ABSTRACT

Survey of Income and Program Participation (SIPP) 1996 Panel, Wave 6 Topical Module Microdata File [machine-readable data file] / conducted by the U.S. Bureau of the Census. -Washington: The Bureau [producer and distributor], 2001.

Type of File:

Microdata; unit of observation is an individual.

Universe Description:

The universe is the resident population of the United States, excluding persons living in institutions and military barracks.

Subject-Matter Description:

The file contains data primarily from the topical module portion of the questionnaire. However, for purposes of matching persons to the core file, which was released separately, the beginning of the file contains identifying information as well as some basic demographic and social characteristics that are also contained in the core file. The identifying information includes sample unit, household address, and entry address identification. Demographic and social characteristics include age, sex, race (White; Black; American Indian, Eskimo, and Aleut; Asian or Pacific Islander), ethnic origin (34 categories including 9 Spanish origin categories), marital status, and education. Data in this topical module file include children's well-being, assets/liabilities, medical expenses/utilization of health care-adult and children, work related expenses and child support paid, and real estate.

The sample consists of 4 rotation groups, each interviewed in a different month from December 1997 to March 1998. For each group the reference period for reporting labor force activity and income is the four calendar months preceding the interview month.

SIPP is a longitudinal survey where each sampled household and each descendent household is reinterviewed at 4-month intervals for 12 interviews or "waves." This file contains the results of the **sixth** interview. Unique codes are included on each record to allow linking together the same persons from the preceding and subsequent waves.

Geographic Coverage:

United States. Codes are included for 45 individual States and the District of Columbia, **although the sample was not designed to produce State estimates**. Areas in the SIPP sample in five States are identified in two groups for confidentiality reasons. The file identifies a subsample of metropolitan residents, along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's).

Technical Description:

File Structure: Rectangular. Each logical record for a sampled person includes information on the household and family of which the person was a part during each month of the reference period, as well as characteristics of the person.

File Size: 80,245 logical records; 1,536 character logical record length.

File Sort Sequence of Sample Units: Sampling unit identification number by entry address ID and person number within sampling unit.

Reference Materials:

Survey of Income and Program Participation (SIPP) 1996 Panel, Wave 6 Topical Module Microdata File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code lists, questionnaire facsimiles, and general information on SIPP.

Survey of Income and Program Participation Users' Guide. *The Users' Guide* contains a general overview of the file as well as chapters on survey design and content, structure and use of cross-sectional files, linking waves and reliability of the data. Additional copies are available from Marketing Services Office, Customer Services Center, Bureau of the Census, Washington, DC 20233.

Related Printed Reports:

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association, articles appearing in the *Journal of Economic and Social Measurement*, and reports in the P-70 series of the Current Population Reports.

Related Machine-Readable Data Files:

SIPP files from all Waves of the 1984 through 1993 Panels, and 1996 Panel, Waves 1 through 4, and 6 are available from Customer Services Center, Marketing Services Office, Bureau of the Census, Washington, D.C. 20233. Some files (1990 - 1993) may be downloaded in ASCII from the Data Extraction System (DES) SURVEY-ON-CALL at <http://www.census.gov/DES/www/welcome.html> Files (1996 forward) may be downloaded from the Federal Electronic Research and Review Extraction Tool (FERRET) at <http://www.ferret.bls.census.gov/cgi-bin/ferret>

File Availability:

Files are available on CD-ROM. A machine-readable data dictionary is provided at the end of each file. Pricing information is available from Customer Services (301) 457-4100 ([order form](#) attached). This file also may be downloaded from the Federal Electronic Research and Review Extraction Tool (FERRET) at <http://www.ferret.bls.census.gov/cgi-bin/ferret>

Census Bureau Order Form

Use this form to order CD-ROM's, tape-to-CD-ROM, customer products, technical documentation, computer tapes and cartridges, diskettes, and publications sold by Customer Services.

Charge your order: It's easy! MasterCard - VISA
To fax your order: 888-249-7295
Phone orders and special handling: 301-457-4100

Please Type or Print. Prices include regular domestic postage and handling. **International customers, please add 33%.**

FILE INFORMATION

Matching Topical Module File with Core File

Since the core and topical module data are released as separate files, it may be necessary to match the two files. The two files contain the following information for linking purposes.

SSUID	Scrambled sample unit identifier
SPANEL	Panel year
SWAVE	Wave of data collection
SROTATION	Rotation of data collection
TFIPSST - FIPS	State code for the fifth month
EOUTCOME	Interview status code for the fifth month
SHHADID	Household address ID in the fourth reference month
SINTHHID	Household address ID of person in interview month
RFID	Family ID number in month four
RFID2	Family ID excluding related subfamily members
EPPIDX	Person index
EENTAID	Address ID of household where person entered sample
EPPNUM	Person number
EPOPSTAT	Population status based on age in fourth reference month
EPPINTVW	Person's interview status at time of interview
EPPMIS4	Person's fourth month interview status
ESEX	Sex of this person
ERACE	Race of this person
EORIGIN	Origin of this person
EFINWGT	Person weight
ERRP	Household relationship
EMS	Marital status
EPNMON	Person number of mother
EPNDAD	Person number of father
EPNGUARD	Person number of guardian
EPNSPOUS	Person number of spouse
RDESGPNT	Designated parent or guardian flag
TAGE	Age as of last birthday at the end of the fourth month
EEDUCATE	Highest degree received or grade completed

Geographic Coverage

State codes are shown except for five States which are identified in two groups. A subsample of metropolitan residents is identified along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's). **The sample was not designed to produce State or MSA/CMSA level estimates.** State codes are primarily useful in relating a respondent's reciprocity of benefits to thresholds which may vary from State to State. MSA/CMSA codes may be used in relating respondent characteristics with contextual variables.

Identification Number System

The SIPP identification scheme is designed to uniquely identify individuals in each wave, provide a means of linking the same individuals over time, and group individuals into households and families over time.

SIPP 1996 WAVE 6 TOPICAL MODULE

The various components of the identification scheme are listed below:

SSUID	Sample Unit Identification Number
SINTHHID	Address ID
EENTAID	Entry Address ID
EPPPNUM	Person Number

The sample unit identification number was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. This identifier is constructed the same way on each wave regardless of moves, to enable matching from wave to wave.

The two-digit address ID code identifies each household associated with the same sample unit identification number. The first digit of the address ID code indicates the wave in which that address was first assigned for interview. The second digit sequentially numbers multiple households that have the same serial number. The address ID code is 11 for all sample addresses that are the same as in Wave 1. As SIPP sample persons move to new addresses, new address ID codes are assigned. Any new address to which sample unit members moved during Wave 4 is numbered in the 40's.

The person ID is a five-digit number consisting of the two-digit entry address ID and a three-digit person number. Person numbers 101, 102, etc., are assigned in Wave 1; 201, 202, etc., are assigned to persons added to the roster in Wave 2, and so forth. This five-digit number is not changed or updated, regardless of moves.

The sampling unit serial number and address ID code uniquely identifies each household in any given wave. The sampling unit serial number can link all households in subsequent waves back to the original Wave 1 household.

Topcoding of Income Variables

To protect against the possibility that a user might recognize the identity of a SIPP respondent with very high income, income from every source is "topcoded" so that no individual income amounts above \$150,000 are revealed. While the data dictionary indicates a topcode of 50,000 for monthly income, this topcode will rarely be used. In most cases the monthly income is shown as an individual dollar amount of \$12,500, with \$12,500 actually representing "\$12,500 or more." (the \$150,000 annual income topcode is \$12,500 multiplied by 12 months). Individual monthly amounts above \$12,500 may occasionally be shown if the respondent's income varied considerably from month to month, as long as the average does not exceed \$12,500. For example, if a respondent's income from a single job were concentrated in only one of the four reference months, a figure as high as \$50,000 could be shown. (Income from interest or property have lower topcodes).

Summary income figures on the person, family, and household records are simple sums of the components shown on the file after topcoding, and are not independently topcoded. Thus, a person with high income from several sources (jobs, businesses, property) could have aggregate monthly income well over the topcode for each source. Families and households with a number of high income members could theoretically have aggregate income shown well over \$150,000, though well below the \$1.5 million shown as the highest allowable value in the data dictionary.

The user is cautioned against trying to make much use of the occasional monthly figures above \$12,500, except in calculating aggregates or observing patterns across the 4-month period for a single individual, family, or household. Those units with higher monthly amounts shown are a biased sample of high income units, more likely to include units with income from multiple sources than other units with equally high aggregate income which comes from a single source.

INDEX TO 1996 WAVE 6 TOPICAL MODULE FILES

Key to Concept Labels

AL - Assets and Liabilities Variables
 BU - Business Variables

HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the file contents and provides locations for each variable (record layout of the public-use computer tape file.) The first line ("D" Line) of each data item description gives the variable name, size of the data field, and the begin position of that field. The components include a short mnemonic or field name for use with software packages; field size; starting position; and a description of field contents with possible values.

The next few lines contain descriptive text and any applicable notes. Categorical value codes and labels are given where needed. Comment notes marked by an (*) are provided throughout for the rest of the dictionary components. Comments should be removed from the machine-readable version of the data dictionary before using it to help access the data file.

The first line of each data item description begins with the character "D" (left-justified, two characters). The "D" flag indicates lines in the data dictionary containing the name, size and begin position of each data item. The second line of each data item description begins with the character "T" (left-justified, two characters). The "T" flag indicates lines in the data dictionary containing the category code and short description of the variable. The line beginning with the character "U" describes the universe for that item. Lines containing categorical value codes and labels follow next and begin with the character "V". The special character (.) denotes the start of the value labels. Two examples of data item descriptions follow:

```
D RNOTAKE      2      813
T LF: Reason couldn't start job
  Why couldn't ... have started a job?
U All persons 15+ at the end of the
  reference period who were unable to start
  a job during weeks on layoff or looking
  for work.
  EPOPSTAT = 1 and RTAKJOB = 2
V      -1 .Not in universe
V      1  .Waiting for a new job to begin
V      2  .Own temporary illness
V      3  .School
V      4  .Other
```

```
D RRRSN        2      1218
T GI: Reason for receipt of Railroad
  Retirement pay
  For what reason or reasons did ...
  receive Railroad Retirement pay during
  the reference period? ISS Code 2
U All persons 15 to 69 who receive
  disability income and/or persons 15+ at
  the end of the reference period who
  receive retirement income and/or survivor
  benefits.
V      -1 .Not in universe
V      1  .Disability
V      2  .Retirement
V      3  .Survivor
V      4  .Disability and retirement
V      5  .Disability and survivor
V      6  .Retirement and survivor
V      7  .Disability, retirement, and
  .survivor
V      8  .No payment received
```

SOURCE AND ACCURACY STATEMENT

for the 1996 Public Use Files from the
Survey of Income and Program Participation¹

SOURCE OF DATA

The data was collected in the 1996 Panel of the Survey of Income and Program Participation (SIPP). The SIPP universe is the noninstitutionalized resident population living in the United States. The population includes persons living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible; all others were not eligible to be in the survey. With the exceptions noted above, persons who were at least 15 years of age at the time of the interview were eligible to be in the survey.

