Could I Get Hurt or Sick on the Job?

Every year **70 teens die** from work injuries in the United States. Another **100,000 get hurt** badly enough that they go to a hospital emergency room.

Here are the stories of three teens:

- 18-year-old Sylvia caught her hand in an electric cabbage shredder at a fast food restaurant. Her hand is permanently disfigured and she'll never have full use of it again.
- 17-year-old Joe lost his life while working as a construction helper. An electric shock killed him when he climbed a metal ladder to hand an electric drill to another worker.
- 16-year-old Donna was assaulted and robbed at gunpoint at a sandwich shop. She was working alone after 11 p.m.

Why do injuries like these occur? Teens are often injured on the job due to unsafe equipment, stressful conditions, and speed-up. Also they may not receive adequate safety training and supervision. Teens are much more likely to be injured when they work on jobs they are not allowed to do by law.
