Additions to Cancer Registry ICD-9-CM Code Casefinding List

Cases are sorted in the hospital diagnosis indices by ICD-9-CM diagnosis code. Each cancer registry, central or hospital, uses a list of ICD-9-CM cancer codes to identify potential cases. With the implementation of collection of benign and borderline intracranial and CNS tumors, ICD-9-CM codes for these diseases need to be added to the cancer registry casefinding list. The additional codes follow:

ICD-9-CM Casefinding Codes for Benign and Borderline Intracranial and CNS Tumors	
ICD-9-CM Code	Description of Neoplasm
225.0	Benign neoplasm of brain
225.1	Benign neoplasm of cranial nerves
225.2	Benign neoplasm of cerebral meninges; cerebral meningioma
225.3	Benign neoplasm of spinal cord, cauda equina
225.4	Benign neoplasm of spinal meninges; spinal meningioma
225.8	Benign neoplasm of other specified sites of nervous system
225.9	Benign neoplasm of nervous system, part unspecified
227.3	Benign neoplasm of pituitary, craniopharyngeal duct, craniobuccal pouch, hypophysis, Rathke's pouch, sella turcica
227.4	Benign neoplasm of pineal gland, pineal body
228.02	Hemangioma of intracranial structures
237.0	Neoplasm of uncertain behavior of pituitary gland and craniopharyngeal duct
237.1	Neoplasm of uncertain behavior of pineal gland
237.5	Neoplasm of uncertain behavior of brain and spinal cord
237.6	Neoplasm of uncertain behavior of meninges: NOS, cerebral, spinal
237.9	Neoplasm of uncertain behavior of other and unspecified parts of nervous system; cranial nerves

Central cancer registries use ICD-10 codes and/or terms to identify "death certificate found" tumors. The CCR death process must be modified to include the following benign and borderline intracranial and CNS codes:
