

Texas Rehabilitation Commission

2003 Annual Report

The TRC Mission

TRC exists to assist people with disabilities to participate in their communities by achieving employment of choice, living as independently as possible and accessing high quality services.

TRC achieves this mission by:

Involving people with disabilities in decisions that affect their lives and the services provided by TRC;

Valuing the diversity of people and providing an equal opportunity environment which offers challenging and satisfying work;

People Helping Managing programs which are efficient and effective; and Then and Now ...

1929-1 Being an agency that is accountable to the public.

Texas Robabilitation Commissioner's Comments

It is not without mixed feelings that I write the last comments for the last annual report of the Texas Rehabilitation Commission. The agency's umbrella organization, the Health and Human Services Commission, is in the midst of consolidating and reorganizing all of health and human services in the state. I was asked to assist in this effort as Special Assistant

to the Executive Commissioner of HHSC effective November 1, 2003. So I write to you both at the end of my long tenure with TRC and at the end of TRC's own storied history. You may have noticed that the cover of this year's annual report is a collage of earlier annual report covers, going back to 1970. A lot of years, folks. The truth is that every ending is also a new beginning, and so we should focus on what the future holds for those committed to helping people with disabilities.

Since 1969, the Texas Rehabilitation Commission has seen many changes: a move from the Texas Education Agency to its own agency; growth of specialized state funded programs; computers replacing typewriters; e-mail and video conferencing replacing travel. Our staff grew from 700 in 1969 to 2600 in 2003. Most importantly, we served 130,000 VR clients and DDS claimants in 1969 and 401,000 in 2003.

 Figure 1

 Export to the Covertor Tax matrix coverages

The legacy of the Texas Rehabilitation Commission is not wrapped up in one person -- it is in each and

every employee and consumer who has had the opportunity and privilege to be a part of our mission. I ask that you support and embrace the new organization with enthusiasm as we embark together on this journey to better health and human services in Texas. The Texas Rehabilitation Commission programs and staff are very vital to the future success of health and human services. I know each of you will commit to the future of the new Department of Assistive and Rehabilitative Services with the same integrity and enthusiasm you have devoted to the TRC.

In closing, I want to thank you for allowing me to be your Commissioner for 23 years. I am more proud to have been bestowed this honor than of anything that's ever happened to me. I will never leave rehabilitation. I may have a new role, but my commitment to the mission of rehabilitation will be unwavering.

My very best to each and every one of you.

Godspeed,

Vernen m (tuet Max

2003 Annual Report

Vocational Rehabilitation Program

The Vocational Rehabilitation Program (VR), a state-federal partnership since 1929, helps Texans with disabilities overcome vocational limitations and enables them to prepare for, find and keep jobs. Together, a client and counselor determine what kind of job the client wants and can achieve. Work-related services are individualized -- guided by informed

| PRIMARY DISABILITIES SE | RVED |
|------------------------------------|------|
| Musculo-Skeletal Disabilities | 27% |
| Substance Abuse | 14% |

| Other Impairments | 12% |
| STATE FISCAL YEAR | 2003 |

choice -- and may include counseling, training, medical treatment, assistive devices, job placement assistance or other services. To be eligible for this program an individual must:

• Have a physical or mental disability that results in a substantial impediment to employment.

- Be employable after receiving services.
- Require services in order to achieve an employment outcome.

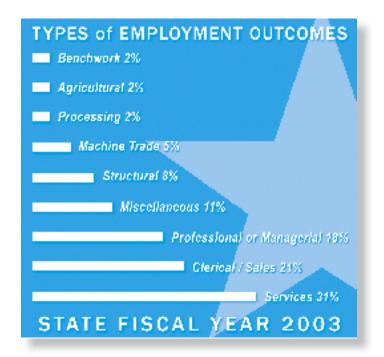

VR Highlights for 2003

• There are five regions with 123 field offices and 519 counselors across the state.

• In State Fiscal Year (SFY) 2003, 150,542 persons with disabilities were served. Of the 127,071 eligible clients, 20,483 were successfully rehabilitated and 77,297 continued to receive services at the end of the year. TRC served 11 percent of the potentially eligible population of Texans with disabilities.

• 90 percent of the eligible clients served had significant disabilities.

• More than 13 percent of all referrals were workers injured on the job. TRC returned 2,180 injured workers to employment.

