

Survey of Occupational Injuries and Illnesses, 2003

U.S. Department of Labor
Bureau of Labor Statistics

March 2005 - Reissued June 2005. For information see http://www.bls.gov/iif/osh_notice05.htm

Summary 05-01

Wide variations exist in the frequency of nonfatal workplace incidents by industry, even among industries producing similar types of goods and services. For example, the total recordable case incidence rate for injuries and illnesses in the merchant wholesalers, nondurable goods industry (North American Industry Classification System, NAICS 424) was 5.7 per 100 full-time workers in 2003. Among industries in this aggregate, total recordable case incidence rates ranged from 10.9 in beer, wine, and distilled alcoholic beverage merchant wholesalers (NAICS 4248) to 2.9 in drugs and druggist's sundries merchant wholesalers (NAICS 4242). Similarly, in all other fabricated metal product manufacturing (NAICS 33299), the total recordable case incidence rate was 7.8 per 100 full-time workers in 2003. Among industries in this aggregate, total recordable case incidence rates ranged from 11.2 in enameled iron and metal sanitary ware manufacturing to 2.4 in ammunition (except small arms) manufacturing. (See table 1.)

This summary report provides industry detail on results of the 2003 Survey of Occupational Injuries and Illnesses conducted by the Bureau of Labor Statistics (BLS). Data for industry sectors (such as construction, retail trade, and health care and social assistance) were published in December 2004.¹ The tables in this report provide detailed industry information (incidence rates and numbers of cases) on nonfatal workplace injuries and illnesses for five and six-digit industries (for example, electrical contractors, concrete pipe manufacturing, and family clothing stores), as defined in the *North American Industry Classification System Manual, United States, 2002*.

Private industry reported approximately 4.4 million nonfatal injuries and illnesses in 2003, with trade, transportation and utilities accounting for about 27 percent of the cases (approximately 1.2 million), and manufacturing accounting for about 22 percent

(approximately 1 million) of the cases. Table 2 shows the number of injuries and illnesses by industry and case type in 2003.

The 2003 survey does not measure workplace fatalities; however, they are captured by the BLS Census of Fatal Occupational Injuries. Nationwide results of the 2003 fatality census were released in September 2004.²

In addition to the injury and illness summary data presented in this report, the 2003 BLS survey provides details on the characteristics (occupation, age, gender, race, and length of service) of the more seriously injured and ill workers. The survey also provides details on the circumstances (nature of the injury or illness, part of body affected, event or exposure, and source of the injury or illness) of workers' injuries and illnesses. *More seriously* is defined for this survey as involving days away from work, not counting the day on which the incident occurred. This information is scheduled for publication in a news release in March 2005. A comprehensive publication containing additional information on characteristics such as broad illness category and more detailed case characteristics will be available at a later date.

Note on Industry Classifications

Beginning with the 2003 reference year, the Survey of Occupational Injuries and Illnesses began using the 2002 North American Industry Classification System (NAICS). Prior to 2003, the survey used the Standard Industrial Classification (SIC) system. The substantial differences between these systems result in breaks in series for industry data. Users are advised against making comparisons between the 2003 industry categories and the results from previous years.

¹ See, "Workplace Injuries and Illnesses in 2003," USDL-04-2486 (Bureau of Labor Statistics, Dec. 14, 2004).

² See, "National Census of Fatal Occupational Injuries, 2003," USDL-04-1830 (Bureau of Labor Statistics, Sept. 22, 2004).

Incidence rates per 100 full-time employees for nonfatal workplace injuries and illnesses are presented in table 1; the corresponding numbers of nonfatal injuries and illnesses are presented in table 2. Logs kept by private industry employers during the year are used in the annual survey to develop estimates of the number and frequency (incidence rates) of nonfatal workplace injuries and illnesses. Employer logs reflect the year's injury and illness experience, as well as the employer's understanding of which cases are work-related under current recordkeeping guidelines of the U.S. Department of Labor. The number of injuries and illnesses reported in any given year also can be influenced by changes in the level of economic activity, working conditions and work practices, worker experience and training, and the number of hours worked.

Note about Summary Series

This publication is the last in a series of summaries of data from the Survey of Occupational Injuries and Illnesses. Future updates of the tables that appear in this summary will be available on the BLS Internet site at <http://www.bls.gov/iif/oshsum.htm> under the heading "Summary Tables."