The 1996 Panel of the SIPP sample is located in 322 Primary Sampling Units (PSUs), each consisting of a county or a group of contiguous counties. Within these PSUs, living quarters (LQs) were systematically selected from lists of addresses prepared for the 1990 decennial census to form the bulk of the sample. To account for LQs built within each of the sample areas after the 1990 census, a sample containing clusters of four LQs was drawn of permits issued for construction of residential LQs up until shortly before the beginning of the panel.

In jurisdictions that don't issue building permits or have incomplete addresses, we systematically sampled expected clusters of four LQs which were listed by field personnel and then subsampled in the field. In addition, we selected sample LQs from a supplemental frame that included LQs identified as missed in the 1990 census.

For the first interview of the panel, Wave 1, we obtained interviews from occupants of about 36,700 of the 49,200 designated living quarters. We found most of the remaining 12,500 living quarters in the panel to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. However, we did not interview approximately 3,400 of the 12,500 living quarters in the panel because the occupants, (1) refused to be interviewed, (2) could not be found at home, (3) were temporarily absent, or (4) were otherwise unavailable. Thus, occupants of about 92 percent of all eligible living quarters participated in the first interview of the panel.

For subsequent interviews, only original sample persons (those in Wave 1 sample households and interviewed in Wave 1) and persons living with them were eligible to be interviewed. We followed original sample persons if they moved to a new address, unless the new address was more than 100 miles from a

¹ For questions or further assistance with the information provided in this document contact Karen E. King of the Demographic Statistical Methods Division on (301) 457-4192 or via the e-mail using karen.e.king@census.gov.

SIPP sample area. Then, we attempted telephone interviews.

Sample households within a given panel are divided into four random subsamples of nearly equal size. These subsamples are called rotation groups and one rotation group is interviewed each month. Each household in the sample was scheduled to be interviewed at 4 month intervals over a period of roughly 4 years beginning in April 1996. The reference period for the questions is the 4-month period preceding the interview month. In general, one cycle of four interviews covering the entire sample, using the same questionnaire, is called a wave.

The public use files include core and supplemental (**topical module**) data. Core questions are repeated at each interview over the life of the panel. Topical modules include questions which are asked only in certain waves. The 1996 Panel topical modules are given in Table 1.

Table 2 indicates the reference months and interview months for the collection of data from each rotation group for the 1996 Panel. For example, Wave 1 rotation group 1 of the 1996 Panel was interviewed in April 1996 and data for the reference months December 1995 through March 1996 were collected.

Estimation. We used several stages of weight adjustments in the estimation procedure to derive the SIPP cross-sectional person level weights. We gave each person a base weight (**BW**) equal to the inverse of probability of selection of a person's household. We applied two noninterview adjustment factors. One adjusted the weights of interviewed persons in interviewed households to account for households which were eligible for the sample but which field representatives could not interview at the first interview (F_{NI}). The second compensated for person noninterviews occurring in subsequent interviews (F_{N2}). We used a Duplication Control Factor (**DCF**) which adjusts for subsampling done in the field when the number of sample units is much larger than expected. We applied a Mover's Weight (**MW**), which adjusts for persons in the SIPP universe who move into sample households after Wave 1. The last weight applied is the Second Stage Adjustment Factor (F_{2S}). This weight adjusts estimates to population controls and causes husbands' and wives' weights to be equal.

The final cross-sectional weight is $FW_c = BW(DCF(F_{NI}(F_{2S}$ for Wave 1 and is $FW_c = IW(F_{N2}(F_{2S}$ for Waves 2+, where IW is either $BW(DCF(F_{NI}$ or MW . James (1995) and Siegel (1995a) describe SIPP cross-sectional weighting in greater detail.

Researchers both inside and outside the Census Bureau conducted evaluations of SIPP weighting methodology and researched alternative methodologies. We are making several improvements to SIPP weighting methods beginning with this panel. They are described below.

- We dropped the first stage factor (F_{1S}) from cross-sectional weighting. This factor adjusted for differences between the Census count of population and an estimate of that count based on Census data for sample PSUs. James (1994) found that it did not reduce variance as was previously believed. Jabine, et al (1990) describe the first stage factor used in earlier panels.
- We are using additional variables in nonresponse adjustment. We added high/low poverty stratum code to the Wave 1 nonresponse adjustment, and we added household income, geographic division,

and number of imputations for selected income and asset items to the nonresponse adjustment for Waves 2+. Research by Rizzo, et al (1994) and by Folsom and Witt (1994) pointed out the potential of the latter three variables in reducing nonresponse bias.

- We redefined nonresponse adjustment cells for Waves 2+ weighting. We formed the nonresponse cells by successively partitioning data from five panels by whichever variable most reduced the bias of the household income to poverty threshold ratio. We used data from a sixth panel to evaluate the results. We calculated the nonresponse bias of six variables at Waves two and seven for both the new cells and the original cells using initial weights and data from the most recent interview in the calculations. The new cells had lower bias for five of the six variables (Siegel, 1995b).

Research was conducted on a number of promising weighting improvements. Allen and Petroni (1994) reported on an adjustment for mover attrition. Folsom and Witt (1994) and Rizzo, et al (1994) studied alternative nonresponse adjustments using response propensity models. Each study computed weights using an alternative methodology. The researchers then compared estimates of various items to benchmarks. The benchmarks came from administrative records and survey data with less nonresponse than the SIPP. The comparisons did not provide strong evidence of lower bias using the alternative weighting methods.

Additional Methodology

Use of Weights. Each household and each person within each household on each wave tape has four weights. These four weights are reference month specific and therefore can be used only to form reference month estimates. Reference month estimates can be averaged to form estimates of monthly averages over some period of time.

Example, using the proper weights, one can estimate the monthly average number of households in a specified income range over November and December 1996. To estimate monthly averages of a given measure (such as, total, mean) over a number of consecutive months, sum the monthly estimates and divide by the number of months.

To form an estimate for a particular month, use the reference month weight for the month of interest, summing over all persons or households with the characteristic of interest whose reference period includes the month of interest. Multiply the sum by a factor to account for the number of rotations contributing data for the month. This factor equals four divided by the number of rotations contributing data for the month. For example, December 1995 data is only available from rotation 1 for Wave 1 of the 1996 Panel (See Table 2), so a factor of 4/1 must be applied.

When estimates for months with less than four rotations worth of data are constructed from a wave file, factors greater than 1 must be applied. However, when core data from consecutive waves are used together, data from all four rotations may be available, in which case the factors are equal to 1.

These tapes contain no weight for characteristics that involve a persons's or household's status over two or more months (such as, number of households with a 50 percent increase in income between November and December 1995).

Producing Estimates for Census Regions and States. The total estimate for a region is the sum of the state estimates in that region. Using this sample, estimates for individual states are subject to very high variance and are not recommended. The state codes on the file are primarily of use in linking respondent characteristics with appropriate contextual variables (for example, state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

Producing Estimates for the Metropolitan Population. For Washington, DC and 14 other states, metropolitan or non-metropolitan residence is identified (variable H*-METRO). In 28 additional states, where the non-metropolitan population in the sample was small enough to present a disclosure risk, a fraction of the metropolitan sample was recoded to be indistinguishable from non-metropolitan cases (H*-METRO=2). In these states, therefore, the cases coded as metropolitan (H*-METRO=1) represent only a subsample of that population.

In producing state estimates for a metropolitan characteristic, multiply the individual, family, or household weights by the metropolitan inflation factor for that state, presented in Table 3. (This inflation factor compensates for the subsampling of the metropolitan population and is 1.0 for the states with complete identification of the metropolitan population.)

The same procedure applies when creating estimates for particular identified MSA's or CMSA's--apply the factor appropriate to the state. For multi-state MSA's, use the factor appropriate to each state part. For example, to tabulate data for the Maine, ME-VT, apply the Vermont factor of 1.57953 to weights for residents of the Vermont part of the MSA; Maine residents require the same modification to the weight (i.e., their factors also equal 1.57953).

In producing regional or national estimates of the metropolitan population, it is also necessary to compensate for the fact that no metropolitan subsample is identified within two states (Mississippi and West Virginia). Thus, factors in the right-hand column of Table 3 should be used for regional and national estimates. The results of regional and national tabulations of the metropolitan population will be biased slightly. However, less than one-half of one percent of the metropolitan population is not represented.

Producing Estimates for the Non-Metropolitan Population. State, regional, and national estimates of the non-metropolitan population cannot be computed directly, except for Washington, DC and the 14 states where the factor for state tabulations in Table 3 is 1.0. In all other states, the cases identified as not in the metropolitan subsample (METRO=2) are a mixture of non-metropolitan and metropolitan households. Only an indirect method of estimation is available: first compute an estimate for the total population, then subtract the estimates for the metropolitan population. The results of these tabulations will be slightly biased.

ACCURACY OF ESTIMATES

SIPP estimates are based on a sample; they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: nonsampling and sampling. We are able to provide estimates of the magnitude of SIPP sampling error, but this is not true of

nonsampling error. Found in the next sections are descriptions of sources of SIPP nonsampling error, followed by a discussion of sampling error, its estimation, and its effect in data analyses.

Nonsampling Error. Nonsampling errors can be attributed to many sources:

- C inability to obtain information about all cases in the sample
- C definitional difficulties
- C differences in the interpretation of questions
- C inability or unwillingness on the part of the respondents to provide correct information
- C inability to recall information, errors made in the following: collection such as in recording or coding the data, processing the data, estimating values for missing data
- C biases resulting from the differing recall periods caused by the interviewing pattern used
- C and undercoverage.

Quality control and edit procedures were used to reduce errors made by respondents, coders and interviewers. More detailed discussions of the existence and control of nonsampling errors in the SIPP can be found in the *SIPP Quality Profile, 1998 SIPP Working Paper Number 230, issued May 1999*.

Undercoverage in SIPP results from missed living quarters and missed persons within sample households. It is known that undercoverage varies with age, race, and sex. Generally, undercoverage is larger for males than for females and larger for Blacks than for non-Blacks. Ratio estimation to independent age-race-sex population controls partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that persons in missed households or missed persons in interviewed households have characteristics different from those of interviewed persons in the same age-race-sex group. Further, the independent population controls used have been adjusted for undercoverage in the Census.

A common measure of survey coverage is the coverage ratio, the estimated population before ratio adjustment divided by the independent population control. The Table below shows SIPP coverage ratios for age-sex-race groups for one month-April 1996 prior to the weighting adjustment. The SIPP coverage ratios exhibit some variability from month to month, but these are a typical set of coverage ratios. Other Census Bureau household surveys [like the Current Population Survey] experience similar coverage.

