

Social Determinants of Equity

and

Social Determinants of Health

SAFER • HEALTHIER • PEOPLE™

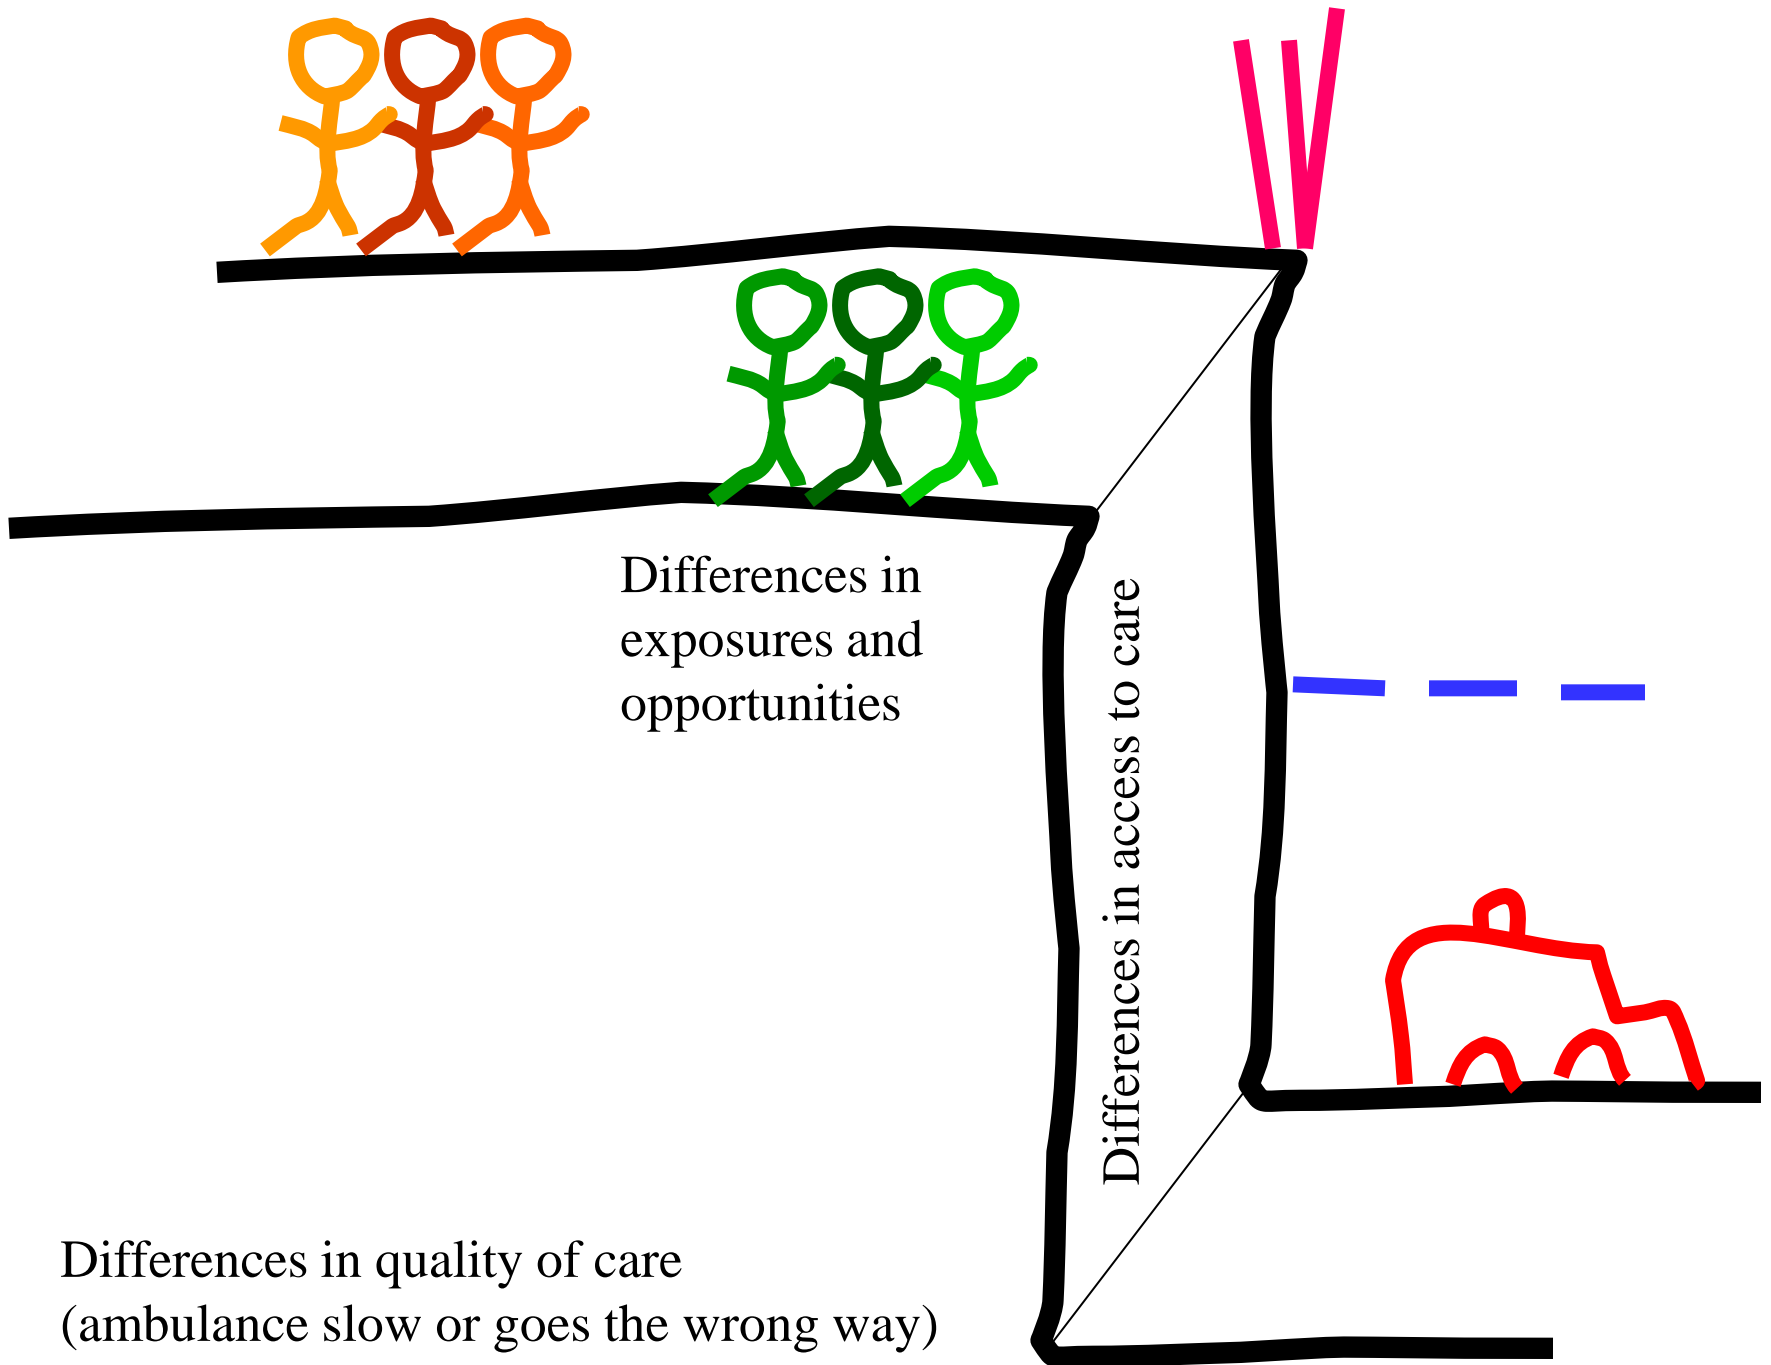

Levels of health intervention

But how do disparities arise?

- Differences in the quality of care received within the health care system
- Differences in access to health care, including preventive and curative services
- Differences in life opportunities, exposures, and stresses that result in differences in underlying health status

Addressing the social determinants of equity:

Why are there differences in resources along the cliff face?

Why are there differences in who is found at different parts of the cliff?

Determinants of health

Determinants of health

Determinants of health

Determinants of health and illness that are outside of the individual

Beyond genetic predispositions

Beyond individual behaviors

Determinants of health

Determinants of health and illness that are outside of the individual

Beyond genetic predispositions

Beyond individual behaviors

The contexts in which individual behaviors arise

Determinants of health

Individual resources

Education,
occupation, income,
wealth

Determinants of health

Individual resources

Education, occupation, income, wealth

Neighborhood resources

Housing, food choices, public safety, transportation, parks and recreation, political clout

Determinants of health

Individual resources

Education, occupation, income, wealth

Neighborhood resources

Housing, food choices, public safety, transportation, parks and recreation, political clout

Hazards and toxic exposures

Pesticides, lead, reservoirs of infection

Determinants of health

Individual resources

Education, occupation, income, wealth

Neighborhood resources

Housing, food choices, public safety, transportation, parks and recreation, political clout