Vocational Rehabilitation Program continued

• Latest national data available shows that TRC received 5.8 percent of the nation's federal rehabilitation funds, yet we were responsible for placing 11 percent of the nation's rehabilitants into employment outcomes.

Client Satisfaction Findings

Satisfaction with services is an important measure of our success. The best way to find this out is to go to the source: our clients. This year, 12,034 former clients were polled through a telephone survey and results indicated:

- Nearly 92 percent were satisfied or very satisfied with their overall experience with TRC.
- More than 97 percent said they were treated with courtesy and respect.

• Almost 93 percent said they had a part in the planning of services.

• Approximately 89 percent of working clients were satisfied or very satisfied with their employment.

Benefits of VR

• By retirement the average rehabilitated client will repay the cost of services at least 9 times through taxes paid.

- For every dollar spent on VR, clients generate \$18 in personal taxable income through the remainder of their work lives.
- \bullet VR is 78.7 percent federally funded and matched at 21.3 percent by the state.

Average Weekly Earnings

Employed clients' average weekly earnings after TRC services were more than 2.5 times greater than before receiving services.

Comprehensive Rehabilitation Services

The Comprehensive Rehabilitation Services program provides time-limited services for persons with traumatic brain injury and traumatic spinal cord injury. CRS clients may receive inpatient comprehensive medical rehabilitation services, outpatient services and post-acute brain injury services. This program does not provide long-term, ongoing services.

CRS was funded by the 72nd Legislature through a percentage of court costs collected from misdemeanor and felony convictions. TRC counselors provide assistance with assessment and evaluation, case management, development of comparable benefits and assistance with support services consistent with the goal of independence. TRC counselors may also assist clients in becoming eligible for services under another TRC program.

Benefits of CRS

Comprehensive Rehabilitation Services help clients with traumatic brain and spinal cord injuries live more independently in the family and the community. This program provides the crucial link in the recovery of as much function and independence as possible after severe injury while encouraging clients/families to:

- Make informed choices about needs and goals.
- Make plans for the future.

CRS Highlights for 2003

- In State FY 2003, TRC served 470 clients in the CRS program.
- Average cost of services is about \$21,020 per person served.

2003 Annual Report

Extended Rehabilitation Services

The Extended Rehabilitation Services (ERS) program is state-funded. It provides an array of employment support services to individuals with significant disabilities, who require special and intensive services to function in the community and workplace. Although ERS offers the choice of sheltered employment, emphasis is placed on community integrated employment (CIE) opportunities.

Benefits of ERS

• ERS services provide the job supports necessary for individuals with significant disabilities to maintain employment.

• More than 83.19 percent of ERS clients are employed in Community Integrated Employment earning an average of \$5.94 per hour.

• Persons with significant disabilities maintain employment and become tax paying members of the workforce.

ERS Highlights for 2003

• 22 ERS counselor and support staff teams served individuals needing ERS services.

• ERS services are available throughout the state.

• In State FY 2003, TRC served 1,291 people in this program; 1,074 in CIE and 217 in alternative sheltered workshop settings.

Independent Living Services

Independent Living Services (ILS) and Centers for Independent Living (CILs) provide a broad array of services that promote increased independence, self-sufficiency and enhanced quality of life for persons with significant disabilities.

The ILS program may include counseling and guidance, durable medical equipment, communications aids, prostheses, rehabilitation technology and training with an outcome of achieving the greatest degree of independence possible.

Consumers control the decision-making, service delivery and management of communitybased CILs. They promote practices that increase self-help, self-advocacy and actively develop peer relationships and role models. Core services of CILs include information and referral, IL skills training, peer counseling, and individual and systems advocacy. CILs work to ensure equal access for individuals with significant disabilities to services, programs and resources within their community.

Program Benefits

• ILS programs and CILs help people with significant disabilities to continue living independently in the home and community.

- Services are provided statewide to persons with significant disabilities.
- ILS client-service funds offer assistance to people who have no other resources.

• Resource and referral services allow persons with significant disabilities who might otherwise be underserved or unserved to access services.

Highlights for 2003

• Currently there are ten state-supported CILs.

• In State FY 2003, ten ILS counselors and their rehabilitation services technicians provided services to 2,728 eligible clients throughout the state.

