Dear Fire Professional:

For 22 years, the State Fire Marshal's Office has published annual fire data reports reflecting information provided by the Texas fire service. In 2003, 831 fire departments reported 1,111,470 fire and non-fire incidents to the Texas Fire Incident Reporting System. This reflects an increase of 22 percent in fire department participation and 14 percent in number of incidents reported. I deeply appreciate the commitment of the fire service for providing this information.

During 2003, fire departments reported 81,326 fires, resulting in 181 deaths, 1,331 injuries and \$382,825,032 in property loss. A fire occurred in Texas every six minutes. We saw a nine percent increase in the number of civilian deaths in structure fires with 77 percent occurring in residential structures. Most civilian deaths in residential structure fires involved people aged 65 or over.

I sincerely hope that all the information contained in this 29th Edition of *Fires in Texas* helps our citizens, state leadership, and fire service personnel better understand the fire problem and its long range impact. The heartache and disruption to people's lives cannot be measured or explained by counting incidents. The injuries, loss of life and property damage resulting from all fires remains a source of great concern to us all.

I call upon all our citizens to join me in promoting fire safety and fire prevention. My aim is to bring to bear all collective efforts to reduce fire loss in our state and make it a safer place for everyone.

Don't hesitate to call our office if I can assist you with your fire safety concerns.

Sincerely,

A handwritten signature in cursive script that reads "Paul W. Maldonado".

Paul W. Maldonado
State Fire Marshal

Five-Year Incident Comparison **55**

All Incidents

This report contains summary information from **831** fire departments for incidents during year 2003, January 1 through December 31. These departments protected **17,994,386** people or approximately **81%** of the state's population, according to the latest census estimates. The average population covered by a reporting department was **21,654**.

Fire departments reported a total of **1,111,470 fire and non-fire incidents** during the year, an increase of **132,425 (14%)**. As a result of changes in the new reporting system, total calls will now include some previously unclassified non-fire incidents in the "All Other Calls" category.

Fires

Type of Fire	1999	2000	2001	2002	2003
Structure	20,279	21,134	21,033	20,352	22,100
Vehicle	18,900	18,440	18,118	16,747	16,760
Outside and Other	39,770	43,269	35,463	35,248	42,466
TOTAL FIRES	78,949	82,843	74,614	72,347	81,326

Fire departments reported a total of **81,326 fires** for this period, an increase of **8,979 (12%)**.

There were **42,466 outside or other types of fires**, an increase of **7,218 (20%)**, **16,760 vehicle fires**, a slight increase of **13** (less than 1%), and **22,100 structure fires**, an increase of **1,748 (9%)**.

There were **181 reported fire-related fatalities**: 180 civilians and one fire fighter. There were **1,331 fire-related injuries**: 868 civilian and 463 fire fighters. Fatalities and injuries reported by a department providing mutual aid are not included in this summary data.

Other Calls

Includes incidents involving overpressure ruptures, explosions and overheating with no ensuing fire, rescue and medical service incidents, hazardous condition calls, service calls such as animal problems, assistance to the police, assisting invalids, standby at fire station, and good intent calls such as cancelled en route calls, controlled burning, smoke scare and hazmat investigation with no hazardous condition found.

	1999	2000	2001	2002	2003
Overpressure Ruptures	2,133	2,883	3,113	3,062	3,241
Rescue/EMS Calls	339,910	380,675	432,331	534,866	635,726
Hazardous Condition Calls	40,566	43,839	49,774	52,367	58,502
Service Calls	54,827	60,596	61,280	67,017	70,583
Good Intent Calls	88,024	97,278	97,104	97,074	105,735

There was an increase of **6%** in **Overpressure Ruptures**, an increase of **19%** in **Rescue/EMS Calls**, an increase of **12%** in **Hazardous Condition Calls**, an increase of **5%** in **Service Calls**, and an increase of **9%** in **Good Intent Calls**.

