

Electricity Facts
TXU Energy Small Non-Residential POLR Plan
 Service Area - Oncor
 January 2009

TOTAL AVERAGE ELECTRICITY PRICE*			
	Average Monthly Use		
	1,500 kWh	2,500 kWh	3,500 kWh
Average Annual price per kWh:	19.9¢	18.6¢	18.0¢

Electricity Price

* These prices represent the **minimum** you will be charged for service given your average monthly usage. This price disclosure is an example based on: (i) average usage patterns – your actual price for electric service may be different depending on how and when you use electricity; and (ii) average service prices – your average price for electric service is variable on a monthly basis depending on the Market-Clearing Price of Energy.

This price disclosure is an example based on an average monthly kWh consumption specified above and includes, where applicable, a demand of 11 kW for 1,500 kWh, 18 kW for 2,500 kWh, and 25 kW for 3,500 kWh and a 19% load factor.

Your rate for POLR service will be derived from the following formula:

POLR rate (in \$ per kWh) = (Non-bypassable charges + POLR customer charge + POLR demand charge + POLR energy charge) / kWh used.

Each month you will also be billed all applicable taxes and any replacement reserve charges.

See Public Utility Commission of Texas Substantive Rule §25.43 (k) (1) (B) for more details about your POLR rate.

Contract

Minimum Term: None Early Cancellation fee: \$0.00
