SUPPLEMENTARY INFORMATION:

¹ Pedestal actuators consist of electromechanical linear actuators, imported with or without motors, or as part of scooter subassemblies, all the foregoing used for lifting and lowering, or for pushing or pulling. The products under investigation include any subassembly of pedestal actuator parts and components. Pedestal actuators are powered by fractional horsepower DC or AC motors, which drive a ball bearing screw or acme screw through a gear reducer to convert rotary to linear motion. The products are designed for flat or base mounting, have telescoping members, with bearings or bearing surfaces, and rigidly support the load and provide anti-rotation. The imported products are provided for in subheadings 8483.40.50, 8501.31.40, and 8501.40.40 of the Harmonized Tariff Schedule of the United States (HTS). Although the HTS categories are provided for convenience and Customs purposes, the written description of the merchandise under investigation is dispositive.
