We support the Development, Relief, and Education for Alien Minors Act, S. 729, and applaud Senator Richard Lugar and Senator Dick Durbin for introducing this important piece of legislation.

We are a nation of immigrants.

The Dream Act will enable undocumented graduating students who were brought to this country by their families before the age 16 to reach full potential and contribute to the future of our country.

The DREAM Act is a constructive step towards addressing the situation that many of these students face. Our current immigration process, presently limits these students from pursuing higher education or serving in our military.

Last November, our country voted for positive change, this bill will allow us to address many of the inequalities that presently exist with our immigration system. S.729 is a constructive solution that will enrich our economic future as a nation.

The youth are the future leaders of our country.

Trinidad Alfaro
Indiana LULAC State Director