Hazards and toxic exposures

Pesticides, lead, reservoirs of infection

Opportunity structures

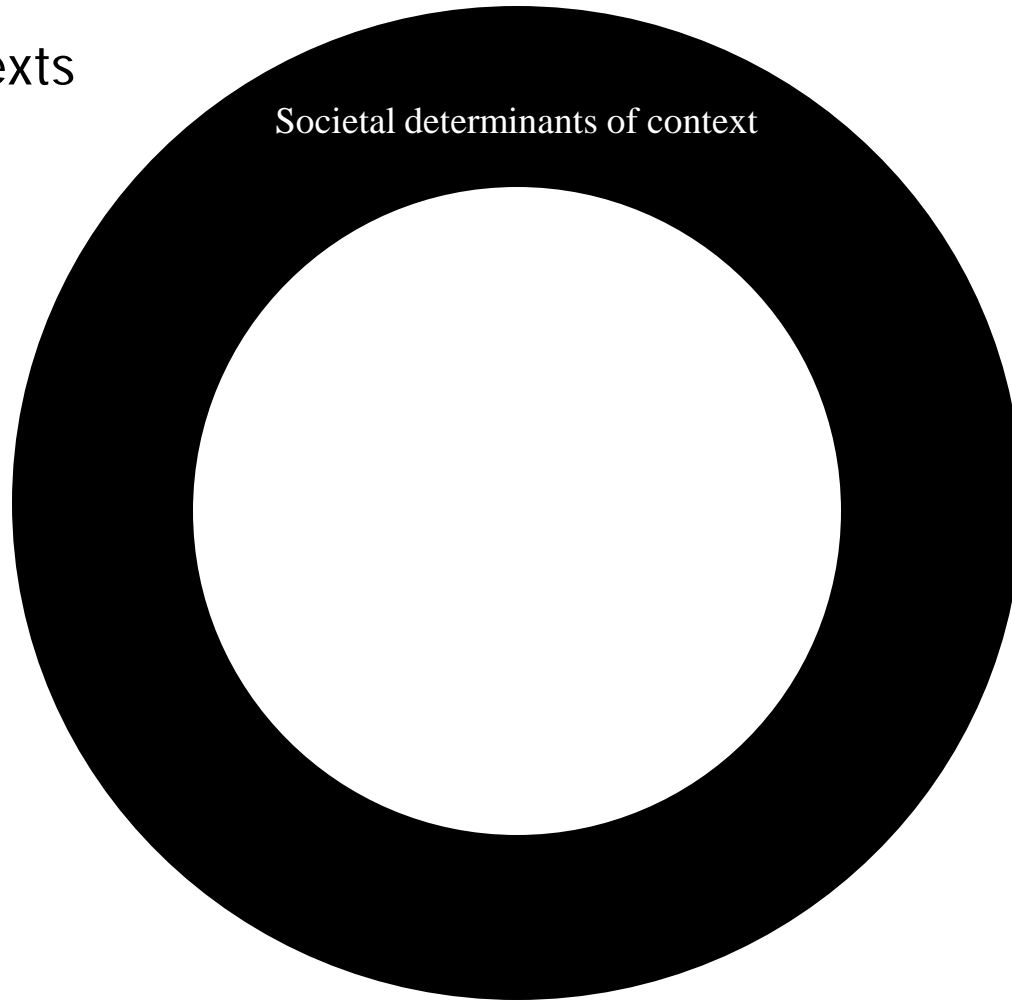

Schools, jobs, justice

Determinants of health

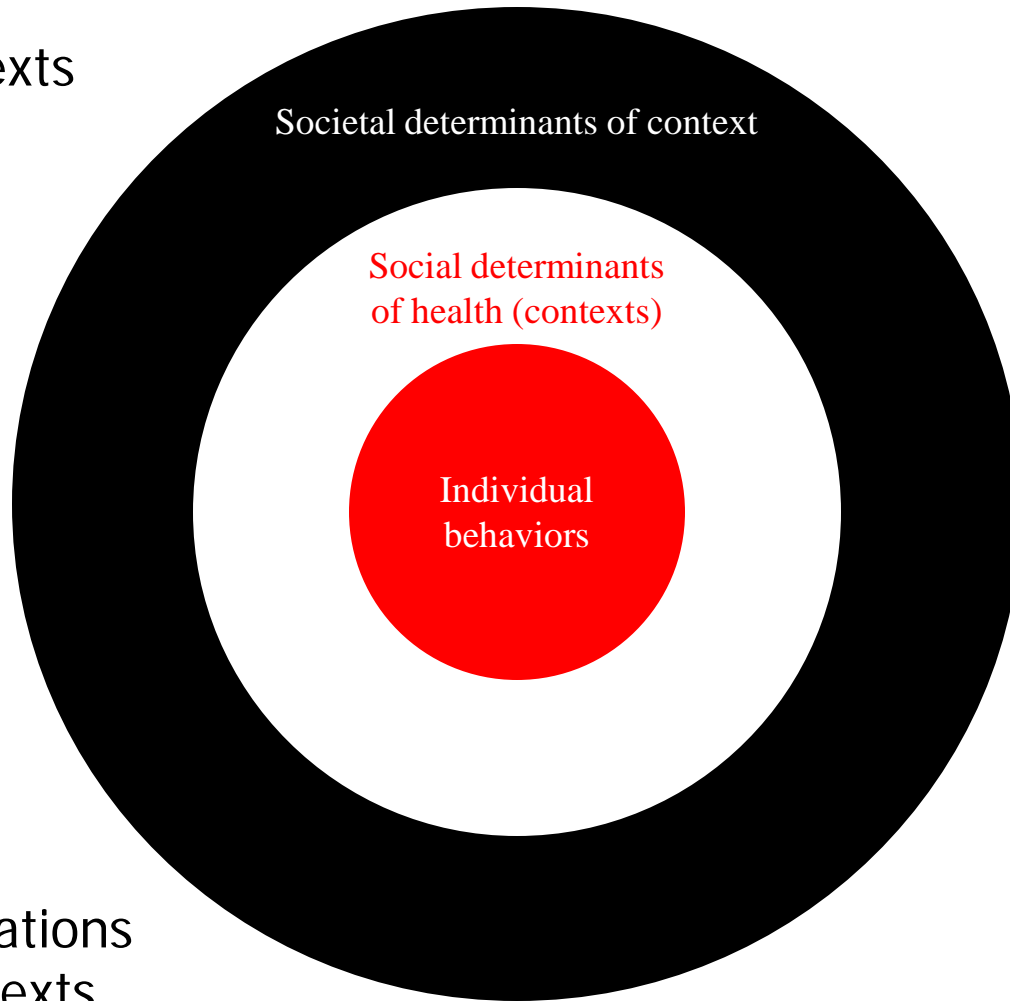

Determinants of health

Determine the
range of
observed contexts

Determinants of health

Determine the range of observed contexts

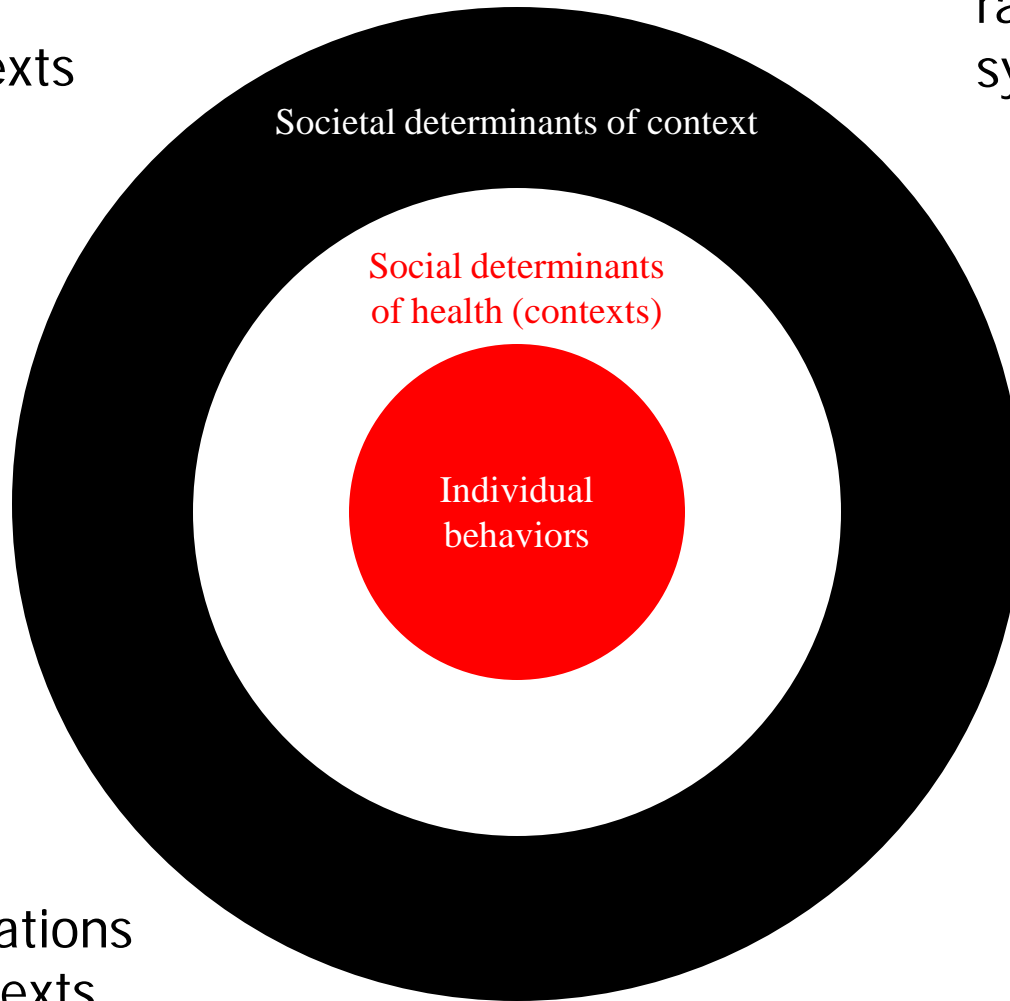

Determine the distribution of different populations into those contexts

Determinants of health

Determine the range of observed contexts

Include capitalism, racism, and other systems of power

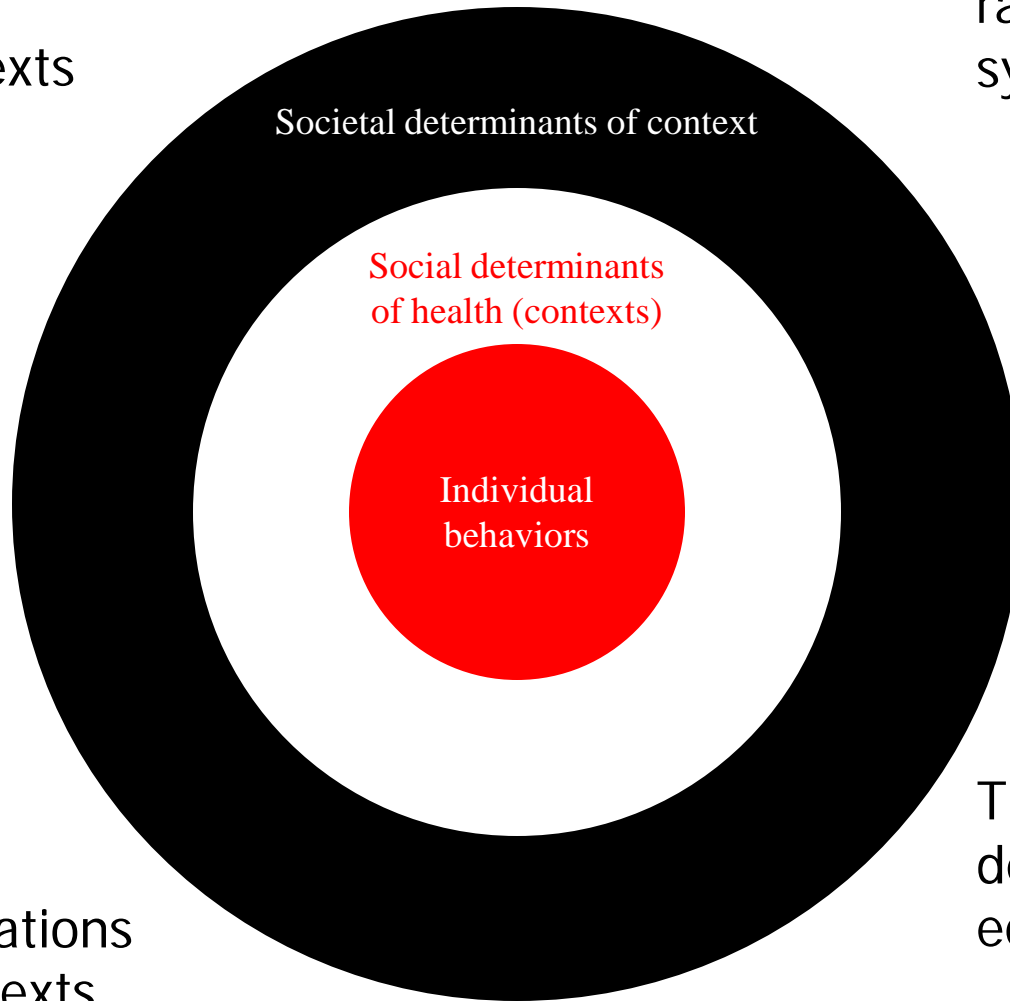

Determine the distribution of different populations into those contexts

Determinants of health

Determine the range of observed contexts

Include capitalism, racism, and other systems of power

Determine the distribution of different populations into those contexts

The social determinants of equity

Addressing the social determinants of health

