Investing in America's Economic Recovery

Lakeview Interagency Site/Parking Lot Surfacing – #12

Need: The parking area serves the Interagency Fire Center, Equipment Shop, warehouse and Radio Building. The parking lot at the Lakeview Interagency Site is not useable during wet weather. During winter months the area becomes muddy and rutted, restricting access to low clearance vehicles.

Recovery Act Funding: Funds will be used to remove the existing base, construct adequate drainage, construct an adequate base with crushed rock and chip seal the parking area.

Benefits: This project will allow year round use of the site for all vehicles. This will particularly allow vehicles to enter the site during wet weather without rutting and damaging the site. The project will create jobs as well as save the bureau from excessive future maintenance of the parking lot.