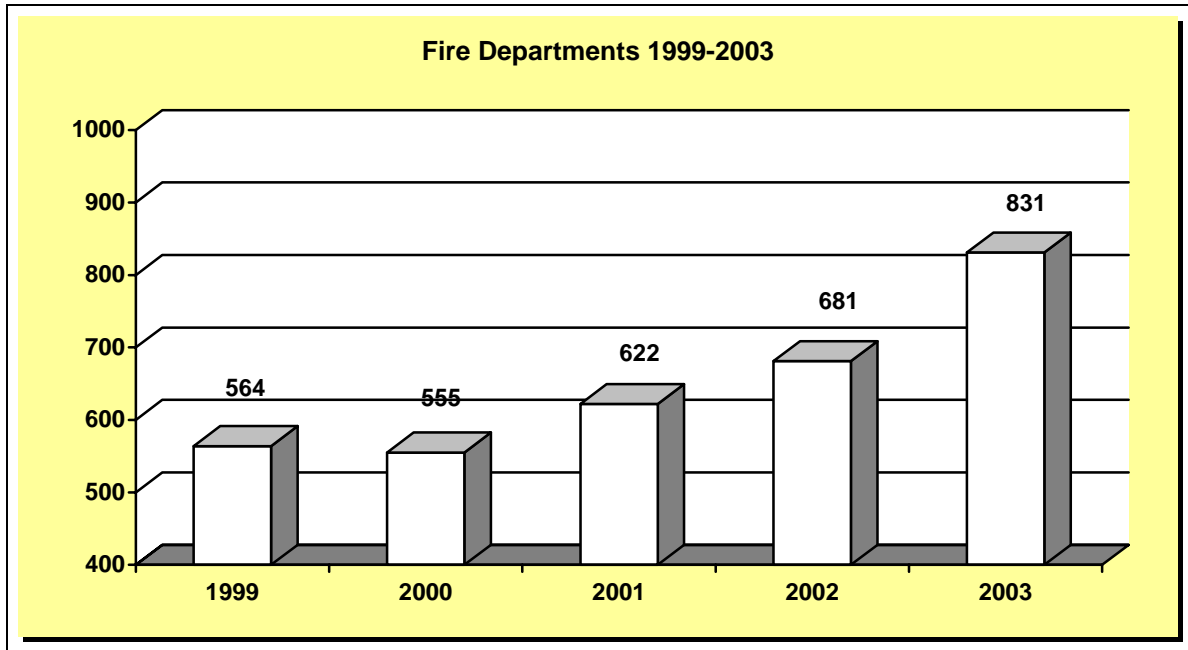

False Calls	1999	2000	2001	2002	2003
Malicious	12,366	12,830	13,235	12,733	13,834
Other False Calls	<u>92,775</u>	<u>102,712</u>	<u>106,621</u>	<u>106,794</u>	<u>106,936</u>
Total False Calls	105,141	115,542	119,856	119,527	120,770

There was a slight increase of **1%** in total **False Calls**.

	1999	2000	2001	2002	2003
Severe Weather and Natural Disaster (new category)		164	436	729	1,025
Mutual Aid Given	19,565	19,113	18,867	23,763	29,570
All Other Calls	9,804	11,950	12,025	8,293	4,992
TOTAL CALLS	738,919	814,883	869,400	979,045	1,111,470

Fire Department Participation

For the third year in a row we have seen an increase in fire department participation in the TEXFIRS program. In 2001 we had an increase of **12%**, in 2002 there was an increase of **9%**, and in 2003 we saw an increase of **22%**. The number of fire departments reporting should be considered when reviewing data comparisons between years.

Fire Dollar Loss

	1999	2000	2001	2002	2003
TOTAL DOLLAR LOSS	\$376,531,754	\$367,632,909	\$396,384,970	\$373,020,577	\$382,825,032

The total dollar loss from these fires was \$382,825,032. Dollar losses represent "best estimates" by fire fighters responding to fire incidents and are used solely for statistical purposes. Some dollar losses for fires were not reported or were reported as "unknown" because lack of time and/or information prohibited the estimation of losses.

Uses of TEXTFIRS

Since 1982, Texas has participated in the collection of fire department incident information through TEXTFIRS, the only statewide uniform system of fire and non-fire incident reporting.

Fire departments use this reporting system to uniformly code incident information. Accurate and complete information about fires and other incidents can provide a fire department with a valuable reference to:

- help allocate limited resources;**
- justify budget needs;**
- review the need for personnel training; and**
- focus the direction of fire education/prevention programs.**

State lawmakers, the press, the general public, insurance companies, and fire service administrators and leaders request TEXTFIRS summary reports to help address fire safety concerns and new legislation issues.

Texas adopted the National Fire Incident Reporting System, NFIRS 5.0, as the TEXTFIRS reporting system, without modification. This year's *FIRES IN TEXAS* is the fourth annual report incorporating this new system, Version 5.0. ***Changes in the data collected and categories utilized should be considered when previous years' data are compared or trends are reviewed.***

TEXTFIRS/NFIRS data is forwarded to the National Fire Data Center (NFDC) at the U.S. Fire Administration each year. The NFDC can then compare and contrast statistics from states and large metropolitan departments to:

- develop national public education campaigns;**
- make recommendations for national codes and standards;**
- guide allocation of federal funds;**
- ascertain consumer product failures;**
- identify the focus for research efforts; and**
- support federal legislation.**

NFIRS data is used as the basis for the USFA's publication *Fire in the United States*, which is the single most comprehensive reference on the nature and scope of the fire problem in the United States.

