

## TABLE OF CONTENTS

### INTRODUCTION 1-1

The Demand for Energy in Texas . . . . .	1-1
Texas at an Energy Crossroads . . . . .	1-2
Fueling Texas . . . . .	1-4
Renewable Energy . . . . .	1-6
Fundamentals of Renewable Energy . . . . .	1-8
Renewable Energy Sources in Texas . . . . .	1-8
Potential for Renewable Energy in Texas . . . . .	1-8
Socolow Wedge Theory . . . . .	1-9
Summary . . . . .	1-10
Objectives of this Study . . . . .	1-10
Overview of this Report . . . . .	1-11
References . . . . .	1-11

### TEXAS CLIMATE 2-1

Introduction . . . . .	2-1
Extremes in the Weather . . . . .	2-1
Average Weather as Indicator of Available Resources . . . . .	2-2
Precipitation . . . . .	2-3
Temperature . . . . .	2-5
Wind Energy . . . . .	2-7
Insolation and Cloud Cover . . . . .	2-10
Summary . . . . .	2-12
References . . . . .	2-12

### SOLAR ENERGY 3-1

Introduction . . . . .	3-1
Significance of Resource: Historical, Present and Future . . . . .	3-1
The Characteristics of Solar Radiation . . . . .	3-2
Directional Nature . . . . .	3-2
Development Issues: Considerations for Large Scale Use . . . . .	3-4
The Texas Solar Resource . . . . .	3-6
Data Sources for Solar Resource Analysis . . . . .	3-6
Solar Resource Characterization . . . . .	3-8
Utilization . . . . .	3-15
Overview . . . . .	3-15
Conversion Technologies . . . . .	3-15

Economics . . . . .	3-21
Costs . . . . .	3-21
Benefits . . . . .	3-23
Incentives and Subsidies . . . . .	3-24
Key Issues . . . . .	3-25
Information Resources . . . . .	3-25
References . . . . .	3-26

### WIND ENERGY 4-1

Introduction . . . . .	4-1
Farm Windmill . . . . .	4-1
Small Systems (up to 100 kW) . . . . .	4-1
Future Uses . . . . .	4-1
Development Issues: Considerations for Large Scale Use . . . . .	4-2
Wind Farms . . . . .	4-2
Institutional Issues . . . . .	4-4
Problems . . . . .	4-5
Small and Distributed Systems . . . . .	4-8
Resource . . . . .	4-9
Wind Characteristics . . . . .	4-10
Measurement and Histograms . . . . .	4-10
Texas Winds . . . . .	4-11
Data Sources . . . . .	4-13
Other . . . . .	4-14
Technology . . . . .	4-15
Large Systems . . . . .	4-15
Small Systems . . . . .	4-16
Innovative Systems . . . . .	4-16
Infrastructure Needs . . . . .	4-16
Economics . . . . .	4-17
Benefits . . . . .	4-17
Subsidies . . . . .	4-18
Key issues . . . . .	4-19
Other issues that will affect the installation of wind systems are: . . . . .	4-19
Information Sources . . . . .	4-19
References . . . . .	4-20

### Table of Contents

Introduction
Texas Climate
Solar Energy
Wind Energy
Biomass Energy
Energy from Water
Geothermal Energy
End Use Energy Efficiency
Executive Summary

<b>BIOMASS ENERGY</b>	<b>5-1</b>
Introduction	5-1
Resources	5-2
Dedicated Energy Crop Production	5-2
Crop Residues	5-6
Texas Woody Biomass Sources	5-9
Animal Wastes	5-11
Municipal Solid Waste (MSW)	5-12
Algae	5-13
Utilization	5-15
Conversion Technologies	5-15
Infrastructure Considerations	5-16
Economics	5-19
Texas Biofuel Production Potential	5-20
Key Issues	5-24
References	5-26
<b>ENERGY FROM WATER</b>	<b>6-1</b>
Introduction	6-1
Significance of Resource: Historical, Present, and Future	6-1
Development Issues: Considerations for Large Scale Use	6-3
Resource	6-6
Quantification of Resource	6-6
Variability	6-10
Utilization	6-12
Overview	6-12
Conversion technology	6-12
Infrastructure considerations	6-14
Economics	6-15
Costs	6-15
Benefits	6-15
Subsidies	6-15
Key Issues	6-16
Information Sources	6-16
Appendix A	6-17
Definition of Small Hydro for Idaho National Laboratory Hydropower Assessment	6-17
References	6-18
<b>GEOHERMAL ENERGY</b>	<b>7-1</b>
Introduction	7-1
Significance of Resource: Historical, Present and Future Uses	7-1
Development Issues for Texas:	
Special Considerations for Large-Scale Use	7-4
Texas Geothermal Resources	7-5
Texas Geothermal Resource Details	7-5
Direct Use Geothermal Resources	7-6

Geothermal Resources for Electrical Production	7-7
Quantification of Resource Base	7-10
Geothermal Resource Variability	7-11
Geothermal Energy Utilization	7-11
Current Geothermal Resource Use in Texas	7-11
Conversion Technology	7-12
Infrastructure Considerations	7-12
Economics	7-13
Costs	7-13
Benefits	7-13
Key Issues	7-14
Information Sources	7-14
Fundamental Data Collection	7-14
Information Sources	7-14
References	7-16

<b>END-USE ENERGY EFFICIENCY</b>	<b>8-1</b>
Executive Summary	8-1
Introduction	8-1
Resource	8-3
Utilization of the Resource	8-7
Texas A&M University – College Station, Texas	8-8
Economics	8-13
Key Issues	8-13
Information Sources	8-14
Exhibit Endnotes	8-14
References	8-14

<b>SUMMARY AND CONCLUSIONS</b>	<b>9-1</b>
Accommodating Intermittency	9-2
Delivering Renewable Energy to Markets	9-2
Valuing Distributed Generation	9-3
Incorporating Energy Storage	9-4
Economics of Renewable Energy Investments	9-4
How Carbon Changes the Picture	9-4
Government Subsidies	9-6
Federal Subsidies	9-6
State and Local Subsidies	9-6
Indirect Subsidies	9-6
Jobs and Economic Development	9-9
Resource Allocation Consequences and Tradeoffs	9-9
Additional Barriers to Development	9-10
Information Sources	9-12
References	9-12

<b>GLOSSARY</b>	<b>1</b>
