## ACKNOWLEDGMENTS

**Jill O'Brien**, Acting Chief, Federal Programs Branch, directed the preparation of this report.

**Jill O'Brien**, Assistant Division Chief for Special Statistics, Governments Division, provided general supervision for the preparation of this report.

**Dawit Asmellash, Kenneth Beatty, Cathy Davis, Diane Glaspie-Walker, Sue Jones, Elizabeth Mangold, Scott Peterson,** and **Alice Wimbish** assisted in the collection and review of Federal Assistance Award Data System data. **Michael Mashburn** served as principal data analyst and liaison with the federal reporting agencies. **Dawit Asmellash, Kenneth Beatty,** and **Scott Peterson** assisted as data analysts and liaisons with federal reporting agencies.

**Joseph Bacon** and **Jennifer Phan** provided computer processing support for the Federal Assistance Award Data System. **Kenneth Beatty** and **David Kahwajy** performed computer processing to generate the report data tables and downloadable files. **Joseph Bacon, Alison Cadden, David Kahwajy,** and **Andrew Post** coordinated Internet data dissemination via the Online Query System and Web site.

**Jamie Stark, Elzie Golden,** and **Christine E. Geter** of the Administrative and Customer Services Division, **Francis Grailand Hall**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Claudette E. Bennett**, Assistant Division Chief, and **Wanda Cevis**, Chief, Publications Services Branch.

Grateful acknowledgment is made to the federal government departments and agencies for their cooperation in providing the information needed for this report.

For information regarding data in this report, contact Federal Programs Branch, Governments Division, U.S. Census Bureau, Washington, DC 20233. Telephone: 301-763-1565; E-mail: <govs.cffr@census.gov>.

# Introduction

---

The Consolidated Federal Funds Report (CFFR) is a presentation of data on federal government expenditures or obligations in state, county, and subcounty areas of the United States, including the District of Columbia and U.S. Outlying Areas. It is collected under the authority of Title 13 of the U.S. Code and contains statistics on the geographic distribution of federal program expenditures, using data submitted by federal departments and agencies. These data have been consolidated and tabulated in a standard format by the U.S. Census Bureau, under the auspices of the U.S. Office of Management and Budget, for presentation in publications and electronic form. The publications are:

- *Consolidated Federal Funds Report for Fiscal Year 2008 (State and County Areas)*
- *Federal Aid to States for Fiscal Year 2008*

Data also are available on CD-ROM and on the Internet. Information on publications and CD-ROMs appears in the section, "Availability of Data" at the end of this introduction.

## REPORT COVERAGE

The Consolidated Federal Funds Report (CFFR) covers federal government expenditures or obligations for the object categories listed below. For fiscal year 2008, amounts reported totaled \$2.8 trillion for the direct expenditure or obligation categories and \$1.6 trillion for other federal assistance (loans and insurance programs):

- Retirement and disability (\$819 billion)
- Other direct payments (\$631 billion)
- Grants (\$575 billion)
- Procurement contracts (\$514 billion)
- Salaries and wages (\$254 billion)
- Direct loans (\$38 billion)
- Guaranteed or insured loans (\$314 billion)
- Insurance (\$1.3 trillion)

Dollar amounts reported under these categories can represent either actual expenditures or obligations. Users should be aware of the differences in this coverage, which varies in accordance with the data, as described later under "Table Descriptions and Data Sources" and in

Appendix D. As a general guide, the grants and procurement data in this report represent obligated funds, while direct payments and salaries and wages represent actual expenditures (outlays). Data on loan and insurance programs generally represent the contingent liability of the federal government.

Certain categories of federal government spending are intentionally excluded from this report. These include such items as interest paid on federal government debt, travel expenses when not provided under procurement contract, and international payments and foreign aid. The financial activity of all federal government agencies is covered, with exceptions for those agencies that do not submit data to any of the federal statistical reporting systems that serve as sources of information for the CFFR. Conceptual or functional exclusions and the agencies not covered in CFFR are discussed below, under the heading "Amounts Excluded From CFFR Coverage."

## SUMMARY OF METHODOLOGY

This is a consolidated report, developed by bringing together available statistics on federal government expenditures or obligations. The first phase of the CFFR program is to identify the available data sources. The following reporting systems and agencies are used as primary data sources:

- U.S. Department of Defense
- Federal Assistance Award Data System
- Federal Procurement Data System
- Office of Personnel Management
- U.S. Postal Service

In addition to these primary sources, several other federal agencies are requested to provide data, usually for selected programs (see section on "Table Descriptions and Data Sources" and Appendix D). Most of these are agencies that do not report under the requirements of the Federal Assistance Award Data System (FAADS).

Finally, selected data are from the information on payments to state or local governments reported by federal agencies for the Census Bureau's Federal Aid to States (FAS) survey. These data cover federal government grants that are not required to be reported in the FAADS, such as the federal government annual payment to the District of

Columbia. For more details about the roles played by FAADS and FAS in support of the CFFR, please see the following two sections: "Relationship to Federal Assistance Award Data System (FAADS)" and "Relationship to Federal Aid to States (FAS)."

All data submitted for the CFFR are assigned a program identification code, an object code, and an agency identification code. The program identification code format is patterned after the Catalog of Federal Domestic Assistance (CFDA) program number. For example, the National School Lunch Program, administered by the U.S. Department of Agriculture, is identified by the CFDA number 10.555. For all data for which CFDA codes are available, the CFDA number is used for the program identification code. For all other data submissions, a unique code (or pseudo code) is assigned. For data that come through the FAADS, the same program identifiers are used in both FAADS and CFFR. Although not presented in this CFFR publication, the program identification code is contained in the CFFR data file available on the Internet and on CD-ROM.

The object code assigned to each data record submitted for the CFFR consists of two alphabetic characters to designate the broad object category of federal expenditure associated with each data record. These are the categories (retirement and disability, other direct payments, grants, procurement, salaries and wages, direct loans, guaranteed loans, and insurance) listed previously under "Report Coverage" and described in more detail below under "Table Descriptions and Data Sources."

Both the program identification code and the object code are used throughout the CFFR processing. For example, during the data edit and review stages, dollar amounts are tallied by program or object category for comparison with other sources of information on federal outlays. In addition, the object code becomes the primary basis for the table presentation in the CFFR publications (all grants data are grouped together, and so forth).

The agency identification code assigned to each data record is the four-character Federal Information Processing Standards (FIPS-95) code issued by the National Institute of Standards and Technology. The two leftmost characters form a component data element, called the Treasury Agency Symbol (TAS), which is identical to the two-digit

numerical code used in the budgetary process to identify major federal agencies. The rightmost two characters are unique agency identifiers.

The work schedule employed by the Census Bureau in the collection and processing of fiscal year (FY) 2008 CFFR data can be described approximately as follows:

September 30, 2008	Federal FY 2008 ended.
October 2008	Requests made for annual supplemental FY 2008 CFFR data sources. See below for discussion of differences between CFFR and FAADS data.
May 2009	Received final FAADS data sources for the fourth quarter of FY 2008 (July 1–September 30, 2008).
June 2009	Completed processing all FY 2008 FAADS data.
June 2009	Received final annual supplemental FY 2008 CFFR data sources.
June 2009	Completed processing all FY 2008 annual supplemental CFFR data.
June 2009	Conducted final analytical research and prepared text, data tables, and appendixes for publication copy and online data query system.
July 2009	Release of data and report on the Census Bureau's Web site: <a href="http://www.census.gov/govs/www/cffr.html">www.census.gov/govs/www/cffr.html</a> .
August 2009	Release of printed publication, <i>Consolidated Federal Funds Report for Fiscal Year 2008</i> .

The processing of all data submitted by federal agencies for the CFFR involves the five steps detailed below. Exceptions are detailed later under "Table Descriptions and Data Sources" and in Appendix D.

1. Verification of edit totals requires comparing dollar amounts and record counts actually submitted with totals provided on transmittal documentation from each federal agency. Since most submissions are via Internet, this process involves ensuring that the electronic files are in the prescribed format. Any discrepancies are brought to the attention of the submitting agency and corrections are made as needed.

