that the City complies with the current Combined Sewer Overflow (CSO) Control Policy. The project involves the investigation and elimination of all sanitary cross connections and installation of backwater prevention devices to protect sewer customers. The goal of this project is to eliminate a CSO and expedite compliance with the Clean Water Act.

Total estimated cost of the project based on facilities plan or preliminary engineering report

\$1,625,000

Amount requested (cannot be greater than 55% of the total project amount)

\$500,000

Amount received from past appropriations

None

Does the community have a financing plan certified by an authorized local official demonstrating how it will cover the 45% matching funds?

No

Intended Recipient of Funds

City of Fostoria
213 South Main Street
Fostoria , OH 44830

Is the recipient a for-profit entity?

No

Explanation of the request (must include purpose and why it is a valuable use of taxpayer funds)

This project includes a design to partially separate the existing combined sewer upstream of CSO No. 5. The project will include inflow redirection of a 250 ac. area of the City. The project will require a study and construction of raising the existing weir at CSO No. 5. The goal of raising the weir and other construction will be to ensure that the City complies with the current Combined Sewer Overflow (CSO) Control Policy. The project involves the investigation and elimination of all sanitary cross connections and installation of backwater prevention devices to protect sewer customers. The goal of this project is to eliminate a CSO and expedite compliance with the Clean Water Act.
