

EID SENIOR STUDENTS SEMINAR SERIES

March 6 - May 22, 2009
1:00 - 2:00 P.M. - Fridays
Lecture Room B

Date	Name	Topic
6-March-09	Christine Banfield	"Innate immune priming of adaptive responses to helminth infection"
13-March-09	Juliana Harris	"Complement Regulatory Proteins and Red Cell Protection during Malaria"
20-March-09	Brett Swierczewski	"Schistosoma mansoni Protein Kinase A (PKA): A Potential New Drug Target"
3-April-09	Rachel Vonck	"Alterations in Bacterial Colonization Load and Host Immune Response in a Novel Mouse Model of Gonorrhoea and Chlamydia Coinfection"
10-April-09	Stephanie Petzing	"Investigations into the structure and function of the attachment and fusion glycoproteins of Beilong virus and J virus"
17-April-09	Kenny Lin	"Immune cell tropisms associated with Monkeypox infection and the affect on pathogenesis"
24-April-09	Beth Carpenter	"Shedding Light on Fur Regulation in <i>Helicobacter pylori</i> "
1-May-09	Aura Garrison	"Crimean-Congo hemorrhagic fever virus attachment and entry"
8-May-09	Kathleen Jones	"The EPIYA Effect: Elucidation of the Role of <i>Helicobacter pylori</i> 's CagA EPIYA Motifs on Pathogenesis"
15-May-09	Shana Miles	"Role of apo and Fur <i>in vivo</i> "
22-May-09	David Larson	"Chronic Helminth Infection Increases the Threshold of Activation for Basophils and Mast Cells"