2. Verification of geographic coding is applied to those submissions received electronically. Since data from the different sources often are submitted on the basis of different geographic coding, a frequent additional step in CFFR processing is to convert all data records to standard geographic designations. The details of geographic coding for the CFFR are described later in the section “Geographic Presentation and Coding.”
3. For purposes of review, data from each agency are sorted by program identification code and geographic unit. This enables review tables to be produced showing data by state, county, or subcounty area for each federal program or object category. At this stage, a national total of federal program amounts in the CFFR is compared to totals for the same programs that appear in other data sources, such as the CFDA and the appendix to the federal budget. Multiyear data also are reviewed by program or object category for unusual changes at the national, state, county, and subcounty levels. In this manner, patterns of federal government spending for any category, such as Department of Defense salaries and wages, are reviewed. This phase of processing is thus concerned with review and verification of dollar amounts by agency program, object category, and geography. Corrections are made as needed based upon consultation with the federal agency submitting the original data.
4. Data records are combined so that only one record exists for each unique combination of geographic code, program identification code, agency code, and object code. Even though multiple grant awards may have been made under a single program to any given geographic area, they are all combined into a single record for the fiscal year. If, for example, ten Community Development Block Grants are awarded to New York City during fiscal year 2008, they are combined into a single record for Community Development Block Grants funding within New York City. Combining like data records in this manner is the final step in processing each individual CFFR submission or data file.
5. All data files are then merged together to form a consolidated CFFR file. This enables the compilation of total federal expenditure or obligation by object category, geographic area, program code, or agency code. These data are reviewed and compared with prior year data, and adjustments are made where appropriate.

This final data file contains records in geographic detail only. County, state, or U.S. total records are not part of the CFFR data file. Nor are summary totals by object category actually contained in the data file. All of these summary

records are tallied during preparation of the tables in the CFFR. In this way, totals published in the CFFR represent summations of the more detailed data contained in the CFFR data file.

Table preparation also entails processing the CFFR data file in conjunction with the CFFR geographic reference file. The data file contains all information associated with the federal program or object category of spending being reported. The geographic reference file contains all pertinent information concerning the government unit for which data are published. This information includes the state, county, and municipal/township name, the 2008 population, the congressional districts, and all associated geographic coding.

### **RELATIONSHIP TO FEDERAL ASSISTANCE AWARD DATA SYSTEM (FAADS)**

FAADS is a quarterly report of financial assistance awards made by each federal agency. Coverage includes most (but not all) grants, direct payments to individuals and others, insurance, and loans. Data submitted by federal agencies for the FAADS serve as the source for most of the statistics in this publication. The FAADS does not provide information on either salaries and wages or procurement contracts. All CFFR data not obtained through the FAADS are otherwise obtained from federal agencies.

The Office of Management and Budget (OMB) selected the Census Bureau as executive agent, responsible for operating the FAADS. Data on financial assistance awards are submitted quarterly by federal government agencies. The Census Bureau collects these data and combines them to form a single quarterly compilation of federal government financial assistance awards. Each quarterly data set is distributed to Congress and state governments. In addition to grant awards, the FAADS program covers direct payments to individuals (such as retirement benefits), direct payments for specified use (such as food stamp awards), cooperative agreements, guaranteed loans, direct loans, and insurance programs of the federal government. All financial assistance awards in the FAADS are identified by a CFDA program number (or a pseudo code, if a CFDA number is unavailable).

For grants, the FAADS data represent the federal obligation incurred at the time the grant award transaction is obligated. The amounts reported do not represent actual expenditures, since obligations in one time period may not result in outlays during the same time period. Moreover, initial amounts obligated may be adjusted at a later date, either through enhancements or deobligations. These deobligations may appear in the CFFR data as negative amounts. Users should be aware of what these amounts represent and use care in interpreting such data.

For fiscal year 2008, CFFR derived data from the FAADS by summing the four quarterly reports that covered financial

assistance awarded between October 1, 2007, and September 30, 2008. All program awards in FAADS are reported by state, county, and usually, city of recipient. Submitting agencies use either FIPS-55 geographic codes for states, counties, and places, or General Services Administration worldwide location codes.

## RELATIONSHIP TO FEDERAL AID TO STATES (FAS)

The publication *Federal Aid to States for Fiscal Year 2008* (FAS) presents state-by-state distributions of federal government expenditures for grants to state and local governments only. In the CFFR, federal grants generally represent obligations (not expenditures or outlays), and include grants to nongovernmental recipients, in addition to payments to state and local governments. Grants are presented in Table 4 of this report.

The FAS report generally covers actual federal grant outlays to state and local governments, by agency and program. Data reported in the FAS are submitted to the Census Bureau in accordance with OMB Circular A-11 and the Census Bureau's annual *Federal Aid to States* reporting guidelines. Such data were previously collected and published annually by the Division of Government Accounts and Reports, Fiscal Service, Bureau of Government Financial Operations, U.S. Department of the Treasury. Prior to 1983, these data were published in the annual Department of the Treasury report *Federal Aid to States*.

During the years 1981–1997, Table 2 of the Census Bureau's publication, *Federal Expenditures by State*, (FES) provided statistics equivalent to those found in the Treasury Department's FAS series (ending in 1982) and in the Census Bureau's FAS series (beginning in 1998). In addition, the other tables of the FES series (discontinued after 1997) published statistics on salaries and wages, direct payments for individuals, procurement, and other programs. These other statistics are now being published as part of the CFFR series.

To the extent possible, the data on grants to state and local governments in FAS are reconciled with amounts in the federal budget. The definitions applied in the budget for grants to governments serve as the basis for reporting in the FAS publication. Users should consult the introductory text in the FAS publication for a detailed explanation of the grants data that appear in that report.

There are several differences between the FAS report and the CFFR report:

1. The FAS report generally covers federal grant outlays or expenditures, whereas grants data in the CFFR generally cover obligations, which may or may not result in actual expenditures. Obligations that do not result in expenditures may become deobligated. Deobligations are shown as negative amounts in the data.
2. The FAS report covers only grants to state and local governments, whereas the grants data in the CFFR include all grants, regardless of whether the recipient is a government entity. The CFFR provides data on several other categories of federal funds, while the FAS provides information only on grants.
3. The level of geographic detail for which data are shown is different. The FAS report distributes data only on a state-by-state basis, while the CFFR report contains state and county area information. (The CFFR database also contains data at the subcounty, place level.)
4. The data on Federal Emergency Management Agency (FEMA) payments under the Disaster Assistance Program also vary. In the CFFR, these payments are classified as grants, while in the FAS report, individual assistance payments under this program are excluded from the grants data. The grants versus direct payments data are not available at the substate level.

## TABLE DESCRIPTIONS AND DATA SOURCES

Appendix D lists the data sources used for the CFFR, arranged by major category of federal government expenditure or obligation. The table descriptions that follow include explanations of the coverage, conceptual basis for reporting (expenditures versus obligations), geographic basis for reporting, and other information important for interpreting the data in the CFFR. The use of the term FIPS geographic codes in the following text refers to the Federal Information Processing Standards codes maintained by the National Institute of Standards and Technology, U.S. Department of Commerce.

### Table 1: Total Expenditure

All amounts in Table 1 are aggregates from data included in Tables 2–6. Data are rounded to millions of dollars. Total expenditure does not include data on contingent liabilities (loans and insurance), which are separately listed in Tables 7–9.

### Table 2: Retirement and Disability

In the CFFR, data covering federal government direct payments are separated into two object categories: direct payments for retirement and disability benefits (Table 2), and all other direct payments (Table 3). Retirement and disability programs include federal employee retirement and disability benefits, social security payments of all types, selected Veterans Administration programs, and selected other federal programs (see Appendix D).

Both the FAADS and CFDA categorize direct payments in a different manner from the CFFR. Both the FAADS and the CFDA subdivide direct payments into the two subcategories, "Direct Payments for a Specified Use" and "Direct Payments With Unrestricted Use." Neither subdivision is

recognized in the CFFR. The CFFR instead subdivides direct payments into three object types: object code DR for "Retirement and Disability Payments to Individuals," object code DO for "Other Direct Payments for Individuals," and object code DX for "Direct Payments Other Than for Individuals." Only object code DR is presented in Table 2. Object codes DO and DX are presented in Table 3.

The CFDA defines "Direct Payments for a Specified Use" as "financial assistance provided directly to individuals, private firms, and other private institutions to encourage or subsidize a particular activity by conditioning the receipt of assistance on a particular performance by the recipient. This does not include solicited contracts for the procurement of goods and services for the federal government." The FAADS similarly defines "Direct Payments for a Specified Use" as "a subsidy or other nonreimbursable direct financial aid."

The CFDA defines "Direct Payments With Unrestricted Use" as "financial assistance provided directly to beneficiaries who satisfy eligibility requirements with no restrictions imposed on the recipient as to how the money is spent. Included are payments under retirement, pension, and compensation programs." The FAADS defines "Direct Payments With Unrestricted Use" as "retirement, pension, veterans benefits, etc."

Except as indicated below, data in Table 2, Retirement and Disability, are compiled from amounts reported by the FAADS. Reported amounts represent obligations of federal funds during the fiscal year. Direct payments for individuals are shown by state and county area only, in accordance with the reporting requirements of the FAADS. The following retirement and disability direct payment programs are not available from the FAADS and are obtained from other data sources:

1. Military retirement benefits data are supplied by the Department of Defense, along with that agency's data on military payroll. Amounts represent actual expenditures during the fiscal year. Coverage includes recurrent benefit payments, as well as permanent and temporary disability payments. Data are provided by state and county area of recipient.
2. Included in the amounts shown for civilian retirement benefits are benefits for retired uniformed U.S. Coast Guard personnel, for which data were obtained from that agency. Coverage includes taxable benefits financed by employer or general fund contributions. Amounts are reported by home residence address of the beneficiary and are available only at the state level. Retired civilian employees of the Coast Guard are excluded from these data, but included in data from the Office of Personnel Management (OPM).
3. Federal civilian employee retirement and disability payments are from the Center for Retirement and

Insurance Services (CRIS), OPM. Amounts include expenditures for all periodic annuity, survivor annuity, lump-sum death claims, and withdrawals. Administrative expenses and funds transferred to other retirement systems are excluded.

