AVERAGE PERSONS PER HOUSEHOLD = the average number of persons per household, determined by dividing the estimated total number of persons who live in households by the estimated number of households.

HOUSEHOLDS BY PERSONS PER HOUSEHOLD -- LIVE ALONE = percent of the estimated number of households that consist of an individual living alone.

HOUSEHOLDS BY PERSONS PER HOUSEHOLD -- 2 PERSON = percent of the estimated number of households that consist of two persons.

HOUSEHOLDS BY PERSONS PER HOUSEHOLD -- 3-4 PERSON = percent of the estimated number of households that consist of three and four persons.

HOUSEHOLDS BY PERSONS PER HOUSEHOLD -- 5 OR MORE = percent of the estimated number of households that consist of five or more persons.

PERSONS LIVING IN -- HOUSEHOLDS -- FAMILY = percent of the estimated number of persons who live in family households.

PERSONS LIVING IN -- HOUSEHOLDS -- NON-FAMILY = percent of the estimated number of persons who live alone or in households that consist of two or more persons who are not related by birth, marriage, or adoption.

PERSONS LIVING IN -- GROUP QUARTERS = percent of the estimated number of persons living in group quarters. This report is one of a series of summaries prepared by the Texas Legislative Council of data reported by the U.S. Bureau of the Census from the long-form questionnaire for the 2000 census. The questionnaire was sent to one in six households nationwide. Reports compiling census data by individual district are also available (contact Redistricting Support Services at 463-6622).