**SIPP Average Coverage Ratios for Reference Month 4 of
Wave 1 - Age by Non-Black/Black Status and Sex**

Comparability with Other Estimates. Caution should be exercised when comparing data from this with data from other SIPP products or with data from other surveys. The comparability problems are caused by such sources as the seasonal patterns for many characteristics, different nonsampling errors, and different concepts and procedures. Refer to the *SIPP Quality Profile* for known differences with data from other sources and further discussions.

Sampling Variability. Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

USES AND COMPUTATION OF STANDARD ERRORS

Confidence Intervals. The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Hypothesis Testing. Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population characteristics using sample estimates. The most common types of hypotheses tested are 1) the population characteristics are identical versus 2) they are different. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

To perform the most common test, compute the difference $X_A \& X_B$, where X_A and X_B are sample estimates of the characteristics of interest. A later section explains how to derive an estimate of the standard error of the difference $X_A \& X_B$. Let that standard error be S_{DIFF} . If $X_A \& X_B$ is between -1.6 times S_{DIFF} and +1.6 times S_{DIFF} , no conclusion about the characteristics is justified at the 10 percent significance level. If, on the other hand, $X_A \& X_B$ is smaller than -1.6 times S_{DIFF} or larger than +1.6 times S_{DIFF} , the

observed difference is significant at the 10 percent level. In this event, it is commonly accepted practice to say that the characteristics are different. Of course, sometimes this conclusion will be wrong. When the characteristics are the same, there is a 10 percent chance of concluding that they are different.

Note that as more tests are performed, more erroneous significant differences will occur. For example, at the 10 percent significance level, if 100 independent hypothesis tests are performed in which there are no real differences, it is likely that about 10 erroneous differences will occur. Therefore, the significance of any single test should be interpreted cautiously.

Note Concerning Small Estimates and Small Differences. Because of the large standard errors involved, there is little chance that estimates will reveal useful information when computed on a base smaller than 200,000. Care must be taken in the interpretation of small differences since even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

Calculating Standard Errors for SIPP Estimates. There are three main ways we calculate the Standard Errors for SIPP Estimates. They are as follows:

- C Replicate Weighting Methods,
- C Generalized Variance parameters (denoted as a and b),
- C Simplified tables using the a and b parameters.

The most reliable method is the Replicate Weighting Method. SIPP uses the Replicate Weighting Method to produce Generalized Variance parameters. Using the Generalized Variance parameters, we create simplified tables.

Standard Error Parameters and Tables and Their Use. Most SIPP estimates have greater standard errors than those obtained through a simple random sample because PSUs are sampled and clusters of living quarters are sampled for the SIPP in the area and new construction frames. To derive standard errors that would be applicable to a wide variety of estimates and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted a and b) were developed to approximate the standard error behavior of each group of estimates. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. These a and b parameters vary by characteristic and by demographic subgroup to which the estimate applies. Table 4 provides base a and b parameters to be used for the 1996 Panel estimates. Table 10 provides parameters for calculating 1996 topical module variances.

The factors provided in Table 5 when multiplied by the base parameters of Table 4 for a given subgroup and type of estimate give the a and b parameters for that subgroup and estimate type for the specified reference period. For example, the base a and b parameters for total number of households are -0.00002495 and 2,484, respectively. For Wave 1 the factor for March 1996 is 1 since 4 rotation months of data is available. So, the a and b parameters for total household income in March 1996 based on Wave 1 are -0.00002495 and 2,484, respectively. Also for Wave 1, the factor for the first quarter of 1996 is 1.2222

since 9 rotation months of data are available (rotations 1 and 2 provide 3 rotations months each, while rotations 3 and 4 provide 2 and 1 rotation months, respectively). So the a and b parameters for total number of households in the first quarter of 1992 are -0.00003049 and 3,036, respectively for Wave 1.

The a and b parameters may be used to calculate the standard error for estimated numbers and percentages. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. Methods for using these parameter for computation of approximate standard errors are given in the following sections.

For those users who wish further simplification, we have also provided general standard errors in Tables 6 through 9. Note that these standard errors only apply when data from all four rotations are used and must be adjusted by a factor from Table 4. The standard errors resulting from this simplified approach are less accurate. Methods for using these parameters and tables for computation of standard errors are given in the following sections.

The procedures described below apply only to reference month estimates or averages of reference month estimates. Refer to the section "Use of Weights" for a more detailed discussion of the construction of estimates.

Variance stratum codes and half sample codes are included on the tapes to enable the user to compute the variances directly and more accurately by methods such as balanced repeated replications (BRR). William G. Cochran provides a list of references discussing the application of this technique. (See Sampling Techniques, 3rd Ed., New York: John Wiley and Sons, 1977, p. 321.)

Standard Errors of Estimated Numbers. The approximate standard error, s_x , of an estimated number of persons, households, families, unrelated individuals and so forth, can be obtained in two ways. Both apply when data from all four rotations are used to make the estimate. However, only the second method should be used when less than four rotations of data are available for the estimate. Note that neither method should be applied to dollar values.

The standard error may be obtained by the use of the formula

$$s_x = fs \tag{1}$$

where f is the appropriate f factor from Table 4, and s is the standard error on the estimate obtained by interpolation from Table 6 or 7. Alternatively, s_x may be approximated by the formula

$$s_x = \sqrt{ax^2 + bx} \tag{2}$$

from which the standard errors in Tables 8 and 9 were calculated. Here x is the size of the estimate and a and b are the parameters associated with the particular type of characteristic being estimated. Use of Formula 2 will provide more accurate results than the use of Formula 1.

Illustration.

Suppose SIPP estimates for Wave 1 of the 1996 Panel show that there were 1,700,000 black households with monthly household income above \$4,000. The appropriate parameters and factor from Table 4 and the appropriate general standard error from Table 6 are

$$a = 0.00018621, \quad b = 2,140, \quad f = 0.61, \quad s = 97,000.$$

Using Formula 1, the approximate standard error is

$$s_x = (0.61)(97000) = 59,170.$$

Using Formula 2, the approximate standard error is

$$\sqrt{(0.00018621)(1,700,000)^2 + (2,140)(1,700,000)} = 55,676.$$

Using the standard error based on Formula 2, the approximate 90-percent confidence interval as shown by the data is from 1,608,412 to 1,791,588. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90% of all samples.

Standard Error of a Mean. A mean is defined here to be the average quantity of some item (other than persons, families, or households) per person, family or household. For example, it could be the average monthly household income of females age 25 to 34. The standard error of a mean can be approximated by Formula 3 below. Because of the approximations used in developing Formula 3, an estimate of the standard error of the mean obtained from this formula will generally underestimate the true standard error. The formula used to estimate the standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{b}{y}\right) s^2} \tag{3}$$

where y is the size of the base, s^2 is the estimated population variance of the item and b is the parameter associated with the particular type of item.

The population variance s^2 may be estimated by one of two methods. In both methods, we assume x_i is the value of the item for unit "I." (Unit may be person, family, or household). To use the first method, the range of values for the item is divided into "c" intervals. The upper and lower boundaries of interval j are Z_{j+1} and Z_j , respectively. Each unit is placed into one of "c" groups such that $Z_{j+1} < x_i < Z_j$.

The estimated population mean, \bar{x} , and variance, s^2 , are given by the formulas:

$$\begin{aligned}\bar{x} &= \sum_{j=1}^c p_j m_j \\ s^2 &= \sum_{j=1}^c p_j m_j^2 - \bar{x}^2,\end{aligned}\tag{4}$$

where p_j is the estimated proportion of units in group j , and $m_j = (Z_{j\&1} + Z_j)/2$. The most representative value of the item in group j is assumed to be m_j . If group “c” is open-ended, or there exists no upper interval boundary, then an approximate value for m_c is

$$m_c = \frac{3}{2} Z_{c\&1}.$$

In the second method, the estimated population mean, \bar{x} , and variance, s^2 , are given by the formulas

$$\begin{aligned}\bar{x} &= \frac{\sum_{i=1}^n w_i x_i}{\sum_{i=1}^n w_i} \\ s^2 &= \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2,\end{aligned}\tag{5}$$

where there are n units with the item of interest and w_i is the final weight for unit “ i ” (note that $\sum_{i=1}^n w_i = Y$).

Illustration.

Suppose that based on Wave 1 data, the distribution of monthly cash income for persons age 25 to 34 during the month of January 1996 is given in Table 11.

Using Formula 4 and the mean monthly cash income of \$2,527 the approximate population variance, s^2 , is

$$s^2 = \left(\frac{1,371}{39,851} \right) (150)^2 + \left(\frac{1,651}{39,851} \right) (450)^2 + \dots + \left(\frac{1,493}{39,851} \right) (9,000)^2 + (2,527)^2 = 3,175,058.$$

Using Formula 3 and the appropriate base b parameter from Table 4, the estimated standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{3,501}{39,851,000} \right) (3,175,058)} = \$16.70.$$

Standard error of an aggregate. An aggregate is defined to be the total quantity of an item summed over all the units in a group. The standard error of an aggregate can be approximated using Formula 6.

As with the estimate of the standard error of a mean, the estimate of the standard error of an aggregate will generally underestimate the true standard error. Let y be the size of the base, s^2 be the estimated population variance of the item obtained using Formula 4 or Formula 5 and b be the parameter associated with the particular type of item. The standard error of an aggregate is:

$$s_x = \sqrt{(b)(y)s^2} \quad (6)$$

Standard Errors of Estimated Percentages. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more, e.g., the percent of people employed is more reliable than the estimated number of people employed. When the numerator and denominator of the percentage have different parameters, use the parameter (and appropriate factor) of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first is the percentage of persons, families or households sharing a particular characteristic such as the percent of persons owning their own home. The second type is the percentage of money or some similar concept held by a particular group of persons or held in a particular form. Examples are the percent of total wealth held by persons with high income and the percent of total income received by persons on welfare.

For the percentage of persons, families, or households, the approximate standard error, $s_{(x,p)}$, of the estimated percentage p can be obtained by the formula

$$s_{(x,p)} = fs \quad (7)$$

when data from all four rotations are used to estimate p .

In this formula, f is the appropriate f factor from Table 6 and s is the standard error of the estimate from Table 10 or 11.

Alternatively, it may be approximated by the formula

$$s_{(x,p)} = \sqrt{\frac{b}{x} (p)(100-p)} \quad (8)$$

from which the standard errors in Tables 10 and 11 were calculated. Here x is the size of the subclass of social units which is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the parameter associated with the characteristic in the numerator. Use of this formula will give more accurate results than use of Formula 7 above and should be used when data from less than four rotations are used to estimate p .