Retirement benefits for federal civilian employees also include data for former U.S. Postal Service (USPS) employees. Note that the amounts reported by OPM include payments from employee contributions. No data covering the payments associated only with employer contributions, earnings on investments, or other nonemployee financed amounts could be obtained.

The OPM data represent an estimated geographic distribution of actual fiscal year 2008 disbursements. The methodology used by OPM is based on proportionate calendar year-to-date annuity disbursements through September 30, 2008. The calendar year-to-date data are accumulated by ZIP Code, and proportionate shares are then applied against the actual total of fiscal year 2008 disbursements. ZIP Codes reflect recipient location except for payments made via electronic funds transfer, which reflect correspondence ZIP Code.

Like other data submitted on the basis of ZIP Codes, these data are converted to state and county areas using standard methodology.

4. Pension plan termination insurance payments reflect benefits paid by the Pension Benefit Guaranty Corporation (PBGC) under the Pension Plan Termination Insurance Program (CFDA program 86.001). Data include only those payments made directly by the PBGC. Amounts paid by interim custodians, such as banks or other financial institutions, are not reported. The data submitted by the PBGC are geographically distributed by postal ZIP Code and converted to county-level data for the CFFR.
5. Payments to retirees and other beneficiaries from the U.S. Public Health Service, Commissioned Corps, are reported by that federal agency. Amounts are reported by mailing address (ZIP Code) of the beneficiary and converted to county level data by the Census Bureau.
6. Data for benefit payments to retirees from the National Oceanic and Atmospheric Administration (NOAA) Commissioned Corps are from the U.S. Coast Guard, Pay and Personnel Center. Amounts are reported by home residence address of the beneficiary and are available only at the state level.
7. The U.S. Department of State's Foreign Service Officers' retirement system provided data on fiscal year 2008 benefit payments. These are reported geographically by ZIP Code and converted to county-level data by the Census Bureau.

8. The Tennessee Valley Authority reported benefit payments to retirees by state, county area, and ZIP Code. Amounts are assigned according to the ZIP Code of the financial institution receiving the benefit payment.
9. Federal Employee Workers' Compensation payments are from reports submitted by the U.S. Department of Labor, Employment Standards Administration, Office of Workers' Compensation Programs. Amounts for fiscal year 2008 reflect actual payments, with the state-and-county distribution based on the ZIP Code of the recipient's place of residence.

Data on social security and supplemental security income (SSI) payments come from reports submitted by the Social Security Administration for the FAADS. All amounts reflect obligations during the fiscal year, with the state-by-state distribution estimated. All amounts are reported by recipient location. Excluded from the amounts reported are payments to recipients in foreign countries. The amounts shown under the SSI program exclude any state government shares administered by the federal government.

### Table 3: Other Direct Payments

Programs classified as other direct payments in Table 3 include two CFFR object categories. The first object category (code DO) is direct payments for individuals, other than for retirement and disability. The second object category (code DX) is direct payments, other than for individuals. The first object category contains far more expenditure than the second object category. For convenience of presentation, these two object categories are combined in the CFFR publication but are available separately in the CFFR database. (See text under the "Table 2" heading above for further information about the subdivisions of the "Direct Payments" category.)

Amounts shown in Table 3, Other Direct Payments, come from the FAADS, except for those programs listed below or in Appendix D. These amounts generally represent obligations incurred during the fiscal year. The four quarterly FAADS data sets are consolidated to obtain fiscal year totals. Direct payments for individuals are reported by state and county area only.

Excess earned income tax credits represent federal government payments during calendar year 2008 for tax year 2007. Information is from the Department of the Treasury, Internal Revenue Service, Statistics of Income Division. Amounts reflect only the excess earned income tax credits actually refunded. Aggregate figures by state are reported. No substate detail is available.

Crop Insurance data on the amount of indemnity payments (claims) and premium subsidies are provided by the U.S. Department of Agriculture. Coverage includes the claims paid directly by the federal government to farmers

and premium subsidies to private insurers. Federal indemnity payments to private insurance carriers are not reported. Amounts reflect the resident county of the claimant for direct payment or location of county of the private carrier for premium subsidies. Data reflect actual expenditures during fiscal year 2008.

FEMA provides county-level data for payments under the National Flood Insurance program. Amounts represent claims and adjustor expenses.

The U.S. Department of Veterans Affairs provides state-level data on face value of life insurance programs.

Legal Services Corporation expenditures data are from that agency. The Legal Services Corporation payments represent annualized grants and contracts, by state, made by this agency from the subsidy it receives from the federal government.

USPS expenditures for current operations, other than procurement and salaries and wages, are provided by USPS as part of that agency's total submission for CFFR. Data are provided by state and county area, with the distribution based on the methodology described later for USPS salaries and wages.

Data for the federal government (employer) share of premiums on federal employee life and health insurance are from OPM, Center for Retirement and Insurance Services. All expenditures for life and health insurance premiums are assigned to the "state undistributed" level of geography. For both the life and health insurance programs, the amounts reported represent only the employer (federal government) share of the premiums.

The U.S. Department of Education reports fiscal year 2008 payments under the Federal Family Education Loan program. Amounts under the other direct payments for individuals category include interest subsidies. Amounts under the direct payments, other than for individuals, category include default payments, advances, and administrative cost allowances for guarantee agencies.

Food Stamp program data are supplied by the Department of Agriculture for the FAADS. Amounts reflect the actual value of benefits awarded, by state, during the fiscal year. Figures may differ slightly from amounts representing the value of benefits redeemed or processed through the Federal Reserve System.

Statistics on federal expenditures for unemployment compensation are compiled from information obtained from the Department of Labor. Amounts reported include all benefit payments made from the Unemployment Compensation Trust Fund, regardless of the source of funding for the payments. Thus, amounts reported include regular and extended benefits to unemployed workers, and benefits to ex-civilian and ex-military federal employees. Prior to 1989, only benefit payments financed by the federal government were included in this publication.

The Office of Justice Programs provides data for payments under the Public Safety Officers' Benefit Program (CFDA 16.571) of the U.S. Department of Justice.

Medicare data are reported by the U.S. Department of Health and Human Services for the FAADS. All amounts reflect obligations during the fiscal year, with the state-by-state distribution estimated. All amounts are reported by recipient location. Excluded from the amounts reported are payments to recipients in foreign countries.

#### **Table 4: Grants**

The grants category in the CFFR combines two grants categories listed in the CFDA and four grants categories found in the FAADS. The CFDA distinguishes two categories of grants: Formula Grants and Project Grants. The FAADS subdivides Formula Grants into two further categories: Block Grant and Formula Grant. The FAADS also subdivides Project Grants into two further categories: Project Grant and Cooperative Agreement.

The CFDA defines "Formula Grants" as "allocations of money to states or their subdivisions in accordance with a distribution formula prescribed by law or administrative regulation, for activities of a continuing nature not confined to a specific program." The CFDA defines "Project Grants" as "the funding, for fixed or known periods, of specific projects or the delivery of specific services or products without liability for damages for failure to perform. Project grants include fellowships, scholarships, research grants, training grants, traineeships, experimental and demonstration grants, evaluation grants, planning grants, technical assistance grants, survey grants, construction grants, and unsolicited contractual agreements." No further definitions are provided in the FAADS or FAS.

The principal source of the grants data in the CFFR is the information submitted quarterly for the FAADS. For grants, the FAADS data represent the federal obligation incurred at the time the grant is awarded. The grants data from FAADS that are carried forward to the CFFR total about 98 percent of all grants reported. (See section above, "Relationship to Federal Assistance Award Data System [FAADS]" for further information about FAADS.)

The remaining grants data for the CFFR are from data submitted to the Census Bureau pursuant to the annual FAS survey and OMB Circular A-11. These submissions are required annually of all federal government agencies that make payments to state or local governments. Selected grant programs data are obtained from the FAS database to ensure comprehensive coverage in the CFFR. FAS data are available only at the state area level of reporting. (See section above, "Relationship to Federal Aid to States [FAS]" for further information about FAS.)

#### **Table 5: Procurement**

Statistics in Table 5, covering federal government procurement contracts, are provided by USPS for Postal Service procurement and by the Federal Procurement Data Center

(FPDC) within the General Services Administration for procurement actions of nearly all other federal agencies, including the Department of Defense.