- Involves the medical care and public health systems, but clearly extends beyond these
- Requires collaboration with multiple sectors outside of health, including education, housing, labor, justice, transportation, agriculture, and environment

Addressing the social determinants of equity

- Involves monitoring for inequities in exposures and opportunities, as well as for disparities in outcomes
- Involves examination of structures, policies, practices, norms, and values
- Requires intervention on societal structures and attention to systems of power

We need to do both

- Address the social determinants of health, including poverty, in order to achieve large and sustained improvements in health outcomes
- Address the social determinants of equity, including racism, in order to achieve social justice and eliminate health disparities

Naming and Addressing

**the Impacts of Racism
on Health**

Why racism?

- To eliminate racial disparities in health, need examine fundamental causes
 - “Race” is only a rough proxy for SES, culture, or genes
 - “Race” precisely measures the social classification of people in our “race”-conscious society
- Hypothesize racism as a fundamental cause of racial disparities in health

What is racism?

A system

What is racism?

A system of structuring opportunity and assigning value

What is racism?

A system of structuring opportunity and assigning value based on the social interpretation of how one looks ("race")

What is racism?

A system of structuring opportunity and assigning value based on the social interpretation of how one looks ("race")

- Unfairly disadvantages some individuals and communities

What is racism?

A system of structuring opportunity and assigning value based on the social interpretation of how one looks ("race")

- Unfairly disadvantages some individuals and communities
- Unfairly advantages other individuals and communities

What is racism?