Illustration.

Suppose that, in the month of January 1996, 6.7 percent of the 16,812,000 persons in nonfarm households with a mean monthly household cash income of \$4,000 to \$4,999, were black. Using Formula 8 and the b parameter of 4,610 from Table 4 and a factor of 2 for the month of January 1996 from Table 5, the approximate standard error is

$$\sqrt{\frac{4,610(2)}{(16,812,000)} (6.7) (100-6.7)} = 0.59 \text{ percent.}$$

Consequently, the 90 percent confidence interval as shown by these data is from 5.74 to 7.66 percent.

For percentages of money, a more complicated formula is required. A percentage of money will usually be estimated in one of two ways. It may be the ratio of two aggregates:

$$p_I = 100 (X_A / X_N)$$

or it may be the ratio of two means with an adjustment for different bases:

$$p_I = 100 (\hat{p}_A \bar{X}_A / \bar{X}_N)$$

where x_A and x_N are aggregate money figures, \bar{x}_A and \bar{x}_N are mean money figures, and \hat{p}_A is the estimated number in group A divided by the estimated number in group N. In either case, we estimate the standard error as

$$s_I = \sqrt{\left(\frac{\hat{p}_A \bar{x}_A}{\bar{x}_N}\right)^2 \left[\left(\frac{s_p}{\hat{p}_A}\right)^2 \% \left(\frac{s_A}{\bar{x}_A}\right)^2 \% \left(\frac{s_B}{\bar{x}_N}\right)^2 \right]}, \quad (9)$$

where s_p is the standard error of \hat{p}_A , s_A is the standard error of \bar{x}_A and s_B is the standard error of \bar{x}_N . To calculate s_p , use Formula 8. The standard errors of \bar{x}_N and \bar{x}_A may be calculated using Formula 3.

It should be noted that there is frequently some correlation between \hat{p}_A , \bar{x}_N and \bar{x}_A . Depending on the magnitude and sign of the correlations, the standard error will be over or underestimated.

Illustration.

Suppose that in January 1996, 9.8% of the households own rental property, the mean value of rental property is \$72,121, the mean value of assets is \$78,734, and the corresponding standard errors are 0.31%, \$5799, and \$2867. In total there are 86,790,000 households. Then, the percent of all household assets held in rental property is

$$= 100 \left((0.098) \frac{72121}{78734} \right) = 9.0\%$$

Using Formula 9, the appropriate standard error is

$$\begin{aligned} s_I &= \sqrt{\left(\frac{(0.098)(72121)}{78734}\right)^2 \left[\left(\frac{0.0031}{0.098}\right)^2 \% \left(\frac{5799}{72121}\right)^2 \% \left(\frac{2867}{78734}\right)^2 \right]} \\ &= 0.008 \\ &= 0.8\% \end{aligned}$$

Standard Error of a Difference. The standard error of a difference between two sample estimates is approximately equal to

$$s_{(x\&y)} = \sqrt{s_x^2 \% s_y^2} \quad (10)$$

where s_x and s_y are the standard errors of the estimates x and y . The estimates can be numbers, percents, ratios, etc. The above formula assumes that the correlation coefficient between the characteristics estimated by x and y is zero. If the correlation is really positive (negative), then this assumption will tend to cause overestimates (underestimates) of the true standard error.

Illustration.

Suppose that SIPP estimates show the number of persons age 35-44 years with monthly cash income of \$4,000 to \$4,999 was 3,186,000 in the month of January 1996 and the number of persons age 25-34 years with monthly cash income of \$4,000 to \$4,999 in the same time period was 2,619,000. Then, using parameters from Table 4 and Formula 2, the standard errors of these numbers are approximately 104,787 and 95,140, respectively. The difference in sample estimates is 567,000 and using Formula 10, the approximate standard error of the difference is

$$\sqrt{(104,787)^2 + (95,140)^2} = 141,534 .$$

Suppose that it is desired to test at the 10 percent significance level whether the number of persons with monthly cash income of \$4,000 to \$4,999 was different for persons age 35-44 years than for persons age 25-34 years. To perform the test, compare the difference of 567,000 to the product $1.6 (141,534) = 226,455$. Since the difference is larger than 1.6 times the standard error of the difference, the data show that the two age groups are significantly different at the 10 percent significance level.

Standard Error of a Median. The median quantity of some item such as income for a given group of persons, families, or households is that quantity such that at least half the group have as much or more and at least half the group have as much or less. The sampling variability of an estimated median depends upon the form of the distribution of the item as well as the size of the group. To calculate standard errors on medians, the procedure described below may be used.

An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using either Formula 7 or Formula 8, the standard error of an estimate of 50 percent of the group.
2. Add to and subtract from 50 percent the standard error determined in step 1.
3. Using the distribution of the item within the group, calculate the quantity of the item such that the percent of the group with more of the item is equal to the smaller percentage found in step 2. This quantity will be the upper limit for the 68-percent confidence interval. In a similar fashion, calculate the quantity of the item such that the percent of the group with more of the item is equal to the larger percentage found in step 2. This quantity will be the lower limit for the 68-percent confidence interval.
4. Divide the difference between the two quantities determined in step 3 by two to obtain the standard error of the median.

To perform step 3, it will be necessary to interpolate. Different methods of interpolation may be used. The most common are simple linear interpolation and Pareto interpolation. The appropriateness of the method depends on the form of the distribution around the median. If density is declining in the area, then we recommend Pareto interpolation. If density is fairly constant in the area, then we recommend linear interpolation. Note, however, that Pareto interpolation can never be used if the interval contains zero or negative measures of the item of interest. Interpolation is used as follows. The quantity of the item such that p percent have more of the item is

$$X_{pN} = \exp \left[\left(\frac{\ln \left(\frac{pN}{N_1} \right)}{\ln \left(\frac{N_2}{N_1} \right)} \right) \ln \left(\frac{A_2}{A_1} \right) \right] A_1 . \quad (11)$$

if Pareto Interpolation is indicated and

$$X_{pN} = \left[\frac{pN \& N_1}{N_2 \& N_1} (A_2 \& A_1) \% A_1 \right] \quad (12)$$

if linear interpolation is indicated, where

N is the size of the group,

A_1 and A_2 are the lower and upper bounds, respectively, of the interval in which X_{pN} falls,

N_1 and N_2 are the estimated number of group members owning more than A_1 and A_2 , respectively,

exp refers to the exponential function and

Ln refers to the natural logarithm function

Illustration.

To illustrate the calculations for the sampling error on a median, we return to Table 11. The median monthly income for this group is \$2,158. The size of the group is 39,851,000.

1. Using Formula 8, the standard error of 50 percent on a base of 39,851,000 is about 0.5 percentage points.
2. Following step 2, the two percentages of interest are 49.5 and 50.5.
3. By examining Table 11, we see that the percentage 49.5 falls in the income interval from 2000 to 2499. (Since 55.5% receive more than \$2,000 per month, the dollar value corresponding to 49.5 must be between \$2,000 and \$2,500). Thus, $A_1 = \$2,000$, $A_2 = \$2,500$, $N_1 = 22,106,000$, and $N_2 = 16,307,000$.

In this case, we decided to use Pareto interpolation. Therefore, the upper bound of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\left(\ln \left(\frac{(.495)(39,851,000)}{22,106,000} \right) / \ln \left(\frac{16,307,000}{22,106,000} \right) \right) \ln \left(\frac{2,500}{2,000} \right) \right] \cdot \$2174 .$$

Also by examining Table 11, we see that 50.5 falls in the same income interval. Thus, A_1 , A_2 , N_1 , and N_2 are the same. We also use Pareto interpolation for this case. So the lower bound of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\left(\ln \left(\frac{(.505)(39,851,000)}{22,106,000} \right) / \ln \left(\frac{16,307,000}{22,106,000} \right) \right) \ln \left(\frac{2,500}{2,000} \right) \right] \cdot \$2142 .$$

Thus, the 68-percent confidence interval on the estimated median is from \$2142 to \$2174. An approximate standard error is

$$\frac{\$2174 \text{ \& } \$2142}{2} \cdot \$16 .$$

Standard Errors of Ratios of Means and Medians. The standard error for a ratio of means or medians is approximated by:

$$s_{\left(\frac{x}{y}\right)} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{s_y}{y}\right)^2 + \left(\frac{s_x}{x}\right)^2 \right]} \quad (13)$$

where x and y are the means or medians, and s_x and s_y are their associated standard errors. Formula 13 assumes that the means are not correlated. If the correlation between the population means estimated by x and y are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means.

Standard Errors Using SAS or SPSS. Standard errors and their associated variance, calculated by SAS or SPSS statistical software package, do not accurately reflect the SIPP's complex sample design. Erroneous conclusions will result if these standard errors are used directly. We provide adjustment factors by characteristics that should be used to correctly compensate for likely under-estimates. The factors called DEFF available in Table 4, must be applied to SAS or SPSS generated variances. The square root of DEFF can be directly applied to similarly generated standard errors. These factors approximate design effects which adjust statistical measures for sample designs more complex than simple random sample.

Metro/NonMetro	-0.00007860	8160	3.46	1.00

Table 5: Factors to be Applied to Table 4 Base Parameters to Obtain Parameters for Various Reference Periods

# of available rotation months³	Factor
Monthly estimate	
1	4.0000
2	2.0000
3	1.3333
4	1.0000
Quarterly estimate	
6	1.8519
8	1.4074
9	1.2222
10	1.0494
11	1.0370

³ The number of available rotation months for a given estimate is the sum of the number of rotations available for each month of the estimate.

Table 6: Standard Errors of Estimated Numbers of Households, Families, or Unrelated People (Numbers in Thousands)

Size of Estimate	Standard Error	Size of Estimate	Standard Error
200	34	25,000	329
300	42	30,000	348
500	54	40,000	372
750	66	50,000	380
1,000	76	60,000	372
2,000	106	70,000	347
3,000	130	75,000	328
5,000	166	80,000	303
7,500	200	90,000	225
10,000	228	95,000	162
15,000	271	99,500	37

- To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 7: Standard Errors of Estimated Numbers of People (Numbers in Thousands)

Size of Estimate	Standard Error	Size of Estimate	Standard Error
200	40	90,000	697
300	50	100,000	714
500	64	110,000	725
750	78	120,000	732
1,000	90	130,000	735
2,000	128	140,000	734
3,000	156	150,000	729
5,000	200	160,000	719
7,500	244	170,000	705
10,000	281	180,000	686
15,000	340	190,000	661
25,000	431	200,000	631
30,000	467	210,000	594
40,000	527	220,000	549
50,000	576	230,000	494
60,000	616	240,000	425
70,000	649	250,000	332
75,000	663	260,000	185
80,000	676	264,000	43

C To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 8: Standard Errors of Estimated Percentages of Households, Families, or Unrelated People (Numbers in Thousands).