Amounts provided by USPS represent actual outlays for contractual commitments, while amounts provided by FPDC represent the value of obligations for contract actions, and do not reflect actual federal government expenditures. In general, only current year contract actions are reported for data provided by the FPDC; however, multiple-year obligations may be reflected for contract actions of less than 3 years' duration.

FPDC collects procurement statistics on a quarterly basis from most federal government departments and agencies and provides these data according to the place of performance rather than the location of the prime contractor. Excluded from the procurement totals reported are the amounts for the judicial and legislative branches of government and most intergovernmental transfers of funds. Also excluded from the totals are amounts for procurement in foreign countries. Also, certain Department of Defense contracts are classified with respect to location of performance. Such amounts are reported as "U.S. undistributed."

Procurement data awarded by USPS include all outlays made under formal contractual agreements. FPDC data include contractual actions for construction, purchases of equipment, and other purchases of tangible items by the federal government. Also included with FPDC data are contractual actions for services often not generally associated with procurement, such as the purchase of utilities, building leases, and other services entered into via contractual agreement.

Procurement data provided by FPDC are distributed according to place of performance, as designated by FIPS state/county/place geographic coding. These geographic codes are matched against the government unit codes comprising the geographic basis for the CFFR and assigned to any units where a match is found. Unmatched data records are distributed to "balance of county" represented by the state/county portion of the FIPS geographic code. (For those FPDC data records submitted only with a state/place code, a county code is first assigned via a geographic conversion file.)

Government "purchase card" data also have been included this year, and prior year data back to fiscal year 1993 have been revised to include this item. In order to improve data accuracy and avoid duplicate counting, FPDC has instituted new reporting features that specifically identify purchase card transactions as either small "micro-purchases" or traditional contract payments that utilize the purchase card.

#### **Table 6: Salaries and Wages**

Amounts reported for federal government salaries and wages are from four sources: Department of Defense,

---

USPS, U.S. Coast Guard (previously within the U.S. Department of Transportation and now a part of the U.S. Department of Homeland Security), and OPM. All amounts represent outlays during the federal government's fiscal year.

The Defense Department provides information on military payrolls, with separate amounts for active military and inactive military (Reserve and National Guard). These data are from the Directorate for Information Operations and Reports of the Washington Headquarters Services, Department of Defense. (Note that salaries and wages data covering civilian employees of the Defense Department are from OPM, as described below.) The submission from the Defense Department is an electronic file containing data records that are distributed using FIPS geographic codes for states and counties.

Amounts reported represent estimates of fiscal year outlays by state and county and include gross compensation. This covers salaries and wages, housing allowances, and, in general, all other personnel compensation, except retired military pay, which is reported in Table 2 under the separate category, retirement and disability direct payments for individuals. Other features of the Department of Defense salaries and wages include:

1. Amounts for military personnel stationed overseas are excluded from totals.
2. Salaries and wages for inactive personnel refer to military Reserve and National Guard payroll.
3. Amounts reported reflect the place of employment (duty station) rather than home residence.

Salaries and wages data for USPS employees are provided by USPS. Amounts represent actual outlays during the fiscal year but with the national total distributed among the states and counties on an estimated basis. Estimates are derived by calculating the "per employee" payroll cost and applying this cost to each postal facility based upon the number of employees. The USPS data are geographically distributed based upon place of employment (postal facility), rather than place of residence. Data records are submitted in an electronic file and contain FIPS state and county area codes.

Statistics on salaries and wages for uniformed employees of the Coast Guard are reported by the Coast Guard, now a unit of the Department of Homeland Security. Data are reported by ZIP Code for the place of employment. Amounts are then aggregated by county area.

Salaries and wages for all other federal employees are from OPM. Coverage includes all other federal civilian employees (excluding the Central Intelligence Agency, Defense Intelligence Agency, and the National Security Agency) employed in the United States and the outlying areas. Data are reported separately for each major federal agency. The data include:

- Basic annual salaries.
- Premium pay (overtime, night differential, cost of living allowances, station allowances, holiday pay, and any retroactive pay but excludes lump-sum pay for annual leave).
- Lump-sum payments (for annual leave).

OPM national totals represent actual expenditures or outlays during the fiscal year. The geographic distribution of these amounts by state (or outlying area) and county are estimated based upon place of employment. The following assumptions apply for the OPM estimation procedures:

1. The basis for the geographic distribution is place of employment, using data on salary and employment distributions from OPM's Central Personnel Data File (CPDF) as of May 1, 2007. Data are geographically prorated to total fiscal year payroll and payment data from the SF 113-A, "Monthly Report of Federal Civilian Employment."
2. Estimated payroll data are produced at the state, county, and outlying area levels only.
3. Payroll data are allocated to states, counties, and outlying areas based partly on estimates. The estimates assume that premium pay and lump-sum payments as well as part-time and intermittent pay are proportional to the salaries of full-time federal civilian employees (both defense and nondefense) in the counties and outlying areas.
4. Judicial pay is estimated using the above assumption with the exception of the Supreme Court of the United States whose SF 113-A pay is added to the District of Columbia's nondefense payroll.

The methodology used to estimate the geographic distribution of salaries and wages data involves the following steps:

1. Actual expenditures for salaries and wages are obtained from the SF 113-A. Salary and wage data on the SF 113-A are total expenditures (including basic, premium, and lump-sum payments) for all federal civilian employees. These data are not reported by state and county on the SF 113-A.
2. From OPM's CPDF and agency survey data (Tennessee Valley Authority), aggregate basic salaries for full-time employees only are computed for each county, each outlying area, total United States, and total outlying areas. Based on these aggregate basic salaries, percentages are computed for Department of Defense and all other agencies. These percentages determine each county's and outlying area's proportion of the total (United States and outlying areas) full-time salaries.

3. The percentages referenced above are applied to SF 113-A agency payroll data for the United States and outlying areas to estimate actual expenditures in counties and outlying areas. State and outlying area totals are obtained by aggregating estimated actual expenditures in counties and outlying areas, respectively.
4. The total U.S. payroll for the Judicial Branch was available, although the distribution by geographic area was not; only their payroll for the District of Columbia was available. Therefore, the remainder of the U.S. payroll for the Judicial Branch is in the “Undistributed” category.

**Tables 7–9. Direct Loans, Guaranteed Loans, and Insurance**

The CFDA defines “Direct Loans” as “financial assistance provided through the lending of federal monies for a specific period of time, with a reasonable expectation of repayment. Such loans may or may not require the payment of interest.” The CFDA defines “Guaranteed/Insured Loans” as “programs in which the federal government makes an arrangement to indemnify a lender against part or all of any defaults by those responsible for the repayment of loans.” The CFDA defines “Insurance” as “financial assistance provided to assure reimbursement for losses sustained under specified conditions. Coverage may be provided directly by the federal government or through private carriers and may or may not involve the payment of premiums.” The FAADS and CFFR use the same categories and provide no separate definitions.

All data on loans and insurance programs of the federal government, with the exception of data on flood insurance, life insurance for veterans, foreign investment insurance, foreign investment guaranties, foreign direct investment loans, and student loan programs, come from the FAADS. Guaranteed loans, direct loans, and insurance are reported in the FAADS by state and county area or by state, county, and place. Data on the Federal Family Education Loan program (CFDA number 84.032) are not reported for FAADS and are obtained separately from the Department of Education. National Flood Insurance data (CFDA number 97.022), reflecting insurance in force on September 30, 2008, are from FEMA, Department of Homeland Security. Data on foreign investment insurance (CFDA number 70.003), foreign investment guaranties (CFDA number 70.002), and foreign direct investment loans (CFDA number 70.005) are from the Overseas Private Investment Corporation (OPIC). Life insurance for veterans data are obtained from the Department of Veterans Affairs.

Loan and insurance program amounts in Tables 7–9 reflect the volume of loan or insurance activities. These amounts represent either direct loans made to certain categories of borrowers or the federal government contingent liability for loans guaranteed and direct insurance against loss.

Loans and insurance data do not represent actual expenditures associated with the loan or insurance programs. Any actual outlays under these programs, such as insurance claims paid by the federal government, appear in the direct payments categories in the CFFR. Federal government contingent liability can vary by program, and caution should be used in comparing one federal loan or insurance program to another or in interpreting the data presented to reflect actual federal outlays over time. The following also should be noted:

1. Amounts guaranteed or insured do not necessarily represent future outlays.
2. All amounts reflect the dollar value of loans or insurance coverage provided during the fiscal year and not the cumulative totals of such activity over the life of the program.
3. Direct loans are not reported on a net basis, as in the federal budget, but rather are shown in terms of total amounts loaned.
4. Programs otherwise similar can vary in the share of the total liability that the federal government guarantees or insures. Certain veterans guaranteed loan programs are guaranteed only up to a stated maximum dollar value, for example. In these cases, the federal government contingent liability is less than the total value of the loan or insured policy agreement.

