**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

**I. INTRODUCTION**

This Intended Use Plan (IUP) accompanies the State of Texas' application for a capitalization grant for the Drinking Water State Revolving Fund (DWSRF) program under the American Recovery and Reinvestment Act of 2009 (ARRA). The IUP identifies the intended uses of the funds that will be made available to the State of Texas' DWSRF loan program from the ARRA capitalization grant totaling \$160,656,000 which includes \$6,426,240 for program administration and \$154,229,760 for financial assistance. The Texas Water Development Board (TWDB) administers this program in accordance with the provisions of the ARRA, P.L. 111-5; Safe Drinking Water Act Amendments of 1996 (SDWA); Section 15.4061, Water Code; and 31 Texas Administrative Code Chapter 371 (TWDB rules) as waived or modified by action of the TWDB's board in order to implement special requirements of ARRA.

The TWDB continues to pursue a long range plan to protect the future health and viability of the DWSRF while providing financial assistance to political subdivisions, investor-owned utilities (IOUs), and eligible non-profit/non-community (NPNC) applicants for water infrastructure and treatment, and source water protection projects in Texas.

**II. ARRA DWSRF GOALS**

The State of Texas is committed to using the capitalization grant for which it is applying to provide assistance to water systems for capital improvement projects that will proceed quickly to construction, create jobs, generate long-term benefits from infrastructure investment, and further the water quality objectives of the SDWA. The TWDB intends to award all assistance available under the ARRA in full conformance with the deadlines established by the ARRA legislation and the terms and conditions of the capitalization grant award. The objectives of the ARRA, as they relate to the SRF, are:

- "To preserve and create jobs and promote economic recovery."
- "To assist those most impacted by the recession."
- "To provide investments needed to increase economic efficiency by spurring technological advances in science and health."
- "To invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits."
- "To stabilize state and local government budgets, in order to minimize and avoid restrictions in essential services and counterproductive state and local tax increases."

The TWDB appreciates these objectives and believes this IUP is fully supportive.

**A. Short-Term Goals of the ARRA DWSRF**

1. The TWDB will maximize the use of the ARRA funds to achieve the objectives of the ARRA and to provide for projects that are designed to meet the public health protection needs of the state. This includes:
  - issuing assistance agreements that require assistance recipients to enter into contracts for construction or begin construction by February 17, 2010;
  - targeting funds to maximize job creation and economic benefits;
  - giving preference to activities that can be started and completed expeditiously, including a goal of using at least 50 percent of the funds for activities that can be initiated not later than 120 days after the date of the enactment of the ARRA, or June 17, 2009 by utilizing a "ready to proceed" criterion for assigning top priority for

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

funding projects within this timeframe;

- assuring that not less than 50 percent of the ARRA capitalization grant shall be in the form of additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans or grants or any combination of these;
  - assuring that not less than 20 percent of the ARRA capitalization grant shall provide funds for projects, or portions of projects, that include green infrastructure, water or energy efficiency improvements or other environmentally innovative activities; and
  - reporting on the environmental and economic impact of DWSRF loans/grants made with ARRA funds and developing, updating, and expanding a portfolio of reports for transparency.
2. For the ARRA, the TWDB will conduct application meetings with potential borrowers and solicit and review applications, resulting in binding commitments representing \$154,229,760 in loans/grants. In addition, the TWDB anticipates that all projects will be under construction or under contract for construction by February 17, 2010.

**B. Long-Term Goals of the DWSRF**

1. Restore and maintain the chemical, biological, and physical integrity of the state's public drinking water by developing a financial and technical program capable of funding annually all projects which pose the most serious risk to public health and compliance with the SDWA. Progress toward meeting this goal will be documented by discussing the activities conducted during the year to ensure that the most critical health problems are being addressed. This will include the incorporation of environmental benefits measures in conjunction with the EPA workgroup on measures. Progress toward meeting this goal will be documented by providing information on strategic assessment of changing needs and ongoing or completed changes aimed at addressing those needs.
2. The TWDB will maintain the fiscal integrity of the DWSRF and assure continuous enhancement of the fund for future generations. Progress toward meeting this goal will be documented by continuing discussions with the EPA on issues such as leverage bonds, pre-design funding options, lending rate policies, loan monitoring activities, and loan default information.
3. The TWDB will maintain the DWSRF into perpetuity. Progress toward meeting this goal will be provided via reporting on the annual capacity modeling and changes in capacity.

Implementation of the ARRA will not impede these long-term goals.

**III. SOURCES ANDS USES OF FUNDS**

The TWDB, on behalf of the State of Texas, is applying for a capitalization grant in the amount of \$160,656,000. This represents the amount that the state is eligible to receive under the state's allocation from the supplemental appropriation enacted under the ARRA. The following table identifies the sources and uses of ARRA funds available to the DWSRF program.

**State of Texas**  
**American Recovery and Reinvestment Act of 2009**  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

**Statement of Sources and Uses of Capital  
for ARRA Projects**

<b>Sources</b>	
Capitalization Grant	\$160,656,000
<b>Total Sources</b>	<b>\$160,656,000</b>
<b>Uses</b>	
4% Admin.	\$6,426,240
<u>Loans/Grants Funded</u>	
Project Assistance Subsidization	80,328,000
Green Projects	32,131,200
Program Loans	41,770,560
<b>Total Uses</b>	<b>\$160,656,000</b>
<b>Net Sources (Uses)</b>	<b>\$0</b>

The ARRA statute and EPA's ARRA guidance specifically allows for the transfer of funds between the Clean Water State Revolving Fund and the Drinking Water State Revolving Fund and §§15.601(c) and 15.609(c) of the Texas Water Code may also be interpreted to permit such a transfer; however, the TWDB does not plan to transfer funds at this time.