• In State FY 2003, 6,791 clients were served through state-funded CILs.

o 2003 Annual Report

Transition Planning Services

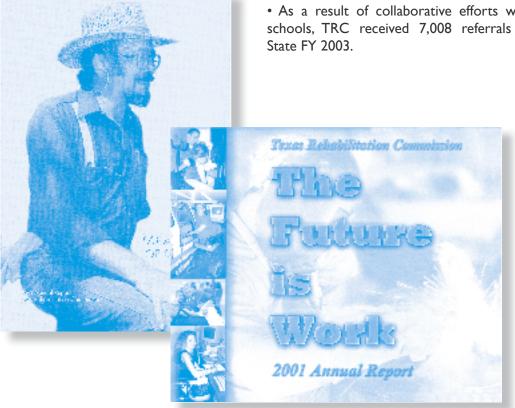

As a part of the VR Program, TRC VR counselors provide consultative and technical assistance to public school personnel in planning the move from school to work for students with disabilities. Each TRC region has a Regional Transition Specialist to assist VR counselors in coordination with schools, independent school districts and Regional Educational Service Centers.

This program provides a framework for TRC, the Texas Department of Mental Health and Mental Retardation, the Texas Education Agency and other agencies to coordinate services to support transition of students with disabilities from schools and/or institutions to the community.

Benefits

• VR counselors assist eligible students to plan for post-graduation employment opportunities.

• VR counselors encourage appropriate referrals from local schools in the last two years the student is in high school.

TPS Highlights for 2003

· As a result of collaborative efforts with schools, TRC received 7,008 referrals in

2003 Annual Report

Disability Determination Services

Disability Determination Services, funded entirely through the Social Security Administration (SSA), prepares disability determinations for Texans who apply for Social Security Disability Insurance and/or Supplemental Security Income. Texans with physical or mental impairments apply for benefits at their local Social Security office and their applications are forwarded to DDS for medical/vocational determination. SSA makes the final decision as to eligibility.

Benefits

• Federal dollars brought to Texas through disability benefits reach about \$402,347,000 per month.

• The TRC DDS maintains offices in Houston, Irving and Austin for face-to-face interviews with people who have been determined to no longer be eligible for disability benefits.

DDS Highlights for 2003

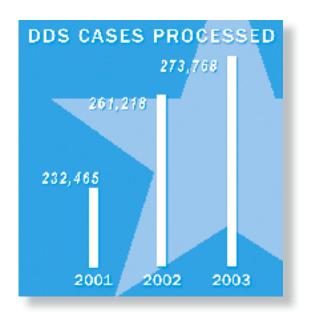

• In Federal FY 2003, DDS processed 273,768 disability cases for Texans.

• For Federal FY 2003, DDS reached 95.0 percent accuracy rate as audited by the SSA.

• SSA has consistently rated the Texas DDS number one among the eight largest DDSs when considering key performance measures.

Note:

The data on the accompanying charts reflects the Federal Fiscal Year term of October 1 through September 30.

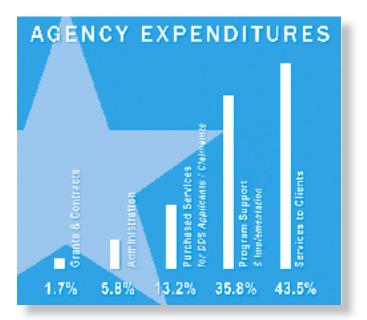

Texas Population Commission

Although most of TRC's staff provide direct services to persons with disabilities, the field is supported by Central Office Administration. Four administrative support areas provide vital services to our front line staff. Financial Services provides the data, information, allocation, payment and accounting to ensure TRC financial accountability and efficiency.

Administrative Services provides behind the scenes support in the following areas: Human Resources, Buyer Support, Civil Rights and Operations Support Services. Automated Services provides planning and support for TRC's information resources, including computer hardware and software, Network Operations, Internet/intranet, Telecommunications and Information Services. The Office of the Commissioner provides the vision and executive leadership for the agency. Offices under the Commissioner include Management Audit, Management and Geographical Information Services, Medical and Legal Services as well as External Relations. TRC also provides administrative support to the Texas Council for Developmental Disabilities.

Late this calendar year, consolidation activities underway within Health and Human Services led to the movement of the Office for Civil Rights and Human Resources Management to the Health and Human Services Commission. These services are now provided by HHSC.