**Tables 10–11: Miscellaneous Calculations**

Per capita federal expenditure amounts in Table 10 are computed using resident population as of July 1, 2008.

Percentage distributions of federal expenditures in Table 11 are computed based on U.S. totals in the same category.

**Table 12: Defense Department and All Other Agencies**

The Defense Department and other agency expenditure amounts in Table 12 are computed from data in Tables 2–6. Figures for all Department of Defense agencies are tallied to arrive at a total for Department of Defense expenditures. This total is then netted from the grand total of federal government expenditures, and the residual categorized as nondefense expenditures. This procedure is followed for each state and outlying area. The defense/nondefense totals are then used to compute per capita and percent distribution amounts, using the procedure described above for Tables 10 and 11.

Data in the column on U.S. Department of Energy defense-related activities are from the Department of Energy, Office of the Deputy Administrator for Defense Programs. These data represent defense-related atomic energy activities

and are presented on an exhibit basis only. Since the data are for the Department of Energy, they are included in the columns for “All other federal agencies,” rather than Department of Defense.

### **Table 13: Historical Summary**

The CFFR has been published annually since fiscal year 1983. The data in Table 13 represent summary totals, by state and object category, of covered federal expenditures from fiscal years 1999 to 2008. Amounts shown include revisions to originally published figures, where applicable. These revisions are made where errors existed in the original data or where federal programs have been reclassified to another object category of expenditure.

### **Table 14: State Rankings**

Per-capita rankings in Table 14 are derived from per-capita figures shown in Table 10. The District of Columbia and the outlying areas are excluded from the rankings.

### **Table 15: County Areas**

The summary federal expenditure data in Table 15 are by state and county area. State areas include the 50 states, the District of Columbia, and the outlying areas of American Samoa, Federated States of Micronesia, Guam, Republic of the Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, Commonwealth of Puerto Rico, and the U.S. Virgin Islands. County areas include both counties and county equivalent areas. Examples of county equivalent areas include county areas with no county government and municipal governments that are independent of any organized county. Coverage includes all object (or use) categories of federal government expenditure.

The basis for the geographic distribution in the CFFR varies according to the object category and the data source. These sources are detailed above in the table descriptions and in Appendix D. The following general guidelines apply:

- Grants-location of initial recipient
- Salaries and wages-place of employment
- Procurement-place of performance
- All other object categories-recipient location

For grants, users should note that some dollar amounts appear at the state capital county areas. This reflects the coding of grants to the state governments, even when such grants represent payments that are subsequently passed through to local jurisdictions, or represent programs that are spread out over all areas of the state in terms of financial impact. Appendix C lists the state capital cities and their respective county areas. Most large-volume grant programs involve a direct federal-to-state

transfer of aid, which the state governments subsequently redistribute. Data for several of these grant programs are treated differently in the CFFR, as described in the section below, “Estimates for Substate Grant Distribution.” As indicated in that section, CFFR data for several grant programs are distributed by county of final recipient, rather than initial recipient, as reported in the FAADS.

Included in the geographic listings are the terms “U.S. undistributed” and “state undistributed.” These are used for data that were reported without specific geographic designations for the state or county.

The congressional districts shown in the CFFR reflect the districts of the 110th Congress. For those states that have only one at-large representative, the congressional district is shown as “00.”

As indicated previously and explained in detail under “Table Descriptions and Data Sources,” dollar amounts reported can reflect expenditures or obligations. In some cases, dollar amounts shown will be negative. Such amounts reflect deobligations of financial assistance that had been previously awarded and generally appear in the grant object category.

## **GEOGRAPHIC PRESENTATION AND CODING**

### **Background**

The CFFR program calls for reporting by state (and outlying area), county (or county equivalent), and municipality. At the subcounty level, the term municipality indicates any subcounty unit of general local government. For this reason, the geographic basis for presentation in the CFFR is the government classification system developed by the Census Bureau in its census of governments program.

This report presents data by state and county area. The District of Columbia and the outlying areas of American Samoa, Federated States of Micronesia, Guam, Republic of the Marshall Islands, Commonwealth of the Northern Mariana Islands, Republic of Palau, Commonwealth of Puerto Rico, and the U.S. Virgin Islands are included. In addition to county areas, municipal governments that are independent of any organized county are included here as county equivalent areas. Appendix A contains a listing of these municipalities.

### **Government Units**

According to the 2007 Census of Governments, there were 89,527 government units in the United States (excluding outlying areas and Indian tribes). In addition to the federal government and 50 state governments, there were 89,476 local governments, distributed as follows:

County .....	3,033
Municipal.....	19,492
Township.....	16,519
School district.....	13,051
Special district .....	37,381

Exact definitions of government units are available online at <[www.census.gov/govs/go/index.html](http://www.census.gov/govs/go/index.html)>. Also online are individual state descriptions that describe the structure and organization of state and local governments throughout the nation. The general local governments that define the universe for this publication are those in existence (active and incorporated) as of October 2007. This count includes all known governments in the 50 states and the District of Columbia but excludes outlying areas and Indian tribes. All such governments are covered in the Governments Integrated Directory, the Census Bureau's file of all active government units in the nation.

The CFFR contains data by state, county, and subcounty area, making use of government units to represent geographic areas. For states and outlying areas, government jurisdictions have fixed, stable boundaries that correspond to well-defined geographic areas. For county and subcounty government units, however, there can be significant differences between the concept of government unit and a specified geographic area.

Where county governments exist, they correspond to generally accepted county geographic boundaries. However, many areas of the United States lack county government. Organized county governments are not found in Connecticut and Rhode Island, as well as in some outlying areas and the District of Columbia. Numerous cities, such as Baltimore, MD (which is not located within a county government area), and San Francisco, CA (which is a consolidated city/county government), also exist independent of any county government.

County-equivalent areas are included in the CFFR as if they were legitimate counties to ensure consistency in the geographic presentation of the data. A complete listing of these areas can be found in Appendix A.

It is important to note that the CFFR covers federal government payments to all types of recipients—both government and other—located in the geographic areas over which these governments have jurisdiction. For example, the federal payments to the New York City area could represent monies allocated to the city government, a private company located in the city, or a private citizen residing in the city. No attempt is made in the CFFR to provide information on the recipients (individually or by type) of federal money. For most programs, information on recipients and recipient types (and other details) can be found in the FAADS.

All funds received within a given municipality are assigned to only one county, even when the municipality exists in

more than one county. In most cases, the effect of this assignment on the statistical presentation of the data is negligible. However, users should be aware of this treatment, particularly if using data for one of these multi-county jurisdictions.

The government structure of New York City deserves special mention. Classified for census purposes as a municipality, the city actually comprises five county equivalent (borough) areas (Bronx, Kings, New York, Queens, and Richmond). None of these are presented separately in this report. New York City is presented as a single county-equivalent area.

### **Congressional District Reporting**

The CFFR database presents data at the state, county, and in some instances, place level. They do not uniformly support the application of county-by-county federal spending data directly to congressional districts, many of which do not conform to county boundaries.

The congressional district or districts (to a limit of four) representing most county areas are displayed in Table 15 and the CFFR database. Appendix B provides a complete list of those county areas with more than four congressional districts. The congressional districts shown in this publication represent the boundaries of the 110th Congress, in session between January 2007 and January 2009.

In counties with more than one congressional district, dollar amounts are not reported separately for each district. The federal financial data in the reporting systems (data sources) used for the CFFR do not contain such detail, with the exception of selected data records of the FAADS.

Several other aspects of the congressional district coding should be noted:

- For states with an at-large representative, the code "00" is reported.
- For outlying areas with a nonvoting representative to Congress, the congressional district is reported as "98."
- For outlying areas with no representatives, the congressional district is reported as "99."
- For counties that exist in more than one district, all congressional districts are reported.

### **ESTIMATES FOR SUBSTATE DISTRIBUTIONS**

Many federal grant programs involve a direct payment to state governments, which are then responsible for program administration. Examples include grants that are "passed through" to local governments (such as block grant programs); grants, such as for highway construction, in which the financial impact of federal funds is

---

spread out over all areas of the state; and grants or assistance programs such as Aid to Families With Dependent Children, which the state can administer but for which the ultimate beneficiaries are found throughout the states.

The CFFR contains data on the substate allocation of funds for several major federal grant programs. To the extent possible, these data are allocated by county or county-equivalent area. Substate allocation figures for these programs are available for some, but not all, of the states and outlying areas. Appendix F contains detail, by program and state.

The Department of Health and Human Services reports the estimated county allocation on selected grant programs on a quarterly basis to the FAADS. The largest of these programs, their CFDA program numbers, and their fiscal year 2008 funding are:

- Temporary Assistance for Needy Families (TANF) (93.558): \$17.3 billion
- Child Support Enforcement (93.563): \$3.4 billion
- State Survey and Certification of Health Care Providers and Suppliers (93.777): \$592.3 million
- Medical Assistance (Medicaid) (93.778): \$261.5 billion

For the Highway Planning and Construction program (CFDA number 20.205), the Transportation Department reports the actual place of performance (county area) where the funded project is located. If the project is in more than one county area, each county is reported, along with its share of the funding. Funding for this grant program totaled \$36.9 billion in fiscal year 2008.