NFIRS data is also used by the

- Consumer Product Safety Commission (CPSC),
- International Association of Fire Chiefs (IAFC),
- International Association of Fire Fighters (IAFF),
- National Association of State Fire Marshals (NASFM),
- National Fire Protection Association (NFPA),
- National Highway Traffic Safety Administration (NHTSA),
- National Volunteer Fire Council (NVFC).

All Fires

This summary report is a statistical presentation of fire incident information submitted by all participating fire departments and should be considered a tool to better understand the fire problem in our state.

The U.S. continues to have one of the highest fire death rates in the industrialized world. Fire kills more Americans than all natural disasters combined. According to the National Fire Protection Association's report *Fire Loss in the United States During 2003* an estimated 3,925 civilians lost their life to fire, 80% occurring in the home. Nationwide there was a civilian fire death every 134 minutes. A residential structure fire occurred every 79 seconds.

Again this year, Texas saw an increase in the number of fire-related deaths. There were 81,326 fires reported to TEXFIRS during 2003, a fire every 6 minutes. These fires resulted in 181 deaths, 1,331 injuries and \$382,825,032 in property loss. There were 180 civilian fire deaths in Texas in 2003, 70% occurring in the home.

Fire department participation in incident reporting increased 22% during the year, with a 12% increase in the total number of fires reported.

There were 22,100 fires in structures, resulting in 137 deaths, 1,135 injuries and \$300,218,708 in property damage. A structure fire occurred every 24 minutes.

Most structure fires occurred on residential property. Structure fires were responsible for 85% of the injuries and 76% of the deaths in all reported fires.

A residential structure fire occurred every 31 minutes. Most civilian deaths (25%) in residential property involved the elderly (age 65 and over).

There were 9,685 incendiary/suspicious fires, resulting in 23 deaths, 143 injuries and \$72,915,100 in property loss. An incendiary/suspicious fire occurred every 54 minutes.

Texas saw a 4% decrease in the number of incendiary/suspicious fires reported and a 12% decrease in the number of deaths resulting from these fires.

Incendiary/suspicious fires were responsible for 13% of deaths and 11% of injuries in all fire-related incidents.

Most fires occurred during the month of December.

Most fire-related casualties occurred in January.

Most fires occurred during the hours of 4:01 PM and 8:00 PM.

There were 510 fires determined to be caused by fireworks, an increase of 40%.

Overview of Year 2003 Texas Fires

All Fires

In 2003, there were	81,326 fires,	181 deaths,	1,331 injuries, and	\$382,825,032	in property loss.
Each month, there were	6,777 fires,	15 deaths,	111 injuries, and	\$31,902,086	in property loss.
Each week, there were	1,564 fires,	3 deaths,	26 injuries, and	\$7,362,020	in property loss.
Each day, there were	223 fires,	0.5 deaths,	4 injuries, and	\$1,048,836	in property loss.
Each hour, there were	9 fires,	0 deaths,	0 injuries, and	\$43,701	in property loss.
Each minute, there were	0.15 fires,	0.00 deaths,	0.00 injuries, and	\$728	in property loss.

A fire occurred approximately every 6 minutes.

Structure Fires

In 2003, there were	22,100 fires,	137 deaths,	1,135 injuries, and	\$300,218,708	in property loss.
Each month, there were	1,842 fires,	11 deaths,	95 injuries, and	\$25,018,226	in property loss.
Each week, there were	425 fires,	2.6 deaths,	22 injuries, and	\$5,773,437	in property loss.
Each day, there were	61 fires,	0 deaths,	3 injuries, and	\$822,517	in property loss.
Each hour, there were	3 fires,	0 deaths,	0 injuries, and	\$34,272	in property loss.
Each minute, there were	0.04 fires,	0.00 deaths,	0.00 injuries, and	\$571	in property loss.

A fire occurred approximately every 24 minutes.

Residential Fires

In 2003, there were	17,072 fires,	126 deaths,	994 injuries, and	\$213,561,192	in property loss.
Each month, there were	1,423 fires,	11 deaths,	83 injuries, and	\$17,796,766	in property loss.
Each week, there were	328 fires,	2 deaths,	19 injuries, and	\$4,106,946	in property loss.
Each day, there were	47 fires,	0 deaths,	3 injuries, and	\$585,099	in property loss.
Each hour, there were	2 fires,	0 deaths,	0 injuries, and	\$24,379	in property loss.
Each minute, there were	0.03 fires,	0.00 deaths,	0.00 injuries, and	\$406	in property loss.

A fire occurred approximately every 31 minutes.