**IV. CRITERIA AND METHOD OF DISTRIBUTION OF FUNDS**

**A. Solicitation of Project Information**

In accordance with TWDB rules, project information was solicited from eligible entities across the state. A DWSRF IUP solicitation packet was mailed to all known existing water systems on October 24, 2008. The deadline for submitting the IUP information was January 23, 2009.

The information required in the IUP solicitation packet consisted of:

- a description of the proposed project;
- information needed to rate the project (except for source water protection projects, rating factors include health and compliance, physical deficiency, consolidation, and affordability);
- the estimated total project cost;
- an estimated schedule for construction of the proposed project;
- county map showing location of service area;
- current Health and Compliance Factor and/or MCL Violations and Physical Deficiencies and proposed project solutions;
- disadvantaged communities worksheet (if applicable); and
- such other information as may be requested by the Executive Administrator.

In order to solicit potential applicants and to assist entities with filling out the IUP project solicitation forms, staff conducted six SRF workshops around the state.

**SRF Workshops**

<b>Date</b>	<b>Location</b>
November 13, 2008	Bryan
November 18, 2008	Amarillo
November 20, 2008	Edinburg
December 4, 2008	Dallas
December 9, 2008	Abilene
December 11, 2008	Odessa

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

In December 2008, the TWDB began conducting a comprehensive outreach campaign to alert potential borrowers of prospective federal plans to provide economic recovery stimulus funding. On December 29, 2008, a special notice regarding the solicitation of project information for potential economic recovery funds was mailed to approximately 3,700 water and wastewater entities. In March 2009, a new web site was launched to disseminate information about the economic recovery funding process. Information on the web site was updated as details changed and became finalized at the federal level. Additionally, projects that had not already closed loans under the SFY 2009 DWSRF IUP were evaluated for inclusion on the ARRA Project Priority List (Appendix C).

On April 9, 2009, the TWDB distributed an email announcement regarding a web-based ARRA Survey designed to solicit additional information in order to ascertain whether a project was ready to proceed and was eligible as a green project. Recipients of the survey were all entities with projects that submitted their project information forms on time and projects that had not already closed loans under the SFY 2009 DWSRF IUP. The deadline for completing the survey was May 4, 2009.

The TWDB has focused on reaching out to communities with ready to proceed projects and those that may be eligible for additional subsidization assistance. As a result of this effort, the DWSRF program has identified over \$3.4 billion in eligible projects that could be ready to proceed to construction within the deadlines established by the ARRA. The Project Priority List (Appendix C) includes projects that have been assessed through the DWSRF prioritization process.

**B. Additional Subsidization**

The ARRA requires that not less than 50 percent of capitalization grant funds shall be awarded in the form of additional subsidies. In March 2009, the TWDB adopted a policy that the additional subsidization would be made available to those entities that meet existing SRF program eligibility requirements as disadvantaged communities and that the additional subsidization would be offered in the form of a grant.

The Project Priority List (Appendix C) demonstrates that at least 50 percent of the ARRA capitalization grant funds of \$160,656,000, or \$80,328,000, will be provided via grant to disadvantaged communities. Any subsequent revision to the Project Priority List will likewise demonstrate that at least 50 percent of the ARRA capitalization grant funds will be provided via grant to disadvantaged communities. If a project qualifies for additional subsidization and receives ARRA funding but exceeds the minimum 50 percent reserved for disadvantaged communities, the entirety of ARRA funding will be awarded as grant.

Local governmental entities and other recipients of ARRA grants are subject to federal regulations relating to administrative requirements for grants. These regulations, at 40 Code of Federal Regulation Part 31, contain requirements relating to:

- standards for financial management that require financial reporting, certain types of accounting records, budget control, source documentation that supports the accounting records, and cash management standards; allowable costs governed by Office of Management and Budget Circular A-87; requirements for matching grants; restrictions on income derived from grants; audits; budget changes; purchase, use, and disposition of equipment purchased with federal grant funds; and copyrights;

**State of Texas**  
**American Recovery and Reinvestment Act of 2009**  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

- procurement standards relating to federal grant funds; these standards relate to competitive bidding, procurement of professional services, codes of conduct, sealed bids, bonding requirements, and certain provisions that must be contained in construction contracts;
- monitoring and reporting relating to performance goals; performance reports, including construction performance reports; and
- retention and access requirements for records and closeout requirements.

Note that the above requirements are in addition to the ARRA's Buy American requirements.

**C. Green Project Reserve**

The ARRA requires that, to the extent there are sufficient eligible project applications, not less than 20 percent of the capitalization grant funds shall be for projects to address green infrastructure, water or energy efficiency improvements or other environmentally innovative activities. To address this requirement, the TWDB evaluated which projects appear likely to qualify as green infrastructure projects using information provided in the project solicitation submission, the ARRA Survey, and the green resolicitation. All green reserve project descriptions will be sent to the EPA for evaluation. The EPA will determine which projects are categorically, or unquestionably, green and which projects will require a business case of the project's green qualifications. Once the business cases have been developed, they will be submitted to the EPA and reviewed by a panel of subject matter experts. The Green Panel will ultimately approve or reject the business case for each project.