The substate allocations for funds for several major programs are derived by the Census Bureau from a survey of state government agencies:

- Food Stamps (10.551): \$34.7 billion
- National School Lunch Program (10.555): \$9.3 billion
- Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) (10.557): \$6.4 billion
- Special Education Grants to States (84.027): \$11 billion
- Rehabilitation Services/Vocational Rehabilitation Grants to States (84.126): \$1.6 billion
- Low-Income Home Energy Assistance (93.568): \$2.6 billion
- Social Services Block Grant (93.667): \$1.7 billion
- Block Grants for Prevention and Treatment of Substance Abuse (93.959): \$1.7 billion

The derived county allocations for the above programs are based upon a Survey of State Government Pass-Through Expenditures, conducted by the Census Bureau during fiscal year 1996. For each program, the administering state

agencies were asked to provide information on the county allocation of program funds within their state. Responses, where received, were used as the basis for prorating total program funding by state among the county areas within each state. Total program funding for each state is reported by the administering federal agency to the FAADS.

### **AMOUNTS EXCLUDED FROM CFFR COVERAGE**

Federal government obligations covered in the CFFR total \$2.8 trillion for fiscal year 2008. This amount does not represent all federal government expenditures. Amounts excluded from the CFFR can be grouped into two general categories: conceptual exclusions and agency/program omissions.

Federal expenditures excluded conceptually are those that could not be geographically distributed, all international transactions and foreign payments, and federal outlay categories not covered by any of the reporting systems that served as data sources for the CFFR. The largest item was net interest on federal government debt, which was estimated to be \$242 billion in fiscal year 2008. The fiscal year 2008 total outlays for the international affairs function in the federal budget was estimated at \$38 billion.

Expenditures for the Central Intelligence Agency, the Defense Intelligence Agency, and the National Security Agency are excluded from coverage.

The CFFR data are compiled by object categories of federal expenditures. The reporting systems and federal agencies that serve as data sources exclude federal procurement, travel, and other expenditures to the extent that they are not covered by contractual agreements or government charge card purchases.

For some agencies, data for selected object categories could not be obtained. These include the procurement actions of the judicial and legislative sectors of the federal government. Expenditures other than salaries and wages are not available for the Federal Deposit Insurance Corporation, National Credit Union Administration, and Federal Savings and Loan Insurance Corporation.

The federal budget outlays estimated for fiscal year 2008 totaled \$3 trillion. However, comparison of the federal budget amount with data reported in the CFFR can be misleading, since the federal budget amounts differ from CFFR in accounting concepts and the treatment of intragovernmental transfers. For example, outlays for many programs in the federal budget are reported on a net basis, whereas the CFFR reports gross outlays or obligations to nonfederal recipients.

### **Recent Legislative Changes**

The Economic Stimulus Act of 2008 was signed into law on February 13, 2008. Created to support the economy during a period of slowing growth, the bill provided relief

in the form of individual tax rebates for households and tax incentives for businesses to stimulate investment. In fiscal year 2008, the Department of the Treasury's Financial Management Service issued 119,242,497 payments, in the form of checks and electronic deposits, totaling \$96 billion. Businesses were expected to utilize \$45 billion in tax deductions. At the time of publication, only national totals were available for these payments, and they were not included in the database and table displays.

The American Recovery and Reinvestment Act of 2009 was not signed into law until February 17, 2009. The FY 2008 CFFR includes only federal obligations or expenditures up until September 30, 2008. Users interested in 2009 data can visit <[www.USAspending.gov](http://www.USAspending.gov)>. While the USAspending data are more current, close attention should be paid to the definitions and clarifications included as part of these reports. When applicable to the scope of coverage, the FY 2009 CFFR will include data on these programs. The Recovery Act is intended to provide a stimulus to the U.S. economy in the wake of the current economic downturn. The measures are worth approximately \$787 billion. These measures include federal tax relief, expansion of unemployment benefits and other social welfare provisions, and domestic spending in education, health care, and infrastructure, including the energy sector.

## RELIABILITY OF THE DATA

### Coverage Error

The above section, "Amounts Excluded From CFFR Coverage," addresses coverage and coverage error.

### Nonresponse

Beginning in FY 2001, the Tennessee Valley Authority (TVA) stopped reporting procurement expenditures via the Federal Procurement Data Center (FPDC). Excluding the U.S. Postal Service (USPS), all procurement expenditures in the CFFR are obtained from FPDC. TVA last reported to FPDC in FY 2000. These expenditure data were used as an imputation for the missing FY 2008 CFFR data. This method of imputation has not been adjusted since the last reported data for changes in FY 2000. The data user should be cautious of using these numbers. When data are missing, the Census Bureau imputes for the missing data items in order to have a complete data set for analytical purposes.

### Processing and Response Error

Because FAADS and CFFR are systems that import electronic data files that have been largely completed by the various federal agencies, Census Bureau processing involves summations and sorting but infrequent, if any, data keying. Routine edits applied to FAADS data are, therefore, primarily intended to identify and correct keying or calculation errors made by respondents. Trend

analysis on multiyear data series is employed to identify significant anomalies and interruptions in the kind of relative continuity expected of high dollar mandatory and discretionary programs. Such anomalies may also originate at the applicant or recipient level.

## Coding

Geographic coding standards are applied to original data whose submitting agencies employ varying geocoding reference files and methods. In order to maintain consistency and standardization, the federal program and agency codes that are included in individual CFFR data records are summarized and published on the CFFR Web site in downloadable electronic format. Data are sorted and grouped by geographic, agency, and program categories and subjected to verification edits and trend analysis as discussed above.

## AVAILABILITY OF DATA

Copies of the publication, *Consolidated Federal Funds Report for Fiscal Year 2008 (State and County Areas)*, are available from Governments Division, U.S. Census Bureau, Washington, DC 20233-6800; 301-763-1565. The publication, *Federal Aid to States for Fiscal Year 2008*, also may be obtained from Governments Division.

As indicated earlier, the CFFR data files are available on Internet and CD-ROM. The data available electronically are more detailed than the summarized data presented in the published reports. Each record in the CFFR data file contains the following fields:

- Government unit (GU) code (state, type, county, unit)
- Program identification code (CFDA code or pseudo code)
- Object code
- Federal funding sign
- Federal funding amount
- Pass-through flag
- Federal Information Processing Standard (FIPS-55) location code (state, county, place)
- FIPS federal agency code

All appropriate documentation and data file descriptions are provided with each CFFR Internet or CD-ROM file. These accompanying files include program identification and agency identification files.

Also available on the CD-ROM is an accompanying CFFR geographic reference file. This file contains the names and Census Bureau GU codes for all state, county, municipal, and township units in the nation. In addition, the file contains associated FIPS geographic location codes, the population, and the congressional districts serving each government unit.

---

Users interested in obtaining CD-ROMs of the CFFR data files should contact Governments Division, U.S. Census Bureau, Washington, DC 20233-6800. Telephone 301-763-1565. Users also may obtain a copy of this report and related data files via the Census Bureau's Internet site at <[www.census.gov/govs/www/cffr.html](http://www.census.gov/govs/www/cffr.html)>.

The CFFR also is being made available to the public through the Census Bureau's State Data Center Program. Through this program, the Census Bureau provides participating state organizations (government agencies and university centers) with publications, CD-ROM files, and general information assistance. The state organizations, in turn, provide data access services, such as publication reference centers, inquiry handling, and general assistance in data use. They also establish affiliates in key locations

around the states by placing basic sets of census publications in local libraries, city and regional planning agencies, and so forth.

