

COMMUNITY INVESTMENT REPORT

A Summary of Select Texas Investments

by Mutual and Stock Life and Health

Insurance Companies in 2007

**Compiled by
Texas Department of Insurance
December, 2008**

Community Investment Report

Texas Insurance Code §425.107¹, requires the Department of Insurance to report on Texas community investments by life, health and accident companies doing business in the state of Texas. The criteria for investments and data submission were determined after consultation with the Office of Public Insurance Counsel and the industry. The resulting report is made available to the Texas Legislature and the public in even-numbered years. The methodology used to gather and analyze the investment information as well as more detailed data summaries are included in the sections following the Executive Summary.

Executive Summary

Texas life and health insurance companies with Texas premiums of \$10 million or more reported Texas investments of \$43 billion in 2007. Premium for the 280 companies required to provide investment data accounted for approximately 98 percent of the total \$60 billion of Texas life and annuity premiums collected in calendar year 2007. Because some groups elected to include companies with premium below \$10 million, investment totals include reported figures from 304 companies.

Ninety-six percent of reported investments were in political subdivision/public utility bonds, commercial and farm mortgages, real estate and corporate bonds.² The \$17.3 billion of commercial and farm mortgage investments reported by 173 of the companies represented the largest category of investments. Political subdivision/public utility bonds investments was the second largest category of reported investments with 185 companies reporting investments of almost \$12.4 billion. Although companies were not required to report corporate bond investments, 84 companies reported investments totaling almost \$10.3 billion.

The statute does not require insurers to identify investments by geographic location (other than at the state level) or those targeting disadvantaged areas or populations. Due to Legislative interest in investments in disadvantaged areas, however, insurers were given the option of providing that information if available. It should be noted that disadvantaged areas are usually identified at the ZIP code level, while investments are frequently identified at a larger geographic base such as city, county, state or even national level. For that reason, not all investments can be linked to specific ZIP codes. Consequently, investments identified as benefiting

¹ See Attachment 1.

² The Community Investment Report survey had mandatory and optional reporting sections. Real estate, commercial and residential mortgages, and political subdivision/public utility investments were mandatory. As not all insurers elected to report optional categories (investments via federal agencies such as FHA, Texas corporate bonds, Texas stocks, deposits in financial institutions, and other investments/ contributions), the investment totals do not include all Texas investments.

economically disadvantaged areas are not comprehensive. Companies did link \$766 million of the \$43 billion investment total to economically disadvantaged areas.

Commercial and farm mortgages dominated the identified investments in economically disadvantaged regions with the \$674 million investment total accounting for almost 88 percent of all investments identified as being in disadvantaged regions. The second highest category of identified investments in disadvantaged regions was just under \$40.4 million for Texas bond investments.

It should be noted that pooled investments such as commercial and farm mortgage obligations are usually based on shared investment characteristics rather than geographic area. Consequently, funds going to some Texas commercial and farm mortgages may not have been identifiable and are not included in either the Texas investment totals or investment totals for economically disadvantaged areas. The same caveat would apply to residential mortgage pools such as Fannie Mae.

Companies Required to Report

All foreign and domestic life and health insurers with \$10 million or more premium volume were required to report. In 2007, Texas life and health insurers with an annual premium of \$10 million or more accounted for over 98 percent of the total Texas life and health premium volume in Texas. As Texas statutes limit investment flexibility for certain types of insurers that typically have relatively small premium volume, inclusion of smaller insurers would have significantly increased the reporting burden for smaller companies without significantly affecting the comprehensiveness of the reported investments. Consequently, insurers with less than \$10 million were not required to report.

The investment survey was sent to 270 companies on September 10, 2008. A higher response rate (304 companies) resulted as some groups opted to include affiliated companies with less than \$10 million in Texas premium in their reports.

