

Mapping of All 2008-2009 Biennium Classification Titles to the Recommended 2010-2011 Biennium Master List

The State Auditor's Office's State Classification Team partnered with the Office of the Comptroller of Public Accounts to produce a manual to assist agencies with changes made by the 81st Legislature to the State's Position Classification Plan (Plan). This manual explains the changes and the necessary payroll actions agencies must take during the end-of-year conversion process.

The following legend is provided to assist agencies with interpreting the conversion manual.

Column(s)	Label	Description
A, B, C	Current Classification No., Current Salary Group, Current Classification Title	Reflects job classifications as approved for the 2008-2009 biennium.
D, E, F	New Classification No., New Salary Group, New Classification Title	Reflects job classifications as approved for the 2010-2011 biennium.
G	<u>Type of Change</u> (Refers to the type of change occurring with each job classification. In some situations there may be more than one change affecting a job classification.)	<u>Reallocation</u> Reallocations occur when a job classification needs to be assigned a higher or lower salary group (for example A09 to A10). If the reallocation is to a group with a lower minimum salary, no additional money may be given to the employee.
		<u>Deletion</u> Deletions occur when a job classification is underutilized or not used at all. A job classification level may be obsolete for a variety of reasons, including if it is no longer competitive with similar jobs.
		<u>New Classification</u> New classifications are added to address gaps in the current Plan and provide agencies with positions that more closely distinguish work being performed.
		<u>Title Change</u> Title changes provide a better description of the functions of a job, reflect current industry terminology or to re-number a series in situations where a level was either added or deleted.
		<u>New Class Number</u> Occurs when the classification number has changed to address the addition of a new series or changes to an existing series.
H	<u>Type of Action</u> (Refers to whether or not the change in the payroll system will be automatic or manual.)	<u>Automatic Conversions</u> Agencies that use the Uniform Statewide Payroll/Personnel System (USPS) do not need to manually process classification or title changes in this category. Agencies that report to the Standardized Payroll/Personnel Reporting System (SPRS) should adhere to the reporting instructions in the Fiscal Policies and Procedures (FPP) related to SPRS conversion instructions.
		<u>Manual Conversions</u> Agencies will need to manually code information for deletions and new classifications in this category. Agencies should determine the appropriate classification based on employees' duties and responsibilities and agencies' organizational structures. In some cases, this determination may result in an additional cost to the agency.
I	Higher Minimum Salary	Indicates situations in which the minimum salary rate for a position has increased due to changes in the Plan. In many situations, there is a fiscal impact to implement these changes.
J	Lower Maximum Salary	Indicates situations in which the maximum salary rate for a position has decreased due to changes in the Plan. Agencies should review these positions and ensure that employees are not paid above the maximum of the range. In no circumstances, however, should a current employee see a reduction in salary.