Base of Estimated Percentage (Thousands)	Estimated Percentages					
	#1 or \$99	2 or 98	5 or 95	10 or 90	25 or 75	50
200	1.69	2.38	3.71	5.10	7.36	8.50
300	1.38	1.94	3.03	4.17	6.01	6.94
500	1.07	1.51	2.34	3.23	4.66	5.38
750	0.87	1.23	1.91	2.63	3.80	4.39
1,000	0.76	1.06	1.66	2.28	3.29	3.80
2,000	0.54	0.75	1.17	1.61	2.33	2.69
3,000	0.44	0.61	0.96	1.32	1.90	2.20
5,000	0.34	0.48	0.74	1.02	1.47	1.70
7,500	0.28	0.39	0.61	0.83	1.20	1.39
10,000	0.24	0.34	0.52	0.72	1.04	1.20
15,000	0.20	0.27	0.43	0.59	0.85	0.98
25,000	0.15	0.21	0.33	0.46	0.66	0.76
30,000	0.14	0.19	0.30	0.42	0.60	0.69
40,000	0.12	0.17	0.26	0.36	0.52	0.60
50,000	0.11	0.15	0.23	0.32	0.47	0.54
60,000	0.10	0.14	0.21	0.29	0.43	0.49
70,000	0.09	0.13	0.20	0.27	0.39	0.45
75,000	0.09	0.12	0.19	0.26	0.38	0.44
80,000	0.08	0.12	0.19	0.26	0.37	0.43
90,000	0.08	0.11	0.17	0.24	0.35	0.40
95,000	0.08	0.11	0.17	0.23	0.34	0.39
99,500	0.08	0.11	0.17	0.23	0.33	0.38

C To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

Table 9: Standard Errors of Estimated Percentages of People (Numbers in Thousands).

Base of Estimated Percentage (Thousands)	Estimated Percentages					
	#1 or \$99	2 or 98	5 or 95	10 or 90	25 or 75	50
200	2.01	2.83	4.41	6.07	8.76	10.12
300	1.64	2.31	3.60	4.96	7.15	8.26
600	1.16	1.64	2.55	3.51	5.06	5.84
1,000	0.90	1.27	1.97	2.72	3.92	4.53
2,000	0.64	0.90	1.39	1.92	2.77	3.20

C To account for sample attrition, multiply the standard error of the estimate by 1.16 for estimates which include data from Wave 4 to Wave 6, 1.30 for Wave 7 to Wave 9, and 1.38 for Wave 10 to Wave 12.

APPENDIX A

Wave 6 Questionnaire

1996 Panel - Wave 6 Topical Modules

Medical Expenses and Utilization of Health Care Topical Module

-ME01-

These next few questions are about your health. Would you say your health in general is excellent, very good, good, fair, or poor?

- (1) Excellent
- (2) Very good
- (3) Good
- (4) Fair
- (5) Poor

-ME02-

During the past 12 months, that is, the period from today back to this date one year ago, were you a patient in a hospital overnight or longer?

- (1) Yes
- (2) No

-ME03-

How many nights in all did you spend in a hospital of any type during the past 12 months?

ENTER "N" FOR NONE OR NO TIMES

_____ Nights

-ME04-

Which of the following best describes the reasons why you entered the hospital during the most recent stay of one night or longer.

FR NOTES: A) READ ANSWER CATEGORIES BELOW .
B) ACCEPT MORE THAN ONE RESPONSE IF OFFERED, BUT DO NOT PROBE FOR MULTIPLE RESPONSES.

(MARK ALL THAT APPLY)

- (1) Yes - Applies
- (2) No - Does not apply

- Diagnostic Tests only
- Give birth, including cesarean section
- Operation or surgical procedure
- Treatment or therapy, not including surgery
- Any other reason

-ME05-

During the past 12 months, did you take any prescription medications?

- (1) Yes
- (2) No

-ME06-

Do you take prescription medicines on a daily basis?

- (1) Yes
- (2) No

-ME07-

Do you have the Flashcard pamphlet we sent you in the mail? It would have come with the introductory letter.

- (1) Yes
- (2) No

-ME08-

During the past 12 months, how many visits did you make to a dentist or other dental professional?

ENTER "N" FOR NONE OR NO TIMES

ENTER "H" FOR FLASHCARD KK

_____ Times

-ME09-

Have you lost any of your permanent adult teeth?

(1) Yes

(2) No

-ME10-

Have you lost all of your permanent adult teeth?

(1) Yes

(2) No

-ME11-

During the past 12 months, how many times did you see or talk to a medical doctor or other medical provider about your health?

ENTER "N" FOR NONE OR NO TIMES

ENTER "H" FOR FLASHCARD LL

_____ Times

-ME12-

Did that visit or call include contact with a physician?

(1) Yes

(2) No

-ME13-

About how many of those visits or calls included contact with a physician?

ENTER "A" FOR ALL TIMES

ENTER "N" FOR NONE OR NO TIMES

_____ Times

-ME14-

In the last 12 months, did you purchase any other medical supplies or services such as those shown on this card?

ENTER "H" FOR FLASHCARD MM

(1) Yes

(2) No

-ME15-

During the past 12 months, about how many days did illness or injury keep you in bed more than half of the day?

ENTER "N" FOR NONE OR NO TIMES

_____ Days

-ME16-

During the past 12 months, about how much did you pay for health insurance? During the past 12 months, about how much did you pay for health insurance for yourself or others in the household?

NOTE TO FR: If someone else in the household pays for the health insurance that covers this respondent, do NOT try to separate the amounts for each person. Just mark N (none) for this respondent and mark the whole amount when you ask this question for the person who pays the premium.

ENTER "N" FOR NO PAYMENTS

_____ Dollars

-ME17-

Was it...

- (1) less than \$500
- (2) \$500 to \$1000
- (3) \$1000 to \$5000
- (4) \$5000 to \$10000
- (5) \$10000 or more

-ME18-

During the past 12 months, about how much was paid for your own medical care?
Include any amount paid on your behalf by another person in this household.

ENTER "N" FOR NO PAYMENTS

_____ Dollars

-ME19-

Was it...

- (1) less than \$500
- (2) \$500 to \$1000
- (3) \$1000 to \$5000
- (4) \$5000 to \$10000
- (5) \$10000 or more

-ME20-

Were these amounts for medical care and health insurance the total cost to your household or did you get reimbursed by some outside source?

- (1) Total Cost
- (2) Got Reimbursed
- (3) Expects to get reimbursed but has not yet

-ME21-

How much of these expenses were reimbursed?

ENTER "N" FOR NONE

ENTER "A" FOR ALL EXPENSES REIMBURSED

_____ Dollars

OR

_____ % (percent reimbursed if answer given as a percentage)

-ME22-

The next few questions are about the health of your child(ren)

(read above for names of all children).

Would you say (child's name)'s health in general is excellent, very good, good, fair, or poor?

- (1) Excellent
 - (2) Very good
 - (3) Good
 - (4) Fair
 - (5) Poor
-

-ME23-

During the past 12 months, was your child(ren) (read above for names of all children) a patient in a hospital overnight or longer?

- (1) Yes
- (2) No

-ME24-

Which children were in a hospital overnight or longer?

ENTER "A" FOR ALL

ENTER LINE NUMBER OF EACH CHILD

(N) No more

-ME25-

How many nights in all did (child's name) spend in a hospital of any type during the past 12 months?

ENTER "N" FOR NONE OR NO TIMES

_____ Nights

-ME26-

Which of the following best describes the reasons why (child's name) entered the hospital during the most recent visit of one night or longer.

FR NOTES: A) READ ANSWER CATEGORIES BELOW.

B) ACCEPT MORE THAN ONE RESPONSE IF OFFERED, BUT DO NOT PROBE FOR MULTIPLE RESPONSES.

(MARK ALL THAT APPLY)

(1) Yes - Applies

(2) No - Does not apply

_____ Diagnostic Tests only

_____ Give birth, including cesarean section (mother)

_____ To be born (baby)

_____ Operation or surgical procedure

_____ Treatment or therapy, not including surgery

_____ Any other reason

-ME27-

During the past 12 months did (read above for names of all children) take any prescription medications?

- (1) Yes
- (2) No

-ME28-

Which children took prescription medications?

ENTER "A" FOR ALL
ENTER LINE NUMBER OF EACH CHILD

- (N) No more

-ME29-

Does (child's name) take prescription medicines on a daily basis?

- (1) Yes
- (2) No

-ME30-

During the past 12 months, did (read above for names of all children) visit a dentist, or other dental professional?

ENTER "H" FOR FLASHCARD KK

- (1) Yes
- (2) No

-ME31-

Which children visited a Dentist?

ENTER "A" FOR ALL
ENTER LINE NUMBER OF EACH CHILD

- (N) No more

-ME32-

During the past 12 months, how many visits did (child's name) make to a dentist?

ENTER "N" FOR NONE OR NO TIMES

_____ Times

-ME33-

Dental sealants are special plastic coatings that are painted on the tops of the back teeth to prevent tooth decay. They are different from fillings, caps, crowns, and fluoride treatments. Has (child's name) ever had dental sealants painted on his/her teeth?

- (1) Yes
 - (2) No
-

-ME34-

During the past 12 months, did you or anyone else see or talk to a medical doctor or other medical provider about (read above for names of all children)'s health?

ENTER "H" FOR FLASHCARD LL

- (1) Yes
 - (2) No
-

-ME35-

For which children?

ENTER "A" FOR ALL
ENTER LINE NUMBER OF EACH CHILD

ENTER "N" FOR NONE, OR FOR "NO MORE" AFTER LINE ENTRIES

-ME36-

During the past 12 months, about how many times did you or anyone else see or talk to a medical doctor or other medical provider about (child's name)'s health?

ENTER "N" FOR NONE OR NO TIMES

_____ Times

-ME37-

Did that visit or call include contact with a physician?

- (1) Yes
 - (2) No
-

-ME38-

In the past 12 months, about how many of the visits or calls included contact with a physician?

ENTER "A" FOR ALL VISITS
ENTER "N" FOR NONE

_____ Times

-ME39-

In the last 12 months, did you or anyone else buy for (read above for names of all children) any other medical supplies or services such as those shown on this card?

ENTER "H" FOR FLASHCARD MM

- (1) Yes
- (2) No

-ME40-

For which children were purchases made?

ENTER "A" FOR ALL

ENTER LINE NUMBER OF EACH CHILD

(N) No more

-ME41-

We have recorded that your health or condition prevents you from working. For how long have you been prevented from working? Has it been a year or longer, or has it been less than a year?

(1) A year or longer

(2) Less than a year

-ME42-

Is it likely that you will be able to work at some time in the next 12 months?

(1) Yes

(2) No

Work Related Expenses and Child Support Paid Topical Modules

-PV01-

Now I have a few questions about your work related expenses, including transportation to work.