A system of structuring opportunity and assigning value based on the social interpretation of how one looks ("race")

- Unfairly disadvantages some individuals and communities
- Unfairly advantages other individuals and communities
- Saps the strength of the whole society through the waste of human resources

“Reactions to Race” module

- Six-question optional module on the Behavioral Risk Factor Surveillance System
- Piloted by six states in 2002
- Now available to all states

States using "Reactions to Race"

Arkansas			2004			
California	2002					
Colorado			2004			
Delaware	2002		2004	2005		
District of Columbia			2004			
Florida	2002					
Michigan					2006	
Mississippi			2004			
Nebraska						2008
New Hampshire	2002					
New Mexico	2002					
North Carolina	2002					
Ohio		2003		2005		
Rhode Island			2004			2007
South Carolina		2003	2004			
Virginia						2008
Washington			2004			
Wisconsin			2004	2005	2006	

States using "Reactions to Race" module on 2004 BRFSS

**Arkansas, Colorado, Delaware, District of Columbia,
Mississippi, Rhode Island, South Carolina, Wisconsin**

Socially-assigned “race”

- **How do other people usually classify you in this country? Would you say:**
 - ◆ White
 - ◆ Black or African-American
 - ◆ Hispanic or Latino
 - ◆ Asian
 - ◆ Native Hawaiian or Other Pacific Islander
 - ◆ American Indian or Alaska Native
 - ◆ Some other group