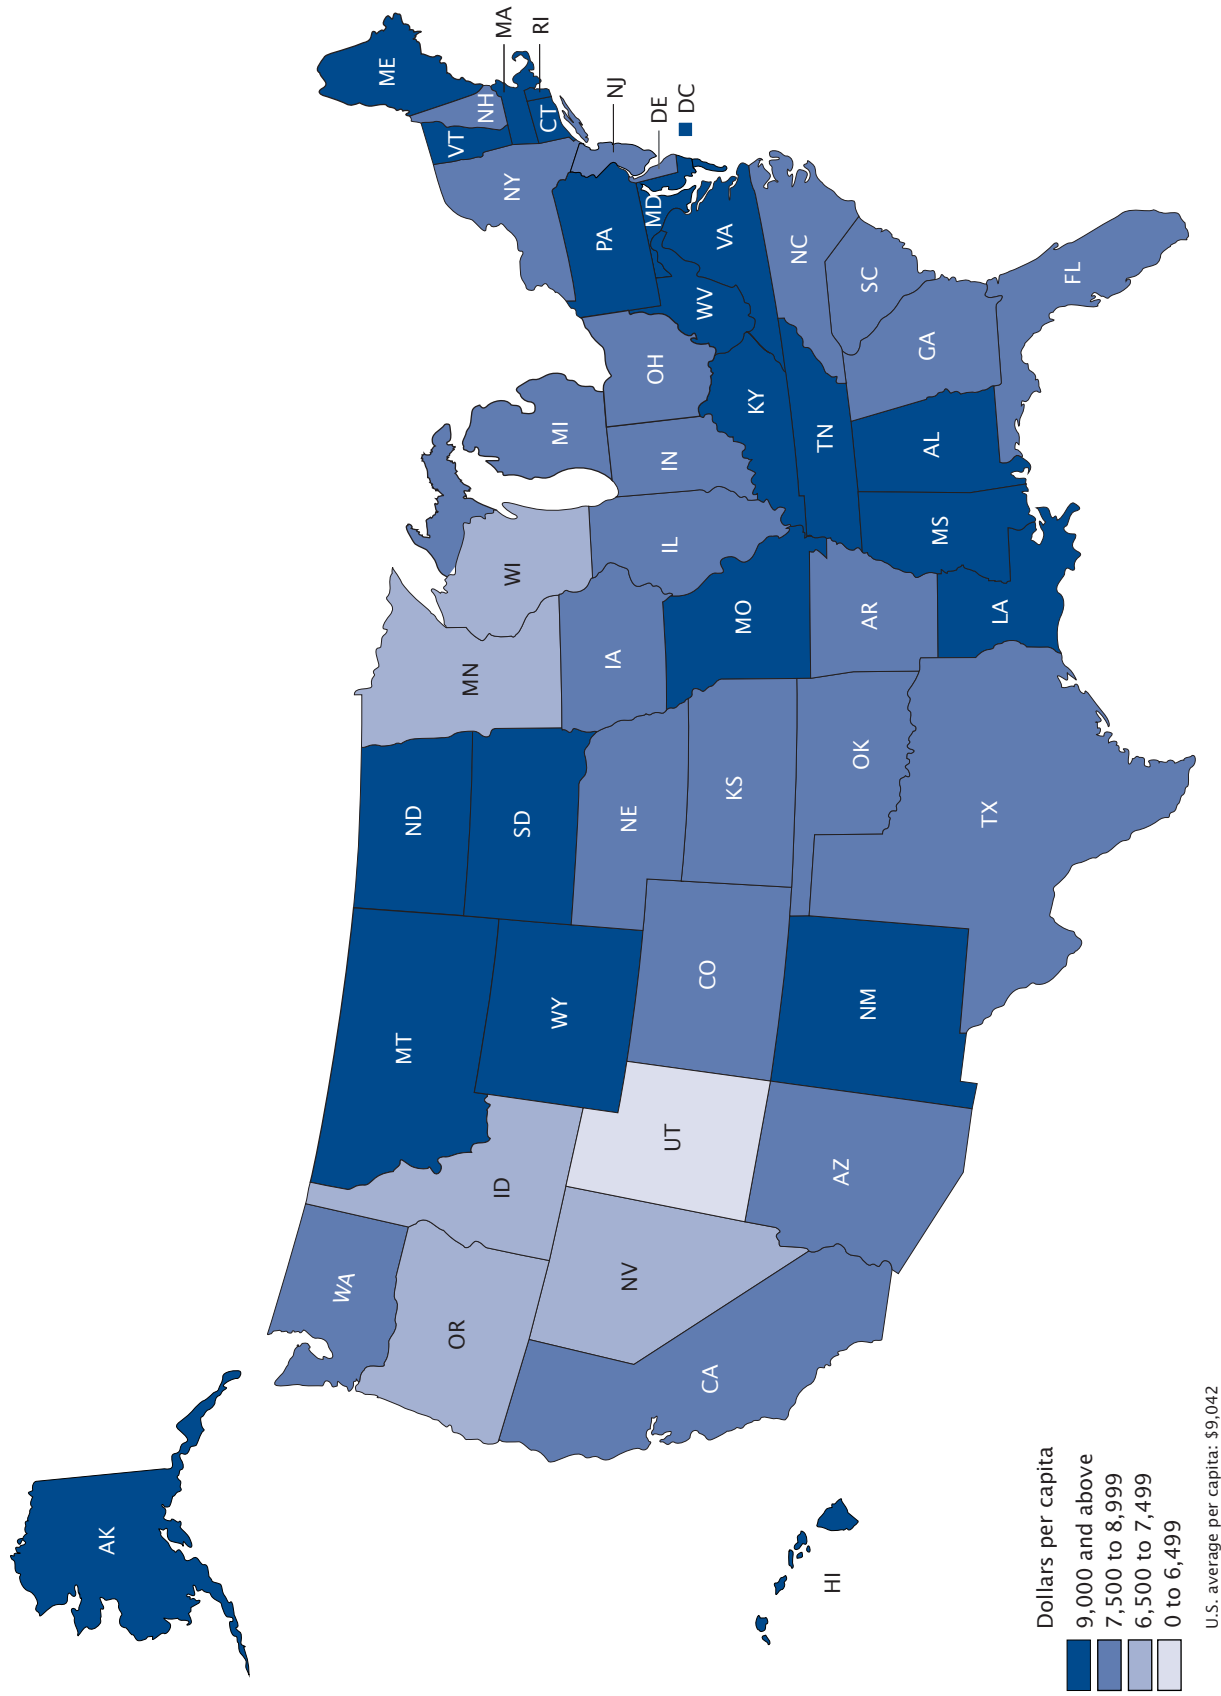

Users may contact the State Data Centers (or affiliates) to determine if the CFFR publication or the related CD-ROM data files are available or to request further information about the data. A list of the State Data Center lead agencies may be found in Appendix E.

#### **MEANING OF SYMBOLS**

The symbols in the tables have the following meanings:

- Represents or rounds to zero or represents not available.

**Figure 1.**

<sup>1</sup> Data for certain programs come from *Federal Aid to States for Fiscal Year 2008*.

<sup>2</sup> Payments in lieu of taxes have been categorized as "grants."

<sup>3</sup> Includes Treasury payments to recipients that are separate from the government of the District of Columbia and Washington Metropolitan Area Transit Authority (WMATA), as well as distributions to state and local governments of seized cash assets and proceeds from the sale of other seized assets.

Note: For additional information, see the Summary of Methodology in this report.

<sup>1</sup> For all agencies, this line includes procurement purchases made using government-issued purchase cards.  
<sup>2</sup> Includes Fiscal Year 2000 procurement data for the Tennessee Valley Authority, which did not provide Fiscal Year 2008 procurement data.

Note: Data shown for U.S. Postal Service represent actual outlays for contractual commitments, while all other amounts shown represent the value of contract actions, and do not reflect federal government expenditures. Nonpostal data generally involve only current year contract actions; however, multiple-year obligations may be reflected for contract actions of less than 3 years duration. Negative amounts represent the deobligation of prior year contracts. For additional information, see the Summary of Methodology in this report.

Undistributed . . . . .	—	—	—	—	2,305,921

<sup>1</sup> The Undistributed amount includes the salaries and wages of the Federal Judiciary that could not be geographically allocated.

Note: Department of Defense data represent salaries, wages, and compensation, such as housing allowances; distributions by state are based on duty station. State detail for all other federal government agencies are estimates, based on place of employment. For additional information, see the Summary of Methodology in this report.

Note: States are ranked from largest per capita amount of federal funds (1) to smallest per capita amount of federal funds (50). Rankings are based upon per capita amounts shown in Table 10. All precautionary notes for Tables 1–6 and introduction apply to rankings. Federal funds for loans and insurance coverage in Tables 7–9 are excluded from consideration in this table. Also excluded are per capita amounts for the District of Columbia and the U.S. Outlying Areas; see Table 10 for these amounts. For additional information, see the Summary of Methodology in this report.

See footnotes at end of table.

**Table 15. Federal Government Expenditure by State and County Area: Fiscal Year 2008—Con.**

[In thousand dollars]

State and county area	Congressional district	U.S. resident population <sup>1</sup>	Federal government expenditure					
			Total	Retirement and disability	Other direct payments	Grants	Procurement	Salaries and wages
Virgin Islands . . . . .	98	109,840	682,873	202,372	105,928	265,300	40,521	68,751
<b>U.S. undistributed . . . . .</b>			<b>22,625,232</b>	<b>18,827</b>	<b>106,200</b>	<b>181,773</b>	<b>20,012,511</b>	<b>2,305,921</b>

<sup>1</sup> Substate population figures for American Samoa and the Northern Mariana Islands represent resident population as of April 1, 2000. All other population figures represent resident population as of July 1, 2008.

<sup>2</sup> See Appendix B for listing of congressional districts.