Let's talk about your employment with (Employer's name)

During the typical week, how did you get to work? Did you drive, ride in someone else's vehicle, take public transportation, use some combination, or some other way?

MARK ALL THAT APPLY
ENTER (N) FOR NO MORE

- (1) Drove own vehicle
- (2) Rider in someone else's vehicle/van pool
- (3) Public transportation (bus, train, subway, etc.)
- (4) Walked or bicycled
- (5) Other

-PV02-

Now I have a few questions about your work related expenses, including transportation to work.

Let's talk about your employment with (Business name)

During the typical week, how did you get to work? Did you drive, ride in someone else's vehicle, take public transportation, use some combination, or some other way?

MARK ALL THAT APPLY
ENTER (N) FOR NO MORE

- (1) Drove own vehicle
- (2) Rider in someone else's vehicle/van pool
- (3) Public transportation (bus, train, subway, etc.)
- (4) Walked or bicycled
- (5) Other

- (5) Other

-PV04-

Altogether, about how many miles per week did you usually drive/ride as part of your work commute?

_____ Miles per week

-PV05-

Do you have to pay for parking or tolls as a part of your work-commuting expenses?

- (1) Yes
- (2) No

-PV06-

Typically, how much did you spend PER WEEK for parking or tolls?

\$ _____

-PV07-

During a typical week, about how much were your work commuting expenses?

\$ _____

-PV08-

Not counting expenses your employer paid, did you have any work-related expenses such as licenses, permits, union dues, special tools, or uniforms for your work?

- (1) Yes
- (2) No

-PV09-

Altogether, how much were your annual expenses for such items?

\$ _____

-PV10-

Do you have any children who lived elsewhere with their other parent or guardian at anytime during the past 4 months?

- (1) Yes
- (2) No

-PV11-

How many children?

-PV12-

In the past 4 months, were you required to pay child support?

(FR NOTE: Include payments made directly to the other parent or guardian, payments made through a court or an agency, payments withheld from this persons' paycheck)

- (1) Yes
- (2) No

How much did you pay in child support in:

ENTER (N) FOR NONE/NO MORE.

ENTER (S) FOR SAME AS PREVIOUS AMOUNT.

Month 4 _____

Month 3 _____

Month 2 _____

Month 1 _____

Assets and Liabilities Topical Module

-AL01A-

As of (the last day of the reference period), did anyone outside of this household owe money to you as the result of the sale of a business or property? Exclude mortgages owed to you which have already been reported.

- (1) Yes
- (2) No

-AL01B-

How much was owed to you?

If shared, count only your share.

\$ _____

-AL02A-

I recorded earlier that you owned Series E or EE U.S. Savings Bonds. Did you own them as of (the last day of the reference period)?

- (1) Yes
- (2) No

-AL02B-

What was the FACE VALUE of the U.S. Savings Bonds that you owned?

If ownership was shared, count only your share.

\$ _____

-AL02D-

As of (the last day of the reference period), did you own jointly with your spouse any checking accounts which did NOT earn interest?

(Do not include any jointly owned interest earning checking accounts reported earlier.)

- (1) Yes
- (2) No

-AL02E-

What is your best estimate of the amount of money you and your spouse had in those checking accounts as of (the last day of the reference period)?

(N) None

\$ _____

-AL02F-

As of (the last day of the reference period), did you and your spouse together owe any money for -

- (1) Yes
- (2) No

Store bills or credit card bills? \$ _____

Loans obtained through a bank or credit union,
other than car loans or home equity loans? \$ _____

Any other debt we have not yet mentioned, including
medical bills not covered by insurance, money owed
to private individuals, or any other debt not
covered and excluding mortgages, home equity
loans, and car loans? \$ _____

-AL03A-

How much was owed as of (the last day of the reference period) for -

Store bills or credit card bills? \$ _____

Loans obtained through a bank or credit union,
other than car loans or home equity loans? \$ _____

Any other debt we have not yet mentioned including
medical bills not covered by insurance, money owed
to private individuals, and any other debt not
covered and excluding mortgages, home equity
loans, and car loans? \$ _____

-AL04A-

Besides any non-interest earning checking accounts owned jointly with your spouse, as of (the last day of the reference period), did you own any other checking accounts which did NOT earn interest?

(Do not include any interest earning checking accounts reported earlier.)

- (1) Yes
- (2) No

-AL04B-

What is your best estimate of the amount of money you had in those checking accounts as of (the last day of the reference period)?

(N) None

\$ _____

-AL04C-

Did you have any debts, such as credit card bills, loans from a financial institution, or educational loans, in your OWN name?

- (1) Yes
- (2) No

-AL04D-

As of (the last day of the reference period), did you owe any money in your own name for-

- (1) Yes
- (2) No

Store bills or credit card bills? \$ _____

Loans obtained through a bank or credit union,
other than car loans or home equity loans? \$ _____

Any other debt we have not yet mentioned including
medical bills not covered by insurance, money owed
to private individuals, and any other debt not
covered and excluding mortgages, home equity
loans, and car loans? \$ _____

-AL05A-

How much was owed as of (the last day of the reference period) for -

Store bills or credit card bills? \$ _____

Loans obtained through a bank or credit union,
other than car loans or home equity loans? \$ _____

Any other debt we have not yet mentioned including
medical bills not covered by insurance, money owed
to private individuals, and any other debt not
covered and excluding mortgages, home equity
loans, and car loans? \$ _____

-AL06A-

I recorded earlier that you owned an IRA or KEOGH account.

As of (the last day of the reference period), did you have any IRAs (Individual Retirement Accounts) in your OWN name?

FR Instruction: (Do not mark "Yes" if your account is only included in spouse's IRA account.)

(1) Yes

(2) No

-AL06B-

For how many years have you contributed to your IRA accounts?

(L) Less than 1 Year

_____ Years

-AL06C-

As of (the last day of the reference period), what was the total balance or market value (including interest earned) of the IRA accounts in your own name?

(N) None

\$ _____

-AL06D-

Was the total -

(1) Less than \$ 5,000

(2) \$ 5,000 to \$25,000

(3) \$25,001 to \$50,000

(4) More than \$50,000?

-AL06E-

As of (the last day of the reference period), which kinds of assets did you hold in your IRA accounts?
Was your IRA account invested in (READ CATEGORIES) -

Enter "N" after last category.

- (1) Certificates of deposit or other saving certificates
- (2) Money market funds
- (3) U.S. Government securities
- (4) Municipal or corporate bonds

- (6) Stocks or mutual fund shares
- (7) Other assets

-AL06F-

Please specify the Other Assets.

- 1)
- 2)

-AL06G-

As of (the last day of the reference period), did you have a KEOGH account in your OWN name?

- (1) Yes
- (2) No

-AL06H-

For how many years have you contributed to your KEOGH account?

(L) Less than 1 Year

_____ Years

-AL06I-

As of (the last day of the reference period), what was the total balance or market value of assets in your KEOGH account(s)?

(N) None

\$ _____

-AL06J-

Was the total -

- (1) Less than \$ 5,000
 - (2) \$5,000 to \$25,000
 - (3) \$25,001 to \$50,000
 - (4) More than \$50,000?
-

-AL06K-

As of (the last day of the reference period), which kinds of assets did you hold in your KEOGH account(s)? Was your KEOGH account invested in (READ CATEGORIES) -

Enter 'N' after last category

- (1) Certificates of deposit or other savings certificates
 - (2) Money market funds
 - (3) U.S. Government securities
 - (4) Municipal or corporate bonds
 - (5) U.S. Savings bonds
 - (6) Stocks or mutual fund shares
 - (7) Other assets
-

-AL06L-

Please specify the other assets held.

- 1)
- 2)

-AL07A-

I recorded earlier that you participated in a 401K or thrift plan.

As of (the last day of the reference period), did you have any 401K or thrift plan accounts in your OWN name?

- (1) Yes
- (2) No

-AL07B-

For how many years have you contributed to your 401K or thrift plans?

(L) Less than 1 Year

-AL07C-

As of (the last day of the reference period), what was the total balance or market value (including interest earned) of any 401K or thrift plans held in your own name?

(N) None

-RNT01-

I recorded earlier that you owned rental property jointly with other people besides your spouse.

Did you own any rental property jointly with others besides your spouse as of (the last day of the reference period)?

- (1) Yes
- (2) No

-RNT02-

How many properties did you own jointly with others as of (the last day of the reference period)?

-RNT03-

What type of properties were they?

(Mark all that apply)
(Mark "N" for "No More")

- (1) Vacation home
- (2) Other residential property
- (3) Farm property
- (4) Commercial property
- (5) Equipment
- (6) Other

-RNT04-

Please specify the type of property.

-RNT05-

Were any of these properties attached to or located on the same land as your own residence?

- (1) Yes
- (2) No

-RNT06-

FR Instruction: Ask or verify.

Were all of these properties attached to or located on the same land as your own residence?

(1) Yes

(2) No

-RNT07-

Excluding properties attached to or located on your own residence, what was the total market value of the rental properties as of (the last day of the reference period)?

\$ _____

-RNT08-

Excluding properties attached to or located on your own residence, was there a mortgage, deed of trust, or other debt on the properties as of (the last day of the reference period)?

(1) Yes

(2) No

-RNT09-

As of (the last day of the reference period), how much principal was owed on the properties?

(N) None

\$ _____

-RNT10-

Excluding properties attached to or located on your own residence, what was the total value of your share of equity in the rental properties owned jointly with others as of (the last day of the reference period)?

("Equity" is the total market value of the property, less any debts held against it.)

(N) None

\$ _____

-RNT11-

Was it -

- (1) Less than \$25,000
- (2) \$25,000 to \$75,000
- (3) \$75,001 to \$100,000
- (4) More than \$100,000

-RNT12-

If I were to call back later would you be able to provide me with an estimate of your share of the equity in the properties? (This information is especially important for the purposes of this survey.)

- (1) Yes
- (2) No

Stock and Mutual Fund Shares Topical Module

-SMJ02-

I recorded earlier that you owned mutual funds.

Did you own any of these funds jointly with your spouse as of (the last day of the reference period)?

- (1) Yes
- (2) No

-SMJ03-

I recorded earlier that you owned stocks.

Did you own any of these stocks jointly with your spouse as of (the last day of the reference period)?

- (1) Yes
- (2) No

-SMJ04-

As of (the last day of the reference period), what was the market value of the Mutual Funds Stocks held jointly by you and your spouse?

(Exclude stock in own corporation if the value of that corporation was already obtained.)

(N) None

\$ _____

-SMJ05-

Was it -

- (1) Less than \$1,000
- (2) \$1,000 to \$10,000
- (3) \$10,001 to \$25,000
- (4) More then \$25,000?