General health status

- **Would you say that in general your health is:**

- ◆ Excellent
- ◆ Very good
- ◆ Good
- ◆ Fair
- ◆ Poor

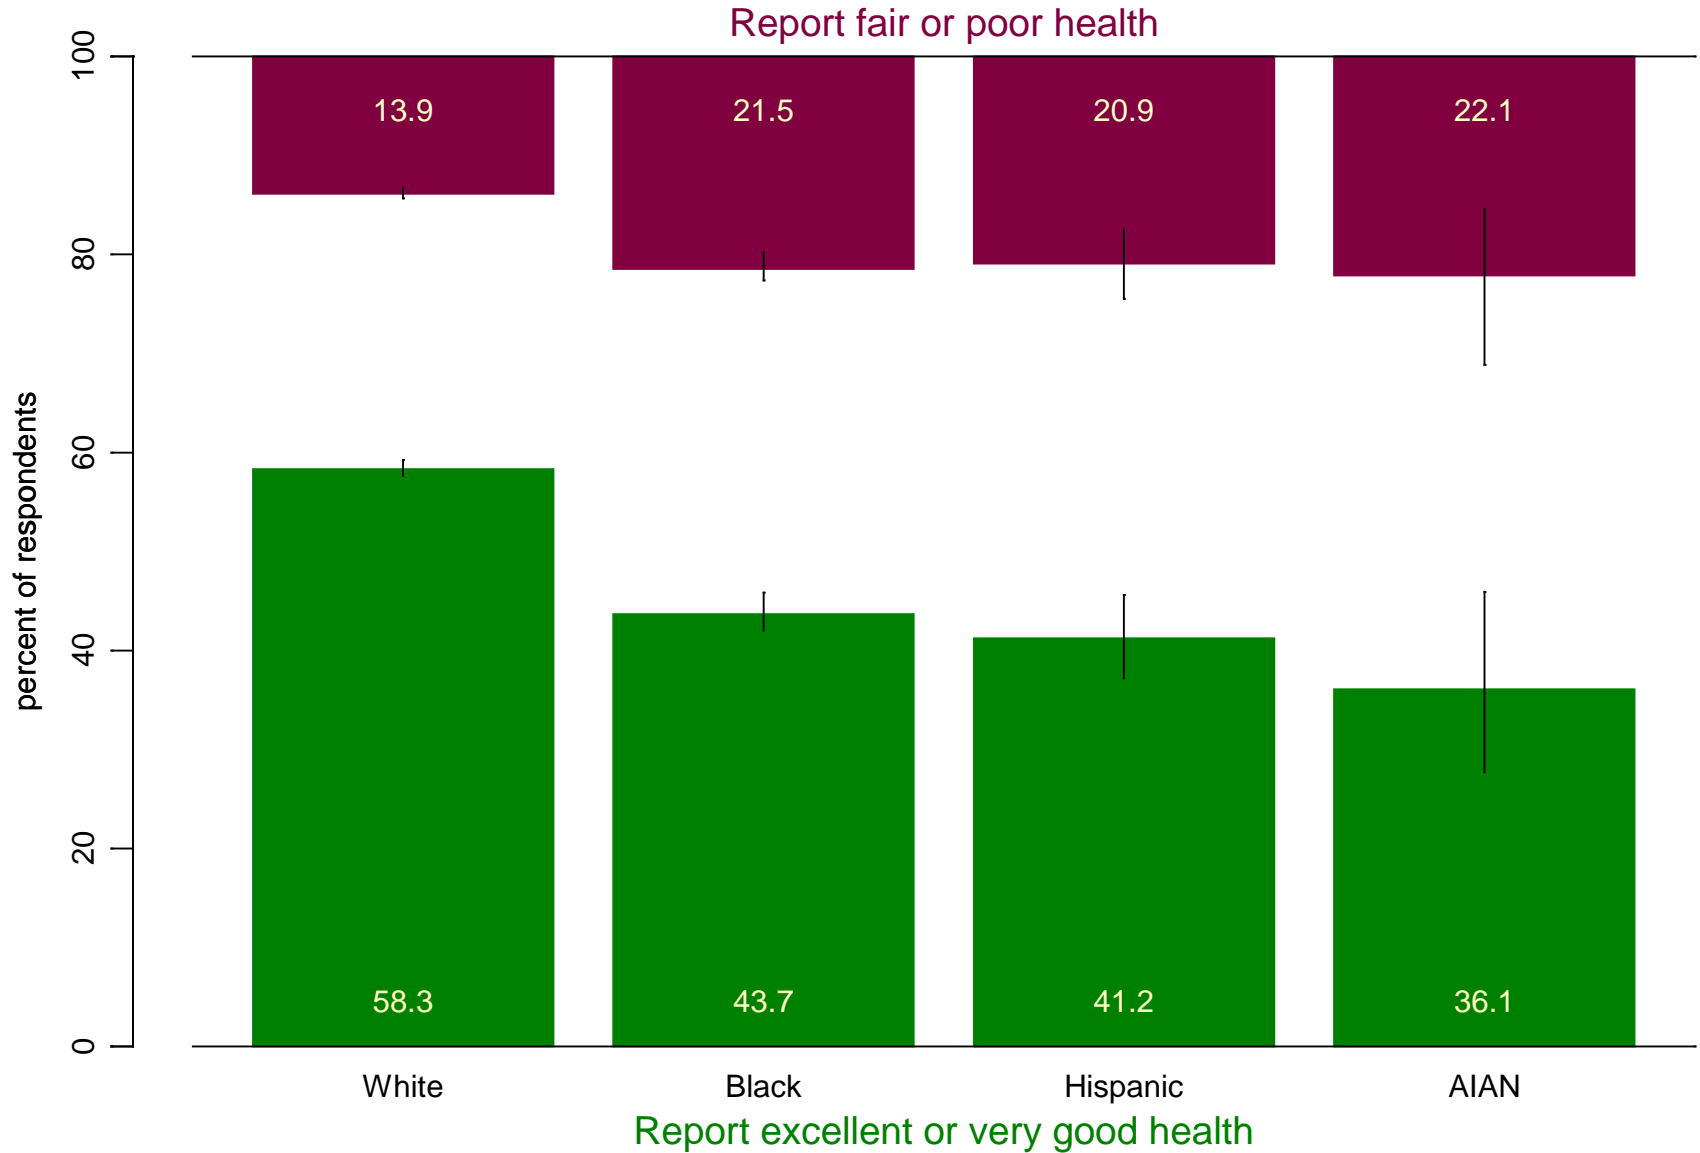

General health status by socially-assigned "race", 2004 BRFSS

General health status by socially-assigned "race", 2004 BRFSS

General health status by socially-assigned "race", 2004 BRFSS

General health status and “race”

- “White” social experience associated with better health

Self-identified ethnicity

- **Are you Hispanic or Latino?**

- ◆ Yes

- ◆ No

Self-identified “race”

- **Which one or more of the following would you say is your race?**
 - ◆ White
 - ◆ Black or African-American
 - ◆ Asian
 - ◆ Native Hawaiian or Other Pacific Islander
 - ◆ American Indian or Alaska Native
 - ◆ Other
- **Which one of these groups would you say best represents your race?**

Self-identified “race”/ethnicity

- Hispanic

- ◆ “Yes” to Hispanic/Latino ethnicity question
- ◆ Any response to race question

- White

- ◆ “No” to Hispanic/Latino ethnicity question
- ◆ Only one response to race question, “White”

- Black

- ◆ “No” to Hispanic/Latino ethnicity question
- ◆ Only one response to race question, “Black”

- American Indian/Alaska Native

- ◆ “No” to Hispanic/Latino ethnicity question
- ◆ Only one response to race question, “AI/AN”

Two measures of "race"

How usually classified by others

White Black Hispanic AIAN ...

How self-identify

White 26,373	98.4	0.1	0.3	0.1	1.1
Black 5,246	0.4	96.3	0.8	0.3	2.2

General health status, by self-identified and socially-assigned "race", 2004

General health status, by self-identified and socially-assigned "race", 2004

General health status and “race”

- Being perceived as *White* is associated with better health
 - ◆ Even within non-*White* self-identified “race”/ethnic groups

General health status by education and "race", 2004 BRFSS

General health status and “race”

- Being perceived as *White* is associated with better health
 - ◆ Even within non-*White* self-identified “race”/ethnic groups
 - ◆ Even within the same educational level

General health status by education and "race", 2004 BRFSS

General health status by education and "race", 2004 BRFSS

General health status by education and "race", 2004 BRFSS

General health status by education and "race", 2004 BRFSS

General health status and “race”

- Being perceived as *White* is associated with better health
 - ◆ Even within non-*White* self-identified “race”/ethnic groups
 - ◆ Even within the same educational level
- Being perceived as *White* is associated with higher education

Key questions

- WHY is socially-assigned “race” associated with self-reported general health status?
 - ◆ Even within non-*White* self-identified “race”/ethnic groups
 - ◆ Even within the same educational level
- WHY is socially-assigned “race” associated with educational level?