Incendiary/Suspicious Fires

In 2003, there were	9,685 fires,	23 deaths,	143 injuries, and	\$72,915,100	in property loss.
Each month, there were	807 fires,	2 deaths,	12 injuries, and	\$6,076,258	in property loss.
Each week, there were	186 fires,	0.4 death,	3 injuries, and	\$1,402,213	in property loss.
Each day, there were	27 fires,	0 deaths,	0 injuries, and	\$199,767	in property loss.
Each hour, there were	1 fire,	0 deaths,	0 injuries, and	\$8,324	in property loss.
Each minute, there were	0.02 fires,	0.00 deaths,	0.00 injuries, and	\$139	in property loss.

A fire occurred approximately every 54 minutes.

Total Fires, Casualties and Dollar Loss by Fire Type

The following table shows the type of fires and the associated casualties and dollar loss.

Types of Fires	Total Fires	FS Injuries	FS Deaths	Civilian Injuries	Civilian Deaths	Total Casualties	Dollar Loss
Structure fires	22,100	392	0	743	137	1,272	\$300,218,708
Vehicle fires	16,760	17	0	69	40	126	\$68,750,239
Natural & cultivated vegetation fires	22,088	20	1	14	1	36	\$3,422,237
Outside rubbish fires	15,480	10	0	6	0	16	\$434,498
Fires, other	3,023	16	0	17	1	34	\$5,234,158
Special outside fires	1,875	8	0	19	1	28	\$4,765,192
Totals	81,326	463	1	868	180	1,512	\$382,825,032

Types of Fires by Percentage of Total

Total Fires, Casualties and Dollar Loss by Month

The following table shows all fires by month, with the associated casualties and dollar loss.

Month	Total Fires	FS Injuries	FS Deaths	Civilian Injuries	Civilian Deaths	Total Casualties	Dollar Loss
January	7,708	52	0	90	22	164	\$36,634,631
February	5,343	36	0	87	14	137	\$38,753,515

Time of Alarm for All Types of Fires

Fires Caused by Fireworks

The following table shows the number of reported fires caused by fireworks each month along with the associated casualties and dollar loss.

Month	Total Fires	FS Injuries	FS Deaths	Civilian Injuries	Civilian Deaths	Loss
January	81	0	0	2	0	\$50,110
February	11	0	0	0	0	\$70,000
March	14	0	0	0	0	\$2,500
April	12	0	0	0	0	\$751
May	8	0	0	0	0	\$600
June	37	0	0	0	0	\$34,430
July	174	1	0	0	0	\$184,314
August	28	1	0	1	0	\$82,500
September	3	0	0	0	0	\$0
October	4	0	0	0	0	\$0
November	9	0	0	0	0	\$1,200
December	129	1	0	0	0	\$73,815
Totals	510	3	0	3	0	\$500,220

Fires Caused by Fireworks by Month

Most fires caused by fireworks, **34%**, occurred during the month of **July**.

Fires Caused by Fireworks 1999-2003

There was an increase of **40%** in the number of fireworks-related fires.

Outside and Other Fires

Fire departments reported 42,466 outside and other fires for this period, the most fires in any single fire category. This type of fire includes rubbish, trees, brush and grass fires, as well as any other type of fire not considered as a vehicle or a structure fire.

Three civilian fatalities, one fire service fatality, 56 civilian injuries, 54 fire service injuries and property loss estimated at \$13,856,085 resulted from outside and other fires.

Total Outside and Other Fires 1999-2003

There was an increase of **20%** in the total number of outside and other fires.

Counties with the Greatest Number of Outside and Other Fires

County	Total	County	Total
Dallas	5,357	Potter	702
Harris	3,223	Nueces	656
Tarrant	2,956	Johnson	588
Bexar	2,828	Gregg	571
El Paso	1,364	Montgomery	568
Travis	1,167	McLennan	535
Hidalgo	1,053	Galveston	535
Denton	782	Bell	509
Collin	744	Grayson	482
Cameron	723	Ellis	476

Fire Cause in Outside and Other Fires

The following table shows the number of outside and other fires by identified cause.

Fire Cause	Total Fires	FS Injuries	FS Deaths	Civilian Injuries	Civilian Deaths	Loss
Appliances, air conditioning	112	2	0	2	0	\$122,846
Children playing	284	0	0	1	0	\$16,191
Cooking	122	1	0	0	1	\$390,536
Electrical distribution	323	0	0	0	0	\$494,550
Exposure	716	3	0	2	1	\$242,968
Heating	44	0	0	1	0	\$74,105
Incendiary/suspicious	4,901	7	0	4	0	\$2,044,047
Natural	1,433	2	0	4	0	\$2,632,466
Open flame, ember, torch	2,905	3	0	7	0	\$402,454
Other equipment	171	10	0	4	0	\$1,949,371
Other heat, flame, spark	1,529	4	0	3	0	\$178,139
Smoking	1,032	2	0	6	0	\$113,603
Unknown	28,894	20	1	22	1	\$5,194,809
Totals	42,466	54	1	56	3	\$13,856,085

Most Frequently Identified Causes of Outside and Other Fires

12% of outside and other fires was identified as **incendiary/suspicious** and included more than **15%** of the total dollar loss in all outside and other fires.