Pursuant to the results obtained by the screening process, the Project Priority List (Appendix C) will show that a minimum of 20 percent of the total capitalization grant funds of \$160,656,000, or \$32,131,200, will be for projects or portions of projects meeting one or more of the specific objectives required by this provision. If sufficient green infrastructure projects do not meet the required 20 percent threshold, the TWDB will make another solicitation before August 17, 2009 for additional projects and will amend the IUP to include the green projects in an effort to meet the 20 percent mark.

**Summary of Green Infrastructure Projects**

Community Size	Number of Projects		Estimated Green Cost	
Small (< 10,000 population)	15	33%	\$49,652,026	32%
Large (≥ 10,000 population)	31	67%	\$103,279,919	68%
<b>Total</b>	<b>46</b>	<b>100%</b>	<b>\$152,931,945</b>	<b>100%</b>

**D. Resolicitation for Green Projects**

Although some form of federal stimulus appropriation was anticipated at the time of the initial solicitation for DWSRF projects that were due in January 2009, the provisions of ARRA were unknown. The enactment of ARRA on February 17, 2009, included a provision that at least 20 percent of the capitalization grant must be reserved for green projects. Guidance of March 2, 2009, from EPA cautioned that if "the projects in a State's IUP do not appear to contain qualifying projects or components of projects with a total value of at least 20 percent of the ARRA capitalization grant to the State, then [ARRA] requires the State to make timely and concerted solicitation for projects" and to add sufficient green projects to the State's IUP to ensure 20 percent funding. Review of the DWSRF projects and discussions with representatives of EPA Region 6 led staff to conclude that a resolicitation was necessary,

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

especially in view of the ARRA time constraints for final award of grant funds. On May 21, 2009, the TWDB provided an additional opportunity to public water systems to submit project information to identify green projects that would be ready to proceed under ARRA timelines.

This resolicitation went to those systems that had responded to the original solicitation as well as those that had not done so. Those that had responded already were requested to provide additional, project-specific information and a business case in support of the project's green qualifications. Those not having previously responded were required to submit project information as well as the business case. All systems were provided an example of a business case and copies of EPA guidance. The resolicitation for new projects was concluded on June 1, 2009, and the additional projects were evaluated and incorporated into this ARRA DWSRF IUP as appropriate based on the criteria set forth herein. Accordingly, the resolicitation incorporated additional guidance from EPA representatives, including the request for sufficient information to effectively document the decision-making process regarding cost breakdowns, environmental benefits, and efficiency analyses based on modeling and calculations to be used in establishing business cases for green projects. The TWDB believes that there are sufficient projects to meet the green reserve that are ready to proceed.

**E. Notice of Availability of Funds**

Notice is hereby given of the availability of \$154,229,760 in ARRA loan/grant funds. This amount includes:

- approximately \$80,328,000 in Additional Subsidization (Disadvantaged Communities) funds
- approximately \$32,131,200 in Green Project funds
- approximately \$41,770,560 in remaining funds

**F. Distribution of Funds**

Reference is made to a funding line. The term funding line refers to the point on the Project Priority List (Appendix C) where the sum of project costs is equal to the amount of funds available. The funding line will be adjusted downward when an entity above the line is not ready to proceed, does not fulfill the 50 percent and/or 20 percent ARRA reserve requirements for which the applicant has been prioritized, decides not to apply, or fails to submit a timely and complete application.

If, at any time during the above-described period, an entity above the funding line submits written notification that it does not intend to submit an application, or if there are insufficient applications demonstrating readiness to proceed to obligate the ARRA funds available (including Disadvantaged Community and green), the funds will be made available to other entities as described in IV.I. Prioritization and Tie Breaking Process in order to accommodate additional projects to utilize the funds that otherwise would not be committed. The Executive Administrator will notify such additional entities in writing and will invite the submittal of applications. Entities receiving a formal notice to make application will have 30 days from the date of notice of availability of funds to submit applications for assistance.

To be complete, the application must include sealed plans and specifications and final environmental determinations, and must demonstrate that all property requirements are in place (i.e., easements obtained, ownership of plant site or long term lease executed) and otherwise evidence that the construction start date is reliable and is timely for ARRA

**State of Texas**  
**American Recovery and Reinvestment Act of 2009**  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

purposes. If an applicant fails to submit a complete application and is unwilling or unable to render the application complete within **five business days** of notice from the Executive Administrator that the application is incomplete, then the applicant will be considered for funding under the SFY 2010 DWSRF IUP or SFY 2009 DWSRF IUP, as appropriate, and the ARRA funding line will be adjusted downward in priority order to accommodate additional projects which would utilize the funds that would otherwise not be committed.

If, based on a review of an application for ARRA funding, or at any time prior to closing a commitment, the Executive Administrator determines that the project is not ready to proceed to construction or to be under contract on or before February 17, 2010, the applicant will be considered for funding under the SFY 2010 DWSRF IUP or SFY 2009 DWSRF IUP, as appropriate, and the funding line will be adjusted downward in priority order to accommodate additional projects which would utilize the funds that would otherwise not be committed.

