

# Wells Sampled by the TWDB for Water Quality Analysis in 2002 (777)

## Aquifer (number of wells sampled)

- ▲ West Texas Bolson (1)
- ▲ Cenozoic Pecos Alluvium (62)
- ▲ Capitan Reef Complex (1)
- ▲ Carrizo-Wilcox (392)
- ▲ Edwards BFZ (7)
- ▲ Edwards-Trinity Plateau (11)
- ▲ Gulf Coast (33)
- ▲ Yegua-Jackson (109)
- ▲ Queen City (106)
- ▲ Sparta (55)
- Counties

## Maximum Contaminant Levels (MCLs)

Of the 777 samples collected by the TWDB in 2002, lead was detected in 9.6% of the sample population; beryllium was found to be in excess of its primary MCL in 5.6% of the samples; and antimony, cadmium, fluoride, and selenium were found in excess of their respective primary MCLs in less than 2.5% percent.
