Table shows campus teacher turnover from 2002-2003 to 2003-2004 and campus percentages of out of field teachers in 2002-2003 for all campuses in each district. Campuses are sorted by out of field teaching percentages in descending order.

Turnover is the percentage of teachers employed in 2002-2003 on a campus but not employed on the campus in 2003-2004. Out of field teaching percentages are the percentages of teachers on each campus assigned to teach subjects for which they did not hold a standard teaching certificate in 2002-2003.

Total teacher count is the number of teachers on each campus in 2002-2003, as calculated from PEIMS. Only teachers of record were included. Certain types of campuses were excluded from analysis, including charter schools, alternative instructional campuses, JJAEP instructional campuses, and DAEP instructional campuses. These campuses were excluded to limit the analysis to predominately regular instructional campuses. However, some campuses that are not regular instructional campuses may have been included due to classification irregularities, and some campuses may have been inadvertently omitted.