The Executive Administrator may exercise the discretion to move the funding line downward according to the process described in I. Prioritization and Tie Breaking Process in order to ensure allocated funding for disadvantaged communities and green projects. As required by the SDWA, a minimum of 15 percent of available funds will be made available to small communities (systems serving populations of less than 10,000).

Each IUP is a stand-alone document and lists projects for a given legislative initiative or fiscal year. Thus, in this case, those projects prioritized below the funding line could potentially move to the top of the list. Entities that submit inadequate or no application may resubmit project information for the following year's IUP.

**G. Funding Options**

The following ARRA funding options are available under the DWSRF program:

**1. Additional Subsidization (Disadvantaged Communities) Funding**

The ARRA requires that not less than 50 percent of the capitalization grant, or \$80,328,000 be used to provide additional subsidization to eligible entities in the form of principal forgiveness, negative interest loans, grants, or any combination of these. To meet this requirement, the Disadvantaged Communities funding option will offer assistance in the form of 100 percent grant to eligible entities who qualify as disadvantaged. The 2.25 percent loan origination fee will be waived for ARRA-funded projects. Following is a summary of projects from entities that qualify as disadvantaged:

**Summary of Disadvantaged Communities Projects**

Community Size	Number of Projects		Total Cost	
Small (< 10,000 population)	104	80%	\$415,545,000	34%
Large (≥ 10,000 population)	26	20%	\$793,385,000	66%
<b>Total</b>	<b>130</b>	<b>100%</b>	<b>\$1,208,930,000</b>	<b>100%</b>

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

- a. Definition** – A disadvantaged community is defined as a service area of a political subdivision that has an adjusted median household income which is no more than 75 percent of the state median household income for the most recent year for which statistics are available; and
- i. if the service area is not charged for sewer services, has a household cost factor for water rates that is greater than or equal to 1.0 percent; or
  - ii. if the service area is charged for water and sewer services, has a combined household cost factor for water and sewer rates that is greater than or equal to 2.0 percent.

The household cost factor is calculated as the sum of the average yearly water bill and the cost of the proposed project divided by the adjusted median household income. The combined household cost factor is calculated as the sum of the average yearly water bill, the average yearly sewer bill, and the cost of the proposed project divided by the adjusted median household income.

A community is a disadvantaged community if it meets the definition of a disadvantaged community presently or becomes a disadvantaged community as a result of a proposed project (i.e., incorporates a previously unserved disadvantaged community).

- b. Eligibility** – TWDB staff determines eligibility for the Disadvantaged Communities funding option. To be eligible for this funding option, the entity must be either (i) a political subdivision that is a disadvantaged community or will serve an area that is located outside the boundaries of the political subdivision and the area served meets the definition of a disadvantaged community; or (ii) an owner of a community water system that is ordered by the Texas Commission on Environmental Quality (TCEQ) to provide service to a disadvantaged community, provided that the financial assistance is for the sole purpose of providing service to the disadvantaged community.
- c. Required Information** – The criteria for determining eligibility for Disadvantaged Communities funding consists of the adjusted median household income, household costs for water and sewer, and costs for the proposed project. There are two methods to determine the adjusted median household income.

- i. Use the following formula:

$$\frac{(2000 \text{ Annual Median Household Income}) \times (\text{Current Texas Consumer Price Index})}{(2000 \text{ Texas Consumer Price Index})}$$

OR

- ii. Use data from a survey approved by the Executive Administrator of a statistically acceptable sampling of customers in the service area completed within the last 12 months. Required survey information is provided to the entity by TWDB staff during the solicitation process.

Other required information is calculated as follows:

**State of Texas**  
**American Recovery and Reinvestment Act of 2009**  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

$$\begin{aligned} \text{Average Annual Water Bill} &= (\text{Avg. \# of persons/household}) \times (2,325 \text{ gallons/person/month}) \times (\text{Monthly water rate}) \times (12) \\ \text{Average Annual Sewer Bill} &= (\text{Avg. \# of persons/household}) \times (1,279 \text{ gallons/person/month}) \times (\text{Monthly sewer rate}) \times (12) \\ \text{Household Cost Factor} &= \frac{(\text{Average Annual Water Bill}) + (\text{Annual Loan Cost})}{(\text{Adjusted Median Household Income})} \\ \text{Combined Household Cost Factor} &= \frac{(\text{Avg. Annual Water Bill}) + (\text{Avg. Annual Sewer Bill}) + (\text{Annual Loan Cost})}{(\text{Adjusted Median Household Income})} \end{aligned}$$

If taxes, surcharges, or other fees are used to subsidize the water and/or sewer system, the average annual amount per household may be included in calculating the household cost factor or the combined household cost factor.

If a project fails to qualify under the criteria for disadvantaged community status, the TWDB may consider making grant funding available if the applicant can otherwise demonstrate inability to repay a loan. This will require a finding by the TWDB that the applicant could not otherwise afford an SRF loan based on consideration of factors presented by the applicant.

**2. Mainstream Funding**

The Mainstream funding option will offer assistance in the form of 0 percent interest rate loans to eligible entities that do not qualify for the Additional Subsidization (Disadvantaged Communities) funding option. The 2.25 percent loan origination fee will be waived for ARRA-funded projects.