Heat Source in Outside and Other Fires

The table below shows the most frequently reported form of heat of ignition in outside and other fires.

Heat Source	Total Fires
Undetermined	30,682
Match	2,262
Heat from other open flame or smoking materials	1,287
Hot ember or ash	1,152
Heat source, other	901
Cigarette	794

Heat source was reported as undetermined in **72%** of all outside and other fires.

Heat Source Identified in Outside Fires

Matches were involved in the largest percentage (**5%**) of outside fires where a heat source was identified.

Vehicle Fires

Fire departments reported 16,760 vehicle fires during this period. These fires caused an estimated \$68,750,239 in property damage, 40 fire-related civilian fatalities, 69 fire-related civilian injuries and 17 fire service injuries. Fire service injuries include all injuries resulting from duty-related activity.

There were more fires in passenger or road transport vehicles than in any other type of vehicle. The following table shows the percentage of fires in different types of vehicles.

Fires by Mobile Property Type

Mobile Property Type	% of Fires
Passenger or road transport vehicles	82.8%
Freight road vehicles	8.3%
Unknown	6.3%
Industrial, agricultural, construction vehicles	1.5%
Water vessels	0.4%
Transport vehicles	0.3%
Mobile property, miscellaneous	0.3%
Aircraft	0.1%

Total Vehicle Fires 1999-2003

Area of Origin in Vehicle Fires

The table below shows the most frequently reported area of origin in vehicle fires.

Area of Origin	Total
Engine area, running gear, wheel area	8,200
Undetermined	4,047
Operator/passenger area of transportation equipment	1,673
Vehicle area, other	661
Cargo/trunk area - all vehicles	521
Exterior, exposed surface	478

Heat Source in Vehicle Fires

The table below shows the most frequently reported heat source in vehicle fires.

Heat Source	Total
Undetermined	7,966
Arcing	1,530

Area of Origin in Mercantile, Business Structure Fires

Fires

The table below shows the number of mercantile, business structure fires by most frequently identified area of origin and the corresponding percentage of all mercantile, business structure fires.

Area of Origin	# of Fires	% of Fires
Undetermined	128	11
Cooking area, kitchen	101	9
Office	71	6
Roof surface: exterior	56	5
Sales area, showroom (exclude display window)	52	5
Wall surface: exterior	51	4
Laundry area, wash house	46	4
Bathroom, checkroom, lavatory, locker room	44	4
All Other	593	52
	1,142	100

Incendiary/Suspicious Fires

During 2003, there were 9,685 fires determined to be incendiary/suspicious. These fires accounted for 12% of all reported fires, 11% of all fire-related injuries, 13% of all fire-related deaths and 19% of all fire-related dollar loss.

An incendiary fire is a fire that was determined to have been deliberately set to destroy property.

A suspicious fire is a fire that was suspected of having been deliberately or maliciously set to destroy property.

An unknown fire is a fire for which the cause was undetermined. In many cases, fires of unknown cause are later determined to have been incendiary or suspicious.

In this report, a fire set by a property owner to destroy or incinerate trash, grass, brush, or other property without value is not classified as incendiary or suspicious unless the fire was set with malicious intent.

Note: Primary fires sometimes spread to other properties, resulting in "exposure fires." Fire loss data for exposure fires are not included in this section of the report. Therefore, total fire losses that might be attributed to specific fire causes may be greater than indicated.

Incendiary/Suspicious Fires

Year	Total Fires	Dollar Loss	Civilian Injuries	FF Injuries	Civilian Deaths	FF Deaths
1999	14,215	\$80,713,381	101	73	25	2
2000	12,958	\$72,055,918	69	100	32	0
2001	11,753	\$86,042,069	79	62	18	0
2002	10,083	\$76,825,633	92	76	26	0
2003	9,685	\$72,915,100	79	64	23	0

Incendiary/Suspicious Fires 1999-2003

Incendiary/Suspicious Structure Fires

The following table shows the number of structure fires identified as incendiary/suspicious by time of alarm, with associated casualties and dollar loss.

