

RAILROAD COMMISSION OF TEXAS
Oil and Gas Division

NOTICE TO OIL AND GAS WELL OPERATORS

Testing of Older Inactive Wells (H-15 Program)
As Required by Statewide Rule 14(b)(3)
CHANGES TO TEST SCHEDULE

Any well, inactive one year or more and that is 25 or more years old, must be tested annually to ensure that it does not present a threat of pollution. In previous years, an annual schedule was mailed out in January and all tests were due June 1st of the same year.

Starting in January 2008, the test schedules will be mailed out monthly, and will be based on assigned field. The start of testing will coincide with the annual surveys (G10/W10) scheduled for each field and will allow 90 days to complete testing.

Please call Field Operations in Austin at (512) 463-6830 if you have any questions.