**Summary of Mainstream Projects**

Community Size	Number of Projects		Total Cost	
Small (< 10,000 population)	247	52%	\$569,044,000	26%
Large (≥ 10,000 population)	231	48%	\$1,649,709,900	74%
<b>Total</b>	<b>478</b>	<b>100%</b>	<b>\$2,218,753,900</b>	<b>100%</b>

The TWDB requires applicants seeking ARRA funds to complete and submit a Preaward Compliance Review Report which lists the federal requirements that they must adhere to, commonly referred to as federal crosscutters. The ARRA includes a number of new crosscutting requirements that will apply to projects funded in part or in whole with funds made available by the ARRA (see VI. Special Conditions for ARRA Funds).

**H. Preference for Expedited Construction**

The ARRA requires that priority be given to projects that will be ready to proceed to actual construction within 12 months of the date of ARRA enactment, or February 17, 2010. In compliance with this requirement, the TWDB will use construction start dates and additional applicable information obtained via the TWDB's ARRA Survey and during the comment period to determine which projects can be started and completed expeditiously.

In addition, ARRA section 1602 requires that "recipients shall give preference to activities that can be started and completed expeditiously, including a goal of using at least 50 percent of the funds for activities that can be initiated not later than 120 days after... enactment" of the ARRA. The TWDB intends to implement this preference by first prioritizing ARRA funding for

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

those projects that appear most likely to be able to start construction by June 17, 2009.

**I. Prioritization and Tie Breaking Process**

Prior to prioritizing the projects, the state's SDWA primacy agency, TCEQ, rates each project by applying criteria specified under TWDB rules. These include total health and compliance factors, total physical deficiencies, and consolidation factors. The TWDB evaluates projects for affordability and one point is added for the combined factor (total rating score).

Prioritization has incorporated the directives of the ARRA, beginning with determining whether a project evidences that the applicant is ready to proceed to construction or to a fully funded construction contract by no later than February 17, 2010. Accordingly, any project that fails to indicate a projected construction or construction contract date on or before February 17, 2010, is excluded from the prioritization for ARRA capitalization grant funding.

The remaining projects are then listed with first priority assigned to stated construction start dates from present through June 30, 2009, consistent with ARRA's directive that preference be given to projects shown ready to proceed within 120 days of ARRA enactment. Projects are then ranked on the basis of the combined factor (total rating score). Priority is then given to all projects demonstrating start dates in July 2009, followed by projects with start dates in August 2009, and continuing succeeding months. Within each month, projects are ranked by the total rating scores.

Projects are then evaluated to determine whether the project qualifies for additional subsidization based on benefits to a disadvantaged community or qualifies as green and, if so, the percent of the project so qualifying. A funding line is drawn based on allocation of at least 50 percent of the allotted funds to disadvantaged communities. Projects are then evaluated based on green infrastructure with priority based on the start dates as described above. In some instances, this results in projects with higher total rating scores and start date but failing to qualify as green or disadvantaged being bypassed in order to comply with the minimum funding requirements for green and additional subsidization. In the event a project benefits a disadvantaged community and qualifies as green, funds for that project will be counted toward the allocation for deep subsidization and also will be counted toward the green reserve. The TWDB will work with those applicants whose projects are not fully funded within the funding line to determine if additional funding for the project can be made available from the base DWSRF or other appropriate TWDB programs within ARRA time constraints. Any additional funding from the base DWSRF program will be subject to ARRA crosscutters, with the exception of projects in distinct and severable phases (e.g., a design phase and a build phase) in which case ARRA crosscutters will not apply to any phase funded exclusively from non-ARRA funds.

In the event that minimum funding allocations for green or disadvantaged communities are not satisfied, funds are reassigned to projects in order to fund the necessary allocation for total funding, with first preference given to the earliest construction start date and total rating score.

Projects have been prioritized for receipt of ARRA funding based on applicant representations regarding the readiness of the projects and related construction contracts to proceed by a certain date. Therefore, applicants receiving an invitation to submit an application for ARRA funding will be required to include with the application complete project plans and specifications for all construction contracts, along with copies of fully executed consultant, utility service, or other related contracts, sealed plans and specifications, final

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

environmental determinations, demonstration that all real estate matters (easements, site location) are resolved, and all necessary permits are in place. This must be submitted within 30 days of the date the invitation is extended, provided that the invitation is made on or after the date the applicant has represented the project will be ready to proceed (and on the basis of which their project has been given priority for funding). Should the date of the invitation precede the date used for establishing priority, the Executive Administrator will establish an appropriate time period for submittal of the documents specified, but in no event will that time exceed 30 days following the applicant's prioritization date. Failure to submit all documentation by the specified deadline will result in disqualification and the related project funding will be reallocated to other projects on the IUP pursuant to criteria described herein.

If it is determined in review of an application that a project that was prioritized for funding on the basis of being green does not meet EPA criteria for green, the project will be disqualified for ARRA funding if the project does not otherwise receive prioritization based on the other criteria for selection described herein. If, after attempting to reallocate funds to replace any disqualified project, there is a shortage of projects to satisfy the green reserve, the shortage will be held in reserve and the TWDB will proceed with an additional public solicitation for additional green projects as soon as practicable. After selection of new, eligible projects, the remaining green reserve will be applied pursuant to criteria described herein.

As a final matter, if necessary, tie-breakers are based on (1) lower population first; (2) availability of other cash resources to partially finance the project; (3) county unemployment rate; and (4) project serving military or Homeland Security installations.