Alarm Time Interval	Total Fires	Percentage	Dollar Loss	Percentage	Civilian Injuries	FF Injuries	Civilian Deaths	FF Deaths
12:01 AM - 4:00 AM	501	19.9%	\$15,283,440	30.7%	16	20	6	0
4:01 AM - 8:00 AM	326	12.9%	\$7,518,491	15.1%	5	10	5	0
8:01 AM - 12:00 PM	283	11.2%	\$2,982,618	6.0%	18	6	1	0

4:01 PM - 8:00 PM	496	19.7%	\$5,249,820	10.5%	15	4	5	0
8:01 PM - 12:00 AM	490	19.5%	\$10,943,436	22.0%	12	9	3	0
Totals	2,518	100.0%	\$49,851,388	100.0%	70	55	21	0

Alarm Time Intervals for Incendiary/Suspicious Structure Fires

Most structure fires identified as incendiary/suspicious (**20%**) occurred between the hours of **midnight and 4:00 AM**.

Incendiary/Suspicious Structure Fires 1999-2003

There was a **.4%** decrease in the number of **incendiary/suspicious** structure fires reported for the year.

11% of all structure fires in year 2003 were identified as **incendiary/suspicious**.

Incendiary/Suspicious Residential Structure Fires

Total Fires	Dollar Loss	Civilian Injuries	FF Injuries	Civilian Deaths	FF Deaths
1,696	\$30,177,714	63	43	17	0

10% of all residential structure fires were identified as incendiary/suspicious.

Incendiary/Suspicious Vehicle Fires

Total Fires	Dollar Loss	Civilian Injuries	FF Injuries	Civilian Deaths	FF Deaths
2,266	\$21,019,665	5	2	2	0

14% of all vehicle fires were identified as incendiary/suspicious.

Incendiary/Suspicious Outside and Other Fires

Total Fires	Dollar Loss	Civilian Injuries	FF Injuries	Civilian Deaths	FF Deaths
4,901	\$2,044,047	4	7	0	0

12% of all outside and other fires were identified as incendiary/suspicious.

Heat Source in Incendiary/Suspicious Outside and Other Fires

The table below shows the number of incendiary/suspicious outside and other fires by heat source.

Heat Source	Total Fires
Undetermined	1,709
Match	1,488
Heat from other open flame or smoking material	517
Heat source: other	240
Cigarette lighter	216
Heat spread from another fire, other	88

Heat source was reported as **undetermined** in **35%** of all **incendiary/suspicious outside and other fires**.

Matches continue to be the most frequently identified heat source in **incendiary/suspicious outside and other fires**.

Casualties

During year 2003, fire departments reported 180 civilian deaths, 2 fire service deaths, 868 civilian injuries and 495 fire service injuries in fires. This chapter provides information on the deaths and injuries suffered by civilians and fire service personnel. The fire service also experienced 4 deaths and 311 injuries in non fire-related incidents. All fire service counts in this section include mutual aid given incidents.

Civilian Casualties by Type of Fire

Of all civilian casualties, **880 (84%)** occurred in structure fires, **109 (10%)** occurred in vehicle fires, and **59 (6%)** occurred in outside and other fires. Of the **180** civilian fatalities, **138 (76%)** occurred in structure fires, **40 (22%)** occurred in vehicle fires and **3 (2%)** occurred in outside and other fires.

Civilian Casualties 1999-2003

Civilian Injuries in All Fires

The following table shows the number of fire-related civilian injuries by age and gender.

Gender	4 and under	5-14	15-24	25-34	35-44	45-54	55-64	65 & over	Unknown	Totals
Male	32	29	66	107	95	79	29	36	12	485
Female	13	24	64	66	71	52	33	47	13	383
Totals	45	53	130	173	166	131	62	83	25	868

Most civilian injuries, **173 (20%)**, involved people between the ages of **25-34**.

One hundred seven (12%) of civilian injuries involved males between the ages of **25-34**.

Civilian Deaths in All Fires

The following table shows the number of fire-related civilian deaths by age and gender.

Gender	4 and under	5-14	15-24	25-34	35-44	45-54	55-64	65 & over	Unknown	Totals
Male	9	3	9	18	16	19	13	17	9	113
Female	10	2	5	3	9	5	10	17	6	67
Totals	19	5	14	21	25	24	23	34	15	180

Most civilian fire-related deaths (19%) involved people age **65 and older**.

Nineteen (11%) of all civilian fire-related deaths involved males between the ages of **45 - 54**.

Civilian Injuries in Residential Structure Fires

The following table shows the number of fire-related civilian injuries in residential structure fires by age and gender.

Gender	4 and under	5-14	15-24	25-34	35-44	45-54	55-64	65 & over	Unknown	Totals
Male	29	23	47	70	72	53	17	28	6	345
Female	12	23	55	55	54	47	32	40	11	329
Totals	41	46	102	125	126	100	49	68	17	674

Most civilian injuries in residential structure fires (19%) involved people between the ages of 35-44. **Seventy-two (11%)** of civilian residential structure fire injuries involved females between the ages of 35-44.

Civilian Deaths in Residential Structure Fires

The following table shows the number of fire-related civilian deaths in residential structure fires by age and gender.