Racism

A system of structuring opportunity and assigning value based on the social interpretation of how one looks (“race”)

- ◆ Unfairly disadvantages some individuals and communities
- ◆ Unfairly advantages other individuals and communities
- ◆ Saps the strength of the whole society through the waste of human resources

Levels of racism

- Institutionalized
- Personally-mediated
- Internalized

Institutionalized racism

- Differential access to the goods, services, and opportunities of society, by “race”
- Examples
 - Housing, education, employment, income
 - Medical facilities
 - Clean environment
 - Information, resources, voice
- Explains the association between SES and “race”

Personally-mediated racism

- Differential assumptions about the abilities, motives, and intents of others, by “race”
- Prejudice and discrimination
- Examples
 - Police brutality
 - Physician disrespect
 - Shopkeeper vigilance
 - Waiter indifference
 - Teacher devaluation

Internalized racism

- Acceptance by the stigmatized “races” of negative messages about our own abilities and intrinsic worth
- Examples
 - Self-devaluation
 - White man’s ice is colder
 - Resignation, helplessness, hopelessness
- Accepting limitations to our full humanity

Levels of Racism:

A Gardener's Tale

Source: Jones CP, *Am J Public Health* 2000

Who is the gardener?

- Power to decide
- Power to act
- Control of resources

Dangerous when

- Allied with one group
- Not concerned with equity

Health equity

- Health equity is the realization by ALL people of the highest attainable level of health.

Achieving health equity

- Requires valuing all individuals and populations equally

Achieving health equity

- Requires valuing all individuals and populations equally, and
- Entails focused and ongoing societal efforts

Achieving health equity

- Requires valuing all individuals and populations equally, and
- Entails focused and ongoing societal efforts
 - To address avoidable inequalities

Achieving health equity

- Requires valuing all individuals and populations equally, and
- Entails focused and ongoing societal efforts
 - To address avoidable inequalities
 - By assuring the conditions for optimal health for all groups

Achieving health equity

- Requires valuing all individuals and populations equally, and
- Entails focused and ongoing societal efforts
 - To address avoidable inequalities
 - By assuring the conditions for optimal health for all groups,
 - Particularly for those who have experienced historical or contemporary injustices or socioeconomic disadvantage.

Addressing racism

- Opportunity structures
 - Education, employment, justice, housing, immigration, transportation, environment, healthcare, social security for children
- Societal valuation
 - Investment
 - Communication: invite contributions, hold high expectations, celebrate accomplishments, cherish existence

Our goal: To expand the conversation

Health services

Our goal: To expand the conversation

Health services

Social determinants
of health

Our goal: To expand the conversation

Health services

Social determinants
of health

Social determinants
of equity

Our tasks

- Put racism on the agenda
 - Name racism as a force determining the distribution of other social determinants of health
 - Routinely monitor for differential exposures, opportunities, and outcomes by “race”

Our tasks

- Ask, "How is racism operating here?"
 - Identify mechanisms in structures, policies, practices, norms, and values
 - Attend to both what exists and what is lacking

Our tasks

- Organize and strategize to act
 - Join in grassroots organizing around the conditions of people's lives
 - Identify the structural factors creating and perpetuating those conditions
 - Link with similar efforts across the country and around the world

Communications and Dissemination

Education and Development

Global Matters

Liaison and Partnership

Organizational Excellence

Policy and Legislation

Science and Publications

Measuring institutionalized racism

- Scan for evidence of “racial” disparities
 - Routinely monitor outcomes by “race”
 - “Could racism be operating here?”
- Identify mechanisms
 - Examine structures and written policies
 - Query unwritten practices and norms
 - “How is racism operating here?”

Policies of interest

- Policies allowing segregation of resources and risks
- Policies creating inherited group-disadvantage
- Policies favoring the differential valuation of human life by “race”
- Policies limiting self-determination

Policies allowing segregation of resources and risks

Redlining, municipal zoning, toxic dump siting

Use of local property taxes to fund public education

Policies creating inherited group disadvantage

Lack of social security for children

Estate inheritance

Lack of reparations for historical
injustices

Policies favoring the differential valuation of human life by “race”

Curriculum

Media invisibility/hypervisibility

Myth of meritocracy and denial of racism

Policies limiting self-determination

De jure and *de facto* limitations to
voting rights

“Majority rules” when there is a fixed
minority