As noted above and at IV.F. Distribution of Funds, in the event an applicant withdraws, fails to move forward with a complete application within critical time constraints, or fails to maintain the project as ready to proceed and the project is removed from the funding list, the funds reserved for that project will be provided to an otherwise unfunded project based on earliest projected construction start date by month and total rating score within that month, provided the project also meets any applicable requirements for green or disadvantaged community.

**J. Avoidance of Reallotment/Relationship to Base Program**

In order to meet the requirements of the ARRA, the TWDB agrees to issue assistance agreements requiring assistance recipients to enter into contracts for construction or begin construction by February 17, 2010. Furthermore, every assistance recipient must provide a signed certification that contracts have been signed in an amount equal to the full value of the signed assistance agreement within 12 months of the date of ARRA enactment, and if applicable, that construction has commenced. The TWDB will include conditions in its assistance agreements to ensure that recipients make timely progress with respect to entering into contracts and/or construction.

The ARRA requires the EPA Administrator to reallocate any funds that do not meet the required deadline for contracts or construction. In order to implement this provision, the EPA will immediately deobligate funds from awarded grants that are not under contract within 12 months of the date of ARRA enactment. The EPA will rely on required reporting to determine if funds are not under contract. All reporting on contracts must be complete no later than 14 days after the deadline for contracts for construction.

To better ensure that EPA does not reallocate, from Texas, any funds from the ARRA special capitalization grant, the TWDB will extend special provisional invitations to applicants, whose

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

projects are not prioritized above the funding line, to prepare a complete application that may be considered in the event a project above the funding line is removed from the list because the applicant chooses not to proceed or fails to demonstrate the project is ready to proceed within ARRA time constraints. Those applicants providing a complete application within 30 days of receiving a special provisional invitation will be funded under the ARRA DWSRF IUP (if a higher ranking project fails to qualify) or will be funded from the 2010 DWSRF IUP with a loan at 0 percent interest from base program funding.

In addition, if an applicant is awarded ARRA funds but the funding is insufficient for the entire cost of the project due to limitations under the ARRA grant, TWDB ARRA rules, or program administration, the applicant will be given the option of a 0 percent interest loan from the base DWSRF program for the remaining cost of the project, subject to any limitations in the base DWSRF program rules and capacity. In this event, the applicant will be required to comply with all ARRA requirements, including Davis-Bacon and Buy American, in the use of DWSRF base program funds.

The TWDB has considered the possibility of transferring funds between the CWSRF and DWSRF and has determined that no transfer will be required for either program in order to comply with the ARRA time constraints. However, the TWDB intends to carefully monitor the processing of applications through commitment of funds and closure on loans and grants and will reconsider transfers if necessary and appropriate.

In the event that funds appropriated by the ARRA are deobligated, such funds will be reallocated to other states on the same basis as was applicable to the initial allotment of funds. None of the funds reallocated shall be made available to any State which was subject to reallocation. Any sum made available to a State by reallocation under this section shall be in addition to any funds otherwise allotted to such State for grants under this appropriation. Furthermore, in order to participate in the reallocation of funds, a State must certify through an amendment to its IUP, that any additional funds will be contracted for construction within 120 days of reallocation. The State of Texas will only be eligible for reallocation for an amount equal to the total value of projects that are certified as ready to proceed in the amended IUP, but no more than an amount determined by the allotment formula. The amendment to the IUP must contain a list of projects ready to receive binding commitments within 120 days of reallocation as well as the certification that these funds will be under contract for construction within 120 days.

In order to effectively ascertain that the State of Texas will be able to participate in a potential reallocation, the TWDB will identify additional projects that will be ready to proceed to construction no later than 120 days after February 17, 2010. If the EPA determines that reallocation is likely at the end of the 12-month period, the TWDB will be required to submit a certified list of projects that will be under contract for construction within 120 days after February 17, 2010. The certified lists submitted by the States will be used to determine participation in a reallocation of funds.

**K. Financial Assistance Terms and Fees**

The Additional Subsidization (Disadvantaged Communities) funding option will offer 100 percent grant funding and the Mainstream (non-disadvantaged) funding option will offer loan funding with a fixed interest rate of 0%. The repayment term will be based on the life of the asset with a maximum of 20 years. The 2.25 percent loan origination fee will be waived for ARRA-funded projects. All funded projects must be ready to proceed and fall within the

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

funding scope of the ARRA funds.

**L. Limits on Funding**

The TWDB will limit each entity to a funding amount less than or equal to 30 percent of the capitalization grant so that the ARRA funds can reach as many qualifying entities as possible. The TWDB has determined that the funds appropriated under the ARRA may not be used to provide assistance for the purpose of purchasing or refinancing municipal debt or restructuring outstanding SRF loans. No project may be funded with a grant or loan amount that exceeds the project cost identified on the Project Priority List (Appendix C). In the event that the cost of a project exceeds the project cost identified on the Project Priority List, the applicant may seek additional funds from the base DWSRF program or other appropriate TWDB programs.

**V. PUBLIC COMMENT**

On June 10, 2009, the TWDB posted notice of the draft ARRA DWSRF IUP and the opportunity for public comment on the Texas Secretary of State's website. On June 11, 2009, the TWDB mailed the draft IUP to stakeholders and posted it online at the TWDB's ARRA website. Stakeholders were provided three methods for submitting comments: electronically, by mail, and at public hearing. The TWDB conducted a public hearing on July 10, 2009, which was attended by 29 commenters and numerous observers. Written comments were accepted from June 12, 2009, through 5:00 PM on July 13, 2009. The TWDB also received a number of comments electronically and via mail. These comments were summarized and presented to the TWDB board members on July 16, 2009, accompanied by staff recommendations for changes to the project priority ranking in response to certain of the public comments.

