

## Science Adventures Program

Science Adventures are informal classes in science and mathematics designed for students and/or families. Experienced classroom teachers or experts in a given field teach the classes. The program format emphasizes student-centered, hands-on learning using entertaining and thought-provoking activities.

Parents: We request your cooperation in registering students only when they meet the grade requirements.

**You must register to attend any Adventure. When registering list one name and one adventure per line. You may pay by check, charge or cash. If paying by check, pay with separate checks: one check/adventure/student. Complete the registration form, mail or fax it with your payment. The registration deadline for all Science Adventures is one week prior to the scheduled date, but registrations will continue to be accepted until the Adventure date if there is room. Fees will be returned if we cancel a class. You will not be charged if you cancel your registration one week prior to the class.**

**Questions? Call 630-840-5588. If you need to call on the day of an Adventure, please call 630-840-8258.**

**Science Adventures and a registration form can be linked from <http://ed.fnal.gov>.**

All Adventures are taught at the Lederman Science Center located at Fermilab in Batavia, Illinois. From Highway 88 take the Farnsworth north exit to Pine Street. From Highway 56 travel north on Kirk Road to Pine Street. From Highway 38 or 64 take Kirk Road south to Pine Street. Turn east on Pine Street and enter Fermilab through the visitor entrance. The Lederman Science Center is the second building on your right.