Note: The CFFR report and database present data at the state and county area level only. They do not uniformly support the application of county-to-county federal spending data directly to congressional districts, the majority of which do not conform to county boundaries. See text selection, "Congressional District Reporting," for additional information. The cities of Baltimore, Maryland, and St. Louis, Missouri, are not within the boundaries of Baltimore and St. Louis Counties, respectively. For additional information, see the Summary of Methodology in this report.

# Appendix A.

## County-Type Areas Without County Government

---

Areas with governments legally designated as consolidated city-county governments and operating primarily as cities (10):

Alaska .....	Anchorage city and borough, Juneau city and borough, Sitka city and borough
California.....	San Francisco city and county
Colorado .....	Denver city and county and Broomfield city and county
Hawaii.....	Honolulu city and county
Kansas .....	Kansas City and Wyandotte County
Montana.....	Anaconda-Deer Lodge County and Butte-Silver Bow County

Areas designated as metropolitan governments and operating primarily as cities (3):

Tennessee.....	Hartsville and Trousdale County, Lynchburg and Moore County, and Nashville and Davidson County
----------------	------------------------------------------------------------------------------------------------

Areas having certain types of county offices, but as part of another government (city, township, state) (22):

Florida.....	Duval County (Jacksonville city)
Georgia.....	Chattahoochee County (Cusseta-Chattahoochee County unified government), Clarke County (Athens-Clarke County unified government), Georgetown and Quitman County (Georgetown-Quitman County unified government), Muscogee County (Columbus city), Richmond County (Augusta city),
Hawaii.....	Kalawao County (Hawaii state)
Indiana .....	Marion County (Indianapolis city)
Kentucky .....	Lexington-Fayette Urban County, Louisville-Jefferson County Metro Government
Louisiana.....	East Baton Rouge Parish (Baton Rouge city), Lafayette Parish (Lafayette city), Orleans Parish (New Orleans city), and Terrebonne Parish consolidated government
Massachusetts .....	Nantucket County (Nantucket town) and Suffolk County (Boston city)
New York.....	Bronx, Kings, New York, Queens, and Richmond boroughs (all part of New York City)
Pennsylvania.....	Philadelphia County (Philadelphia city)

Area classified as a separate county area and as a separate state area in population statistics, but counted as a municipal government in U.S. Census Bureau statistics on governments (1):

District of Columbia .....	Washington city
----------------------------	-----------------

---

Cities located outside of any “county” area and administering functions elsewhere commonly performed by counties (42):

Maryland .....	Baltimore city (distinct from Baltimore County)
Missouri .....	St. Louis city (distinct from St. Louis County)
Nevada .....	Carson City city
Virginia (39 cities) .....	Alexandria, Bedford, Bristol, Buena Vista, Charlottesville, Chesapeake, Colonial Heights, Covington, Danville, Emporia, Falls Church, Fairfax, Franklin, Fredericksburg, Galax, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Martinsville, Newport News, Norfolk, Norton, Petersburg, Poquoson, Portsmouth, Radford, Richmond, Roanoke, Salem, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester

Unorganized areas bearing county designations (20):

Connecticut (8 county areas with no county government) .....	Fairfield, Hartford, Litchfield, Middlesex, New Haven, New London, Tolland, and Windham
Massachusetts (7 county areas with no county government) .....	Berkshire, Essex, Franklin, Hampden, Hampshire, Middlesex, and Worcester
Rhode Island (5 county areas with no county government) .....	Bristol, Kent, Newport, Providence, and Washington

Other unorganized county-type areas (11):

Alaska .....	11 census areas
--------------	-----------------

---

# Appendix B.

## Geographic Areas With More Than Four Congressional Districts

---

State and county area	Congressional district
Arizona:	
Maricopa County .....	2, 3, 4, 5, 6, 7
California:	
Los Angeles County .....	22, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 42, 46
Orange County .....	40, 42, 44, 46, 47, 48
San Bernardino County .....	25, 26, 41, 42, 43
San Diego County .....	49, 50, 51, 52, 53
Florida:	
Broward County .....	17, 19, 20, 21, 22, 23
Miami-Dade County .....	17, 18, 20, 21, 25
Illinois:	
Cook County .....	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 13
Maryland:	
Baltimore County .....	1, 2, 3, 6, 7
Massachusetts:	
Middlesex County .....	1, 3, 4, 5, 6, 7, 8
Norfolk County .....	2, 3, 4, 9, 10
New York: .....	
New York City Area .....	5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17
Pennsylvania:	
Montgomery County .....	2, 6, 7, 8, 13, 15
Texas:	
Dallas County .....	3, 5, 24, 26, 30, 32
Harris County .....	2, 7, 9, 10, 18, 22, 29
Washington:	
King County .....	1, 2, 7, 8, 9

Note: These are congressional districts of the 110th Congress, in session between January 2007 and January 2009.

# Appendix C.

## County Locations of State Capital Cities

State	Capital	County area
Alabama.....	Montgomery	Montgomery County
Alaska.....	Juneau	Juneau Borough
Arizona.....	Phoenix	Maricopa County
Arkansas.....	Little Rock	Pulaski County
California.....	Sacramento	Sacramento County
Colorado.....	Denver	Denver City/County
Connecticut.....	Hartford	Hartford County
Delaware.....	Dover	Kent County
Florida.....	Tallahassee	Leon County
Georgia.....	Atlanta	Fulton County
Hawaii.....	Honolulu	Honolulu City/County
Idaho.....	Boise	Ada County
Illinois.....	Springfield	Sangamon County
Indiana.....	Indianapolis	Marion County
Iowa.....	Des Moines	Polk County
Kansas.....	Topeka	Shawnee County
Kentucky.....	Frankfort	Franklin County
Louisiana.....	Baton Rouge	East Baton Rouge Parish
Maine.....	Augusta	Kennebec County
Maryland.....	Annapolis	Anne Arundel County
Massachusetts.....	Boston	Suffolk County
Michigan.....	Lansing	Ingham County
Minnesota.....	St. Paul	Ramsey County
Mississippi.....	Jackson	Hinds County
Missouri.....	Jefferson City	Cole County
Montana.....	Helena	Lewis and Clark County
Nebraska.....	Lincoln	Lancaster County
Nevada.....	Carson City	Carson City
New Hampshire.....	Concord	Merrimack County
New Jersey.....	Trenton	Mercer County
New Mexico.....	Santa Fe	Santa Fe County
New York.....	Albany	Albany County
North Carolina.....	Raleigh	Wake County
North Dakota.....	Bismarck	Burleigh County
Ohio.....	Columbus	Franklin County
Oklahoma.....	Oklahoma City	Oklahoma County
Oregon.....	Salem	Marion County
Pennsylvania.....	Harrisburg	Dauphin County
Rhode Island.....	Providence	Providence County
South Carolina.....	Columbia	Richland County
South Dakota.....	Pierre	Hughes County
Tennessee.....	Nashville	Metro Nashville-Davidson <sup>1</sup>
Texas.....	Austin	Travis County
Utah.....	Salt Lake City	Salt Lake County
Vermont.....	Montpelier	Washington County
Virginia.....	Richmond	Richmond City
Washington.....	Olympia	Thurston County
West Virginia.....	Charleston	Kanawha County
Wisconsin.....	Madison	Dane County
Wyoming.....	Cheyenne	Laramie County

<sup>1</sup>Metropolitan Nashville-Davidson is listed as Davidson County in the *Consolidated Federal Funds Report*.

# Appendix D.

## Consolidated Federal Funds Report Data Sources

Category	Source
<b>GRANTS</b>	
Corporation for Public Broadcasting—public broadcasting grants	Corporation for Public Broadcasting*
Customs duties and federal excise taxes rebated to the government of Puerto Rico	Department of the Treasury
Department of the Interior— Bureau of Indian Affairs—grants to Indian tribes Shared revenues for mineral leases, grazing lands and other payments to state and local governments Payments to U.S. Territories	Bureau of Indian Affairs* Bureau of Land Management and Minerals Management Service* Office of the Secretary of the Interior*

# Appendix F.

## Use of County Area Allocations for Selected Federal Pass-Through Assistance Programs by State

[A = Program data are allocated to all county areas. The distribution is based on data supplied by the state for all of its county areas.  
 B = Program data are allocated to all county areas. The distribution is based on data supplied by the state for most of its county areas.  
 The U.S. Census Bureau estimated remaining county allocations.  
 C = All program data are allocated to state undistributed]

State and territory	Food Stamps (10.551)	National School Lunch Program (10.555)	Special Supplemental Food Program for Women, Infants, and Children (WIC) (10.557)	Handicapped Education—State Grants (84.027)	Rehabilitation Services—Basic Support (84.126) <sup>1</sup>	Low Income Home Energy Assistance (93.568)	Social Services Block Grant (93.667)	Block Grants for Prevention and Treatment of Substance Abuse (93.959)