Gender	4 and under	5-14	15-24	25-34	35-44	45-54	55-64	65 & over	Unknown	Totals
Male	7	3	5	5	9	15	7	15	3	69
Female	10	1	5	2	7	4	8	16	4	57
Totals	17	4	10	7	16	19	15	31	7	126

Most civilian deaths in residential structure fires (25%) involved people age **65 and over**.

Sixteen (13%) of civilian residential structure fire deaths involved females age **65 and over**.

Fire Service Injuries, Deaths in All Incident Types

The table below shows the number of fire service deaths and injuries in all incidents. Mutual aid calls are included.

Incident Type	Injuries	Deaths
Fire	495	2
Overpressure rupture, explosion, overheat - no fire	0	0
Rescue and emergency medical service incidents	250	4
Hazardous conditions - no fire	29	0
Service call	15	0
Good intent call	10	0
False alarm and false call	3	0
Severe weather and natural disaster	0	0
All other calls	4	0
Totals	806	6

Fire Fighter Injuries 1994-2003

The chart below shows the number of fire-related fire service personnel injuries during the years 1994-2003.

Fire Service Injuries by Type of Fire

The following table shows the number of fire service personnel injuries by type of fire incident.

Type of Fire	Injuries
Structure Fires	417
Vehicle Fires	19
Outside and Other Fires	59

Most Frequent Fire Service Injuries by Property Use in Structures

The following table shows the number of fire service injuries in structures by known type of property.

Property Use	Injuries
Residential	327
Assembly	23
Mercantile, business	21
Storage	17
Manufacturing, processing	8

66% of all fire service injuries in structures occurred in residential property.

Fire Service Fatalities

The State Fire Marshal's Office investigates all line-of-duty deaths involving fire-service personnel in Texas. These investigations are conducted under statutory authority conferred upon the Texas Department of Insurance. For more information see our website at <http://www.tdi.state.tx.us/fire/fmlodinvesti.html>.

In 2003, TEXFIRS participating fire departments reported six fire service personnel fatalities. Only incidents reported with complete data are reflected in this report.

Incident Type	Building Fire	Vehicle Extrication	EMS	Grass Fire	Vehicle Accident	Vehicle Extrication
Property Type	Commercial	Highway	Outdoor Property	Open Land	Highway	Highway
Cause of Fire				Unknown		
Date	19-Jan	19-Jan	12-Feb	8-Mar	18-Mar	19-Nov
Age	32	28	46	62	20	61
Sex	Male	Male	Male	Male	Male	Male
Cause of Death	Smoke/Blast	Blunt Force	Cardiac	Cardiac	Blunt Force	Stress/ Exertion
Nature of Death	Internal Trauma	Internal Trauma	Heart Attack	Heart Attack	Internal Trauma	Heart Attack

The following fire fighter fatalities were not included in this report due to incomplete or unreported information.

Incident Type	Search/Rescue	EMS
Property Type	Outdoor Property	
Cause of Fire		
Date	27-Mar	5-Nov
Age	48	47
Sex	Male	Male
Cause of Death	Blunt Force	Cardiac
Nature of Death	Internal Trauma	Heart Attack

2003 Structure Fires

Texas fire departments reported a total of 22,100 structure fires.

Region 1	3.3%	732	
Region 2	2.6%	582	
Region 3	32.9%	7,260	Dallas Fire Department 1,851 (8.4% of the state total)
Region 4	7.4%	1,625	
Region 5	5.0%	1,100	
Region 6	18.9%	4,178	Houston Fire Department 2,100 (9.5% of the state total)
Region 7	9.4%	2,085	Austin Fire Department 286 (1.3% of the state total)
Region 8	8.0%	1,767	San Antonio Fire Department 1,058 (4.8% of the state total)
Region 9 and 10	5.6%	1,240	El Paso Fire Department 415 (1.9% of the state total)
Region 11	6.9%	1,531	

