

# Wells Sampled by the TWDB for Water Quality Analysis in 2003 (690)

## Aquifer (number of wells sampled)

- ▲ Other (20)
- ▲ Cenozoic Pecos Alluvium (9)
- ▲ Edwards - BFZ (8)
- ▲ Edwards Trinity Plateau (321)
- ▲ Gulf Coast (5)
- ▲ Ogallala (11)
- ▲ Trinity (316)
- Counties

## Maximum Contaminant Levels (MCLs)

Of the 690 samples collected by the TWDB in 2003, nitrate was detected in 7.3% of the sample population, cadmium in 7%, and lead in 6.1% of the sample population. Thallium and beryllium were found in excess of their respective primary MCLs in less than 0.01% of the total samples collected.