**VI. SPECIAL CONDITIONS FOR ARRA FUNDS**

**1. Davis-Bacon**

The ARRA requires that Davis-Bacon Act wage rules be applied to all assistance agreements made in whole or in part with funds appropriated under the ARRA. The Department of Labor provides all pertinent information related to compliance with labor standards, including prevailing wage rates and instructions for reporting. The TWDB will require applicants to incorporate Davis-Bacon requirements in their bid solicitations, to include the standard Davis-Bacon contract clauses in their construction contracts, and ensure that their contractors comply with applicable Department of Labor requirements.

**2. American Iron, Steel, and Manufactured Goods**

Section 1605 of the ARRA requires that the appropriated funds may be used for the construction, alteration, maintenance, or repair of a public building or public work only if all of the iron, steel, and manufactured goods used in the project is produced in the United States unless (a) a waiver is provided to the recipient by the EPA or (b) compliance would be inconsistent with United States' obligations under international agreements. In order to receive a waiver, the State must send a written request to the EPA Administrator. A decision will be made based on the following criteria:

- a. The requirement is inconsistent with the public interest for purposes of the project for which a waiver has been requested,

**State of Texas**  
American Recovery and Reinvestment Act of 2009  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

- b. Iron, steel, and necessary manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality, or
- c. Inclusion of iron, steel, and manufactured goods produced in the United States will increase the overall cost of the project by more than 25 percent.

If a waiver is granted by the Administrator, the EPA will publish such waiver, with a sufficient explanation, in the Federal Register. The TWDB will not approve a draw on ARRA funds for any project that requests a waiver from the EPA until the EPA waiver has been made.

The TWDB will require applicants to incorporate contract conditions required for Buy American provisions of ARRA and a contractor certification form.

### **3. DBE “Fair Share” Goals**

Disadvantaged Business Enterprise (DBE) requirements will apply to all ARRA funds. It is the EPA’s policy that recipients of EPA financial assistance through grants, cooperative agreements, and loans put forth a good faith effort to identify, solicit, and if possible, award a fair share of contracts/procurements to small, minority, and women-owned businesses. This policy applies to all contracts/procurements for construction, equipment, services, and supplies. In accordance with these guidelines, the TWDB has established and presently administers the Small, Minority, and Women-Owned Business Enterprise (SMWBE) program to promote SMWBE participation for all applicable program projects.

The goals shown below were developed using data from the 1997 United States Economic Census, which determined the availability of small, minority, and women-owned businesses throughout the State. The goals are applied to individual project contracts and procurements, which then determines the maximum potential procurement opportunities (in dollars) that are available to be awarded to Minority Business Enterprises (MBEs) and Women-Owned Business Enterprises (WBEs) in each of the applicable procurement categories. It is important to note that the goals are not achievement standards or quotas, nor is achieving the goals mandatory. However, applicants and prime contractors (including minority and women-owned businesses) are required to adequately demonstrate that a good faith effort was made to achieve the goals using the EPA’s six affirmative steps. The fair share goals are negotiated by individual states, and are then presented to the EPA for approval.

The current EPA-approved fair share goals for the State of Texas are as follows:

<b>Category</b>	<b>MBE Goal</b>	<b>WBE Goal</b>
Construction	34.84%	6.72%
Equipment	7.22%	4.14%
Services	16.05%	21.31%
Supplies	9.67%	5.20%

Guidance for this program may be found on the TWDB website at the following link:  
[www.twdb.state.tx.us/publications/forms\\_manuals/SRF052\\_SMWBEGuidance.pdf](http://www.twdb.state.tx.us/publications/forms_manuals/SRF052_SMWBEGuidance.pdf).

## **VII. ADMINISTRATIVE COST OF THE DWSRF**

The ARRA authorizes amounts from the DWSRF to be used for program administration, provided that such amounts do not exceed 4 percent of the capitalization grant award. The

**State of Texas**  
**American Recovery and Reinvestment Act of 2009**  
**Drinking Water State Revolving Fund**  
**Intended Use Plan**

TWDB has requested the full 4 percent for program administration expenses, which include reporting activities; payment processing; pre-application activities; application review; engineering review; construction progress inspection; portfolio, audit, and cash and securities management; financial management; and technical assistance. Additionally, the SDWA allows a state to set aside funds equal to 2 percent and 10 percent of the capitalization grant for technical assistance to small systems and program management activities. The TWDB has consulted with the TCEQ on this issue. Texas does not intend to set aside these funds from the ARRA grant award, nor reserve these funds to be taken from a future grant.

**VIII. GRANT PAYMENT SCHEDULE**

The TWDB estimates that \$160,656,000 will be drawn in federal funds in accordance with the following schedule. The TWDB will submit Outlay Reports for projects with supporting documentation equivalent to the total amount of federal grant funds.