-SMJ06-

Was any debt or margin account held against these jointly held mutual funds or stocks as of (the last day of the reference period)?

- (1) Yes
- (2) No

-SMJ07-

As of (the last day of the reference period), what was the amount of the debt or margin account?

(N) None

\$ _____

-SMI02-

I recorded earlier that you owned mutual funds and stocks.

Besides the stocks or mutual funds held jointly with your spouse, did you hold any other stocks or mutual fund shares in your own name as of (the last day of the reference period)?

- (1) Yes
- (2) No

-SMI03-

As of (the last day of the reference period), what was the market value of the stocks and mutual fund shares owned in your own name?

(Exclude stock in own corporation if value of that corporation was already obtained.)

(N) None

\$ _____

-SMI04-

Was it -

- (1) Less than \$1,000
- (2) \$1,000 to \$10,000
- (3) \$10,001 to \$25,000
- (4) More than \$25,000

-SMI05-

Did you have a debt or margin account held against these stocks or mutual funds as of (the last day of the reference period)?

- (1) Yes
- (2) No

-SMI06-

As of (the last day of the reference period), what was the amount of the debt or margin account?

(N) None

\$ _____

Mortgages Topical Module

-MO2A-

I recorded earlier that you jointly held a mortgage with your spouse.

As of (the last day of the reference period), how much principal was owed to you and your spouse on this mortgage?

(Include principal for all mortgages jointly held.)

(N) None

\$ _____

-MO2B-

Was it -

- (1) Less than \$10,000
 - (2) \$10,000 to \$25,000
 - (3) \$25,001 to \$50,000
 - (4) Over \$50,000
-

-M04-

I recorded earlier that you held a mortgage in your own name.

As of (the last day of the reference period), how much principal was owed to you on this mortgage?

(Include principal for all mortgages held.)

(N) None

\$ _____

-MO5-

Was it -

- (1) Less than \$10,000
- (2) \$10,000 to \$25,000
- (3) \$25,001 to \$50,000
- (4) Over \$50,000

Other Financial Investments Topical Module

-OA02-

Earlier you reported owning other financial investments:

As of (the last day of the reference period), what was your equity in these investments?

(Equity is the total market value of the property, less any debts held against it. If the investment is jointly owned, count only your share of equity.)

(N) None

\$ _____

-OA03-

Was it -

- (1) Less than \$1,000
- (2) \$1,000 to \$10,000
- (3) \$10,001 to \$25,000
- (4) More than \$25,000?

Child Well-Being Topical Module

-STATUS-

Are you available to answer some questions about the children in the household?

(1) Yes

No, F1 TO BACK UP. THEN F9 TO SKIP PERSON OR F10 TO EXIT CASE.

-LEAD_IN-

Now we are going to ask you a few questions about your child(ren).

PRESS "ENTER" TO CONTINUE

-CW1-

****NOTE: ENTER INCHES IN INCHES ONLY FIELD. PRESS ENTER TO GO TO INCHES FIELD.****

About how tall is (child's name) without shoes?

_____ Feet _____ Inches

or

_____ Inches

-CW2-

About how much does (child's name) weigh without shoes?

_____ Pounds

-CW3a-

****NOTE: AN "IMMEDIATE FAMILY MEMBER" CAN BE ANY RELATIVE THE RESPONDENT CONSIDERS TO BE PART OF THEIR IMMEDIATE FAMILY.****

Other than members of (child's name)'s immediate family, has (child's name) EVER been cared for regularly in any Head Start, day care, or pre-school programs or by any family day care providers or babysitters?

- (1) Yes
- (2) No

-CW3b-

How old was (child's name) when he/she was FIRST cared for by someone other than you or an immediate family member on a regular basis?

- (1) 0-3 Months
- (2) 4-6 Months
- (3) 7-11 Months
- (4) 12-17 Months
- (5) 18-23 Months
- (6) 2 years and above

-CW3c-

Thinking back to that time, for how many hours each WEEK was (child's name) usually cared for by someone else?

Number of hours: _____

-CW4a-

Has (child's name) ever lived apart from you, for any reason, for a MONTH OR MORE?

- (1) Yes
- (2) No

-CW4b-

****NOTE: CATEGORY (3) TO BE USED ONLY IF CHILD LIVED APART FROM RESPONDENT MORE THAN ONE TIME.****

Thinking about these instances, did you send this child to live with someone else because you were not able to keep (child's name) with you?

- (1) Yes
- (2) No
- (3) Sometimes yes, sometimes no

-CW4c-

Did this happen at any time during the PAST 12 MONTHS?

- (1) Yes
- (2) No

-CW5-

About how many times in the PAST MONTH did you or any family member take (child's name) on any kind of outing - out to the park, to church, to a playground, to visit with friends or relatives, etc.?

_____ Number of times

- (N) None

-CW6a-

****NOTE: THE TOTAL SHOULD INCLUDE THE COMBINED NUMBER OF TIMES THAT THE MOTHER, FATHER, AND ALL OTHER FAMILY MEMBERS READ TO THE CHILD. IF TWO OR MORE PEOPLE READ TO THE CHILD TOGETHER, COUNT IT ONLY ONCE. ****

About how many times in the PAST WEEK, in total, did any family member read stories to (child's name)?

Number of times: _____

- (N) None

-CW6b-

****NOTE: INCLUDE ALL THE TIMES THE DESIGNATED PARENT READ TO THE CHILD AND THE TIMES THE DESIGNATED PARENT WAS PRESENT WHEN SOMEONE ELSE READ TO THE CHILD. ****

About how many times in the PAST WEEK did you read to (child's name)?

Number of times: _____

(N) None

-CW6c-

****NOTE: INCLUDE ALL THE TIMES THE FATHER READ TO THE CHILD AND THE TIMES HE WAS PRESENT WHEN SOMEONE ELSE READ TO THE CHILD.****

And, about how many times in the PAST WEEK did (spouse of respondent's name) read to (child's name)?

Number of times: _____

(N) None

-CW7a-

Are there family rules for (child's name) about what television programs he/she can watch?

- (1) Yes
- (2) No

-CW7b-

Are there family rules about how early or late (child's name) may watch television?

- (1) Yes
- (2) No

-CW7c-

Are there family rules about how many hours (child's name) may watch television?

- (1) Yes
- (2) No

-CW8a-

In a TYPICAL WEEK LAST MONTH, how many DAYS did you eat BREAKFAST with (child's name)?

Days: _____

(N) None

-CW8b-

In a TYPICAL WEEK LAST MONTH, how many DAYS did you eat DINNER with (child's name)?

DAYS: _____

(N) None

-CW8c-

In a TYPICAL WEEK LAST MONTH, how many DAYS did (spouse of respondent's name) eat BREAKFAST with (child's name)?

DAYS: _____

(N) None

-CW8d-

In a TYPICAL WEEK LAST MONTH, how many DAYS did (spouse of respondent's name) eat DINNER with (child's name)?

DAYS: _____

(N) None

-CW9a-

How often do you and (child's name) talk or play with each other for 5 minutes or more, just for fun?

(READ CATEGORIES)

- (1) Never
- (2) About once a week (or less)
- (3) A few times a week
- (4) One or two times a day
- (5) Many times each day

-CW9b-

How often do (spouse of respondent's name) and (child's name) talk or play with each other for 5 minutes or more, just for fun?

(READ CATEGORIES)

- (1) Never
- (2) About once a week (or less)
- (3) A few times a week
- (4) One or two times a day
- (5) Many times each day

-CW10a-

How often do you praise or compliment (child's name) by saying something like, "Good for you!" or "What a nice thing you did!" or "Way to go!"?

(READ CATEGORIES)

- (1) Never
- (2) About once a week (or less)
- (3) A few times a week
- (4) One or two times a day
- (5) Many times each day

-CW10b-

How often does (spouse of respondent's name) praise or compliment (child's name) by saying something like, "Good for you!" or "What a nice thing you did!" or "Way to go!"?

(READ CATEGORIES)

- (1) Never
- (2) About once a week (or less)
- (3) A few times a week
- (4) One or two times a day
- (5) Many times each day

-CW11a-

How far would you LIKE (child's name) to go in school?

- (1) Leave school before graduation
- (2) Graduate from high school
- (3) Get some college or other training
- (4) Graduate from college
- (5) Take further education or training after college

-CW11b-

How far would (spouse of respondent's name) LIKE (child's name) to go in school?

- (1) Leave school before graduation
- (2) Graduate from high school
- (3) Get some college or other training
- (4) Graduate from college
- (5) Take further education or training after college

-CW12-

How far do you THINK (child's name) will go in school?

- (1) Leave school before graduation
- (2) Graduate from high school
- (3) Get some college or other training
- (4) Graduate from college
- (5) Take further education or training after college

-CW13a-

Has (child's name) EVER attended or been enrolled in kindergarten?

- (1) Yes
- (2) No

-CW13b-

How old was (child's name) in years and months when he/she first started kindergarten?

_____ Years

_____ Months

-CW13c-

Has (child's name) EVER attended or been enrolled in first grade?

- (1) Yes
- (2) No

-CW13d-

How old was (child's name) in years and months when he/she first started first grade?

_____ Years

OR

_____ Months

-CW13e-

Has (child's name) EVER attended or been enrolled in kindergarten or elementary school IN ANY GRADE?

- (1) Yes
- (2) No

-CW14-

What is the highest grade or year (child's name) has completed?

- (K) Kindergarten
- (1) First grade
- (2) Second grade
- (3) Third grade
- (4) Fourth grade
- (5) Fifth grade
- (6) Sixth grade
- (7) Seventh grade
- (8) Eighth grade
- (9) Ninth grade
- (10) Tenth grade
- (11) Eleventh grade
- (12) Twelfth grade
- (C) College, one year or more
- (N) No grade completed

-CW15a-

Is (child's name) currently attending or enrolled in school?

- (1) Yes
- (2) No

CW15b-

What grade or year in school is (child's name) now attending?

- (K) Kindergarten
- (1) First grade
- (2) Second grade
- (3) Third grade
- (4) Fourth grade
- (5) Fifth grade
- (6) Sixth grade
- (7) Seventh grade
- (8) Eighth grade
- (9) Ninth grade
- (10) Tenth grade
- (11) Eleventh grade
- (12) Twelfth grade
- (C) College, one year or more

-CW15c-

Is (child's name) enrolled in public school OR private school?

- (1) Public
- (2) Private

-CW15d-

Is (child's name)'s school the regularly assigned neighborhood/community school, or a school you chose?

- (1) Assigned
- (2) Chosen
- (3) Both -- assigned school is school of choice

-CW15e-

Is (child's name)'s school affiliated with a religion?

- (1) Yes
- (2) No

-CW15f-

Does (child's name) go to a special class for gifted students, or do advanced work in any subjects?

- (1) Yes
- (2) No

-CW16-

Is (child's name) on a sports team either in or out of school?