Investments Included

The survey consisted of two sections: a mandatory reporting section and an optional reporting section. Investments more readily linked to geographic locations -- real estate, residential mortgages, commercial and farm mortgages, and political subdivision/public utility bonds -- were in the mandatory section. Companies were also given the option of reporting other Texas-specific investments. The optional section included corporate stocks and bonds, deposits in financial institutions, Texas investments via U. S. agencies and a general category for other types of investments, including donations to Texas charities or non-profit organizations. Texas investments were defined as:

- Property located in Texas (real estate and mortgages)³;
- Bonds for Texas political subdivisions (state and local governments and school districts) and public utility projects in Texas;
- Investments in businesses with a Texas incorporation or principal place of business (stocks and bonds);
- Deposits in Texas financial institutions;
- Other investments and contributions to Texas organizations.

While the statute does not require insurers to identify investments targeting economically disadvantaged areas or populations, there is legislative interest in this topic. Consequently, the survey provided insurers the opportunity to identify investments targeting disadvantaged areas or populations when possible. It should be noted that disadvantaged areas are usually identified at the ZIP code level, while investments are frequently identified at a larger geographic-base such as city,

³ Companies were also given the opportunity to report investment pools such as Commercial Mortgage Obligations and residential mortgage programs such as Fannie Mae. Since investors generally have no information on the individual investments within these pools, it can be assumed that investments reaching Texas via investment pools are under-reported.

county, state or even national level. For that reason, not all investments can be linked to specific ZIP codes. Consequently, investments identified as benefiting economically disadvantaged areas are not comprehensive.

Limitations on Investment Information

An individual insurer's record-keeping system and/or investment types can limit its ability to link an individual investment to economically disadvantaged areas or populations. Therefore, insurers were given space to include ZIP codes on each investment listed, but were not required to do so. While this gave insurers the opportunity to report investments in economically disadvantaged areas, limitations on companies' ability to identify investment areas means the total investments in economically disadvantaged areas should not be considered comprehensive.

Criteria used for identifying an area as economically disadvantaged were:

- Any Texas ZIP code with a 2000 Census median household income of less than 75 percent of the county median income but not more than 75 percent of the state median income ($\$39,927 \times 75\% = \$29,945$), or
- Any ZIP code with a median income of less than 50 percent of the state median income ($\$39,927 \times 50\% = \$19,964$)⁴.

⁴ See Attachment II for a list of the ZIP codes meeting the economically disadvantaged criteria.

Reported Investments

Table 1 shows the total reported investments and reported investments in economically disadvantaged areas for the four mandatory investment categories and five optional investment categories. It should be noted that the comprehensiveness of this data varies by investment type since some investments, such as mortgages, are more readily linked to geographic locations than others.

**Table 1
Texas Investments**

Reporting Categories	Total Texas Investments	Economically Disadvantaged Areas	
		Investments	Percent of Total Investments
Mandatory			
Real Estate	\$1,401,698,473	\$34,679,265	2.47%
Commercial and Farm Mortgages	\$17,344,693,186	\$673,537,867	3.88%
Residential Mortgages	\$695,898,715	\$273,207	0.04%
Texas Bonds	\$12,356,684,003	\$40,388,335	0.33%
Sub-total	\$31,798,974,377	\$748,878,674	2.36%
Optional			
Investments via U.S. Agencies	\$157,638,859	\$0	0.00%
Texas Corporate Bonds	\$10,287,772,633	\$13,845,363	0.13%
Stocks in Texas Companies	\$490,527,963	\$2,615,840	0.53%
Deposits in Texas Financial Institutions	\$19,545,324	\$810,507	4.15%
Other Texas Investments & Contributions	\$304,021,832	\$0	0.00%
Sub-total	\$11,259,506,611	\$17,271,710	0.15%
Total - All Categories	\$43,058,480,988	\$766,150,384	1.78%

Table 2 summarizes investments in economically disadvantaged areas by county, where the investment is based on a ZIP code or county-level investment. The investment reported at the state level in the following table is for projects qualifying for federal income tax credits under the Section 42 low income housing tax credit program, a federal tax incentive intended to increase the available of low-income housing.

Table 2
Investments Identified in Economically Disadvantaged Areas⁵

County	All Investments
Texas	\$4,978,277
Bell	\$6,132,713
Bexar	\$164,408,843
Brazos	\$7,073,185
Dallas	\$95,108,246
El Paso	\$9,692,279
Galveston	\$13,145,695
