

**Toxic Substances Coordinating Committee
Human Health Workgroup
December 2, 2008**

Agenda

- Introductions
- Hot topics/issues/current sites/agency updates
- Indoor/ambient air and vapor intrusion discussion
- Future topics of discussion

Attendees

Heidi Bojes, Annabelle Dillard, Quade Stahl, Carrie Bradford

Minutes

- It was suggested that the quarterly meeting of the TSCC Human Health Workgroup be moved to coordinate with the TSCC General Committee meeting to try to increase attendance. When the 2009 TSCC General Committee meeting dates are announced, the 2009 workgroup meetings will be scheduled.
- Annabelle Dillard and Quade Stahl from the Policy Standards and Quality Assurance Unit of DSHS talked about the regulatory role DSHS has with respect to asbestos, lead, indoor air, mold, and radon. Their mandates are for state government buildings, and they provide consultative visits for schools. They have also produced Texas Voluntary Indoor Air Quality Guidelines for Government Buildings (<http://www.dshs.state.tx.us/iaq/SchoolsGuide.shtm>).
- It was suggested that the TSCC Human Health Workgroup might be a good forum for updates regarding the legislative session.

Future Topics of Discussion

- Vapor intrusion issues and evaluation
- Methodology to evaluate air data and concerns about air quality
- Radon

Next TSCC General Meeting

December 16, 2008, 9:30, T-709

Next TSCC Human Health Workgroup Meeting

To be announced
