

ACKNOWLEDGEMENTS

The Texas Renewable Energy Resource Assessment was first produced by the Sustainable Energy Development Council in 1995. House Bill 1, Article 1, Comptroller Fiscal Programs, Rider 15, 80th Legislature, 2007, directed the State Energy Conservation Office to update the report.

SECO through the Innovative Energy Demonstration Program promotes the use of renewable energy and sustainable building practices through technology demonstration, hands-on instruction and renewable energy education.

Renewable energy can have significant economic development, security and reliability benefits and opportunities for Texas communities and individuals in the development of these resources.

Special thanks is giving to the Comptroller's State Energy Conservation Office and Research staff for their knowledge and expertise.
