

Table 19. Microbial constituents detected in ground-water samples collected for the Southern Sacramento Valley Ground-Water Ambient Monitoring and Assessment (GAMA) study unit, California, 2005.

[The five digit USGS parameter code is used in the USGS's computerized data system, the National Water Information System, to uniquely identify a specific constituent or property. "FP" following a site area name in the first column indicates "flowpath." E, estimated; GAMA, Ground-Water Ambient Monitoring and Assessment; mL, milliliter; USGS, U.S. Geological Survey; YOL, Yolo; —, not detected]

GAMA sample identification number	Coliphage F-specific	Coliphage somatic	<i>E. coli</i> colonies/100 mL	Total coliforms colonies/100 mL
USGS parameter code	99335	99332	90901	90900
YOL-04	—	present	—	—
YOLFP-15	—	—	—	E1