**Grant Payment Schedule**

<b>Quarter</b>	<b>TWDB 4% Administration</b>	<b>Loans</b>	<b>Total Texas Grant Payments</b>	<b>Cumulative ARRA Funds Drawn</b>
FY 2009 Q4	\$923,423	\$38,557,440	\$39,480,863	\$39,480,863
FY 2010 Q1	\$923,423	\$30,845,952	\$31,769,375	\$71,250,238
FY 2010 Q2	\$923,423	\$30,845,952	\$31,769,375	\$103,019,613
FY 2010 Q3	\$923,423	\$23,134,464	\$24,057,887	\$127,077,500
FY 2010 Q4	\$767,790	\$15,422,976	\$16,190,766	\$143,268,266
FY 2011 Q1	\$491,190	\$3,855,744	\$4,346,934	\$147,615,200
FY 2011 Q2	\$491,190	\$3,855,744	\$4,346,934	\$151,962,134
FY 2011 Q3	\$491,190	\$3,855,744	\$4,346,934	\$156,309,068
FY 2011 Q4	\$491,188	\$3,855,744	\$4,346,932	\$160,656,000
	<b>\$6,426,240</b>	<b>\$154,229,760</b>	<b>\$160,656,000</b>	

To ensure the timely and expeditious disbursement of Automated Standard Application for Payments (ASAP) funds to the TWDB, the TWDB will submit reports to the EPA as required by the grant agreement.

**IX. REPORTING REQUIREMENTS FOR ARRA FUNDS**

The TWDB and the recipients of ARRA assistance will have special reporting requirements. States will be required to report no less than weekly on the uses of funds provided by the ARRA. The DWSRF Project Tracking System will be used to gather information regarding key project characteristics and milestones. Project data should be entered into the reporting systems as soon as agreements are signed with assistance recipients. A summary of state Benefits Reporting requirements can be found in Attachment 4 of EPA's ARRA Guidance available online at [www.epa.gov/water/eparecovery/docs/2009-03-02\\_Final\\_ARRA\\_SRF\\_Guidance.pdf](http://www.epa.gov/water/eparecovery/docs/2009-03-02_Final_ARRA_SRF_Guidance.pdf)

**X. TRACKING ARRA FUNDS**

The TWDB agrees to track and account for ARRA funds so that they can be clearly identified separately and will be in compliance with the requirements to track data as stated in section 1512 of the ARRA.

**Appendix B. List of Ineligible Projects**

The following projects are ineligible for ARRA funding and eligible for 2010 DWSRF funding:

	Project ID #	Entity	Project Cost	Reason
1	61700	Allen	\$2,485,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
2	61569	Annetta	\$245,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
3	61820	Annetta	\$290,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
4	62157	Anthony	\$5,740,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
5	61582	Arlington	\$13,500,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
6	62053	Arlington	\$10,379,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
7	62026	Austin	\$33,745,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
8	62027	Austin	\$31,700,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
9	62028	Austin	\$1,370,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
10	62029	Austin	\$10,415,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
11	62032	Austin	\$3,700,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
12	62033	Austin	\$1,875,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
13	62036	Austin	\$2,240,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
14	62037	Austin	\$3,640,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
15	62039	Austin	\$8,055,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
16	61854	Bay City	\$5,970,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
17	61511	Beaumont	\$10,225,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
18	62176	Beaumont	\$9,000,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
19	61824	Bell Co WCID # 1	\$78,095,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
20	62162	Benbrook WA	\$6,520,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
21	62174	Boerne	\$20,710,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
22	62158	Bolivar Peninsula SUD	\$29,840,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
23	61622	Breckenridge	\$1,905,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
24	61669	Brenham	\$7,260,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
25	61570	Buena Vista Subdivision WS	\$1,070,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
26	61806	Canton	\$6,000,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
27	61535	Cardon Villa MHP	\$95,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
28	62183	Cedar Park	\$515,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
29	61510	Chambers-Liberty Cos ND	\$18,795,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
30	62190	Chico	\$620,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
31	62054	Chisholm Trail SUD	\$22,100,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
32	62055	Chisholm Trail SUD	\$24,420,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
33	61782	Cleburne	\$11,920,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
34	61603	Corbet WSC	\$285,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
35	61995	Corpus Christi	\$12,620,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
36	61996	Corpus Christi	\$15,940,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
37	61997	Corpus Christi	\$14,010,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.
38	61737	Corsicana	\$37,350,000	The start date indicated for this project is after February 17, 2010 and is therefore not ready to proceed; project will be placed on 2010 IUP.

**Appendix B. List of Ineligible Projects**

	<b>Project ID #</b>	<b>Entity</b>	<b>Project Cost</b>	<b>Reason</b>
42	61552	Stephens Regional SUD	\$5,000,000	This 2009 project is a duplicate of a 2010 project on the ARRA project priority list.
43	61816	Stephens Regional SUD	\$8,000,000	Project was withdrawn by entity.
44	62098	Talty WSC	\$1,220,000	Project form received after January 23, 2009 deadline.
45	61581	Trenton	\$4,285,000	This 2009 project is a duplicate of a 2010 project on the ARRA project priority list.
46	61544	Trinity River Authority	\$16,735,000	This 2009 project is a duplicate of a 2010 project on the ARRA project priority list.
47	62073	Troup	\$1,125,000	Project form received after January 23, 2009 deadline.
48	62336	Webb County	\$10,495,000	Project form received after January 23, 2009 deadline.
49	62335	Wellington	\$736,200	Project form received after January 23, 2009 deadline.
<b>Subtotal</b>			<b>\$441,156,200</b>	
<b>Grand Total</b>			<b>\$2,158,169,200</b>