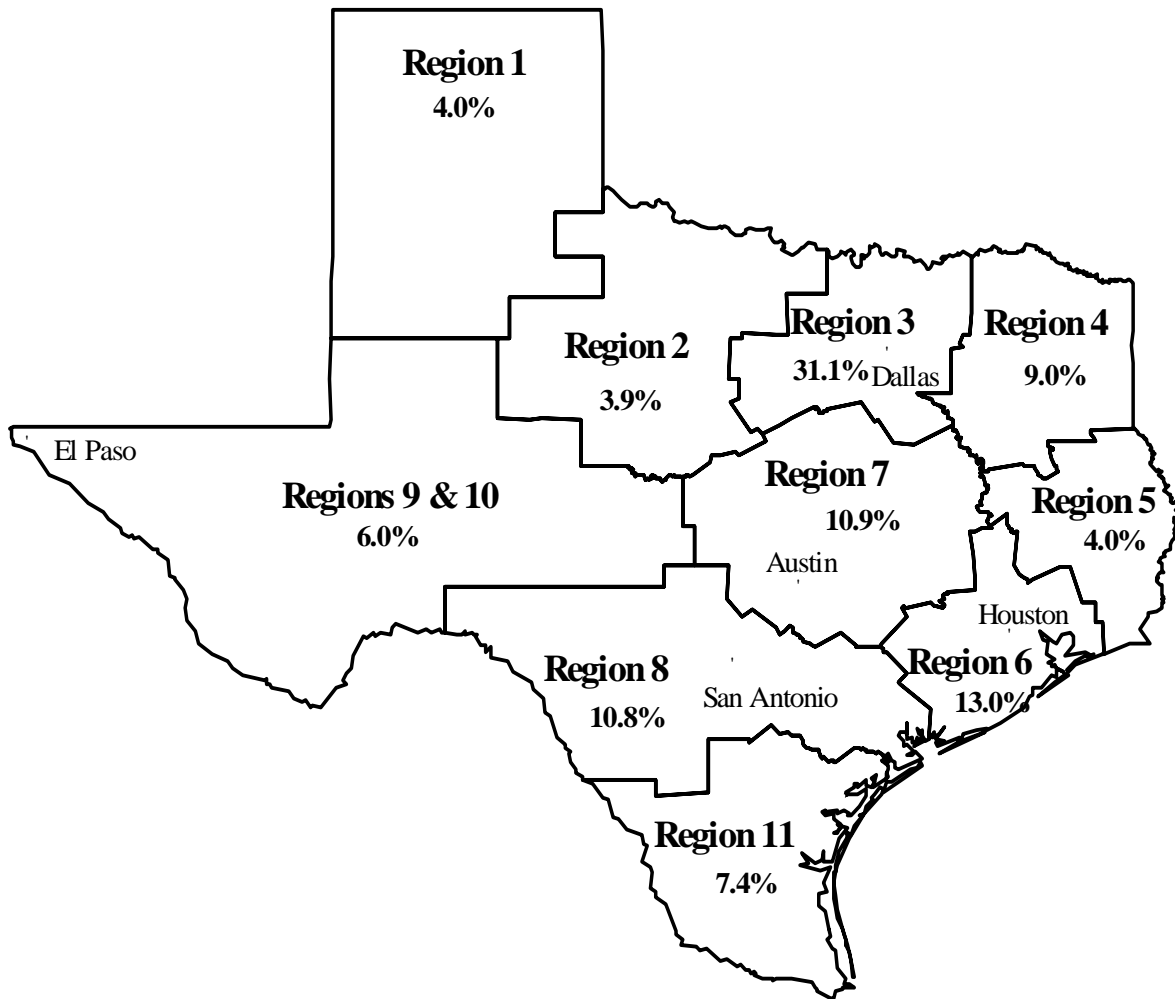

2003 Vehicle Fires

Texas fire departments reported a total of 16,760 vehicle fires.

Region 1	2.4%	405	
Region 2	1.9%	324	
Region 3	31.8%	5,330	Dallas Fire Department 1,836 (11% of the state total)
Region 4	5.8%	976	
Region 5	4.2%	712	
Region 6	20.0%	3,345	Houston Fire Department 1,851 (11% of the state total)
Region 7	8.9%	1,500	Austin Fire Department 295 (1.8% of the state total)
Region 8	10.1%	1,685	San Antonio Fire Department 1,143 (6.8% of the state total)
Region 9 and 10	5.9%	980	El Paso Fire Department 515 (3.1% of the state total)
Region 11	9.0%	1,503	

2003 Outside and Other Fires

Texas fire departments reported a total of 42,466 outside and other fires.

Region 1	4.0%	1,709	
Region 2	3.9%	1,644	
Region 3	31.1%	13,206	Dallas Fire Department 3,377 (8.0% of the state total)
Region 4	9.0%	3,810	
Region 5	4.0%	1,698	
Region 6	13.0%	5,502	Houston Fire Department 2,160 (5.1% of the state total)
Region 7	10.9%	4,633	Austin Fire Department 910 (2.1% of the state total)
Region 8	10.8%	4,570	San Antonio Fire Department 2,589 (6.1% of the state total)
Region 9 and 10	6.0%	2,559	El Paso Fire Department 1,114 (2.6% of the state total)
Region 11	7.4%	3,135	

Participating Fire Departments

The Texas Department of Insurance would like to thank the following fire departments that submitted reports to the Texas Fire Incident Reporting System (TEXFIRS) in 2003. This report would not have been possible without their continued cooperation, efforts, and support.
