A Title V facility has the option to use this form to request that their Title V permit contain a permit shield. A Title V permit with a permit shield will identify rules that do not apply, and state that compliance with all conditions on the permit will be considered as compliance with all regulatory requirements in effect as of the date of the date of permit issuance. A requirement identified in the permit as non-applicable is not enforceable by EPA, the AQMD, or citizens. However, if a requirement is erroneously omitted from the permit, a permit shield will not protect a facility from enforcement action.

General Instructions:

1. Submit one 400-A, one, 500-TV, and one 500-D form for each permit unit. Facility permit holders: All devices with the same application number are in the same permit unit.
2. Permit processing fee: If you are applying for equipment with an existing permit, you must also submit for each 500-D application the permit processing fee specified for a change of conditions in the Summary Permit Fee Rates table in Rule 301. There is no fee if you are requesting a permit shield for new equipment for which you are also applying for a permit.
3. Please type or print the information in the appropriate blanks.