- (1) Yes
- (2) No

-CW17-

Does (child's name) take lessons after school or on weekends in subjects like music, dance, language, computers, or religion?

- (1) Yes
- (2) No

-CW18-

Does (child's name) participate in any clubs or organizations after school or on weekends, such as Scouts, a religious group, or a Girls or Boys club?

- (1) Yes
- (2) No

-CW19a-

****NOTE: QUESTION CW19 ALLOWS RESPONDENT TO ANSWER FROM HER/HIS OWN PERSPECTIVE. QUESTIONS REFER TO THE RESPONDENT IF THE RESPONDENT IS THE DESIGNATED PARENT/GUARDIAN OR TO THE SPOUSE OF THE DESIGNATED PARENT OR GUARDIAN IF THE SPOUSE IS THE PROXY RESPONDENT.****

Now I'm going to read you some statements. Please tell me if you think each statement is not true, sometimes true or often true.

In general, (child's name) likes to go to school.

Would you say this statement is not true, sometimes true, or often true?

- (1) Not true
- (2) Sometimes true
- (3) Often true

-CW19b-

(Child's name) is interested in school work.

Would you say this statement is not true, sometimes true, or often true?

- (1) Not true
- (2) Sometimes true
- (3) Often true

-CW19c-

(Child's name) works hard at school.

Would you say this statement is not true, sometimes true, or often true?

- (1) Not true
- (2) Sometimes true
- (3) Often true

-CW20a-

Other than graduating from one school to another, has (child's name) EVER changed schools since entering the first grade?

- (1) Yes
- (2) No

-CW20b-

How many times did (child's name) change schools for reasons other than graduation?

Number of times: _____

-CW21a-

Has (child's name) repeated any grades, or been held back for any reason?

- (1) Yes
 - (2) No
-

-CW21b-

Which grade or grades did (child's name) repeat?
(MARK ALL THAT APPLY)

- (K) Kindergarten
 - (1) First grade
 - (2) Second grade
 - (3) Third grade
 - (4) Fourth grade
 - (5) Fifth grade
 - (6) Sixth grade
 - (7) Seventh grade
 - (8) Eighth grade
 - (9) Ninth grade
 - (10) Tenth grade
 - (11) Eleventh grade
 - (12) Twelfth grade
 - (N) No more
-

-CW22a-

Has (child's name) ever been suspended, excluded, or expelled from school?

- (1) Yes
- (2) No

-CW22b-

How many times has this happened?

Number of times: _____

-CW22c-

What grade was (child's name) in when this happened?

- (K) Kindergarten
 - (1) First grade
 - (2) Second grade
 - (3) Third grade
 - (4) Fourth grade
 - (5) Fifth grade
 - (6) Sixth grade
 - (7) Seventh grade
 - (8) Eighth grade
 - (9) Ninth grade
 - (10) Tenth grade
 - (11) Eleventh grade
 - (12) Twelfth grade
-

-CW23a-

Now I'm going to read you a few statements about feelings parents may have regarding their children. Please tell me how often you feel this way.

My child is much harder to care for than most children. How often do you feel this way? (READ CATEGORIES)

- (1) Never
- (2) Sometimes
- (3) Often
- (4) Very often
- (H) Help

-CW23b-

My child does things that really bother me a lot. How often do you feel this way?
(READ CATEGORIES)

- (1) Never
- (2) Sometimes
- (3) Often
- (4) Very often

-CW23c-

I find myself giving up more of my life to meet my child's needs than I ever expected. How often do you feel this way?
(READ CATEGORIES)

- (1) Never
- (2) Sometimes
- (3) Often
- (4) Very often

-CW23d-

I feel angry with my child. How often do you feel this way?

- (1) Never
- (2) Sometimes
- (3) Often
- (4) Very often

-LEAD_IN2-

NOTE: FILL WITH "COMMUNITY" IF RESPONDENT LIVES IN A RURAL AREA

Now I am going to read you some statements about your (neighborhood/community.) Please tell me whether you agree or disagree with each statement.

PRESS "ENTER" TO CONTINUE

-CW24a-

"People in this (neighborhood/community) help each other out". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion
- (H) Help

-CW24b-

"We watch out for each other's children in this (neighborhood/community)". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

-CW24c-

"There are people I can count on in this (neighborhood/community)". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

-CW24d-

"There are people in this (neighborhood/community) who might be a bad influence on my child". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

-CW24e-

"If my child were outside playing and got hurt or scared, there are adults nearby who I trust to help him/her". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

-CW24f-

"I keep my child inside as much as possible because of the dangers in the neighborhood/community)". Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

"There are safe places in this (neighborhood/community) for children to play outside." Do you strongly agree, agree, disagree, or strongly disagree with this statement?

- (1) strongly agree
- (2) agree
- (3) disagree
- (4) strongly disagree
- (5) have no opinion

APPENDIX B

Working Papers

This appendix provides a list of SIPP Working Papers. These papers are available on the Census Bureau's Internet site <http://www.census.gov>

Old	New	
(8401)	1	(Update No. 1, Revised 12/85) "An Overview of the Survey of Income and Program Participation," D. NELSON, D. B. MCMILLEN, and D. KASPRZYK (Census Bureau)

SIPP DATA REVIEW

SIPP 1996 Wave 6 Evaluation Report: Child Well-Being Topical Module

Introduction:

This memorandum presents basic tabulations used to evaluate the Child Well-Being Topical Module from the Wave 6 interview of the 1996 Survey of Income and Program Participation (SIPP). The data from this topical module were collected during December 1997 through March 1998. The child well-being data were collected for 22,142 children ages 0 to 17 years linked to 11,913 designated parents.¹ For purposes of analyses in this report, the data are presented with children as the units of analysis, i.e., each child is an observational unit, as responses were obtained for all children in the household.

The survey universe of children from this module are compared with data from the March 1998 Current Population Survey (CPS) and from the 1992 Panel Wave 9 and 1993 Panel Wave 6 combined Child Well-Being topical modules which were conducted in Fall 1994. Table 1 provides age, sex, and race comparisons. Population distributions from the 1996 SIPP Panel closely replicate those from the March 1998 CPS, generally within one percentage point by age, race, and sex. One exception is the higher proportion of White non-Hispanic children under age 6 in the SIPP compared to the March 1998 CPS.

Allocation rates for selected child well-being items by race and Hispanic origin are presented in Table 2. Table 3 compares child well-being data from this module with the Fall 1994 data. The Fall 1994 data were published in P70-68, "A Child's Day: Home, School, and Play (Selected Indicators of Child Well-Being.) A major comparability difference between items in the 1996 module and the Fall 1994 is that the Fall 1994 data were not allocated. Some differences observed between the two data sets may be attributed to nonresponse in the Fall 1994 data and the resulting distributions and analyses shown in the published report based only on reported data. Since many items are used to subsequently screen other questions in the survey, it was decided that an overall improvement in the data would result from fully editing the module. While this aids data analysis for the 1996 module, it does introduce noncomparability issues with the previous child well-being module in the 1993 Panel.

Two variables are not addressed in this memo as they could not be analyzed due to insufficient data. The variables, ECHGSCHL and ETIMCHAN, will not be on the public use file. These two questions ask if the child has ever changed schools since the first grade and the number of times schools were changed for reasons other than graduation. It was discovered--while the instrument was in the field-- that some respondents were being skipped over these questions. The instrument was corrected for later waves, but the loss of information was too great to retain these two variables in the public use file.

¹The designated parent includes biological, step, and adoptive parents, and may also include other relatives or nonrelatives acting as a guardian for the child in the absence of the parents. In married-couple families, the mother is the designated parent--if the mother is not available for an interview, the father or husband may provide the mother's information as a proxy respondent. In single-parent families, the resident parent is the designated parent. If neither parent is in the household, the guardian is the designated parent.

Allocation Rates

Although we collected information on the height and weight of all children under 6 years of age, the height and weight variables had extremely high allocation rates (not shown in Table 2) and will not be used in any publications. The height variable had an overall allocation rate of 42.7 percent, and the weight variable was 28.8 percent. The allocation rates shown in Table 2 vary considerably from 18 to 24 percent--still quite high. The high allocation rate may be, in part, due to its positioning as the last module respondents were asked in Wave 6.

Allocation rates were generally higher for Black children than White children by about ten percentage points, consistently across most of the topics in the child well-being module. However, little systematic differences in allocation rates were found between Hispanic children and White non-Hispanic children.

Reasonableness of the Child Well-Being Data

The universe of children in the topical module by age, sex, race, and Hispanic origin are generally consistent with distributions from the March 1998 CPS and the Fall 1994 SIPP (Table 1).

Caution should be exercised when making comparisons between Winter 97-98 and Fall 1994 for the child well-being variables (Table 3). Aside from the allocation issue, differences in responses may also arise from seasonal variations in the two surveys. Beyond allocation, the variable EDAYCARE in the 1996 SIPP Panel is not directly comparable with a similar question on ever being in child care which was collected in Fall 1994. In both surveys the two questions are worded exactly the same: "Other than members of ...'s immediate family, has ... ever been cared for regularly in any Head Start, day care, or pre-school programs or by any family day care providers or babysitters?" However, two questions in the Fall 1994 surveys included relatives as day care providers which preceded this question. They were: (1) "Is ... now enrolled in family day care, that is, in the home of a neighbor, friend, or relative on a regular basis? By "regular basis" we mean at least once a week." and (2) "Is ... now being cared for by a babysitter or babysitters in the child's home on a "regular basis" (includes care by relatives other than parents)?" The Fall 1994 data, then, potentially include relatives as child care providers as the total "ever care" percentages shown in Table 3 are a combination of ever being in child care among respondents who said "yes" to any of these three items.

The 1996 survey, however, did not include care by relatives such as aunts or grandparents who may frequently be used, especially for very young children. For this reason, the variables ECAREMTH and EHRSCARE on the 1996 Wave 6 topical module will not be comparable with similar variables from the 1994 survey.

Examination of some other variables on children's activities common in both surveys, however, indicate that both surveys were repeating similar levels of participation or involvement. Participation in sports and ever having repeated a grade in school are generally within a few percentage points for both surveys. Somewhat larger differences were found among children 3 to 11 years old regarding tv rules and children 1 to 2 years old being read to each week.

The module does include three mothers who are male caused by sex being different in previous wave than in the current wave. In the previous wave a female was edited to be a mother. In the current wave, the sex is male but continuing to be a mother. This problem was fixed in Wave 7.

Summary

The 1996 Wave 6 data on child well-being appear to be reasonable despite concern over the rather high allocation rates. We have confidence that these data are reliable and useful for analysis of the well-being of America's children as long as caution is exercised in comparing data with prior SIPP surveys which have slightly different item wording or conducted in different seasons which might influence children's activities.
