## NOTE on counties selected for participation:

The map reflects the original sample group of counties invited to participate in the study. However, additional courts may participate in the study if so desired. (For example, the Presiding Judge of the Third Administrative Judicial Region requested that 14 additional courts in his region be invited to participate in the study.)

Certain groups of counties were selected for the study given that the counties are served by the same court(s) across the counties. An example is the 51st District Court serving Tom Green, Coke, Irion, Schleicher and Sterling counties. To have selected only one of those counties would have required that judge to only report on a subset of the total workload of that court.