TABLE 1. Incidence rates¹ of nonfatal occupational injuries and illnesses by industry and case types, 2003 — Continued

Industry ²	NAICS code ³	2003 Annual average employment ⁴ (thousands)	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
				Total	Cases with days away from work ⁵	Cases with job transfer or restriction

Religious, grantmaking, civic, professional, and similar organizations	813	1,294.5	2.9	1.3	.9	.4	1.6

¹ The incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000, where

N = number of injuries and illnesses
 EH = total hours worked by all employees during the calendar year
 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year)

² Totals include data for industries not shown separately.

³ *North American Industry Classification System* — United States, 2002

⁴ Employment is expressed as an annual average and is derived primarily from the BLS-Quarterly Census of Employment and Wages (QCEW) program.

⁵ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁶ Excludes farms with fewer than 11 employees.

⁷ Data for Mining (Sector 21 in the *North American Industry Classification System*-- United States, 2002) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health

Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁸ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁹ Fewer than 15 cases.

¹⁰ Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

¹¹ Incidence rate less than 0.05.

NOTE: Because of rounding, components may not add to totals. Dash indicates data not available.

¹ Totals include data for industries not shown separately.

² *North American Industry Classification System* — United States, 2002

³ Employment is expressed as an annual average and is derived primarily from the BLS-Quarterly Census of Employment and Wages (QCEW) program.

⁴ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁵ Excludes farms with fewer than 11 employees.

⁶ Data for Mining (Sector 21 in the *North American Industry Classification System*-- United States, 2002) include establishments not governed by the Mine Safety and Health Administration rules and reporting, such as those in Oil and Gas Extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁷ Fewer than 50 cases.

⁸ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

⁹ Fewer than 15 cases.

¹⁰ Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore, estimates for these industries are not comparable to estimates in other industries.

NOTE: Because of rounding, components may not add to totals. Dash indicates data not available.

Technical Note

Data sources and scope

Information in this report is from the Survey of Occupational Injuries and Illnesses, a Federal/State cooperative program in which employer reports are collected and processed by State agencies cooperating with the Bureau of Labor Statistics. A sample of 183,700 establishments representing the total private economy (except for mines and railroads) was surveyed for 2003.

The survey is limited to private industry. It excludes the self-employed, farms with fewer than 11 employees, private households, and employees in Federal, State, and local government agencies. Under a separate system, agencies of the Federal Government file work injury and illness reports with the U.S. Secretary of Labor.

Nonfatal occupational injuries and illnesses for coal, metal, and nonmetal mining and for railroad activities were reported to the Bureau of Labor Statistics by the Mine Safety and Health Administration of the U.S. Department of Labor and by the Federal Railroad Administration of the U.S. Department of Transportation, respectively.

The survey includes the following private industries: Agriculture, forestry, fishing, and hunting, NAICS 11; oil and gas extraction, NAICS 211; sulfur mining, part of NAICS 212; construction, NAICS 23; manufacturing, NAICS 31-33; wholesale trade, NAICS 42; retail trade, NAICS 44-45; transportation and warehousing, NAICS 48-49; utilities, NAICS 22; information, NAICS 51; finance and insurance, NAICS 52; real estate and rental and leasing, NAICS 53; professional, scientific, and technical services, NAICS 54; management of companies and enterprises, NAICS 55; administrative and support and waste management and remediation services, NAICS 56; educational services, NAICS 61; health care and social assistance, NAICS 62; arts, entertainment, and recreation, NAICS 71; accommodation and food services, NAICS 72; and other services, NAICS 81. Establishments are classified in industry categories based on the *North American Industry Classification System (NAICS) Manual, United States, 2002*, U.S. Office of Management and Budget.

Definitions

The definitions of occupational injuries and illnesses are from 29 Code of Federal Regulations Part 1904, *Recording and Reporting Occupational Injuries and Illnesses* (Occupational Safety and Health Administration, January 19, 2001).

Recordable cases are injuries or illnesses that result in any of the following: death, loss of consciousness, days away from work, restricted work activity or job transfer, or medical treatment beyond first aid. Also, cases that involve a significant injury or illness diagnosed by a physician or other licensed health care professional, even if it does not result in death, loss of consciousness, days away from work, restricted work activity or job transfer, or medical treatment beyond first aid are considered recordable cases.

Cases with days away from work are cases that involve days away from work, with or without job transfer or restriction.

Cases with job transfer or restriction are cases where a worker cannot perform the routine functions of his or her job, or cannot work the full workday that he or she would have been scheduled to work.

Other recordable cases are cases that do not involve days away from work or days of job transfer or restriction.

Incidence rates represent the number of injuries and/or illnesses per 100 full-time workers, and were calculated as:

$(N/EH) \times 200,000$, where:

N = number of injuries and/or illnesses

EH = total hours worked by all employees during the calendar year

200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year)
